Observations on Kermadec job

[1]

The lack of accessible storage, a place where
the bundles can stay in order, instead of
being disordered en masse & find an
individual one, remains ridiculous and
wrong.

Single complete series of numbers should have
been made for whole set, as soon as saw
not anything like all were numbered.
Old numbers then added to inventory,
as at Delos.

Copies to be made in triplicate whenever there
are inventory numbers used, in order to
have an inventory ^{in numerical sequence} copies for me and
for them as well as sorted cards.
Use triplicate books as at Delos.
Incredible saving in trouble.

KERAMEIKOS

2

DEUTSCHES
ARCHAEOLOGISCHES INSTITUT

ATHEN
PHIDIAS - STRASSE 1

, den 22.12.1962

Sehr verehrte Miss Grace,

heute endlich kann ich Ihnen Ihren Bericht über die Henkel vom Dipylon zurücksenden. Wir haben die Strassenbezeichnung der jetzt gültigen Zählung entsprechend geändert, eine Angabe über die Zahl der gefundenen Münzen hinzugefügt; unter den genannten Personen habe ich Gruben mehr hervorgehoben, weil er die Unternehmung am Dipylon geleitet hat; datiert wurden die Münzen von Dr. Franke, unserem Numismatiker. Gegen den Druck des Berichts in der Hesperia haben wir keinen Einwand.

Zu danken ist, glaube ich, ganz unsere Sache: dafür dass Sie sich der Amphorenstempel des Kerameikos so angelegentlich annehmen. Die Abdrucke der Inventar-Eintragungen bleiben vielleicht am besten bei Ihnen, bis wir sie einmal wirklich brauchen. Dagegen wären wir dankbar für Abzüge Ihrer Aufnahmen der Fragmente vom Dipylon, die Sie uns freundlicherweise angeboten haben. - Gleich im neuen Jahr werden wir für eine bessere Aufbewahrung der Amphorenhenkel Sorge tragen.

Mit nochmaligem Dank, den besten Wünschen und Empfehlungen
Ihr sehr ergebener

Dr. Franke für Dr. Franke F. Willem van.

KERAMEIKOS

December 9, 1962

Dear Professor Willemsen,

I am grateful for your permission to continue my work on the stamped handles found at the Kerameikos, and for the kindness and courtesy shown to me and to those helping me by the members of your staff in the workrooms when I was there, October 29 - November 1, with a short call on November 2. Thanks to Dr. Vierneisel's provision of wooden cases to take the whole collection of handles, we were able this time to rearrange them and store them in a way that makes individual items and related groups more accessible for study than was possible before. In the course of this work we made many checks, and took some photographs. We also numbered and made a preliminary record of about 100 new finds, GA 1673-1775, of which the last 7 belong to a particular group in which Dr. Vierneisel was interested. On this group, see the enclosed pages dated 8.XII.62.

You may like to know the present number and assortment of your stamped handles:

Thasian	63	
Black Sea centers	5	
Rhodian	459	
Knidian	1084	or 60 per cent
Koan	11	
Chian	23	
Parian	5	
Corcyrean(?)	5	
Parmeniskos Group	16	(On the group, see <u>Hesperia</u> Suppl.X, pp.168-9.)
Roman	23	
miscellaneous	72	
not seen by us	10	
	1776	

The difference between the sum, 1776, and the last number given, 1775, is due to a slight duplication in numbering.

The ten handles not seen by us are GA 1367-1374, and 1626-1627. These are, I believe, with other finds in cases of context pottery from the excavations. Other handles evidently now so stored are GA 1348-1366, but these were recorded in 1959 by rubbings; finally, the Dipylon group, GA 1769-1775, are being kept out for the present for study.

The rest of the handles are now in 41 cases assembled together on shelves in the long apotheka. Beside them is an empty case for new unnumbered handles. Within the cases, the numbered handles are laid in order in layers separated by newspapers, which serve more or less as trays. The Knidian are in order by the type numbers of their stamps.

Copies of the inventory records of all these handles exist. Please let me know if the Institute would like to have them.
With many thanks for your help, and best wishes for the coming holidays,
Yours very sincerely,

KERAMEIKOS

4.01

Mislaid Kerameikos papers, now found,
which should help to find missing bundles

By chance (looking for HAT reamt Engelquist article
on the Argos) I found a folder filed under GRACE
in which were numerous copies of Kerameikos records
which had been given to the Gym Institute and had
apparently been returned to Judith P. after she left
that job. The folder contains also some notes on
whereabouts of certain bundles, and it is too bad we did
not leave these notes before ~~doing~~ reamt job, so as to be
able to give an up-to-date report of assortment
instead of leaving gaps for bundles we did not find.

(unbated)

One slip, ~~products~~ GA numbers under Roman
numerals, suggesting numbers of cases, and being
slightly rearranged reads thus: "To 1347, in April."

Desirable &

find

1348 - 1366

Desirable

to find

1367-74, and 1626-7,

under records undated,

ston properly?

Discuss

dates with

excavations?

KGA 1367 - 1374 is the series we have never seen or rubbed, and do not know anything about.

KGA 1626 and 1627 are placed by a note at end of Inst. copy of types list, 2nd part:

" KGA 1626 In Kiste mit Kienstaub (B.S. Graphem)"

" GA 1627 wie GA 1367-73"

[Bei Pompeion I Schubenschnittung, über Sull. Lehm]"

On an undated yellow sheet, indication of provenance (boxes) for GA 1661-1672.

The KERAMEIKOS SENT me all the records of SAN's which VG had made especially for the KERAMEIKOS. I did NOT ask for them and they arrived without comment so there is no particular explanation for this move.

This file also contains a partial record of the whereabouts of SAN's which are in small cardboard boxes, that is NOT in the big collection of wooden boxes.

Keramides - JAH not found
in recent refactoring

KGA 1348 - 1366

Series numbered by AB 3. VIII. 59,
and rubbings taken.

KGA 1367 - 1374

Now seen by me, but presumably
on 15. VIII. 61, by ELW_A when she saw, and
separated out, the Latin 1375-8.

KGA 1626 - 1627

Now seen by any of us from EA.
Unless YOK, must have been numbered
TX, or X. 61.

An early Thasian handle, reading: Oaxw
on which see notes on yellow paper, } star shell p. 11. T
dated 1. V. 61 and 2. V. 61. From } K 220 φ
port-hole of ibria (?), 4th cent. context: "Keramides,
Schmitt I, Loch 3."

This handle had no number on it when seen
(? apparently) by me 2. V. 61. It may be one of missing
numbers listed above, 1367-1374, 1626-7, unless it
was never numbered.

A frag. with Latin stamp, seen by ELW 15. VIII. 61
"one Latin, which will be numbered by J.P." ; was it
numbered by JP? Or is it KGA 1660, numbered by
→ Mr. B.? Got reading from ELW. So it perhaps

the unnumbered frag. we found in the Latin case?
(H)ERENN or some such).

On this missing material, see note of 27.7.61 in Kraus's journal:

"Judith said that about 50 numbered items were in these boxes of mixed finds in the Old Museum, from excavations by Kübler; and that probably there were others in these boxes that had never been found and numbered. Yesterday she has decided to take them out of their boxes (and leave a list of numbers, or at least intend)."

But as she left this job about 6.11.61, did she ever do this? Is this where the missing numbers are? Though less than 50.

[see note of 7.11.62.]

It seems that no individual ^{numbered} items are missing, just the series listed above. But a check was not made of the Parmenisthes Group case; nor a really careful check of several of the smaller groups.
→ Do this next visit.

Work at EA on Keramides records

Duplicates were begun yesterday of KSA 1673 ff. by AD. The old KSA numbers (found later & have been duplicated by a series of which rubbings - and duplicates - had been made) are being entered below the new, valid, ones. Must try & find out if Judith made any unwanted entries in any records kept at the Keramides of SA numbers given.

AD is currently keeping a list of plants needed. But I think it will be best for him not to try too much to distinguish superior examples among the Kerkira, but when rubbings are finished, and karoulas cut, and put into KT order, before they are filed with the rest, check against KT plant file.

Ash JP also: was the Institute's copy of the typeset lists retained there (as I have assumed) (but they can't seem to find it) or does she think she gave it back to me? (See note of 7.XI.62, on mislaid papers found.)

Check to be made between Thasian numbers added to list from handlers seen and last lot of Thasian karoulas

List 8 to be made of Plodium after
KSA 1179: Take from duplicates, and note
checks by numbers, showing the items were
put into Plodium cases.

Note to Dr. Willensson (on separate page).

Typed copies of other lists needed:

~~KSA~~ KT storage

Other categories? - if Institute wants them?

cards~~

~~put in file
16. XI.~~

On Monday last, 3. VII. 59, MZ and AD went for whole morning, for checking various difficult items not finished from the rubbings done (MZ), for numbering and taking rubbings of some new items (AD, who also laid things out in rows so wanted objects could be found, they being stored now in tins).

The new items are 9 believe partly from excavations, for which some context will be available.

Last item at present is KGA 1366.

A number of more recently numbered items still to plot.

5. VII. 60

Clearing up papers, I find the original and first carbon of ^{dated at the beginning 3. II. 59.} duplicates of Keramaites later finds, KGA 1181-1366. The drawings have been light, these will be kept as the stuff with other similar (perhaps on west wall of room) at least while they are in duplicate. The card copy has been cut, and the baskets filled with the old small baskets that are the original record of KGA 1-1180. Note that these old baskets still bear their original K and KUG numbers. These can be corrected by reference to the typed lists where T. Perlzweig's new numbering ~~is entered~~ has been entered. Perhaps Mrs. Heath will do it?

