26. IX. 78

Some discussion today with
S. Petroff on Section R - now NISBF
printing plans listed here.

SAH for masonry in Fountain House Porch,
Layer 5; SS 12941-12946

Rhodian

	<u>fab</u>	<u>dur</u>	<u>spongy</u>	<u>month</u>	<u>SS</u>
Rhodian	Δαυκράτης	rose			12941 ○
					12942
		rose	Καυκράτης	Sp.	12943 ○ with rose st., rose

			KT	
Kreusan	Νικασίβουλος	Λυσάβιος	1068	12944
	Ευβουλος	(Φιδιπίτος)	629	12945
	Μάριος	club	Φιδιπίτος	1734 12946

The excavator ascribed this ^{material} filling to a "late stage in the ^{MSBF} building program," and these stamps would agree ^{1 with} ^(the excavator) what they say, if you date the filling as I do. ^{MSBF}

That is, I continue to put the end date of the MSBF filling proper ~~is~~ in the 2nd decade of the 2nd century. One of the latest Rhodian spongers in the filling is Καυκράτης, of SS 12943, which has also the small secondary stamp (with rose) which comes in at the time; SS 12943 is no doubt from an amphora of Δαυκράτης, so

Unit takes one of your fabricated handles with the
name.

Among the Kankorian, the dating name of the
is again one of the latest in the MSBT, after 188
A.D. or so. The Kankorian is probably not much
earlier.

So I would say the little group is very likely
all of the second decade of the 2nd century.

VS

29.VIII.59

H. A. T.

The non-MSBF handle groups from Section K in 1953 have long looked to me as if they might prove useful to SAH studies if examined as hoards. And so they have.

I should be interested to know whether the estimated dates combine with the finding places to produce some sort of pattern which fits in with your topographical and historical views.

Naturally the handles, especially the smaller groups, can provide only termini post.

V

HAT suggests I read (over now) EV's Section Summary of K in 1953, although he says he has in Princeton the plan that goes with it, without which I find it hard to get definite references.

On the ring bowl in a settling basin (P 23095): it is said to have been "covered to a considerable depth by the general filling" but I have now been able to identify any group of SAH found over, or in, the basin.

I do not find any detailed enough reporting ^(with chronological sequence) to have bearing on the date of the handle groups covered by my recent studies.

SAH FROM SECTION K, 1953, FROM FILLS NOT INCLUDED IN MSBF BY THE EXCAVATOR

In 1953, apart from the groups of SAH listed by EV as from the MSBF (accounted for in VG analyses made 1955-56), a number of other groups were catalogued from Section K, sometimes quite large numbers recorded with a common finding place in the general terraced area south of the Middle Stoa.

Of these groups of handles, all that seemed to have an inner consistency, and a lower limit before about 125 B.C., have been studied as groups, being first sorted into the following chronological periods as indicated by the handles themselves:

- A. Contemporary with MSBF, i.e. to ca. 185 B.C. *Note some are from MZ, which dated probably 1*
- see Deposit II* B. With lower limit in the period of Knidian phourarchoi, 188-167 B.C. *have been included in original MSBF analyses.*
- " "* C. " " " " construction period of the Stoa of Attalos, and the years before the destruction of Corinth, 146 B.C.
- " "* D. With lower limit in the third quarter of the 2nd century; here the date rests largely on name-connections of Knidian eponyms which suggest they are not too remote from the middle of the century, though independent context evidence also helps.

The names of the individual finding-places, as given by EV and copied on the catalogue cards, are repeated in full in the numerical lists of the various date-groups. See attached papers.

Following is a KEY LIST of groups studied; for convenience I have entered also inclusive numbers of fair-sized groups not analyzed, because they included SAH known to date in the late 2nd or 1st centuries B.C. *But groups listed with regular MSBF are not entered here.*

SS 12009-12021	(46/ΔΓ)	A (to ca. 185 B.C.)	
(12431-12440)			includes a Knidian of 1st B.C.)

13760-13766	" "	C	" " " "
13767-13796	(25-26/AA-AE)	A	late, to possibly a little later than MSBF
(13798-13818			includes <u>duoviri</u> Knidian)
13819-13863		D	i.e. to third quarter, but SS 13836 is possibly last quarter
13864-13878	(25-26/AA-AE)	A	(to ca. 185 B.C.)
13934-13937	(9/IE)	A	" " " "
13938-13943			
13944-13946	(N of 23/AA)	D	(to ca. third quarter 2nd)

- 3 -

SS 13952-13958	(22/AB)	chron. group A	(to ca. 185 B.C.)
13959-13963	(22/AA)	A	" " " "
13976-13980	(9/IZ)	A	" " " "

A number of small groups, especially of post-MSBF date, have been omitted from this study even though they seem consistent enough. Also, there were several consistent late groups from K 1953 finds which by definition have been omitted. If anybody is interested in any of these, please say so.

