Great Russell Street,
London WC1B 3DG.

10th July 1989.

Dr. V.R. Grace,
Agora Excavations,
American School of Classical Studies,
54 Souedias Street,
106 76 Athens.

(LW acted)

Dear Dr. Grace,

Very many thanks for your letter of 21st June explaining how, on the evidence of the amphora stamps, it is now possible to see that the construction of the Stoa of Attalos may have begun as early as 159 when Attalos became king. Your helpful explanation was exactly what I wanted. I am fortunate indeed to have both that and so good a context for a Achaian League bronze coin.

It was a pleasure to speak to you on the phone in Athens, and also to discover that it was your sister who published the 1929 Arcadia hoard.

With warmest thanks again,

Yours sincerely,

Jennifer Cargill Thompson.

Mrs. Jennifer Cargill Thompson (née Warren)

I join in love & in best wishes for pleasant days on this side of the water. Yours ever Homer

HOMER A. THOMPSON
MEADOW LAKES, APT. 30-06
HIGHTSTOWN, NEW JERSEY 08520

July 8/89

Dear Virginia:

It was a joy as always to hear from you. I'm writing on the day you were to leave Athens. I trust you did get away on that day despite the vagaries of air travel, and that this note finds you with Priscilla, with whom please share my warm greetings.

I'm glad to have the updating on the numismatic & amphora dating of the Stoa of Attalos. Eventually someone will have to make a detailed comparison between the Stoa of Eumenes II & Attalos II in respect of architectural

you may have read in today's N.Y. Times of
 Ben Merritt's death on July 7. I plan to attend
 the funeral in Austin July 11th, 10 A.M.

style, workmanship, material, etc.
 As you ^{are} probably aware, M. Korres
 has recently argued, convincingly
 I think, that the facade of the
 Eumenes building was of
 Pergamene marble & was shipped
 prefab. to Athens. Do you recall
 that the Greek seminar room in
 the Cathedral of Learning in Pittsburgh
 was designed by J. Travlos, made
 of Pentelic marble in Athens & sent
 over ready for installation?

D & I shall make every effort
 to see you in Nyack. We remember
 our previous visits, & are sorry
 to learn of Mary's loss. So let us
 know a convenient date when the
 time comes.

June 21, 1989

Mrs. J. Cargill Thompson
15, Rochester Road
London NW1 9JM
England

Dear Mrs. Cargill Thompson,

Here is a note in writing that I think you wanted about the possibility allowed by the amphora stamps in the filling that construction of the Stoa of Attalos was undertaken early in the King's reign. As I understand it, you are making a study of bronze coins of the Achaean League, one of which was found in the filling of the Stoa of Attalos. As others had been found in Corinth, 146 had been considered the reliable terminus, until something earlier was suggested for the construction of the Stoa.

As Susan Rotroff mentioned to you, the date of the construction of the Stoa of Attalos is taken up incidentally in my article, "The Middle Stoa Dated," in Hesperia 1985. See pp. 14-15, 24 (end of note 63), and 32 (end of text). Of eponyms in Knidian stamps datable later than the phourarchoi (whose time ended in Knidos in 166), only 9 were found on amphora handles from the filling of the Stoa of Attalos. So its construction could have been begun in 157 B.C. Now since publication of my 1985 article, two of the 9 have been redated with probability, and only 7 are left for this period. So perhaps construction was begun in 159, as soon as Attalos became king.

The evidence of the amphora stamps does not require this earlier date, but allows it.

Yours sincerely,

copy to H.A. Thompson

⊗ Not exactly the right word, at least for Δεωσ, which had been based on a wrong reading.
Πολυξενος's date is corrected in the article, but that did not reach the index.

17.7.89

[?] told me that now, instead of SA fill
dating 7 years before end of Corinth,
it is found to be 9 years before - 2 epigraphs moved out of SA fill,

Professor V.R. Grace,
American School of Classical Studies,
54 Souedias Street,
106 76 Athens.

Dear Professor Grace,

I am keenly interested in your view that the latest amphorae stamps in the building fill of the Stoa of Attalos are to be dated c. 157 BC (Retroff, Hesperis 57 (1989), 92-3). One of the bronze coins of the Achaian League, of which I am writing a study, was found in the fill, so your dating provides a vital t.a.q. for this series, which, I believe, was a single episode of coinage. I shall be in Athens 15th - 24th May (for the Symposium on Achaia and Elis in Antiquity, 19th - 21st May), and will be at the British School. I am trying to see some coins outside Athens also, so my plans are still confused, but if possible, please may I try to make contact with you, to see if we might briefly discuss this matter. I am so delighted to have this excellent context, an unusual luxury for those working on bronze coins!