[OVER]

(5.VII.60)

On Roll
504

Note that in list (dated 14.IV.60) of Keranides to be phot. (of KGA 1181 - end), there are three new Knidian types. It would seem sensible to take all the needed photos. (38?) once setup is made but since to find them one would have to set in order ^{contents} a great number of times, it would be quite an operation. If has to be done in a hurry, AD couldn't do it.

I. II. 61

In visiting to check a table ^(for drawing), find the materials of this check still about, and inquiring of AD, ascertain as follows:

1.) KGA numbers have been entered in red on kartoulas, throughout Knidian ^(and EK and K) section of ^{Bartholomae} file. I think this was all done by Mrs. Heath. She must have gone from the kartoulas to the corrected list.

2.) Entering new KGA numbers in files: I had thought Mrs. H. would do this at the same time, but it turned out too hard, partly because of her eyes. AD has taken over this job, and from the kartoulas has entered new KGA numbers in the Knidian file, at the same time entering KT numbers both on the kartoulas and on the typed list. A pink card showing how far he has got comes just after:

KT 1248 (Piddinos, sp. Europ.) KGA 1017

No new (KGA) numbers have been entered for any class save Knidian, either on kartoulas or in regular files.

Keramaitos Notes

P. M. Wallace has continued correcting Keramaitos ^(mostly in red) particulas to their KGA numbers. She has done
 Rhodian, "Schmidt Group (Parnassus group)", T. Cassian, Koan,
 Chian, Cosyean, Pontic, Musiel. Assigned, Imperial,
 Lagynos, Latin, Miscellaneous. Old numbers crossed out.

These revised numbers have still not been corrected
 in the file-card entries of any of these classes.

Correction of entries of Keramaitos items in finding file
 cards is still just through KT 1248 (on entry of 1.II.61).

16.VIII.61

Yesterday ELW went to the Keramaitos.

She found none of the whole jar and large
 frags. - at least 10 - which we saw in June 1957.
 J.P. unable to locate; but later an idea occurred
 to her of a place to try. [They were later found.]
 26.IX.61

Evidently KGA numbers have been given through
 KGA 1378, whereas we have records only through
 KGA 1366, except for the readings of a few Latin words ELW.
 (in 1957 and 1958)
Unregistered handles: she saw 3 boxes with
 perhaps ¹⁰⁰⁻¹⁵⁰ 300 altogether, found in recent excavation,
 according to J.P. (to ELW). ELW looked through
 these 3 boxes and found one Latin, which will
 be numbered by J.P. She thought the handles in
 general looked fresh and sharp. They have no
 numbers, and J.P. said they knew nothing about
 context.

(OVER)

At ELW's request, and by J.P.'s concurrence, the Latin's are now to be kept separate.

Probably other classes could be kept so, if somebody would go and sort them out. This would be a great convenience. JP could be done by a student, using our lists, and marking the Knidian bundles with KT numbers, by which they could then be kept.

26.VIII.61

Recently Mr. Benachis has spent some over two mornings in the Kerameikos taking rubblings of inscriptions recently numbered, judith writing the numbers on the rubbings, also indications of class and old other notes, as dictated by Mr. B. The bundles were in several gambols, and they took them as they came, not in order. Yesterday he brought the last lot of rubbings, which certainly include a new name in Koine: Λαδίκος. He then sorted this into numerical order, and has put them into small envelopes by 30's. They are KGA 1379-1625. Would like now to get the duplicates made, particularly because at the end of the year Judith leaves the Kerameikos. But unless I turn out that AD can manage a good part, hesitate to push it now since his estimate more than a week of her part-time hours here.

20.X.61

AD is now well on with this job.

Rerum Notae

(Last previous note seen to be of) 26.X.61. Is another page out of file? since we have been planning ^{for some time} about putting new order in these bundles -)

See today's letter to E.L. Will (in ROMAN).

Had thought Mr. Benedic's unusual availability a good chance to get these SATT separated by class, and especially the Kinds into type order. Work hours can only be done in a.m., because of Judith's hours, and Mr. B.'s mornings are otherwise occupied in various museums. J.P. not enthusiastic at possibility of Mr. Kenneth Clark carrying out the task.

Now I realize AD will leave some elasticity (presumably) in the coming weeks, his looking for the Water Co. Very desirable if he could do this job, which involves writing the KT numbers on the kinds, and sorting them thus.

First, necessary to finish the job of entering new KGA numbers in kind file, and at same time KT numbers on barcodes and on typed list. There is not a large part of that job left. ~~AD~~ With AD or M.E.T. whoever comes first on Monday, should attack it ^{perhaps they could work as a team} and see then if AD can arrange to do the re-ordering in succeeding mornings.

For the present, Phodia as well as minor groups to remain in KGA order. But Kinds to go by KT. Note we must enter KT numbers the ^{copy of} typed list kept by the Institute. And probably make eventually

(20.8.61) a list in KT order.

In such a list, and in time, leave a little space for additions.

It seems that last lot^{numbered} is not in time, but in boxes of various sizes. Desirable in repacking & for lay in cages separated by layers (pithy thick) of newspaper, as done in Delo.

Later. Mr. Benachin came, and carried on the kind number-correction and entering of KT nos. through KT 13⁵¹46.

24.8.61
[Tuesday]

Mr. B. returned this afternoon, and carried on through KT 1511. I told him we were eager to get this job done, so as to be ready for AD & put order at the Parameters which he is free in the a.m.; AD telephoned this a.m.; his holiday ends sooner than I expected - next Wed. back to work. Mr. B. may return tomorrow.

27.8.61
[Friday]

Chiefly by Mr. Benachin (with a bit by VG and me) this correction in kind files and entering of KT numbers in ^{Koran} Bartoula files has been carried systematically through KT 1548. (Last Bartoula is number KGA 1140.) In addition, at end of yesterday, HST and I, working together, filled out gaps in first couple of pages of the numerical list, entering the KT numbers by copying up ~~apparently necessary~~ in Bartoula file name-identification for missing KT numbers in 1st list, and then in regular file. In some cases I turned

Keramitico Note

(27.X.61) out that the rest of the corrections and entries had been made, and the KT entry in the typed list had just been forgotten. In other cases, the KT number was beyond where Mr. B. had reached. In these cases, the fact that the work has been done will be recognized when the kartouka is readed, because there will be the red KT number entered down left.

This part of the KT series is hard for Mr. B. to look up from kartoukas & files, because it is the divini types, lots of which have their master cards under the divini, in the order of the name of the fabricant which was on the other handle of the jar. Often you have to read it through a cross-reference card in which we copy the pencil parenthesis entries have been made.

So it goes slowly. But it is a satisfaction all round that he can do it. Actually he likes to do it, and would not leave the job with MET yesterday.

The pressure to finish yesterday came from arrangements we had made for A.D. to work a few mornings in the Keramitico now while he is free from the Water Co. He and Judith settled to work 8:00-2:00 today, and finish I think tomorrow (though it is O.K. day) and Monday. Mr. Benadi was to go today too. They are to sort the handles by category, and mark the Kintin, as many as time allows, with their KT numbers. Yesterday I marked a carbon copy of

(27.17.61) the numerical list in blue to serve as a category list of the Placidian. Mrs. Forbes, a volunteer, had made category lists of the smaller groups on 25.7.61, putting the bartoletas into numerical order, listing from them, and then checking between her list and the general numerical typed list. Some anomalies she found I amended in the general list (e.g. items now called Chian, not marked as classified in the typed list). Last night she said she had omitted to list items which in the typed list ought to belong to the "Mixed" category, but were not present among bartoletas; probably many of these were items later amended by me (see above) but of course some bartoletas may easily be out of place, and it would have been better to make a more thorough check before this job was done. (No more could be done last night or this morning, papers and A.D.'s. list having been taken after tea here yesterday, by Judith.)

Judith said that about 50 numbered items were in those boxes of mixed finds in the Old Museum, from excavations by Kibler; and that probably there were others in those boxes that had never been found and numbered. Yesterday she had decided to take them out of their boxes (and leave a list of numbers, or whatever instead). Now

Keramikos Notes

(27.7.61)
[Friday]

she has telephoned to ask for the last number given for the lot of rubbings recently brought us by Mr. B.) because one of the German staff, seeing all this activity, & was moved to produce some more handles he knew of; so these will be numbered and rubbed by Mr. Benadiri. On the last number: see. & on rubbings it is RGA 1625, but she finds a note that numbers have been given through 1628, ^{1627 off} I think. To be kept in mind.

She said Mr. Benadiri had arrived, and was occupying himself as usual abroad. And that the first container being almost all Knidian, AD had set to to write RT numbers on them, from the marked list.

⊗ 16. XI. 62

But I

have this.

Did she

bring it

right

back?

In above,

p. 1.

Yesterday, in addition to working equipment that is to be brought back here, I gave her the carbon copy of the duplicates made in 1959, covering RGA 1181-1366. This serves as the continuation of the typed numerical list, which goes back to the days when duplicates were not made. It should be kept with other Keramikos papers. Original in above, and carbon had not previously been separated, I suppose because there are 30 or 40 photos that ought to be taken ^(and this number mentioned) but the particulars had been cut and sorted, no doubt to help in preparing the SITE CARD.

KGA 1379-1625

(27.X.61)

Of the new lot¹, rubbings taken by Mr. Benadine in TX. 61, AD has now made duplicates through KGA 1588, but with a number of omissions which ME must try to read before we write "unread" on them; these are of course largely Kirdin. He complained to Mr. B. that his rubbings had not been up to standard; I suppose this is partly that in Alexandria there are much fewer of the Ptolemaic of the 1/2 3rd B.C. than there, the rather fainter stamps, and AD is not used to reading these from rubbings; also of course he is not used to reading Kirdin from rubbings at all.

28.X.61
[Sat.]

J.P. brought back to tea on the 27th a list of gaps^[in continuation of list, of KT nos.] sent by AD, who said on same page that he had written KT nos. through KGA 250 (nearly all Kirdin). I worked on these till J.P. left, and this morning finished working through Kirdin particulars with names, revising inv. nos. and entering KT nos.

