numerically numbered classes,
i.e. Parm. Gp.)

1.VIII.60

ON TYPED CONCORDANCES OF NATIONAL MUSEUM THASIAN WITH BON

On the first column of numbers on pages 3-6 below, see A.-M. and A. Bon, Les Timbres Amphoriques de Thasos (1957), p.60, where the "M.E." used in this publication is explained as "Musée Epigraphique, A. Bon," since these numbers were given by the Bons to (otherwise unnumbered) handles, at that time stored in the Epigraphical Museum in Athens. The large collection of stamped handles of many classes has since been removed from the Epigraphical Museum, and put into a neighboring storeroom of the National Museum. The letters "EM" have been incorporated by us in the numbers given to all classes of handles in this collection, and are now taken to mean Ethnikon Mouseion. The Thasian are distinguished from the other classes by the letters AB (Bon initials).

Numbers, ~~then,~~ in the EM AB columns in the following concordances are the ones prefixed "M.E." in the publication above cited.

Numbers in the BON columns are catalogue numbers of the same publication. Note that these are the numbers of stamp types, of which there may be many examples: for instance, of Bon 413, 4 examples are listed from the National Museum, EM AB 39, 97, 109, 154.

Asterisks on numbers in the EM AB columns call attention to Explanatory Notes below, see pp. 11-13. These are usually concerned with corrected readings or classifications resulting from further study, which have sometimes produced anomalies to be corrected in the revised edition of Bon. In these notes, I have given the new inventory numbers of most of the reclassified handles (a few have

- 2 -

resisted identification, among a series of duplicate impressions).

Gaps in the BON column opposite EM AB numbers without asterisk, as for instance EM AB 292, mean that the handle is a Thasian with an illegible stamp, not included in the publication.

EM AB 326 - 334 had remained among the unclassified handles at the Museum and were not numbered until January 1960, hence none are listed in Bon. Those identified as belonging to Bon types have Bon numbers in parentheses.

Preparation and checking of these lists has been done at various times from May through July, 1960, and for the checking we have had volunteer assistance from Mrs. W. R. Heath and Clifford Truesdell.

CONCORDANCE OF NATIONAL MUSEUM THASIAN WITH BON

Explanatory notes on concordance

AB 17 is listed correctly under Bon 1318, but also under Bon 53 by mistake for AB 174.

AB 39, listed correctly under Bon 413, appears also under Bon 1862, from which it should be removed.

AB 46; handle not found. Possibly identified ^{cal} ~~ified~~ with AB 151?

AB 54 is listed twice in Bon, under 573 of ΔΕΙΝΟΝΙΑΣ and under 1968 where are listed illegible stamps with the same device. The identification is not certain.

AB 55 is listed twice in Bon, properly under 1102, and (before decipherment) separately as 1813, which latter number should be eliminated in a new edition.

AB 61 is listed twice in Bon, probably correctly under 376, and separately also as only example of 1903, to be eliminated.

AB 85 is listed correctly as an example of Bon 1306, and erroneously under Bon 1933, where it is a number mistake for AB 285.

AB 88 is a Knidian handle, not a Thasian, now numbered KT 961 EM 8.

AB 102 is an example of Bon 514, but in the text the actual number has been omitted.

AB 104 is listed twice in Bon, probably correctly under 1053, and also separately as the only example of 2098.

AB 109 is listed twice in Bon, correctly under 413, and also under 1885.

AB 118 is listed twice in Bon, correctly under ¹⁵¹⁶ ~~118~~, but also under 1452 where it is a mistake for 128.

AB 124 has been listed under Bon 325, and used to illustrate the type. The reading ΑΡΙΣΤΟΚΑΗΣ however derives from identification of AB 124 with Dumont, p. 16, fig. 6, whereas it should rather be identified with Dumont, p. 16, fig. 5, and used to illustrate Bon 1824 instead of Dumont's drawing. We did not find in the National Museum a handle with a stamp corresponding with Dumont's other drawing (p. 16, fig. 6). but think that what he drew may have been an example of Bon 258, which a new example found in Pella now permits us to restore certainly with the name ΑΡΙΣΤΟΚΑΗΣ.

AB 126 is a Knidian handle, now numbered KT 2046 EM 2.

AB 128 is an example of Bon 1452, but by a number mistake appears there as 118.

AB 129 is listed twice, wrongly under Bon 1071, and correctly under Bon 2017, since it is a separate type.

AB 135 is listed twice, probably corrected^{ly} under Bon 521, and also as the only example of 2109, to be eliminated.

AB 145 is a Knidian handle, now numbered KT 355 EM 6.

AB 146 is an example of Bon 1199, but is not listed there (late decipherment).