GENERAL COMMENT

Note at the end of the full numerical listing of each chronological group the figures added giving the assortment of handles contained. The percentage of Rhodian and Knidian in the various groups is interesting:

	<u>Rhodian</u>	<u>Knidian</u>
Original MSBF (containing more old stuff)	59 percent	25 percent
Group A (lower limit is that of MSBF, taken to be ca. 185 B.C.)	54	38
Group B (before battle of Pydna, 167 B.C., and end of Rhodian domination)	45	40
Group C (to ca. 146 B.C.)	19	74
Group D (to ca. 125 B.C., more vaguely)	10	86

Analyses which have been made of the groups show that in Athens in the 2nd century B.C., after the first couple of decades, Rhodian handles in a given lot tend to be not only more scarce the later the period, but also less up to date than the Knidian found with them. For instance, in Group C, lower limit ca. 146, nearly all the Rhodian are later than the latest in Group A, but only one can be reliably called later than about 170 (SS 13760, of TIMQ, probably about 150 B.C.). Whereas in the same group, 46 percent of the Knidian seem to be datable in the period 166-146 B.C. Following the interruption of import from Rhodes, which may have pleased Athenian merchants more than Athenian housekeepers, perhaps old Rhodian jars, being handsomer than the Knidian, were cherished to some extent. Or perhaps those that did reach Athens came quite indirectly.

1647
Of. Rostovtzeff, SEHEN, p.1647, addendum to note 10 on ~~px~~ Chapter VI:
" . . . the disappearance of Rhodian containers from Athens testifies to the gradual emancipation of Athens from the commercial hegemony of Rhodes, an emancipation which began earlier than 166 B.C. (see above, p. 629 f.) but was accentuated by the Roman settlement of the affairs of Greece after Pydna."

SS 13959 - 13962 : 22/AA, cutting intermediate strosis; near later wall, possibly disturbed.; p.3270.

SS 13976 - 13980 : 9/IZ, west of Fountain House. Fill beside drain.

7.VIII.59

The group SS 13767-796 might perhaps have been combined with the above, but are being analyzed separately, though listed here in the numerical list. They include a Knidian eponym, ΘΕΑΙΑΗΤΟΣ, who does not occur in MSBF proper, but may be no later than the rest, since he is not known as a phrourarchos, and is named by several MSBF fabricants. They include also a Thasian of ΠΑΙΣΤΡΑΤΟΣ, who is not in MSBF proper, or at Pergamon, and may be at a little later. They do not include much leftover earlier stuff.

		ΚΑΛΛΙΚΡΑΤΗΣ	ΑΓΡ.	13787	
		ΚΑΛΛΙΚΡΑΤΙΔΑΣ	ΔΑΔ.	13795	
	rose	ΚΡΑΤΙΔΑΣ	ΥΑΚ.	13793	0
ΜΑΡΣΥΑΣ			ΠΑΝ.	13785	
ΝΙΚΑΓΙΣ				13784	
ΟΛΥΜΠΙΟΣ	burning torch			13789	
		ΣΥΜΜΑΧΟΣ	ΥΑΚ.	13788	

All these names occur in the MSBF proper. With the exception of ΔΙΟΓΕΝΗΣ and ΚΡΑΤΙΔΑΣ, who may be as early as the third quarter of the 3rd century, these belong to the common names in the MSBF, so very likely the later ones.

See F.S. Kleiner, sup 1975, pp. 311-312, on H-I 14:1, which he quotes as dating "possibly as late as the early 3/4". !! Find no record of our discussing this group.

orig. in KNIDIAN (MSBF)

GROUP OF SAH CONTEMPORARY OR ALMOST CONTEMPORARY WITH MSBF : K N I D I A N
(though not listed by excavator as MSBF)

SS 13787 - 13796, from Section K, 1953, "25-26/AAFAE, cutting intermediate strosis to working floor"

<u>fabricant</u>	<u>device</u>	<u>eponym</u>	<u>KT</u>	<u>SS</u>	shape etc.
ΘΕΥΑΡ(		ΔΑ(	741	13767	
ΜΑΡΩ(N)		ΔΑΜΟ(	1095	13774	
(ΘΕΥΔΡΠΙΔΑΣ)	device	ΕΥΚΡΑΤΗΣ ^{III}	1379	13773	
ΜΟΡΜΙΣ	bouk.	ΘΕΑΙΑΗΤΟΣ ^{III} ^{IV}	2034	13768	
ΑΡΙΣΤΟΓΕΝΗΣ		ΝΙΚΑΣΙΒΟΥΛΟΣ ^{II}	229	13772	
ΝΙΚΑΣΙΒΟΥΛΟΣ	anchor	ΠΟΛΙΟΥΧΗΣ ^{III}	1671	13771	
ΕΥΒΟΥΛΟΣ	trident	(ΦΙΑΙΗΤΟΣ)	629	13769	