Note that this last lot, in general after KT 1548 (though some KT had been done already, which working from the mounting list directs, & fill in gaps), have been done without the master copy of the typed lists, or any copy, in which the revised numbers had been entered, so that in revising entries on file cards, I have had

(28.X.61) To depend on accuracy of record numbers previously entered on kartonulas (by various people). Will be desirable to check for publication. The same for all items (mixed earlier KT nos.) with titles, which can be sorted to the end of the file when names had been read, before to check with or without devices.

As soon as checking was finished, copied off list of items involved. (Then leaving revision in red on this carbon of type list), and checked ^{numbers} with Mrs. Kitting who was here, and Spiro took the list to the Kramers, about 11:00 a.m.

Yesterday, in addition to list of gaps through KGA 250, J.P. brought rubbings:

1.) batch of new finds, not in order but apparently ex. KGA 1864

2.) Batch of unread, which AD thought might now be read, at least some, by M.E.T., who was to return rubbings with numbers. But she was not here

→ These rubbings should be pasted on their kartonulas which have no pictures of any kind, mostly.

31.X.61

[Monday]

Project of getting a photo of Adikos (Kon), and
may as well take at least enough other desiderata
as to fill a film.

Yesterday I broached the subject with Judith
(or M. T. did). She thinks no difficulty over our
taking photos, ~~better~~ of course apply for permission
to our director for publishing newer finds
than those covered by old permission. They have
electrified now, and base plugs. (Franklin
Zedro could be asked to photo. Adikos
in the next lot, but no surety given it
would be.)

Now it would seem good to do previously
listed desiderata (through KGA 1366?) so
as to take things in order; but, if only say
one roll to be done, then better to do from
new series, because film was. could be
written before separating duplicates.

The photographika, saw cameras,
→ must be in N. Mus. Ask M. T.

J.P. comes. Discuss what days AD to go the and finish.
(has to be p.m.). She would rather finish soon. I shall
call him and tell him to go there tomorrow and not
come here. I have telephoned him, ca. 6:30 p.m.

He goes there tomorrow 3:30 - 5:00, writing numbers. And
comes here Thursday. And goes over more to Kon.
Friday, when I must go to photo. (Adikos etc.).

The little Frank of the
gibbous moon, and the
more show, and the
Mr. B's sort of job.

3. XI. 61

[Friday]

Today, after arranging with Judith, went to Karamiah to plant. L.A.B.Kos (Kos) mainly, took also a series of other desiderata, incl. 3 for ELW. (MST did all the actual photographing.) [Roll 507]

Ad continued to write KT numbers on Kirdin, and I was divided between recording and passing to MST, and sorting ~~the~~ Kirdin into numerical groups.

In the end, with a few listed gaps (apparently only (6)) he has found all the Kirdin through KSA 1346, and marked those of which KT numbers were available (i.e. most, some illegible). We intended to go through KSA 1366, but being in a hurry at the end, we did not succeed in finding numbers between 1346 and 1366. Missing nos.: 1348-1366

Still do not
see them
29. X. 62

Went to party at 4.45.

Mr. Benadi was then part of the time.

18. X. 62

Karamiah papers were kept out for some time with the intention of summing up, which still fresh in mind, what had been done and how things had been left. But too much pressure of other jobs, did not manage.

Anyhow, from calendar notes it is clear that we did not return to Karam. after Nov. 3 (Friday); on

(18.X.62)

7.14

Nov. 7, Tuesday, J.P. came to say that she had left her job at the Ker. and at the Institute. Note on the Category Lists of 25.X.61 a space for a note is squared out, with entry of date, 7.XI.61; evidently intended to summarize the situation, on that day. A.D. thinks ^[i.e. some group] they were sorted out and stored by category.

Now as I try to clean up some old papers and prepare work which Mr. B. could do, I find the duplicates of the Keramides, KGA 1379 - 1642, ^{separated} ~~now sorted~~ on card, though apparently written before end of XI.61. Desirable of course to photograph before separating, if practised, as numbers can be entered.

Since A.D. will have some morning time free during his holiday (not to take a long trip out of Athens), if possible we will go to Keramides, begin 29.X.62, and make 1.) good record of how bundles are arranged, and 2.) some photographs if possible, and 3.) some improvement in storage if possible - in particular a sorting of ~~the~~ Keramides by K.T. number - which had always been intended. Before doing that however, to see any missing items are hunted for, while bundles ^{are} still in numerical order.

(15.X.62)

Necessary to apply for permission to work, and to find out what are the ~~propos~~. METT will ask about the letter from Miss Christodouloupoulou who now works there under Dr. Willensen, with whom she worked in Munich. I will write to ^{Prof.} Dr. W., and METT will find out for Dr. Karouzos who if anybody in the Service should be applied to, now Meliades has retired.

see letter of
23.X.62)
V9 to Willensen

24.X.62

Dr. Willensen and Mr. Platon are both willing to have us work at the Ker. next week; see separate notes and copies of correspondence.

AA is to meet me here; he comes at 8:00. They also go to work at 8:00 at the Ker., so we will go along as soon as stuff is collected. Please;

Kypriakos
Babichidops
(Horn's
eldest)

1.) ^{AA + KB} Find items listed for photography and/or study, not attended to on or before 3.XI.61. Begin with unfinished older list.

2.) ^{V9} Check storage situation in general, and take notes on it.

3.) ^{AA} Set up of $\phi\omega\sigma\phi\alpha\phi\iota\kappa\acute{\epsilon}$.

4.) ^{AA + KB?} Start sorting Kinder by KT, to be stored in this thus labelled - Institute's copy of Ker. list must ^{then} be marked w. KT nos.

5.) ^{V9} Photograph.

6.) AA try to read his selected ~~Phot~~ unread.

27.8.62

Last night happened to meet Karam on street at 7:30 (coming to his ^{info} ditto job), and arranged that Kyprianos ^(Bartholomew) will join us Monday a.m. 29.8. & help at Karamitros (as unfortunately he has no job, and apparently is physically incapable of doing the ^{weeding?} weeding work he was trained for by the Queen).

From at beginning of our job, to find first series of objects for study, and/or plant, then to lay out handles in numerical order, so he can start right off, under AB's supervision.

 add Poly
 ———
 11

Bring, beside φωτογραφικά, ^{particulars} notes, pads, pencils, rubbing paper (etc.): some extra lines? to enable sorting by K.T. and leaving a little space for later additions. So on if they can raise them, and if not, bring on Tuesday. There may not be space. Bring also some newspapers. And a lamp, with the photographician.

29.8.62

VG, AD, and Kyprianos Variluchos ^{note of 15.8.62} [Kyprianos did a little work & to SA before we were ready to leave: separated and cut out 1st 2 pages of dupl. & sent to K.G.A. 13.7.9.]
 We arrived here at the Karamitros ^{first} ~~some~~ ^{at} 9:00, having to collect our boxes and our equipment. It is now done & 12:00

Kyprianos is getting the Plowden into numerical order; they were in unmarked cases, partly assembled in a general way by number, but contained not reliable (result of

radio [✓]

(9)

7.17

(29.8.62)

(29.8.62) Mr. Bensch's sorting will be looking at our lists, or keeping
to numbers). They will be laid in alternate intervals,
with newspapers between.

AD and I have been looking for, then mending
plots, and in the course of so doing, laying out
contents of bins and cases following after the GA nos.
which he had gone through and written ^{the} KT numbers
(through KGA 1346). We have still not
found the series between GA 1346 and GA 1366. We
have found a second series of the following nos.,
which do not match the entries in our duplicate,
based on rubbings;

KGA 1379 - 1385

That is, 26 handles,

1387 - 1399 1406

which should be 28 (1386

1401/1404/1406

and 1400 ^{found 30.7} are missing)

KGA 1386

^{found 31.7} and ^{found 30.7} 1400

of this series are not with

the Rhodian nor with the kind in numerical place,
because we have laid them out and hunted. Need
to lay out the various categories, such as L12, etc.

Have taken 3 rubbings of good ex. line, & see if
they have possibly been numbered in some other series.
[They were not on file.]

30.8.62

(29.8.62)

Kyriakos had brought his lunch, and ate it outside
a little after 12:00. AD and I waited till MET came,
toward 2:30, and when she had started to plot, we
went to a nearby place, where he had me to lunch, fish.
Itadakida

(30. X. 62)

7.18

(29. X. 62)
(Monday)
ST was a
20 - exp.!

MET finished Roll 538^(X), which turned out to be a short piece as well as having been started ^(by me) abroad. She started Roll 539, getting through KG A. 1394.

AA and I packed away, at 2 cases of Plinian, checked, in numerical order, no items missing, laid in layers with newspaper between.

MET made some checks, on items listed at the EA.

Kyrillos leaving put into numerical order all major classes ^{(incl. Thracian) and these}, save the Knidian, and the last lot of those also which had no KT numbers yet, went home a little ^{before} 4:00.

The rest of us stayed until toward 4:30, as we found guards and messenger stay until then. We then walked (in the rain) to the Stra.

We saw: Dr. ^{newel} Diemasil (sp?) Dr. Gruben (young architect), some young ladies (one of whom turned out to be Dr. Xpoudoudoudoudou (Mr. Varoudek's daughter). Also Tiárrys (Baltorges) who still works here in his spare time for the Water Co.

The messenger's name is 'Apetzridis

30. X. 62

(Written at home, ready for bed.) Kyrillos and VJ and AD arrived serially, from ca 8:00 - 9:00; MET ca. 2:30, from the Stra.

