

VRG _ Folder _ 0088

Taken from ^{Keram.} Journal and other dated notes.

14.8.62

1.01

For typewritten summary
of 28. X. 65, see
journal KERAM. KERAMEIKOS - SUMMARY OF KSA
fields, in it is
attached & covering
list & Willemsen.

KSA 1 - 818
+ KSA 86 bis
See typed list

Can leave no
context records
by numbers.

Originally KV 1-818, objects which
had no numbers before we worked
them (started summer 1950).

These are fairly well sorted out by class
(though with some anomalies) within
the case - lots that we found, also
within the case-lots the Plardin are
sorted alphabetically, which makes
a convenient when taking notes on
fabrics.

KV 816-818 were numbered 4. VI. 57

KSA 819 - 1180
+ KSA 1147 bis
See typed list

Slight possibility
of ancient context
records by old
numbers.

These had old excavation (or
study?) numbers ^{written on them,} 1-376, but there
were gaps in the series, items we did
not find. The new numbers by J.P.
follow the order of the old numbers,
but skip the items we did not
find.

KSA 1181 - 1347
~~various~~
See duplicates

Handles found by J. P. in boxes,
and collected for demolition of houses,
in 1958. Rubbings by Mr. Benadon.

Content possibilities:

see Tin Numbers
entered in J.P. list
of 19. VII. 58.

(late 1958)
also notes on categories. Duplicates made
at Sten beginning 3. II. 59. Checks
at Kerameikos made by ME on
3. VIII. 59.

* 7. VII. 62

See pages of Today's

data. All these

missing handles could

probably now be found

in excavation boxes,

with other finds.

Found
21. II. 63

by Dr. Diemerfeld.

Have been
recorded but
replaced in
small boxes,
as requested
for present.

Handles which had been collected by
J.P., and were numbered, and
rubbing, taken by AA on 3. VIII. 59.

Thought to be partly for excavations.

This series not found either in AT. 61
or in AT. 62 during our work-periods
at the Kerameikos. 22. IV. 63 All
have now been found, and released for
storage with other SATs.

No duplicates have been made of
this series. We have record from

ELW (at Kerameikos on 15. VIII. 61) of
KgA 1375-1378 which are Latin;
and these 4 handles were found by us
just now, 30. X. 62, in the case
of Latins. (registered by ELW on
15. VIII. 61).

The completely missing - never rubbed
not seen by us - KgA 1367-1374
may include the early Thasian
handles mentioned in J.P.'s note of
1. V. 61. (From "Schmidt 1, Koch 3".)

Maybe KgA 1348-1374 are still with

excavation material, miscellaneous,
being held for study by the excavator
— Dr. Shady?

(KGA 1379-1406, ^(X) later re-numbered KGA 1673-1700; ^(X)

It now seems likely these numbers may have been given
at the same time ^(X) as KGA 1367-1378, sometime
after II.59 and before VIII.61 when ELW saw
KGA 1375-1378, which appraised us of the fact
that numbers had been given after KGA 1366.

There was no special reason to assume that 1378
was the last of that lot, but I did assume

to I guess. I don't know if any inventory list
was made ^{at the Karamides, by their staff}, which includes this original set of
KGA 1379-1406; anyhow at the Store we
had no rubbings or other records of this set.

Probably we provided the numbers 1379 to
begin the new set KGA 1379 //.

⊗ A confirmation will be supplied if the characteristic big
numbers of the old KGA 1379-1406 are also on KGA 1375-8
(Latinos.)

KGA 1379-1625—

See duplicate

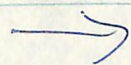

^{actually 19. IX. 61 (on J.P. ^{was})}
^{shortly before 26. IX. 61}
Handles recorded by Mr. Benaschi
with J.P., who wrote the numbers
on the rubbings, also indications
of class, etc., as dictated by Mr. B.

Duplicate made, largely by AD,

⊗ Note that by error AD omitted 1379 at the start, so it is actually
now KGA 1700 (instead of 1673) and all the rest are up one. (See duplicate)

(KGA 1379-1625)

No context: see
opposite →

Found
21. XI. 63

But still
to be kept
apart with
context with
for present.