Note that all these occur in the MSBF save ΘΕΑΙΑΗΤΟΣ, who may be slightly later than the MSBF. Of the cut type of ΕΥΒΟΥΛΟΣ originally dated in the term of ΦΙΑΙΗΤΟΣ, there is one example in the MSBF (SS 869), and no example of the uncut type, so possibly SS 869 is an impurity as assembled in the MSBF (not then recognized as such), and SS 13769 is also, like SS 13768 (ΘΕΑΙΑΗΤΟΣ), slightly later than MSBF proper. Perhaps the ^{about} rest correspond with the latest part of the MSBF.

GROUP OF SAH CONTEMPORARY OR ALMOST CONTEMPORARY WITH MSBF : V A R I O U S
(though not so listed by excavator as MSBF)
SS 13767 - 13796, from Section K, 1953, "25-26/AA-AE, cutting intermediate
strosis to working floor"

	name	device	SS	
Thasian	NIKOAHMOT TI(	bow and arrow	13776	<u>Bon</u> 1244
	HAISTPATOZ	(not preserved)	13775	
Koan	ANAPOT	caduceus	13780	
	ZMIYPOZ	rosette?	13781	
		club, crab	13778, 13779	
pseudo-Rhodian AP		rose	13794	
	AIOZ(	lyre	13777	
Early Knidian	ligature		13770	

Of the Thasian, NIK. TI(appears in the MSBF, while HAISTPATOZ does not, and may be slightly later.

The Koan are of MSBF period, save Zopyros, for whom there is no other context as good as the present; SS 13781 has the rim preserved, and its low elevation above the handle suggests a date not much later than that of the MSBF.

Pseudo-Rhodian appear both in the MSBF and in the Pergamon deposit, though not these particular types. Cf. SS 12974 from MSBF, which has the same device and perhaps the same name as SS 13777 here (where it is abbreviated); in ~~this case~~ ^{both cases} the shape of the handle is not Rhodian, as it is for instance with SS 13794 here.

The Early Knidian is matched in the MSBF.

POST-- M S B F GROUPS OF SAH EXCAVATED 1953 IN SECTION KAPPA

1. Lower limit ca. 188 - 167 B.C. apparently

(None of these groups were listed by the excavator as MSBF.)

Numerical listing, with excavator's description of fill [and some VG comments in brackets]:

SS 13032 - 13037 : 26-28/KE-AA, Fountain House porch to Stepped Retaining Wall, Layer naming APISTEIAAZ,

2, p.2110. [This small lot resembles MSBF except for the Rhodian SS 13032, which belongs to the group which appear in Pergamon and not in the MSBF, and are therefore dated by VG in the 2nd decade of the 2nd century; and the handle of unknown origin SS 13037, about which I know nothing, but it looks relatively late.]

SS 13398 - 13429 : Hellenistic fill south of Middle Stoa and south of Drain C. [Late - post-MSBF - in this group are SS 13413-14, Knidian of the phrourarch period, and there may be others among the less well-known minor groups. Note that handles from the "lowest" part of this fill are listed among those contemporary with MSBF (SS 13430, etc.).] [Some unread also, 22/KZ]

SS 13728 - 13747 : Hellenistic fill beside wall, below "intermediate" strosis. [Post-MSBF in this group are the Knidian SS 13733 and 13739, which are of the phrourarchos period, eponyms ANOMASNIAAZ and APISTEIAHZ.]

SS 13748 - 13753 : 19/KA, Hellenistic fill above bedrock just north of Fountain House. [Post - MSBF in this group are SS 13749, naming the Knidian ΘΕΥΑΤΟΤΩ, a phrourarchos, and SS 13753, naming the Rhodian eponym APISTEIAAZ, on whom see above, first lot. Further, SS 13752 names the eponym ΝΙΚΑΖΑΓΟΡΑΖ, one of the latest of those in MSBF, apparently; and SS 13751 is from a jar of ΑΝΤΙΜΑΧΟΖ, a potter most of whose activity seems to have fallen post - MSBF, though there are a couple of handles of his in the deposit.]

Altogether 64 handles,

21.VIII.59

The post-MSBF eponyms here are ΑΠΟΛΛΩΝΙΑΔΑΣ, ΑΡΙΣΤΕΙΔΗΣ, ΘΕΥΔΟΤΟΣ, ΚΑΗΝΟΠΟΛΙΣ, and I do not feel too sure of the earliness of this ΦΙΛΙΠΠΙΟΣ, since there is only a single example in the MSBF (SS 869, from Section ③), whereas a number have been found in post-MSBF SAH groups from Section K (1953), and a phourarchos ΦΙΛΙΠΠΙΟΣ did exist. The four other listed post-MSBF eponyms are all phourarchoi.