Sorting of Knidian by KT. In various separate sheets of preliminary figures, Kyrillos theoretically counted the Knidians ^{in the Knidian figures} by 50's, and wrote down the first and last

(30.8.62)

(Tuesday)

(30.8.62) KT numbers, and from this we figured out some round numbers for AD to set up markers (as in N. Mus. and Delos); but ^{the small heaps} ~~they~~ have not come out as evenly ^{distinct} as they should, and perhaps the ^K got mixed up; however, no matter.

Doing this was rather suddenly settled on today, when I saw not much for K. to do otherwise, and found that ^{wooden} cases were available to replace the tins in which nothing could be laid out in order; and that space would permit of the cases on the shelf space allotted to us. It is of course highly desirable to get the Kinds into KT order, in aid of the Kinds volume, etc. (One of the young Germans said all this to be replaced) ^{of Kinds} ^{by KT}

Well over half the tins were sorted today, almost all by Kyriakos. When we have checked his heaps, we found no mis-sorting. They are being taken in ^{KGA} order; this was an opportunity to get the illegible laid peacefully in numerical order, but this was not done; shall go put the first lot in order myself tomorrow a.m.

In order to take a proper check of the Kinds as they go into storage, we need a storage list by KT and below that by GA, to be taken from the Kardinias; ~~as~~ AD would do this (as he has done for ABC Kinds, against our ^{Alex} trip), but no time. Coming back to the 5th after we left the Karam-Tokas, he stayed and set up the Kardinias of ca KGA 1375-1672. ME ^{sorted all at} started to put Kinds in KT order, which I finished at home this evening. Now these must be added to the main lot of

(30.X.62)

7.20

(30.X.62)
(Tuesday)

Korannekha Kartoules (a mixed lot, because of no duplicate in early days). And from this combined file, the draught list is to be copied tomorrow a.m. on a pad. Mrs. Homer Thomas (Winifred E.) has agreed to come down with me tomorrow morning and help us, and I hope she will be able to write clearly enough to do this. This list will then be checked against the bundles as they are packed.

AΔ has finished marking all Kinder bundles with KT nos. The Plushin are now mostly packed into their cases by layers separated by newspapers. For the last few cases, I have made note of what is beginning and end of each layer.

The Roman were taken out, set in order, and replaced, with inclusion numbers marked on the cases. AΔ has replaced the cases on the high shelves; we really need some manual assistance there, which K. prob. should not try to give.

New numbers: have been started, with ^[Locally, first] second set of 125A 1379-1406. In separate sheet. Publications were taken by AΔ of this lot.

Photography: MTT finished Roll 539 and began 540, and photographed everything which had been listed.

31.X.62

(AT EA.)

31.X.62

Mrs. Thomas (^{W.T.} Freddie) did come down, and did write out the whole storage list of the Keramitok Kindia, from the Kantoules which I just checked through, and added those from newly-cut pages.

Kyriakos finished sorting the bundles into their heaps by KT. He learned from AA how to set individual heaps into full order, AA having done a few & started with; I also did a couple. The majority of the heaps were ^{sorted}.

AA and I, and later MET and I, packed the sorted and laid-out bundles, in their KT order, into cases which take about 60, leaving a little space (for possibly 8 or 10 added) in each one, for ^{new finds} ~~additions~~ to the contained types. We checked each bundle against W.T.'s list, beginning & working on the first part of it, ^{well} before she finished. Certain anomalies found, pointed to corrections to be made in various places, as e.g. in entering KT numbers in master list, AA occasionally had entered instead to GA number; but we were able to get the right numbers with material to hand. Altogether, got through KT 600, I think 6 cases.

AA finished numbering new finds, and cleaned ^{the needed a little more cleaning} some. With some help from MET, he took rubbing of most of these, since Mr. Benavides did not come - he had said he could, was perhaps stopped by the rain.

MET, arriving at 3:00, took several photos which

(31. X. 62)

7.22

(31. X. 62) had been added to our desiderata; and then assisted ~~to~~ as above. Nicko had telephoned that Roll 539 was very good - he developed it early this a.m.

Quite a lot remains to be put away, and so we must return tomorrow. Mrs. Thomas is willing to come. To be met at gate at ca 9:15 - 9:30. Kyriakos will come. A.D. can come for a few hours, but has business.

W. T. and I had lunch at the nearby place (on Aspiárow, near Vapó ped. St. - Kúpros Kúrtas), and A.D. when we had come back.

3. XI. 62

on 1. XI. 62
(Thursday)

Though he had business, A.D. worked with us from 9:00 until nearly 12:00. W. T. stayed the whole morning, and we finished packing the kindia by K. T., and then had lunch again at the nearby place, and ^{she} went on home. With Kyriakos, I finished packing up the illeg. kindia (we made a deal, he also separating to agree), and various smaller categories; the only one that remains undecided was the Parmeniskos gfr. The cases are assembled as shown in a pencil diagram dated 1. XI. 62; note that the cases available for kindia turned out to be of various size. For lifting this up in place we again had some help from Yannis, Aristide.

16. XI.62

(On 1. XI.62 (Unable to finish notes that Sat. 3. XI, because cont.-) had to meet the Astronomers to be taken to the Yeroulandos. The following week got mixed up in reading HAT's Guide. The stream is swift.)

On 1. XI, in addition to jobs listed back of p. 11, I photographed all of special groups of JAH, GA 1769-1775, also the two with them, on Poll 540.

AA packed up the photographs, made wooden tags for the newly packed cases; heaved things on the shelves, with help (see above); gathered up working materials; I think there were rubbings still to finish.

Known, The following categories were checked ^{by VG or AD} that day; ^{EK} Chian, Pontic, Parian, 2c Group, LK¹. A more heavy check — just a count — was made of the following categories by VG: Coreysian, Imperial, Lagynos, Zalmathia, 9 Brian.

Did not manage to check the Pammeniades Group items.

Gave 100 dr. to Aristides (with difficulty); not able to give anything to Yannis. Coins in a tin left for staff.

On 2. XI.62 At the Sora, I looked up (from the rubbings) the special - context group GA 1769-1775, and made readings and dating notes.

At about noon, I went to the Kerameikos and returned to the key to the area which they had lent me. Made some checks on the special - context group,

(16.XI.62)

7.24

(on 2.XI.62) from picture-cards brought from a Stoa. Some
further calls with one of the staff - was it
Dr. ^{on Viernersel?} Ropke? - about the control of this
group.

Keramaitos - New Number given

Starting with (K)SA 1673 (following last no. in
duplicates) AS is numbering new bundles.

First series: KSA 1673 - 1700

These are a ^{second} ~~duplicate~~ series of KSA 1379-1406,
all save KSA 1386, which I still think
may be found. Found B.I.F., a trace of "vase"
They are being numbered in sequence, but
the first (1379) got misplaced, so it is
put at the end.

Note that because of missing "1386", the new
KSA 1679 is now missing, perhaps YOK.

Found
31.X.

These are findings, except:

1673, Rhok.

1675 "

I find that AS is listing
the categories as he makes
mappings.

31.X.62

Second series: KSA 1701 - 1706

A few bundles in the bottom of a case labelled
"New goss - amphicorinul", said to be finds
previous to the 4 or 5 small cases labelled ^{"Heilig Stream"} 1961/2,
Olme Befd". In here we found the missing
old-numbered 1386.

Third series: KSA 1706 - 1768

These were in 4 small boxes labelled "Heilig Stream".

NEW
NUMBER

KERAMEIKOS

October 24, 1962

Dear Mr. Platon,

I am much obliged to you for the information and advice you gave me yesterday, about permission to study and photograph in the various museums and storerooms of antiquities in Greece. I shall take up presently the matter of a general permission for my class of material, which might be granted to me.

In the meanwhile, I should be grateful if you would yourself authorize me to work ^(X) in the storerooms of the Kerameikos during this coming week, beginning with October 29. I think we will probably work only October 29-31, but I should like to be free to go back later in the week if necessary. I think you said you would be willing to do this.

I have applied for, and received, permission from Professor Willemssen. His staff will be working there also, so I suppose there will be no need for an additional guard to be arranged for.

Yours sincerely,

^(X) The work we need to do will include some photography, as I told you.

General permission to work
on stamps & ampoules
→ to museums & a part of Greece

I have just seen Mr. Platon on subject
of working next week at the Kerameikos. He
did seem to think I needed a specific permission
in my present state (as they cannot make exceptions).
He suggested I apply for a general and
lasting permission to study & photograph
these objects in the museums of Greece. The
application should go to Mr. Kondis.

He himself would be willing to give me
permission for a few days, e.g. next week.

MET to please work this out. ^{general appl.} Prob.
better to get the temporary permission for next
week. The MET compose (with advice from Kondis)
and A.D. types.

24.8.62

MET says if I write an applic. in English,
best addressed to Arch. Service, Museum Section,
she can take it up with Kondis - perhaps
next week. She doubts if I could get a
permission authorizing guards to permit me to
phot. ; the reply or refusal - we still have to
do it. Not really much use.

25.VII.57

Mr. Miradas said
we could have
a proper applicant
made out, and
this is evidently
a copy of the
reply.

How should it be
acknowledged?

KERAMEIKOS

October 23, 1962

Dear Professor Willemsen,

You may perhaps know that with the permission of Dr. Kübler and then of Dr. Ohly I have been working on the coarse-ware amphoras and especially on the stamped handles of the Kerameikos since 1949, and that one category of these handles has already been published, the Thasian: see A.-M. and A. Bon, with collaboration by V. Grace, Les Timbres Amphoriques de Thasos, Paris 1957. I gave to Dr. Ohly in 1958 a list of the Kerameikos handles included in this book, which unfortunately has no concordance of inventory numbers.

May I have your permission to continue working on this material as time allows? In particular, I should like to work in the apotheke the first three days of next week, October 29-31, when my expert but now part-time assistant can give me a few full days from his annual holiday from his principle job. I believe you have one or more assistants at present working there, and we would of course fit our hours to their convenience. I should like to complete a classified arrangement of the handles begun last year during the same young man's holiday (my assistant), and also to take some more photographs.