KGA 1626-1627

Never seen by us

7. XI. 62
AT end of upper list,
second part (old "K"
numbers), in Just. copy,
J. P. adds:

"GA 1626 Du Kiste mit
Kionisches (B. S. Graphen)"

GA 1627 wie GA 1367-73"

[Bei Pompeii I, Scher-
schilling über sull-Lohn"]

beginning 28. IX. 61, and
finished during X. 61.
This must be the lot seen by
ELW on 15. VIII. 61, see journal
of Keram., p. 2: "3 boxes
with perhaps 300 ... found in
recent excavations, acc. to J. P.
(to ELW) ... on Latin, which
will be numbered by J. P. ... no
numbers, and J. P. said they knew
nothing about context."

(I do not identify the Latin; write
to ELW.) (who must have rubbed).

Dupls of 1379-1625 were sep. sent
by Keram. 29. X. 62 (2 pages only) and GAD
30. X. 62. (with notes, page 1 & 2)

No rubbings of these included
in those brought by Mr. B. on
and before 25. IX. 61 (1379 -
1625) but J. P. found a note
(presumably from herself)
on 27. X. 61 (see journal p. 5) that
numbers had been given beyond
1625 (probably 1627), and
she began the next lot with
1628. Maybe the Latin
(see above) was one of these
numbers. Maybe some large
frag. that was omitted?

KGA 1628-1672

See duplicates

3 know of no

context.

But see ↓

See also note of 6.XI.58
by J.P., 7 bundles
without number, for a
box "2 45.10" from
which came GA 1665-
1671 (according to another
undated note),

1661-1664, and 1672,
also may have had ^{some yellow}
some context: on list
of items from boxes.

KGA 1673-1700

Dupl. to be made

KGA 1701-1705-

Dupl. to be made

Handled produced by one of the
German staff. (This happened
to know of); numbered and
rubbed by Mr. Benachis 27.X.
61; see Ker. Journal, p. 5, of
that date; and p. 6.

Duplicates begun by AA 8.XI.61,
finished 10.XI.61, with then supple-
mentary work by METT.

Separates and cut by AΔ
staying late at the Store on
30.X.62 (see journal p. 10)
along with preceding material
1395-on.

Old numbers 1380-1406, 1379; see
above, p. 3. Renumbered, and
rubbing taken, by AΔ on
30.X.62, see journal, back of
p. 10.

A few bundles found 30.X.62 in
bottom of case labelled: "Neue
gest: Amphorenkerkel" said to
be earlier finds than 1706-1768

(KGA 1701-1705)

below. In this case we found
the old number GA 1386, now
GA 1679.

Numbered, and rubbing taken,
by AΔ on 31.X.62

KGA 1706-1768

Dupl. to be made

Finding place & to
interest; but no
useful context,

Found on 30.X.62 in 4 small
boxes labelled "Heiligs Strasse,
1961/62, ohne Bfd." AΔ
sorted these by kinds, and
numbered ~~the~~ ^{the} ~~boxes~~ ^{the}
and took rubbings of them
on 31.X.62, with some help
from M&H.

KGA 1769-1775-

Dupl. to be made

Context: see opp.

Found on 30.X.62 in a
small box labelled: "Dipylon
62 unter Strasse II B
(Schreiben fertig(?) word not clear)"
In same box, a loc. plan. on
pall 540, and an unstamped
whole China handle, Ht ca.
26. Potters expert agrees to
3 or 4/4 yrs; but coin expert
says to 275.

28.VII.64 These objects as a whole have evidently not been put away, as I see the above 2 KT items are not in the storage list. Probably last lot not yet given KT markings, as I think AD said (?).

25.VIII.64 We find them in little boxes, the first lot in a drawer, and AD is marking KT nos. on them to be put away.

28.IX.64 The Thasin and Undessapud, which go in numerical order, have been put away, though without being checked. Better add to category lists of them, and check in drawer to addition.

The Kindin & Plodin ~~have~~ have been put in KT and alphabetical order, temporarily in a drawer together. Check when are the bundles of small groups -

at EA

AA found these in a small case 'on top' of the cabinet. It was labelled "amphioxanthos" or some such in German.

He also numbered and rubbed these handles. Dr. Gruben was not there.

4. X. 74

Θ These items seem to be the actual handles published by Thucydides, ΠΡΑΚΤΙΚΑ 1950 (Athen 1951), pp. 64, H. (our own effort). He publishes our photos of these handles. Discovery of Θ first by H.E.T.; also this present Θ found. ~~It~~ Thucydides was then in charge at the Kerameikos, and evidently stored his finds for other parts, in the storerooms there.