An additional type of this period, 188-166 B.C., is in the Knidian fabricant list, that of the ΠΑΙΔΙΑ ΘΕΥΔΕΡΙΑΔΑ, without eponym in the type.

Note that the dating of these groups of SAH depends largely on the Knidian.

Original = KNIDIAN groups, by 500.

	ΤΕΣΣ		13037	

21.VIII.59

On present information, these items do not further define the date of the handles as a group. The Thasian may both be before 200 B.C. Of the Koan, ΡΟΔΟΚΑΗΣ occurs in the MSBF, while for ΔΙΟΓΕΝΗΣ there is no stamp context but this, as is true for the rest of the above, save the Parian, which is MSBF.

2. Lower limit ca. 166 - 146 B.C. apparently.

proper

SS 12924 - 12939 : 26/KF, martyr in Fountain House Porch Layer 3, p.2101 (MSBF, last stage of building program) ^{10.60} *contains 4p and front - 4p. typew. J. Little MSBF*

SS 13457 & 13467 : Cut on axis of Fountain House below general change (A, south of terracotta channel). [Not sure of dates of ΠΟΛΙΤΑΣ, ΑΠΤΕΜΩΝ, ΘΕΥΑ(]

SS 13468 - 13491 : Cut on axis of Fountain House. Below general change (B, north of terracotta channel and over lead pipe).

SS 13492 - 13500 : 21-22/A, Hellenistic fill between later walls. [Contains no leftover Knidian of MSBF period; may all be post 166 B.C.; and the eponym ΕΥΘΑΓΟΡΑΣ (SS 13495) is ~~not~~ known at Corinth or in 2A construction fall, though close (by name-connections) *1 no. ident. RT, 54 from Corinth VII.68 - 10. Δία γ (SS 13495)*

SS 13501 - 13502 : 22/AB, Hellenistic fill over intermediate strosis; cf SS 13509.

SS 13509 : 22/AB, " " " " " , cleaning
near late wall.

SS 13692 - 13702 : 21/KO, Hellenistic fill above channel 64 and to south. [Contains almost no leftover MSBF, but dates ca. 188 - ca. 140 B.C., including the eponym ΕΥΦΡΑΤΟΡΑΣ, on whom see above.]

SS 13703 - 13715 : 24/KH, cutting strosis to working floor.

SS 13757 - 13759 : 25-26/AA-AE, Foundation of large blocks; in rubble part of foundation at north. [SS 13759 is the late handle.]

SS 13760 - 13766 : 25-26/AA-AE, martyr. Layer under foundation blocks; to intermediate strosis. [Probably 188-186, SS 13764, 13766. [Exact date not known, SS 13765.].

[Ca. mid 2nd, 13760, Rhodine of TIM 2.]

18.VIII.59

From the list, it seemed possible there were pairs from the same jar. The handles having been got out, and the obvious possibilities examined, find none, but take note of the appearance of the handles:

SS 13760, of ΤΙΜΩ, looks very late, corresponding with other evidence to suggest it is ca. mid 2nd. It is rather roughly made, and short-topped. (No rim.)

Post-MSBF eponyms: ΑΡΙΣΤΕΙΔΑΣ, ΑΡΧΙΑΙΔΑΣ, ΞΕΝΟΦΩΝ. These all occur at Pergamon, hence presumably before ca. 180 B.C.

Post-MSBF fabricants: ΑΜΥΝΤΑΞ with wreath, this ΑΡΙΣΤΟΚΛΗΣ, and probably others in addition to ΤΙΜΩ, ca. mid 2nd. + Ισίδωρος

18.VIII.59

Of 61 handles above listed with the names of Knidian eponyms, apparently 16 or 17 are of the MSBF period, 17 or 16 of the period 188 - 167 B.C., and 28⁺ or 46 per cent - seem to be datable ca. 166 - 146 B.C.

9. XI. 59

Note that Εὐφραγόρας is now known from Antioch:

Co 26 (CP 1781) has been ident. as exp. of KT 1673.

	ΕΥΒΙΟΤΣ			13500		

18.VIII.59

The Early Knidian appear also in the Knidian list from this group, at the end of the list by fabricant.

Two Chian (one a lagynos handle) bear in the MSBF bear the same name as SS 13490. They are considered latish in the series of Chian in the MSBF. (See commentary.)

One would expect the Corocyrean(?) to be 4th-3rd cent. B.C.; however, the only context apart from the present is presence of several in Corinth.

The Pontic belongs to Grakov's Group VI, formerly dated 122-70 B.C., but I think he has got back to 150 B.C. now. (I should finish it at 183 B.C.)

The Thasian ΘΙΑΙΣΤΡΑΤΟΣ is not attested as early as the MSBF, but SS 13775 comes from the group SS 13767-13796 which must be nearly contemporary.