Yours sincerely,

Virginia Grace

24.10.62

A note was added in ink requesting a telephone call if convenient. This a.m. a lady named Zaverakis called and said permission was freely given. Their staff goes down at 8:00.

KGA 1584

KGA 1589

Monday morning, October 30, 1961

Dear Judith,

Thank you very much for telephoning today, as well as for the beautiful order you and your Myrmidons are putting into the SAH collection of the Kerameikos.

It will be fine if you and Mr. Benachi have time to make the check you mentioned. It will be a definite help to have those lists checked themselves, I mean the lists of Unclassified and smaller classes, against the objects. If there is a disagreement between them and Mr. Benachi's sorting, will you please refer to the typed list? And then if Mr. Benachi continues to disagree with the way the item appears in the typed list, it would be fine if he took a note to this effect, on a separate piece of paper, please, best not to write ^{on the typed} ~~on~~ lists (except for checks perhaps), because it is so hard to find all the remarks. Certainly write whatever you like on the pencil lists, but rather in ink or colored pencil. Ask him please to make a clear note as to where the object finally went!

The duplicate copies of the readings, KGA 1181-1366, make a continuation of the typed lists, and it would be fine to continue sorting through 1366 if you have time. After that, I would be happier if everything stayed in numerical order until readings are finished.

(Wednesday a.m. Oct. Nov. 1.)
[J.P. told me last night that by the time this arrived, Mr. B. had already sorted all numbered bundles.] [Now according to a list, all KGA 1181-1366 are sorted, as A.D. said at 6:30 p.m. yesterday when I called him.]

(found in situ, 2. V. 61)

Dear Virginia - this handle comes from a post-hole
which may have something to do with the ikria
connected with the epitaphia. All the other sherds
from this post-hole are, as far as I can pin them down,
4th century. The ^{sherds from the} other post-holes are also 4th century.
Please tell me, is the handle later than 4th century?

Hopefully,

Judith

13.IX. 58 Athens

Dear Virginia - thank you very much for the concordance, I expect Dr. Ohly will come to thank you in person.

George Zoumanides has spent part of his time in the Kerameikos putting the handles in order. He has arranged the old ones (the ones you have recorded) in numerical order in neatly labelled tins and he has numbered the new ones (the ones you have not yet recorded). Mr. Benachi made rubbings of the new ones until he ran out of cigarette paper - this was just before he left. At the present moment I would like some more cigarette paper in order to finish the rubbings.

The demolition of four houses is producing a few new handles every day. Since I am still dealing with boxes, not yet having reached the stage of individual finds, and since I have no help, I thought I might wait until demolition had produced a worthwhile number of handles and then see if it would be possible to get help from the Agora in numbering and taking rubbings. Or photos.

Some amphoras with dipinti have turned up and one with a graffito⁺ ΓΑΥΚΥC. Quite a few grey-ware amphoras turned up among Brueckner's old finds.

With many thanks,

(J. Perlzweig)

Dear Dr. Ohly,

I enclose concordances of the Thasian handles from the Kerameikos excavations which have been published in Bon, Etudes Thasiennes IV, Les Timbres Amphoriques de Thasos.

Note that, in the case of duplicate examples of a given type, the Kerameikos example is the one illustrated if it stands first in the list of examples.

Yours sincerely,

Virginia Grace

Entering of Bon numbers in Romanian stamp lists

AD has entered them in the manuscript lists, using the stamp Et. Thas. IV. (no.). This was part of the general job, of proceeding from the printed (proof) text, and entering corpus numbers in all sorts of inventory lists, cards, and in copies of publications.

I have today looked through these ms. lists, and noted a couple of omissions, which I have fixed, also one false entry, which I have corrected. (Entered in wrong one of the 2 lists, Ker. and Ker. Vg, and did not note it was a Kuadian.)

To be done: find the hantoulas marks there also, check the stamps in the ms. list w. ^{check back to books} hantoulas made typed list: (Note some items in Bon not listed as Thasian by no.)

<u>New ^{Ker.} number</u>	<u>Bon no.</u>	<u>referred to as</u>

AGORA EXCAVATIONS
AMERICAN SCHOOL OF CLASSICAL STUDIES
ATHENS, GREECE

October 19, 1957

Dear Dr. Ohly,

Here is the drawing for the skeleton cabinet for stamped handles, such as has been used by the French in Delos and Thasos, and ^{by us} for two large collections in Alexandria, as well as, in recent times, here at the Agora. I have put in also a few photographs, to show how it works. They would probably help a carpenter to understand the drawing. Be sure the drawers are not made to fit closely in width, either: there should be a full centimeter of play; some made recently in Delos are too big, and stick.

I enclose also lists of the handles we found at the Kerameikos, both those with old numbers, and those which were not numbered, and ^{to which} we have given ~~them~~ numbers (distinguishable by the initials VG). Finally, here is a list also of sacks, cases and boxes in which we found the handles, and to which they have been returned. When we worked for an hour or so in the apotheke on June 4, 1957 (the day we met you there), we found a few more items which had apparently turned up in the course of cleaning the apotheke: these are Kerameikos 335, 339, 340 (old numbers) and Kerameikos VG 816-818. 817 and 818 (necks of Knidian jars) were in a case with many other fragments which may join with them.

My trip to Samos is postponed until next Tuesday. I think you told me you have no objection if rubbings are taken of the handles from the old excavations. Please let me know if I can do anything in Samos for you or for others.

With many thanks for your help,

Yours very sincerely,

Virginia Grace

October 19, 1957

Dear Dr. Ohly,

Here is the drawing for the skeleton cabinet for stamped handles, such as has been used by the French in Delos and Thasos, and for two large collections in Alexandria, as well as, in recent times, here at the Agora. I have put in also a few photographs, to show how it works. They would probably help a carpenter to understand the drawing. Be sure the drawers are not made to fit closely in width, either: there should be a full centimeter of play; some made recently in Delos are too big, and stick.

I enclose also lists of the handles we found at the Kerameikos, both those with old numbers, and those which were not numbered, and ^{to which} we have given ~~them~~ numbers (distinguishable by the initials VG). Finally, here is a list also of sacks, cases and boxes in which we found the handles, and to which they have been returned. When we worked for an hour or so in the apotheke on June 4, 1957 (the day we met you there), we found a few more items which had apparently turned up in the course of cleaning the apotheke: these are Kerameikos 335, 339, 340 (old numbers) and Kerameikos VG 816-818. 817 and 818 (necks of Knidian jars) were in a case with many other fragments which may join with them.

My trip to Samos is postponed until next Tuesday. I think you told me you have no objection if rubbings are taken of the handles from the old excavations. Please let me know if I can do anything in Samos for you or for others.

With many thanks for your help,

Yours very sincerely,

Visit to the Kerameikos with ELW

on 4. VI. 57

ELW needed to look again at the Roman pieces in the Kerameikos, which were 11 in all, before publication, as she had not seen them since 1951 when she was beginning her studies. As she is leaving for ^{Tübingen} Germany tomorrow night, and to manage to get in today, if possible. ME telephoned Modiafys, ^{on Saturday} who told us to go to the Ministry and ask for a paper; Marinatos was to be there till 2:00. In fact he was not there, and Mitos instructed me to write an application on the spot, Longhand, and he would see to it, and we would have it by Monday. Monday was the day of the train, one of the building & the Greek authorities. However, nobody saw any of us on this occasion, and the ²εἴρημα reached us just about 6:00, by hand, to Nika in the office downstairs. Today, Tuesday, we began at 9:15 to try to reach Modiafys for the keys; telephoned several times, at considerable intervals, he was not on the Acropolis yet. Finally we took our stuff to the Kerameikos, ^{where we often used to find things; when it was a change} and they called for them. They told us to come to the excavations on the S side, ^{M.} he would be there. When we got there, we had gone to the Acropolis. We were greeted, not very pleasantly, by Miss Τραπεζοπούλου M.'s assistant, who said we should not have gone straight to the Kerameikos. (!!) Fuss made by M., who complained of the ²εἴρημα concocted by Mitos's, said it should have requested publication rights - when was our permit to publish? He finally gave us a guard (Ἀσπικὴς Παναγιωτόπουλος). We got into the 2αὐθίρη after 11:30, and left again after 1:30.

OVER

406.24-18

Work done by ELW: check of these 11 items, and recording of 3 new stamped items that turned up (Ker. 335, 339, 340), plus a stamped Roman medallion VG 816 (inverted today) and some jars and fragments found here and there outside.

Work done by ME: recording of these items for our records, also 2 new Kirtlin items, now numbered VG 817 and 818. She wrote the numbers on the 3 new VG items (815-818) in their ink. She assisted in with measuring whole jars.

Work done by VG: photographed 4 jars from the parapottery, ^{406.24,23} and a grey (large) ^{406.22} (406.17,18) a Chian and an Attic (?) of about 500 BC, and a small ^{406.21,20} fragment of a mid-5th? according to resemblance with fragments from Baulthorpe well. (For brief description see list of Roll 406). The grey seems to be related by a topless one from a pre-480 Agora group.

Work done by AD: got out a part away ELW's objects, which was a nuisance for those from Case 17 and Sack 29. Took rubbings of all the Latin, old-new, and of the new Kirtlin. General servicing.

Work done by ELW: check of these 11 items, and recording of 3 new stamped items that turned up (Ker. 335, 339, 340), plus an unstamped Roman medallion VG 816 (invented today) and some jars and fragments found here and there outside.

Work done by ME: recording of these items for our records, also 2 new Kirdia items, now numbered VG 817 and 818. She wrote the numbers on the 3 new VG items (818-818) in their ink. She assisted me with measuring whole jars.