With best wishes,

Listed by AA

The greater part of this group is datable in the 3rd century B.C., many in the first half of the century, including those naming ΑΡΤΕΜΙΔΩΡΟΣ, ΔΙΟΚΛΗΣ, ΕΠΙΓΩΝΟΣ, ΖΗΝΩΝ, ΘΕΥΔΩΡΟΣ (the fabricant), ΚΑΛΛΙΚΡΑΤΙΔΑΣ, ΚΡΕΩΝ, ~~ΜΥΤΙΕΝΥΧΝΕΥΧ~~ ΟΝΑΣΑΝΑΡΟΣ, ΠΟΛΥΚΡΑΤΗΣ, and ΤΙΜΟΚΛΕΙΔΑΣ; some of these are close to 300 B.C.

Apparently none is later than the latest from the deposit at Pergamon, i.e. presumably than about 180 B.C. This is in line with the decrease in Rhodian after the early 2nd century noticed generally at the Agora, and cf. SEHWW, p.1647, n.10.

However, the first eponyms listed, ΑΡΑΤΟΦΑΝΗΣ and ΑΡΙΣΤΕΙΔΑΣ (II), are evidence for the relative dates of the MSBF and the SABF, since they are two of the small group of eponyms (7 or 8) who appear in the Pergamon deposit but not in the MSBF, and who are seen by various indications (e.g. appearance of secondary stamps on handles naming them) to be consistently a little later than the MSBF Rhodian group.

The Rhodian in the SABF are thus more useful in defining the date of MSBF than that of SABF.

SAH FROM STOA OF ATTALOS BUILDING FILL : T H A S I A N

<u>name</u>	<u>device</u>	<u>SS</u>
HOYAYAAHZ	triskeles	1722 (Section I)
HPHEHIOAIZ	device	11640
HYOISN III	palmette	11370
HYOISN IV	device	11639

The foregoing are all probably datable in the late 4th century or thereabout.

In addition, the fill contained 4 early Thasian handles (datable before ca. 340 B.C.):
SS 10785, 11044, 11501, 13377.

Thus the Thasian in this fill are not dated by it, nor do they define its date.

C H I A N

<u>reading</u>	<u>SS</u>	
ERM(	10899	from jar
KPO(retr.	11070	" lagynos
MEN(	13988	" "

lunate instead of
A similar stamp, but with straight-lined epsilon,
on a whole jar in Cyprus (Cy 316 in Paphos Museum),
and on 2 handles in the Pergamon deposit (no.1303).

Stamps with the reading ERM(on Chian handles seem to be datable about 300 B.C.; see comment on the Chian in the MSBF. According to the parallel from Pergamon (see above), MEN(should date before about 180 B.C. Neither MEN(nor KPO(appear in the MSBF, and the latter is not at present fixed as earlier than before the middle of the century (appears in Corinth as well as in SABF).

P O N T I C *Sinopean*

Single handle, SS 10866, attempted restorations of stamp:

- 1) AETYNOMOY/[IPI]OZ/[EIMA]AISN both names of Period III, called 220-180 B.C.
- 2) AETYNOMOY/[HOEI]OZ/[KEPA]AISN " " " " V " 150-122 B.C.

The second remains a possibility so far as date is concerned even if Grakov's sequence is not telescoped so as all to fit in before 183 B.C. (see comment on MSBF Pontic): the Stoa of Attalos may have been built before 150.

C O A N

Single handle, SS 10763, with reading MOA(, and section of rim preserved. One parallel, ABC.

STOA OF ATTALOS BUILDING FILL : Z H GROUP

Single handle, with reading ZH in more or less rectangular stamp with rounded corners. Thick rather arched handle; red clay with bits and holes, remains of thick cream slip(?).

Handles of this kind have already been dated by presence in MSBF.

M I S C E L L A N E O U S

SS 10731 Handle rather like Chian, but broadish; stamp an unidentified letter or monogram.

SS 10732 Broad short-topped handle of micaceous red clay, light slip(?), and red stain above handle; cf. some possibly Parian (e.g. new jar from III). Stamp an alpha with dot inside. 3 other examples include SS 13234, from pre-Stoa fill?

SS 10733 Handle rather like Chian but broadish and has many white bits; as in Chian, distinct grey core, and light wash over dark under surface. Stamp not made out, seems to be the impression of a monogram stamp.

SS 10765 Small fragment of handle which might be Chian, with gem impression of Victory and Trophy, of which another example was found in the "4th century hole" in Section N, deposit dated 3rd quarter of 4th, though not without impurity (SS 11348, Knidian of early 2nd).

SS 10779 Small fragment of broad handle of fine micaceous red clay with buff core and surface. Stamp with large letters, apparently A Y or A Y as exists on file with small variations, sometimes on EK handles.

SS 10940 Handle of russet micaceous clay and light grey core, like Thasian, thicker than most Thasian. Stamp reads]PA retrograde, with a curved letter before the rho. Cf. a rubbing on file from Benachi, @PA or BPA retrograde (rubbing of 1955-56); no note on fabric of handle.