The stamp of ΕΚΑΤΑΙΟΣ is matched at Pergamon. Nothing better on ΕΥΒΙΟΤΣ than here

D. 173 III

①

POST--M S B F GROUPS OF SAH EXCAVATED 1953 IN SECTION KAPPA

5. Lower limit apparently third quarter of 2nd.

(None of these groups were listed by the excavator as MSBF.)

Numerical listing, with excavator's description of fill [and some VG comments in brackets]:

- a) SS 13538 - 13540 : Hellenistic fill at 20/AA. [Note that the Rhodian, and possibly also the Thasian, are remarkably close in date to the Knidian, both dating possibly after 150 B.C. The Knidian eponym is the later ΦΙΑΙΝΝΟΣ.]
- b) SS 13637 - 13649 : 24/KH, cutting strosis to working floor and over water channel. [This is mostly mixed first half of 2nd, but SS 13642, naming Knidian eponym ΕΥΦΑΝΩΡ, should be 3rd quarter.] (11.88)
- c) SS 13819 - 13863 : Martyr in Fountain House Porch, Layer 3. [This large group is predominantly of the 188-167 B.C. phourarchoi period, contains also other first half of 2nd cent. material, and SS 13849, which names the eponym (Knidian) ΦΙΑΟΜΒΟΤΙΑΔΑΣ, who should be third quarter.]
- d) SS 13944 - 13946 : Built into rubble wall north of 23/AA; p.3248. [The Knidian eponym ΚΑΑΛΙΑΔΑΜΑΣ is not established as before 150 B.C. (cf. SS 13944), though probably he is not much later.]

This group, or series of groups, includes:

Thasian	1
Rhodian	7 (incl. 1 plus fragment of stamped Rhodian lagynos) 7
Chian	1 (lagynos)
Early Knidian	2
Knidian (reg.)	53
	64

Coin with group date

a) 10.10.54 : 40-42

b) 12.3.54 : 1-3

c) 12.24.54 : 1

d) 12.2.54 : 1

POST-MSBF KAPPA 1953 : GROUPS TO CA. THIRD QUARTER 2ND B.C. : V A R I O U S

	<u>fabricant,</u>	<u>device</u>	<u>eponym</u>	<u>month</u>	SS	
Rhodian		rose	APIETEIAAE	ΘΕΞ.	13861	0
		ivy leaf	APIETONIAAE		13649	
			APXIAAIAAE	ΔΔΔ.	13859	
			IEP.AETYMHAHE	ΔΔΔ.	13539 ^m	(retr.)
	(illegible)		(illegible)	APT.?	13862	
	"				13860	
		caduceus			13863	Rhodian <u>lagynos</u> fr.
Thasian	ΣΑΤΥΡΟΣ	vase, VIII			13538	ex. of <u>Bon</u> 1532
Chian	APIETOAHMOE				13638	Chian <u>lagynos</u> fr.
Early Knidian	monogram  (ligature)				13946	
		unidentified (incuse)			13637	

Of the Rhodians, all eponyms, APIETONIAAE is ca. 3rd quarter of 3d B.C., APIETEIAAE and APXIAAIAAE are toward 180 B.C. (in Pergamon deposit but not in MSBF), while AETYMHAHE is ^{ca.} mid-second B.C. ~~perhaps xxx third quarter xxx~~ (one or two ex. found in Carthage).

The Thasian has no better context than the present. The fabric suggests a date in the 3rd or possibly 2nd cent. B.C.: a rough stamp on the vertical part of a light handle.

For the Chian there is no better context than the present.

Of the Early Knidian, SS 13946 is matched in the MSBF, while another example of the type of SS 13637 was found in AA, well at 97/Γ, the Bone Well (C 5 : 3); the latter deposit is now dated 2nd quarter of 2nd (GRE) or about mid 2nd.

In this lot, of legible Knidian with eponym names, 41 altogether, over 40 percent are leftovers from the period ca. 188-167 B.C., and nearly 25 percent more are of the preceding period (date of the MSBF). The other 35 percent are divided about equally between the 166-146 BC period and the third quarter of the 2nd century.

The latest eponyms are apparently ΑΓΑΘΟ(ΚΑΗΣ?), who may possibly be later than the 3rd quarter, though not as late as the end of the century, ΕΥΕΡΑΝΩΡ, ΚΑΛΑΙΔΑΜΑΣ, ΦΙΛΙΠΠΙΟΣ (? KT 1735), and ΦΙΛΟΜΒΡΟΤΙΔΑΣ; the four latter should be third quarter.