Work done by VG: photographed 4 jars from the parapet, a ^{406.24,23} Chian and an ^{406.22} Attic (?) of about 500 BC, and a small ^{406.21,20} foreigner of ca mid-5th? according to resemblance with fragments from Baileia wall. (For brief description see list of Poll 406). The ^{with 1st measurements} grey seems to be matched by a ^{with 1st measurements} tephros one from a pre-480 Agora group.

Work done by AD: got out & put away ELW's objects, which was a nuisance for those from Case 17 and Sack 29. Took rubbings of all the Latin, old-new, and of the new Kirdia. General servicing.

Work to be done on Kerameikos material

Last-made side views, which have been attached to small cards and checked with objects, will be attached also to master cards. See if new master cards have been made for all these *σείδηρα*.

Lists of old and new numbers in sequence - the typed copies of these lists must be annotated from the corrections on the originals. Copies then given to Threps. and to Kibler.

Lists by finds - these perhaps not to be made, unless demanded.

I. e. no summary of the Kerameikos as such, perhaps until after corpora are done. Unless demanded.

Keramat - putting small cards in order

M.S. 5 do.

Knide

Duoin put in alph. order by alphabetical, first of the
2 names. ✓

Incomplete stamps

File by a name, or by a division of name.

Those not read, & be in numerical order, 0
separate from □

Every one of these files, check in numerical lists
& see if can be found in file by numbers.

When new guides needed

make then for Op. } and file.
Hocd. }
Saps. }

check previous files

(Point 2 up-also make files w. files.) ✓

Tracing

- 1.) Check if all small cards are present (against list)
- 2.) Put small cards in alph. order
- 3.) Type a list of them ^(anti) & send copies

Ἀρεά 8-9-50

Kommunion Plow

Note for which no space or available cards

Ἀποκράτης fab.

Note that the characteristic fractional stamp with the
^{and indicate of word die}
 line down to middle, appears here as 2 sizes of
 small handles: VG 624 has about width of full-size
 handle, but is short and thin. VG 500 is also
 thin, definitely smaller. Km. 372 with mouth,
 distinctly earlier fabric; 3rd quarter?

Ἀποκράτης, sp.

not also ~
 Δόκρος handle
 VG 502: not all the
 with before 220-
 early angular

VG 627 Sharpish, angular - certainly post 200
 (note large letters) VG 502 might be earlier,
 but not very early - like Ἀποκράτης handle.
Ἀποκράτης, fab.

Type of VG 628 - incomplete - not understood.
 Proc. not Δ. III with letters. Angular but
 does not look late enough.

Δαμόφιδος, fab.

^{sp.} VG 597 Angular, rising, short-topped. Stamp
 set close to neck. Rim of slight projection.

Δάμων ^(sp?)

^{sp.} VG 630 Broadish, curves down close w. v. line
 and. Rim characteristic, but w. little projection.

Διοκλῆς, fab.

^{sp.} VG 760 Slightly curved; rather short top, not
 much rise. Clay die

March 27, 1951

Wrote to Kibler asking if OK
for Mr. Bon & ^{publish} to the Times, and
Lydia to publish in Latin.

Dear Miss Grace,

many thanks for your letter from March 27. I am glad to hear from the progress of your studies of the Kerameikos-handles and I should be much obliged if the two specialists you write could publish the Thasian and Latin stamped handles of the Kerameikos-material.

With the best wishes
for your publication

Yours sincerely
Karl Kübler.

Tübingen - Listmann
Linsenbergstr. 25

Dear Miss Grace,

18. 4. 50

many thanks for your kind letter
I received a few days ago. You are right,
the permission to use the amples and
les from the Kermerkos in publication
is given to you a long time before the
war and I am very glad to assure you,
that these bundles are free for you to
use them. Twenty or more years ago
someone german fellow has planned and
started to prepare a publication of
this material, but there was no occasion
to finish this work. Please to use
also the whole vinejars from the Ker-
merkos in your studies. Unfortuna-
tely the field books of the excavation
are not in my hands, but there are
only a few records about these finds.

With the best wishes for your
important investigations

Yours sincerely Karl Kießler

April 5, 1950

Dr. Karl Kubler
Tubingen (14b)
Lustnau
Linsenbergstr.25

Dear Dr.Kubler:

Two American girls who have been with us lately on holiday from their studies at Tubingen tell me the city is charming, and fortunately not damaged. I was glad when I heard it was your home.

I am writing to find out something about the stamped amphora handles from the Kerameikos, which I saw, in their sacks and cases, yesterday. I believe that you or your Institute gave me permission before the war to study these stamps, and to use them in publication, but I find I have nothing in writing to this effect. The Greek Archaeological Service has agreed that I may study and photograph them as far as they are concerned, and arrangements have been made tentatively. But I noticed yesterday that the handles have been numbered, and to some extent sorted, so I am wondering whether someone else has started to prepare a publication.

I should be much obliged if you would tell me whether this material is free for me to use, and if it is, whether there are records about it to which I may have access. I am assembling an index, and the aim for this year is to get in the handles in Athens. The publication plan is for a Corpus, if money can be found, and in the meanwhile for illustrated studies, with as broad a basis as possible, of particular groups, sequences, etc.

your

I should be glad of your permission to use also whole wine jars, even though unstamped. The study of these is of course a necessary part of the study of the stamps - or vice versa. I have this year sorted out some hundreds of jars at the Agora, and shelved them by date and class.

The Agora staff and director, Homer Thompson, are assembled and working, but very little excavating is going on, or planned for this season, owing to lack of funds. Investigations this year will mostly be concerned with the Stoa of Attalos, so it may be ready for reconstruction. I have my personal interest here, because many stamped handles are found in the various strata underlying the Stoa.

I hope you are well.

Yours sincerely,

Virginia Grace

AMERICAN SCHOOL
OF CLASSICAL STUDIES
ATHENS, GREECE.

20 March 1950

Dear Virginia

Mr. Lord informs me that the business has been transacted. At your convenience will you please make the appropriate deposit with Mr. Athanassiades.

Yours,

AC

P.S.

I have just received from the Ministry of Education a written statement of its refusal to move the amphora handles from the Kerameikos. It contains, however, a specific order to the Ephor of the Acropolis to make this material available to you and to provide "all facilities daily."

AMERICAN SCHOOL OF CLASSICAL STUDIES
ATHENS, GREECE.

11 Feb. 50

Dear Virginia

The Council refused the request for permission to move the handles, on the grounds of a general fixed rule - a question of principle and precedent. They regret to give this unfavorable reply, and promise all possible facilities for work in the store-rooms.

Sorry.

Π Ρ Ο Σ

Τό Ὑπουργεῖον Θρησκευμάτων καί Ἐθνικῆς Παιδείας

Διεύθυνσιν Ἀρχαιοτήτων

Ἐνταῦθα

Ἐχομεν τήν τιμήν νά θέσωμεν ὑπ' ὄψιν ὑμῶν τά κάτωθι.

Ἡ παρ' ἡμῖν ἐργαζομένη ἀρχαιολόγος Ἀνίς ΒΙΡΓΙΝΙΑ ΓΚΡΕΪΣ ἀπό μακροῦ ἀσχολουμένη εἰς τήν μελέτην τῶν σφραγίδων, τὰς ὁποίας φέρουν αἱ λαβαί ἀμφορέων, καί διεθνῶς γνωστή ἐν τῇ εἰδικότητι ταύτῃ, ἐπιθυμεῖ πρὸς συμπλήρωσιν τῶν στοιχείων, τὰ ὅποια ἔχει ἤδη ὑπ' ὄψιν της, νά ἐξετάσῃ τὰς ἐν τῷ Μουσείῳ τοῦ Κεραμεικοῦ ἐναποθηκευμένας τοιαύτας.

Ἡ ἡμετέρα Σχολή παρὰ τῇ ὁποίᾳ ἐργάζεται ἡ Ἀνίς Γκρέϊς ἔχει θέσει ὅλα τὰ ἀναγκαῖα βοηθήματα, ὡς εὐρετήρια, φρελλοὺς, καί τὰ κατάλληλα φωτιστικά μηχανήματα εἰς τήν διάθεσιν της ἐν τοῖς ἐργαστηρίοις τῶν ἀνασκαφῶν τῆς Ἀρχαίας Ἀγορᾶς Ἀθηνῶν.

Ἐν τῇ ἐπιθυμίᾳ ἤδη νά ἐξυπηρετήσῃ τήν συμπλήρωσιν τοῦ ἔργου της, ὑποβάλλει τήν παράκλησιν ὅπως εὐαρεστηθῇτε καί ἐπιτρέψῃτε τήν ἐκ τῶν ἀπόθηκῶν τοῦ Κεραμεικοῦ ὑπ' εὐθύνην τῆς Σχολῆς μεταφοράν τῶν ρηθειῶν λαβῶν ἀμφορέων εἰς τὰ ἐργαστήρια τῆς Ἀρχαίας Ἀγορᾶς Ἀθηνῶν ὅπου ὑπ' εὐθύνην τῆς Σχολῆς θέλει γίνῃ ἐπὶ δέμηνον περίπου ἡ σχετικὴ μελέτη.