AB 152: no handle so marked was found (check 10.XI.53 and 4.VI.60).

AB 155 has been renumbered BOZ. EM 3, according to a new attribution of this class as Bosporan made by a Russian scholar.

AB 157 is not Thasian, and has been numbered Mis. E.M. 436 (with the unclassified).

AB 160 is not Thasian but Late Knidian, now numbered LK EM 90.

AB 167 is Samian (?), now numbered ΣAM. EM 2.

AB 168 is Knidian, an example of KT 809. (EM 4).

AB 169 has been renumbered Π. EM 60, as an example of the Parmeniskos group.

AB 170 and 170 bis are Late Knidian, devices respectively palm leaf and amphora. AB 170 is now LK EM 251

AB 171 has been renumbered Mis. EM 438.

AB 172 has been renumbered Mis. EM 439.

AB 174 should be listed under Bon 53, but by a number mistake, AB 17 appears.

AB 175 is Knidian, an example of KT 1726. (EM 14)

AB 180 is listed under Bon 70, but as the only example, and seems not to be Thasian. It has been renumbered Mis. EM 440

AB 184 has been renumbered Mis. EM 441.

AB 185 is listed under Bon 2106, as the only example. It is in fact Knidian, now numbered KT 1050 EM 7. Eliminate Bon 2106.

AB 188 is Late Knidian, now numbered LK EM 683.

AB 189 has been renumbered Mis. EM 442.

AB 190-204 are not Thasian handles, but as follows:

190	LK EM 409	197	KEP. EM 1 (Corcyrean)
191	ZH EM 16	198	Mis. EM 445
192	ZH EM 17	199	Mis. EM 446
193	Mis. EM 443	200	Mis. EM 447
194	KT 1206 ex. EM 6	201	KT 341 ex. EM 17
195	Mis. EM 444	202	LK EM ex. 445
196	EK EM ex. 32	203	LK EM ex. 550
		204	LK EM ex. 450

AB 205 has been renumbered Mis. EM 448.

AB 206-207, though published in Bon as indicated, are also not Thasian, but AB 206 is Knidian, KT 1439 EM 16, while AB 207 is LK EM 529 (Late Knidian).

AB 208: no handle so marked was found.

AB 209 is an unstamped handle with rather Knidian fabric.

AB 210-215 are not Thasian handles, but as follows:

210 KT 813 ~~ex.~~ EM 6

211 Late Knidian (?) handle with incuse ring impression. (LK EM 361)

212 " " " " " " " " " " " "

213 " " " " " " " " " " (LK EM 363).

214 Early Knidian handle, stamp with double-axe

215 " " " stamp like that of Hesp. 1934, p. 291,

AB 218 is listed twice in Bon, correctly under 1412, and as the only example of 2003, to be eliminated.

no. 276
(EK EM 82)

AB 259 is a Samian (?) handle, now numbered ΣAM. EM 3.

AB 262 is a Corcyrean (?) handle, now numbered KEP. EM 5.

AB 285's photograph illustrates Bon 1933, of which it is the only example. But by a number mistake it is listed as 85 instead of 285.

AB 299 is not Thasian but Late Knidian, ~~of the type of~~ LK EM ²⁰³ 201.

AB 300 is apparently not Thasian. Its number is now Mis. EM 449.

AB 305 is listed twice in Bon, under 548, of which it is the only example (photograph appears here) and also as an ~~illustrated~~ example of 1984, where it is said to be illegible. 548 restores it ΔΕΑΑ[ΚΟΣ]. Perhaps it should be restored ΔΕΙ[ΝΟΠΑΣ].

AB 308 is listed twice in Bon, with correct restoration as the only example of 1711, and again as the only example of 1949, which should be eliminated.

RHODIAN STAMPS IN THE COLLECTION OF THE NATIONAL MUSEUM, ATHENS

Numbers given to Rhodian handles in the National Museum are based on the numbers assigned by Nilsson to each eponym and/or fabricant whose name appears in stamps catalogued by him from the finds at Lindos in Rhodes, see Martin P. Nilsson, Timbres Amphoriques de Lindos, Copenhagen, 1909, pp.349, ff. By using these numbers, and storing the handles in their order, we arrived directly at an alphabetical storage order for most of the Rhodian handles at the National Museum. Specific numbers for individual handles have been composed by adding EM numbers (for ΕΘΝΙΚΟΝ ΜΟΥΣΕΙΟΝ) to the N(ilsson) numbers.