2.VII.55

REMOVAL FROM MSBF OF SS 13005-13031 (K 2616-2642)

In the accompanying analytical list of these handles, "MSBF" appears under "Comment" whenever there are parallels in the deposit. Items dated "Before 150" do not appear in the deposit apart from ~~this list~~ ^{this list}, and are evidently of somewhat later date though still in the first half of the century, possibly still even in the 1st quarter, some of them. The Rhodian eponym APIZTON is one of a very few who do not appear in the MSBF while being present in quantity in the Pergamon deposit; these are all a little later than the MSBF Rhodian, (called ca 180 BC) and apparently indicate that the close of the Pergamon deposit was later than that of the MSBF.

v For the mixed character of this particular lot, note 3 handles of the 1st B.C., and the fact that ^{there are} only 7 stamps with parallels in the MSBF as otherwise listed.

TO BE SUBTRACTED FROM MSBF GROUP: SS 13005-13031
 Location, described by EV 1953 as possibly disturbed,
 "26-28/KE-KA; Fountain House Porch to stepped Retaining Wall;
 (K 2616-2642) Layer I; p.2110."

Position of ^{some} fill in K not included in MSBF

No page
Dated 11.30.54

Q.P. 27161

seems to
although the
SS 13398 is

I think it is
near of that
relation
and west S

Q.P. 2723

SS 13348-13364 (K 2829 etc.) in 25/MB Hall

fill S of M.S.

(13361 supposed to be late 2nd)

This is part to point where I was able to get
entry of the fill from E.V.

But the position looks just like other in
was called MSBF

SS 13503-13508 (K 2989 etc.) 20/AA, Hall fill

13538-13540 3003
(Same sort of place. To early drawing (SS 13503)
(2nd half 2nd)

Are then plans of these steps & S.C.

SS 13819-13863 (K 3219 etc.)

Look at SS 13831
5
6

Then, the Intermediate Stross (ramp to west end of middle str.) is pply contemporary or immediately after (diff. from the ep.) to MSBF.

10.VI.56

10.05

On fills in Kappa not included in MSBF
but datable before about mid 2nd

Have today reviewed the groups listed 22.V.56, looking at SS cards of all the fair-sized lots, checking with MSBF and Combined SABF - Cornith. up. list, and other places, and making notes in lira-cotta pencil on the groups checked; added some notes also on some Pds. & Kus. & Th. persop. cards from these fills, and listed Kus. spongers apparently to be put in 1st $\frac{1}{2}$ 2nd, but not in MSBF or Combined lists.

Contemporary with MSBF: (many small lots, also)

SS 12941-46 Layer 5 of Marly in Fountain House porch
12962-68 H.W. fill along 3/4 of Poros Fr. Wall (MSBF dist. in
13075-83 Hall. fill over ramp leading up post west end of

stepped retaining wall p. 2124

13716-722 24/K11 cutting, walking floor
13864-878 Cutting, walking floor Marly 25-26/AA-AE

13879-882 " intermediate v. 20.54 " " "
13934-37-43 W side of Fountain House, Layers 1-2
13952-958 cutting intermediate strass 22/AB

13959-63 " " " late near wall, poss. dist.
13976-80 9/12 West of Fountain House. Fill behind drain

Contemporary with SABF etc.? (anyway, post MSBF, but off by 1st $\frac{1}{2}$ 2nd)

SS 12924-939 corresponds (except has up. T. & S. of P. wall) X

> 13819-863 Layer 3 of Marly in Fountain House Porch

13298-429 Hall. fill S of middle str., & S of Drain C

13457-467 Cut across of Fountain House below general change (A, south of T.C. channel)

13468-91 Ditto, but N of T.C. channel and over land fill
(corresponds, except has T. & S. of P. wall) X

13492-13500 21-22/A H.W. fill between later walls
(corresponds, except has E. & P. of P. wall) X

THE 37
see OVER

POST-- M S B F GROUPS OF SAH EXCAVATED 1953 IN SECTION KAPPA

1. Lower limit ca. 188 - 167 B.C. apparently

(None of these groups were listed by the excavator as MSBF.)

Numerical listing, with excavator's description of fill [and some VG comments in brackets]