Ἡ τοιαύτη μελέτη εἶνε ἐνδεδειγμένον νά γίνῃ ὑπὸ τὰς συνθήκας ταύτας διότι 1ον) ἐν τῷ Κεραμεικῷ δέν ὑπάρχει ὁ ἀπαιτούμενος πρὸς τοῦτο χώρος καί ἀνεσις. 2ον) Διότι ἐπὶ τύπων σφραγίδων μὴ ἀπολύτως καθωρισμένων ἀποβαίνει πολὺ χρήσιμος ἡ παραβολή αὐτῶν πρὸς ἑτέρας ἐκ τῆς μεγάλης ἐν τοῖς ἐργαστηρίοις τῆς Ἀγορᾶς συλλογῆς καί μελέτη ἐν παραλληλισμῷ πρὸς τὰ εὐρετήρια καί ἐν τοῖς ἀρχείοις σημειώματα, τὰ ὅποια καταλαμβάνουν ἐν τοῖς ἐργαστηρίοις τῆς Σχολῆς ἐξ συρτάρια δελτίων. 3ον) Διότι ἡ ὅλη ἐργασία εἶνε ἀνάγκη νά ἐκτελεῖται κατὰ τὰς ἀπογευματινὰς ὥρας ὅποτε οἱ σπουδασταὶ βοηθοὶ αὐτῆς ἐν τῇ προκειμένη ἐργασίᾳ διαθέτουν τὸν ἀπαιτούμενον χρόνον. 4ον) Διότι κατὰ τὰς βραδυνας αὐτὰς ὥρας ἀπαιτεῖται δυνατὸς φωτισμὸς διὰ τήν ἀνάγνωσιν καί ἐξακρίβωσιν τῶν σφραγίδων, τὸν ὁποῖον δέν διαθέτει τό ἐν τῷ Κεραμεικῷ Μουσείον.

Ἀμα τῇ ἀποπερατῶσει τῆς μελέτης ὑπ' εὐθύνην πάντοτε τῆς ἡμετέρας Σχολῆς θέλουσιν ἐπιστραφεῖ αἱ ἐν λόγῳ λαβαὶ ἀμφορέων.

Ἡ προκειμένη αἴτησις ἀποβλέπει - ὥς εἶνε πρόδηλον - εἰς τὴν ἐξυπηρέτησιν τῶν ἀρχαιολογικῶν μελετῶν ἐν τῇ χώρᾳ, εἰς τὴν ὁποίαν εἶνε εὐτυχὴς νὰ συμβάλῃ ἡ Ἀμερικανικὴ Σχολὴ Κλασσικῶν Σπουδῶν. Ἐν τῇ πεποιθήσει δέ ὅτι συμμερίζεσθε τὰς ἄνω ἐκτιθεμένας ἀπόψεις καὶ ὅτι ἡ αἴτησίς μας θέλει γίνῃ ἀποδεκτὴ, παρακαλοῦμεν ὅπως δεχθῆτε τὴν ἐκφράσιν τῆς ἐξαιρέτου τιμῆς μεθ' ἧς διατελοῦμεν.

Ὁ Διευθυντής

ΤΖΩΝ Α. ΚΑΣΚΕΪ

February 1, 1950

Memorandum for the Director

It would be a very great convenience for me to have for study in my workrooms at the Agora the stamped handles from the Kerameikos excavations.

These are about 1200, stored in 2 larger boxes (holding perhaps 100 each), 9 smaller boxes, and 16 small burlap sacks. The sacks and boxes were seen in June 1948 by E.V. in the long storeroom at the Kerameikos, position as indicated in the accompanying sketch.

The reading and tabulation of these handles will take us probably two months, of work which will have to be done mostly in the late afternoon, the hours which my assistants can give me. The majority of the stamps will undoubtedly be Knidian, fifty percent of which cannot be read in full without the help of our index (six drawers of file cards) and a strong reading light. It would probably be as inconvenient for the Kerameikos Museum to have us working there, occupying so much space and time, as it would be for us to have to transport back and forth our apparatus, which is needed also at the Agora. It is also often useful, in the case of stamp types not yet fully established, to be able to compare actual handles with possible duplicates in the large Agora collection.

The Ministry has agreed to have other Kerameikos material studied at the Agora: the bones examined by Angel. I should call for the handles personally, and take the lot all at once or in parts, as preferred by the authorities.

The recording of the Kerameikos handles is part of my program for this year as Fulbright Fellow, and would fit best into the schedule as soon as conveniently possible.

I am most obliged for your attention to this matter.

Keramiechos JOURNAL 12.VI.50 [- 30.VII.52]

Note that as
Miss E. looks to
cases from the
shelves, she
did not record
any shelf labels
with particular
cases

Small cases on shelves "23 1898" etc. : 9

(handles seem not to be numbered)

Scoops on shelves : 15 (2 taken out) Handle numbered

Scoops in box 2

Large cases on floor : 2 (handles numbered ap/ly)

Besides them, there are a few handles in and then
in boxes (assembled by Threps. in old museum)
and in trays in ^{long} spotted near main group

Them seen in company of guard (Spiros). It seems necessary
to be accompanied at every moment.

We brought the files over today, arriving at about 4:00,
due to various delays with car. Miss E., and Costa & Chelpe.
Found waiting, Threpsiadis and Kotzias. As I was worried
seen in long spotted will soon stop, settled in old museum,
near door. Has turned out cloudy; I will be back to arrange
light.

Note that a good many, but not all, have numbers.

(see list of containers).

(over)

~~16.VI.50~~ Miss S. went also 13.VI. 14.VI. to which little I went too.

16.VI.50 13.VI Miss S.

14.VI " " = VQ, at which time we find we need ~~more~~ chairs, and if we are to have lights, ^{must} ~~must~~ bring an electrician.

15.VI Miss S.

16.VI " " ; and I go this aft. w. chairs and other smaller necessities.

Present plan of recording, etc.

We are using only the numbers found on the bundles, so far. When a sack is finished, the cards are ^{to be} put in numerical order to check duplicates in numbers, which are also hard to read. The items in each sack etc. to be listed in duplicate (one for me one for ^{Miss} Thelma). ~~Do~~ Not put back in sacks till I look through bundle and cards. Then, items to be phot. [↓] are left out, marked w. sack number. (new types, or better examples). The sacks are marked with serial numbers 1, 2, 3, etc., and, as finished, are set in a row apart from those ^{not yet done} ~~not finished~~.

Shall go through those with numbers, and probably give (further or) numbers to those we find worth.

(2.)

23. VT. 50 36.03
Friday, 9:45 a.m.

Keramides

19-20
~~20-21~~ Miss Z. was with me in Corinth, and 21. VT The
guard didn't show up, hoping she was still in Corinth. Work
here this week: Thurs., Fri, Sat. (on her suggestion) making about
16 hours.

Andrew the Agoravender has installed electricity for
reading stamps, bringing it from upstairs ^{outside} ~~in~~ the guard's
house. It has to be turned on upstairs, and the lamp there
unscrewed. The wire ^{has only its indoor covering} ~~is uncovered~~, and I feel some doubt
whether it is safe.

Got through Sack 12 reviewing Miss Z's
work.

27. VT. 50 (Tuesday)

vg 8:30-11:30

Came today in particular in order to consider museum as
place to get side light for photographs. Decided on a place.

We have started on the cases, first ^{one of} them which
appeared to have numbers on the base (the large ones on the
floor). I turned out that only a sprinkling of handles (10) had
numbers on them. Miss Z. has sorted the Kinds for the other
and given them vg numbers, with a K beside them on the
inventory card. The non-Kinds (including LK and BK) remain
in heaps on the floor ^{at least} ~~marked~~ with case numbers. These handles
have not been read or numbered.

Bring more
small cards

(over)

Got through Sack 16, and checking of Theoria (from
Sacks 1-12)

30.VI.50 This with Miss E. shipped Wed but would Thursday
(28 Peter + Paul) and will come Saturday.

Came this morning to photo in museum. Some delay in getting
under way from Agaña (discussion w. H.A.T. on joint pub. w.
the French). Started ca. 8:30 in museum, then till 10:30, &
about finish Roll 144. Grand at the Museum Charalambos.
Andreas helped in & bring stuff, and returned to Agaña
at 9:00.

Miss E. is on Case 20 (large one).

Got through Kodak, on accidented Tassin, and a
couple of Kodak w. K numbers, of Case 17. Not ~~all~~
of numbered Kodak ^{or} ~~and~~ used.

4.VII.50 Roll 144 turned out pretty well. Nilsa wants a little
longer exposure. Does not look to me as good as Corintha,
but one sees that on the actual slides, when photographing.
Today - Tuesday - we did Roll 145^{again in new museum}. Most of adjustments
made by Miss E., but I was there to set up environment
shaper, and suggest other lighting, etc.

In old museum, got through Kodak of Case 18. Miss
E. finished Case 22 (doing only two Kodak, beginning with
Case 17).

Tomorrow morning, first thing, Andreas to go and read
Kodak, laying them out alphabetically, take off card, ^{over} some
to be kept separate. Shall go with him, come back quickly.
He also takes ^{typed} cards for Miss E., Nielsen (as if there is one there).
and here, for him to write with.

Keramides6.VII.50
Thursday

Visit put off till today, when Andreades and I were both there - with Miss E. - all morning. She is in Case 24. I checked first enlargements of per. handles (~~both~~ Dirimitis), and found them about 5% over-enlarged. (Roll 144). I reviewed Kridia in Cases 19, 20. Andreades sorted ^{and read} Rhodian in Case 17, laid them ^{alphabetically} on two boards. The small cards have been left with the handles, awaiting Miss H. If Miss E. finishes Kridia in all cases, she is to start on $\frac{1}{4}$ gwr & r.

11.VII.50
Tuesday

Photographed those ready, Miss E. working partly alone (while I visited museum, and studied Geometric horse loaded with jars). Noticed later (in afternoon at Agora) that the measuring cardboard is just brown .001 too short. It seems possible this may account ^{partly} for over enlargement in supposedly actual sig. end. We returned to Apollon (old museum), and I reviewed Case 21 Kridia. Andreades during the morning sorted the Rhodian from Cases 18 and 19, and wrote cards for them.

12.VII.50
Wed.