There are some names on National Museum Rhodian handles which are not found in Nilsson's catalogue of the Rhodian from Lindos. For the present, these names have not been numbered. In place of numbers, the names themselves have been written in full on the handles, followed by the specific EM numbers. Handles bearing these names are stored in their proper alphabetical position in the drawers. For example, the two handles ANTIAEON EM 1 and ANTIAEON EM 2 come between the seven handles of the fabricant ANTIFONOS, N(ilsson) 53 EM 1-7, and one dated by the eponym ANTIAOXOS, N 54 EM 1.

The handles are stored in the drawers in the order of their numbers. As far as the specific (EM) numbers go, this is not quite the order of the following list. Although prior to numbering the majority of the handles had been laid out according to the system followed by this list (for each name, from simpler to more complicated stamp types, those containing a month name alphabetical by month, etc.), many handles were found at various later times, having been stored on other parts of the museum, and then had to be added under the individual names. Other additions have resulted from recent decipherment of difficult stamps.

It is believed that the majority of the handles in the National Museum were found in or near Athens, but provenance is known definitely in few cases. Where it is known, the handles have been marked with indications of provenance. The Rhodian

from the excavations at the Olympieion by Mr. Mitsos in 1939 - 1940 were numbered in a special sequence for convenience of study. These OA numbers appear in parentheses in the following list. Certain handles are assumed to have come from Alexandria, since they were found in cases deriving from the Rostovitz or Demetriou collections.

In the list, where the minuscule reading is exactly the same, EM example numbers follow one another horizontally, e.g. N 7 EM 2-13, 23, 24, etc. (In Rhodian stamps, the same minuscule reading does not necessarily imply the same die, since there is great die variation.) Where the EM numbers follow one another vertically, e.g. N 7 EM 14₁₅, there are different minuscule readings, i.e. variations in word order or arrangement in lines, or case endings, abbreviation, etc.

Indications in the upper right corners classify handle and/or stamp, distinguishing 1) place of origin when known - T(hasos), R(hodes) K(nidos), etc.; 2) type of stamped vessel if not an amphora; 3) language if not Greek; 4) shape of stamp if not a plain (unframed) rectangle; retrograde inscription (indicated by an arrow). Inventory numbers and any other documentation go to the left, any descriptive comment to the right, dimensions unless otherwise specified being width by thickness of handle where stamped. Numbers in the middle are negative numbers.

MAKE SURE YOU HAVE THE RIGHT WEIGHT AND FINISH

The heavier WEIGHTS give long wear, but they enable you to make only a few copies at a time. The lighter weights produce more copies at a time, but they do not wear as long as the heavier sheets. To get the longest wear for the money, select the heaviest sheet which will produce the desired number of copies.

The harder FINISHES produce clean, gray copies. The softer finishes produce black copies, but they are not quite so clean as the harder finishes. On typewriters with elite (small) type, use medium, hard or extra hard finishes. On Electric and Noiseless typewriters, use the special finishes designed for those machines.

Carbon for Regular Typewriters

Color	Finish	1-5 Copies Standard Weight No.	1-10 Copies Light Weight No.	6-16 Copies Extra Light Weight No.	1-3 Copies Correspondence Weight No.
Black	Extra Intense	1030	1020	1010	
	Intense	1080	1070	1060	1090
	Hard	1180	1170	1160	1190
	Extra Hard	1280	1270	1260	

Carbon for Electric Typewriters

Color	Finish	1-5 Copies Standard Weight No.	1-10 Copies Light Weight No.	6-16 Copies Extra Light Weight No.	1-3 Copies Correspondence Weight No.
Black	Intense	1330	1320	1310	1340
	Medium	1380	1370	1360	1390
	Hard	1230	1220	1210	

Carbon for Noiseless Typewriters

		1-4 Copies Standard Weight	1-6 Copies Light Weight	1-8 Copies Extra Light Weight
Black	Intense	1430	1420	1410
	Medium	1480	1470	1460

Also Available in Colors

Same Sheet Can Be Used With Either Regular or Noiseless Typewriters

Blue	Intense	1630	1620	1610
Purple	Intense	1730		1710
Green	Intense	1830		1810
Red	Intense	1930		1910
Brown	Intense	1980		1960

Order by Catalog Number

The stock numbers above cover Brand, Weight, Color and Finish. No further description is needed except the quantity and sheet size. In ordering popular sizes, replace the fourth digit "0" with one of the numbers shown below, to eliminate necessity of writing down dimensions.

8 1/2 x 11 —1	8 1/2 x 13 —3	8 1/2 x 14 —5
8 1/2 x 11 1/2 —2	8 1/2 x 13 1/2 —4	8 1/2 x 14 1/2 —6

For Complete Typing Satisfaction, use Carter's Nylon Ribbons in your favorite Carter Brand. They give your letters the "Executive Look" and they offer exceptionally long wear. Ask your Carter Dealer to let you try one of these fine Carter Ribbons.