- a) SS 13032 - 13037 : 26-28/KE-AA, Fountain House porch to Stepped Retaining Wall, Layer 2, p.2110. [This small lot resembles MSBF except for the Rhodian SS 13032, which belongs to the group which appear in Pergamon and not in the MSBF, and are therefore dated by VG in the 2nd decade of the 2nd century; and the handle of unknown origin SS 13037, about which I know nothing, but it looks relatively late.]
- b) SS 13398 - 13429 : Hellenistic fill south of Middle Stoa and south of Drain C. [Late - post-MSBF - in this group are SS 13413-14, Knidian of the phrourarch period, and there may be others among the less well-known minor groups. Note that handles from the "lowest" part of this fill are listed among those contemporary with MSBF (SS 13430, etc.).] [Some unread 22/KZ]
- c) SS 13728 - 13747 : Hellenistic fill beside wall, below "intermediate" strosis. [Post-MSBF in this group are the Knidian SS 13733 and 13739, which are of the phrourarchos period eponyms ΑΠΟΛΛΩΝΙΑΔΕ and ΑΠΙΕΤΕΙΝΗΕ.]
- d) SS 13748 - 13753 : 19/KA, Hellenistic fill above bedrock just north of Fountain House [Post - MSBF in this group are SS 13749, naming the Knidian ΘΕΥΑΟΤΟΞ, a phrourarchos, and SS 13753, naming the Rhodian eponym ΑΠΙΕΤΕΙΔΑΔΕ, on whom see above, first lot. Further, SS 13752 names the eponym ΝΙΚΑΞΑΓΟΡΑΞ, one of the latest of those in MSBF, apparently; and SS 13751 is from a jar of ΑΝΤΙΜΑΧΟΞ, a potter most of whose activity seems to have fallen post - MSBF, though there are a couple of handles of his in the deposit.]

Altogether 64 handles,

21.VIII.59

The post-MSBF eponyms here are ΑΠΟΛΛΩΝΙΑΔΑΣ, ΑΡΙΣΤΕΙΑΔΗΣ, ΘΕΥΔΟΤΟΣ, ΚΑΗΝΟΠΟΛΙΣ, and I do not feel too sure of the earliness of this ΦΙΛΙΠΠΙΟΣ, since there is only a single example in the MSBF (SS 869, from Section Θ), whereas a number have been found in post-MSBF SAH groups from Section K (1953), and a phrourarchos ΦΙΛΙΠΠΙΟΣ did exist. The four other listed post-MSBF eponyms are all phrourarchoi.

An additional type of this period, 188-166 B.C., is in the Knidian fabricant list that of the ΔΑΙΔΙΑ ΘΕΥΔΕΡΙΑΔΑ, without eponym in the type.

Note that the dating of these groups of SAH depends largely on the Knidian.

21.VIII.59

On present information, these items do not further define the date of the handles as a group. The Thasian may both be before 200 B.C. Of the Koan, ΡΟΔΟΚΑΝΗΣ occurs in the MSBF, while for ΔΙΟΓΕΝΗΣ there is no stamp context but this, as is true for the rest of the above, save the Parian, which is MSBF.

POST--M S B F GROUPS OF SAH EXCAVATED 1953 IN SECTION KAPPA

Numerical listing, with excavator's description of fill: [and some VG comments in brackets]

SS 12924 - 12939 : 26/KI, martyr in Fountain House Porch Layer 3, p.2101 (MSBF, last stage of building program)

SS 13457 & 13467 : Cut on axis of Fountain House below general change (A, south of terracotta channel). [Not sure of dates of NOAITAZ, APTEMON, OEYA]

SS 13468 - 13491 : Cut on axis of Fountain House. Below general change (B, north of terracotta channel and over lead pipe).

SS 13492 - 13500 : 21-22/A, Hellenistic fill between later walls. [Contains no leftover Knidian of MSBF period; may all be post 166 B.C.; and the eponym EYΦPAΓOPAZ (SS 13495) is not known at Corinth or in ZA construction fill, though close (by name-connections)]

SS 13501 - 13502 : 22/AB, Hellenistic fill over intermediate strosis; of SS 1350

SS 13509 : 22/AB, " " " " " , cleaning near late wall.

SS 13692 - 13702 : 21/KΘ, Hellenistic fill above channel 64 and to south. [Contains almost no leftover MSBF, but dates ca. 188 - ca. 140 B.C., including the eponym EYΦPAΓOPAZ, on whom see above.]

SS 13703 - 13715 : 24/KH, cutting strosis to working floor.

SS 13757 - 13759 : 25-26/AA-AE, Foundation of large blocks; in rubble part of foundation at north. [SS 13759 is the late handle.]

SS 13760 - 13766 : 25-26/AA-AE, martyr. Layer under foundation blocks; to intermediate strosis. [Probably 188-166, SS 13764, 13766. [Exact date not known, SS 13765.].

[Ca. mid 2nd, 13760, Placidia of TIM 2.]

Coins: [M.C.]

Altogether 97 handles.

18.VIII.59

From the list, it seemed possible there were pairs from the same jar. The handles having been got out, and the obvious possibilities examined, find none, but take note of the appearance of the handles:

SS 13760, of ΤΙΜΩ, looks very late, corresponding with other evidence to suggest it is ca. mid 2nd. It is rather roughly made, and short-topped. (No rim.)

Post-MSBF eponyms: ΑΡΙΣΤΕΙΔΑΖ, ΑΡΧΙΛΑΙΔΑΖ, ΞΕΝΟΦΩΝ. These all occur at Pergamon hence presumably before ca. 180 B.C.

