

Ainesidamos, ep.

210 - 200?

Hiller: '220-180. Häufig'. Derived from occurrence in Pergamon, where examples like ours (with rose, with head of Helios) occur.

Agora context: such as there is, agrees.

SS 1366 from good place in θ with Rh and an early Kn handle.

internal evidence: no b.b. alpha. Nicely made rose stamps 1557 and 2017 suggest still 3d cent, but handles all angular type.
