²⁰⁰ SS 290 (E)
^{Retr.} ^{Eni} Ζηνο[δότος] Ἡφαίστι[ωνος] Κνί[?] ?
 six-petalled rosette (Retr.)

Compare P. ^{II} 144:

Ἡφαίστι[ωνος] Κνί[?] ^{av}
 retrograde round a six pointed star.

²⁰⁰ For the central device (ordinarily ^{also} rather Rhodian) than Knidian (see further D, Pl. XI, no. 14, with a fragmentary inscription ^{appears to be} Ω(ΟΥΚΝΙΑ). The present handle ^{looks} Knidian, (the seal less so). The spacing of the letters implies a gap after ΗΦΑΙΣΤΙΩ[ΝΟΣ] which would ^{easily accommodate} well take at least an abbreviation of ΚΝΙΔΙΟΝ. The two names are properly those of Rhodian fabricants. ^{may possibly} Zenodotos, ^{one possible} case as ^{an or two, including 66 above} eponym. ^{cf. no. 66 above} Apparently no Knidian name begins with Z. Hephaestion is not found on explicitly Knidian seals except the ^{example quoted above} first one referred to here, but Pridik (1896) and D, each includes ^{of which are} under Knidian a pair of rectangular seals, all four ^{probably to be restored}.

^{Eni} ^{Eni} χαρ-
 μου Ἡφαί-
 στίων

^{cf. P. 1896 no. II} 111 - 112; D, p. 287, 100-101 ^{and} P, also calls Knidian a handle with ^a seal (no. 264) reading:

Ἡφαίστι(τ)ίων
 Ἐνι Παν(σ)αν(ι)α
 ουδωω ?

This seal suggests a

^{Period of Rhodian control} One Knidian seal with the name of the eponym Epicharmos has the rose as device. ^{in the} (P. ^{II} 110). Epicharmos may perhaps be dated ^{first} half of 2nd century by two seals in D, and one from the ^{of} Agora (SS 1496) ^{with} the fabricant Ariston, one of whose seals was found beneath the Stoa of Attalos (SS 1861 — see Pl. III, 8, with discussion).

The period of Rhodian hegemony in Knidos is given in Head, H.N. as 197 B.C. ^{the date of the} (defeat of Antiochos) to 160 B.C. when Rhodes lost her mainland possessions.