SS 10961 Handle of Thasian type; stamp is a delta or a monogram with delta. Cf. Phyx Miscellaneous from the Filling of Period III of the Assembly place, and date probably before ca. 340 B.C.

SS 11049 Handle which has been called Knidian, but the clay is over-fine-grained and hard. Left end of a ~~XX~~ 2-line stamp: E|
4PA| an iota(?) before the delta

SS 14053 Handle of Thasian or Mendaeian shape, with rim preserved. Stamp an aryballos or ribbed mug in beaded circle. Examples of this and closely resembling dies have been found in various 4th century deposits. (See under aryballos.)

These handles do not help to define the date of the SABF.

P-R 6-12

Construction filling of Stoa of Attalos

(so cited in Howland ms., and can be so used; but there are other fillings falling under the same grid-squares which will need separate numbers, ^rwhich cannot be straightened out without H.A.T.'s help. It would be better to avoid putting this material in final form until all is tidied up, as it might well turn out that we would have, e.g.

P-R 6-12 : 1 and

Post 166 (as 1) III. 60)

• Post 16.6

~~Pre-Stoa groups have not been included in this study, but SAH items in these groups have been checked in the notebook ~~entire~~ entries - small photographs and partial readings - ~~in case of doubt~~ also on the inventory cards with identification readings, or even on the actual handles. ^{on this check} No item was found that appeared to be later than this lot according to my lights, and most ^{was} clearly earlier. Observed ^{Post-453} ~~no~~ midian eponym not already listed in the list made 1.VI.56 ^{or} drawn from finds in Corinth and Carthage plus Stoa of Attalos fill (those included in this list), but some of the pre-Stoa items may fill in a Stoa item (pre-Stoa) example where previously the name had been known from Corinth only.~~

Pre-Stoa groups have in principle not been included in this list and study. SAH items in such groups have been checked in the notebook entries - small photographs and partial readings - sometimes also in case of doubt on the inventory cards with identification readings, and/or the actual handles. In this quick check, I found no item which seemed to me later than the 1st listed here, and most were clearly earlier. I noticed one name, that of ΕΥΚΡΑΤΙΩΝ (with title ΠΡΟΫΠΑΡΧΟΣ), that supplements the list of eponyms drawn I.VI.56 from post-MSBF types found in Corinth and Carthage and the Stoa of Attalos fill.

1

That is, fills related to the Brick Building, the Square Building, etc. Exceptionally, the "pre-Stoa" handles from Section I have been included - see beginning of list.

2

SS 13220, example of KT 1383, from just above floor level of Sq. Bldg., area Piers 10-15.

1722

List from R.E. 11. Mar. 49, with notes as to relative position of handles. SS 5379 (Rhodian of Timakrates) predates the construction of the 'Brick Building' which was built after 229 and went out of use when the Stoa was built. Other definitely pre-Stoa handles: SS 1837 (Knidian of Nikias) and 1863 (Knidian of Theogenes). Contemporary with the construction of the Stoa should be the jar SS 5486 (Knidian of Sotion) which lay on the floor of the 'Brick Building' when it went out of use. R.E. notes that part of the construction fill was stuff brought to fill in holes to level the floor: the Rhodian handles of Zenon and Theodoros are of the earlier 3rd century.

To be compared with Corinth list when ready.

4. VII. 49

Note that there are no contemporary Rhodians (not big - find 11)

Amphora frags. from Stoa of Attalos Constr. Fill

From G.R.F. : these shreds include what was current at the time of the building of the Stoa, also what was dug through by the builders when they sunk their foundations
i.e. 1st half of 2nd century plus third and fourth and earlier fill.

Identifying:

Thasian : pre-Macedonian (?) too (b.d. from 15-16)
(buff clay, slipped; scarcely any mica)
couple plain
broad handles
high rim

Rhodian : too (3rd and 4th) and other frags.

Knidian : couple of too (which fill a cap in our sequence) - sharp, sharp. O.A.
(frag), incl. a possibly ^{vacant} (?) rim-handle bit

Chian : ^(field) type - with a hole down through it. Several handles probably Chian

Corinthian : handles frag
Solo group : rim-frag

Misc. : couple of handles of Corinthian shape, but of fine yellow or pink clay, with fine glaze
Beazley-type too, very plain; Beazley-type rim, white-slipped. One of these being too V Spindle-wheel too

Other odd too

5th cent. couple of dark grey jar handles - one at least looks Chian.

(2.)

9.09

(mon slacks, spread out downstairs)

Neck, with down-hung in. Rough fabric, adding
broad thin handle.

stuffed top  - in this early corner (and day,
eigels slip)

"Meadow" top (5th or 6th ant.)

Other tops:

sl. concave ^{smooth} w. bump in middle

DEPOSITS II B-X : ΣA

33

STOA OF ATTALOS (P-R: 6-12)

FILLING - TO CA. 159 B.C.?