Post-MSBF fabricants: ΑΜΥΝΤΑΕ with wreath, this ΑΡΙΣΤΟΚΑΗΖ, and probably others in addition to ΤΙΜΩ, ^{ca. mid 2nd} + ΤΙΜΩ ^{2.66}

18.VIII.59

Of 61 handles above listed with the names of Knidian eponyms, apparently 16 or 17 are of the MSBF period, 17 or 16 of the period 188 - 167 B.C., and 28⁺ or 46 per cent - seem to be datable ca. 166 - 146 B.C.

9. XI. 59

	ΕΥΒΙΟΤΩ			13500		

18.VIII.59

The Early Knidian appear also in the Knidian list from this group, at the end of the list by fabricant.

Two Chian (one a lagynos handle) ~~knar~~ in the MSBF bear the same name as SS 13490. They are considered latish in the series of Chian in the MSBF. (See commentary.)

One would expect the Corcyrean(?) to be 4th-3rd cent. B.C.; however, the only context apart from the present is presence of several in Corinth.

The Pontic belongs to Grakov's Group VI, formerly dated 122-70 B.C., but I think has got back to 150 B.C. now. (I should finish it at 183 B.C.)

The Thasian ΘΙΑΣΤΡΑΤΟΣ is not attested as early as the MSBF, but SS 13775 comes from the group SS 13767-13796 which must be nearly contemporary.

The stamp of ΕΚΑΤΑΙΟΣ is matched at Pergamon. Nothing better on ΕΥΒΙΟΤΩ than h

POST--M S B F GROUPS OF SAH EXCAVATED 1953 IN SECTION KAPPA

11.15

3. Lower limit apparently third quarter of 2nd.

(None of these groups were listed by the excavator as MSBF.)

Numerical listing, with excavator's description of fill [and some VG comments in brackets]

- a) SS 13538 - 13540 : Hellenistic fill at 20/AA. [Note that the Rhodian, and possibly also the Thasian, are remarkably close in date to the Knidian, both dating possibly after 150 B.C. The Knidian eponym is the later ΦΙΑΙΝΠΟΣ.]
- b) ³ SS 13637 - 13649 : 24/KH, cutting strosis to working floor and over water channel [This is mostly mixed first half of 2nd, but SS 13642, naming Knidian eponym ΕΥΦΑΝΩΡ, should be 3rd quarter.]
- c) SS 13819 - 13863 : Martyr in Fountain House Porch, Layer 3. [This large group is predominantly of the 188-167 B.C. phourarchoi period, contains also other first half of 2nd cent. material, and SS 13849, which names the eponym (Knidian) ΦΙΑΟΜΒΡΟΤΙΑΣ, who should be third quarter.]
- d) SS 13944 - 13946 : Built into rubble wall north of 23/AA; p.3248. [The Knidian eponym ΚΑΛΑΙΑΑΜΑΣ is not established as before 150 B.C. (cf. SS 13944), though probably he is not much later.]

This group, or series of groups, includes:

Thasian	1	
Rhodian	7	(incl. 1
	8, plus fragment of stamped Rhodian lagynos)	7
Chian	1	(lagynos)
Early Knidian	2	
Knidian (reg.)	53

In this lot, of legible Knidian with eponym names, 41 altogether, over 40 percent are leftovers from the period ca. 188-167 B.C., and nearly 25 percent more are of the preceding period (date of the MSBF). The other 35 percent are divided about equally between the 166-146 BC period and the third quarter of the 2nd century.

The latest eponyms are apparently ΑΓΑΘΟ(ΚΑΗΣ?), who may possibly be later than the 3rd quarter, though not as late as the end of the century, ΕΥΦΑΝΩΡ, ΚΑΛΛΙΑΜΑΧ, ΦΙΛΙΠΠΙΟΣ (? KT 1735), and ΦΙΛΟΜΒΡΟΤΙΔΑΣ; the four latter should be third quarter.

Early Knidian	monogram 				13946	
	(ligature)	unidentified (incuse)			13637	

Of the Rhodians, all eponyms, APISTONIAAZ is ca. 3rd quarter of 3d B.C., APISTEIAAZ and APXIAAIAAZ are toward 180 B.C. (in Pergamon deposit but not in MSBF), while AETYMHAHE is ^{ca.} ~~perhaps late third quarter~~ ^{or} mid-second B.C. (one or two ex. found in Carthage).

The Thasian has no better context than the present. The fabric suggests a date in the 3rd or possibly 2nd cent. B.C.: a rough stamp on the vertical part of a light handle.

For the Chian there is no better context than the present.

Of the Early Knidian, SS 13946 is matched in the MSBF, while another example of the type of SS 13637 was found in AA, well at 97/Γ, the Bone Well (G 5 : 3); the latter deposit is now dated 2nd quarter of 2nd (GRE) or about mid 2nd.