Today we (And. & I) went about 9:30 to Keramides, where she sorted the Rhodian of Case 20 (numerous) and wrote some of the readings, in addition to helping in various other ways. I reviewed Kridia of Cases 22, 23. Miss E. had embarked on the Scáfope of Case 17, having ~~to~~ sorted all radii and cases in long apollon (saw them containing, on a few handles mixed with other things) and finished all Kridia. She had numbered this first batch following the Kridia. Not very (over)

pin number. The *Siafopa* in subsequent cases have been sorted by Vg and numbered by Andreas - cases 18, 19, 20. Vg numbers now are to about Vg 428. Miss E. continues to work on these *Siafopa*, annotating duplicates on Agave cards as well as making Keramian small mounting cards.

14. VII. 50 Friday
and
17. VII. 50 Monday
To Keramian ^{on Friday} with all 3 helpers. Andreas chiefly numbering, as well as helping all round. Miss T. finished sorting ^{and writing notes by} Photo. of case 20 which he numbered to earlier cases, then ^{she} made a start at tabulating and checking with the files. Miss E. went through some ^K cards for Miss Polons, then continued with the *Siafopa*. I checked through the last of the Kinds, started on the *Siafopa*. Decided I must do them with the cards, in order to add notes on clay, to decide better about desirability of photographing, etc. So she had better sort the *Siafopa* cards away from the Kind files - has to be done eventually anyway.

~~Miss T.~~
Miss T.

On Monday Miss T. did not come, having urgent personal business.

18. VII. 50 Tuesday
(today)

Again with all 3. Miss E. mostly photographing, me fixing the set-up, and helping from time to time ~~absent~~ in intervals of listening to E. Smithson's lecture on the museum. Miss T. gets through about half of case 17 ^{Photo} with checking and tabulating. Miss E. after photographing, starts to sort away the now Kind cards. I work on *Siafopa*, finishing case 17.

19.VII.50
Wed.

Andreades remained in the Agora, sorting Karamitros cards into numerical order, pasting on contact prints from rolls 144 and 145; and continuing with the rearrangement of handles in Agora cabinets.

Miss S. and I photographed in the New Museum, doing about 22 shots together, after which I left her to finish the roll. She did about 6 more, then winding got stiff, she came down and we finished with three stamps of long pieces, done outdoors in the sun. She continued sorting the Scápopa cards from the Kinkin, and corrected and filed some new cards from Miss K.

Miss H. worked on with Pelotie of Case 17, and I got through Scápopa of Case 18.

20.VII.50
Thurs.

I listed and numbered the handles in the ⁸~~7~~ boxes

from 1942 excavations assembled by Threpsides and Miss Fyfe and Miss Ghali (?) as having handles in them. Recorded the labels in and on the boxes, also other objects (lamps etc.) with the handles. In all, 54 handles. I worked on the Scápopa of Cases 19 and 20, but owing to interruptions I did not finish either.

Miss H. continued with the Pelotie. Miss S. continued sorting away non-Kinkin cards from the index, and worked on the Kinkin from the boxes listed. Andreades stayed at Agora, working a rearrangement of Pelotie and other charts.

315
461
54
X.65
Are there
Boxes 30-36,
from which
(K.G.)
can K.G. 762
815?
- but then are
only 7 boxes.

21. VII. 50

Friday

Went to Karamba with Anderson about 9:15. He marked ^{work} labels for the 29 sacks and cases. I sorted out the photographed by sacks. Miss Z. finished the Kridin in the boxes. With help of Spino the ground we got out the earlier sacks, and made a start on checking duplicate numbers and contents of sacks. Found that a whole sack of Plecton had not been kept out for Miss T. & Tabulate and check for photographs. The sacks have been kept in numerical order inside the old museum.

Miss T. continued checking & tabulating the Plecton.

There was too much confusion. Shall bring Miss Z. photo. & get into ^(entirely for 144, 145) Kridin files, in order to keep her busy while being by for consultation when needed. Then any error in ident. of Plect. bundles can be checked. Kridin files should come back to Agora after Monday's work.

24. VII. 50

Monday

Went to Karamba with Anderson about 9:15. Finished check of duplicates, and he tied up and labelled sacks 1-16, save 3, mostly Plecton, writing Miss T.'s work, and 15, from which we have 5 photographs - Kridin work. Finished sacks have been put into old apothecary. Old labels, when there were any, have been tied outside again.

I checked Kridin from Boxes 30-36. Those not to be phot. have been returned to their boxes. The Kridin files have been brought back to the Agora.

(24. VII. 50

at Rhodini
Miss H. is working on Case 20, nearly finished.

Help Miss E. put in photo. from Roll 145, and did a little further work on Scápopa, besides helping with closing of sacks, etc., and preparing for photography tomorrow.
No further work by me on Scápopa today.

25. VII. 50

Tuesday

Exposed most of Roll 149, then gathered up machinery to take to Corinth this afternoon. Taxi & Agor, with Miss E., a chair, etc.

26. VII. 50

Wednesday

27. VII. 50

Thursday

28. VII. 50

Friday

Miss H. working on Rhodian, closing, tabulating.
(Miss E. being at Agor, Andreas and I in Corinth.)
Miss H. finishes Rhodian, brings all files - but not all apparatus - to Agor, as I will not go on at Keramides until after HAT leaves.

1. Aug. 50 at Agor

Plan for finishing at Keramides:

Set 2 girls to photographing Rhodian, while I go on with Scápopa. I start the film. When it is finished, one of the girls comes down for another, and helps me with odd jobs that may have come up.

When Rhodian are all photographed, lay them in a general alphabetical series, all cases. Cards the same. Then possible to write fabric notes with economy.
afterwards, ~~lay out~~ sort into cases, by numbers.

8. IX. 50

Miss H. and Anderson occupied giving numbers to National Museum Period until time for their holiday, the last working day having been 1. Sept., viz 2 Sept. So she has not done any plot.

5. IX. 50 Miss E. came to Karamukha with me on Tuesday 5th Sept. We had 500 watt lamp, then brought ground glass and amplified handles down from ^{new} museum and plot, in old museum, with 500 watt

and 150 watt lamps. Worked at first together, and on second roll achieved good speed (about 2 minutes per handle average). Roll 153?

8. IX. 50 Miss S. has worked alone this morning and part of yesterday, averaging 6 minutes per handle. Has not looked in place today, my fault, first time she has set up alone for photography. There are under 30 or 40 Period in plot.

State of tabulation etc. of Karamukha handles: to kind have been read, tabulated, ^{index} cards made for new types, photographs taken, then for the boxes await printing of their pictures. There may be a few odd remnants, such as those with K numbers in Case 29. The Period have been read and tabulated and two index cards made for new types. The majority have now been plotted, but no prints except for the few found in largely kind sacks. (See now yet from Cases 17 ff.) General fabric notes are still for me to take on them, long business. The Diapapa: making made by Miss S. of most, but much work still for me there, fabric note etc. Except for some Thasian, no new index cards have been made for them - do it after listing and the sorting.

11.IX.50 Finished phot. of Rhodion & Karameris today. Miss Z. also gathered together for various cases the ^{Rhodion} alphabets in alphabetical order, for me to start - up - the fabric notes, and general review. Brought files and camera, left 500-watt lamp - sundries. Didn't work then till after

Apollonia, perhaps not till after Rhodes.

5th 22.IX.50

2 diminutives phot. & to Bonn - Mrs. Ghali at the Karameris; Mrs. B. took several herself. (See note - dark feather)

7.XII.50

Came with Andreades about 9:15. He is working on sorting Rhodion alphabetically for fabric notes to be made. I have been checking some missing or anomalous items, and will continue with Scápopa. A. put all Rhodion in general alph. order.

9.XII.50

Came with Andreades on 8:30. Delay of about an hour, because Scapápopa on the Acropolis forgot today was Saturday, (Andreades went up & told him.) (Another time, both telephone began leaving Agora.) Andreades put Rh. in more refined alphab. order, also started packing cases 17, 18, 19, 20, with Ku. and such Scápopa as were ready. Photographed samples from Scápopa - of Case 17 not found - may be up in the Museum. Fixed and took fabric notes on Rhodion through Aíoxívas, also made some progress with Scápopa - now in Case 20 & 21.

12.XII.50

(Andreades ill)
Went alone, getting in about 9:00. Worked on Scápopa, Thrasian first (have taken back files to stay), Case 29 still Ede, and all the Rh. fabric notes - phot. checked. Left back for Ku. by F.V., as the School had been doing in Ku. today.

14. VII.50 Key trouble, got started only at ca 9:30

(17.7.51) Worked till after 1:00 Miss E. went through the stuff for Case 29, and J. checked and listed an identification, filling out the list of old numbers. We got some bundles put away, clearing up a bit. However ^{the majority} of the Plesian still remain to be studied by me. Also we have quite a few fish sp. assembled to be photographed. Then may be a week of merrings to put through them. We took her one of our two chairs, also the 500 watt lamp.

Miss K. has finished copying one of the lists for the Kerasiades but it has not been checked. To be kept with carbons with originals, each page, for addition of corrigenda, unless Threpsades makes his copy.

23. VII.51 Threpsades having told me I could get in without fail, from 8:00 on, ^{and} ~~arrived~~ having telephoned to the Acropolis and ascertained that Diamantis had gone down with the heps, ^{taxi, 9,000} arrived at 9:15, unable to raise anybody at upper house except one disagreeable old woman & voice of a disagreeable young woman, all professing to know nothing. Down at Old Museum, find wife of old guard, who is friendly, and hobbles back on a crutch to find the guard. He turns up at 9:35, says he was in the museum court washing shields, didn't hear me knock. He goes back to Museum to get heps.
At 10:20 I am in. ^{for Dapnēstas} Got through Zynodotos, leaving at 12:15-
24. VII.51 Got in by 8:35 with Spiro. Further study of Plesian. Zigras through Kαζετόμενος.

Plan for Miss Z. to rustle a.) electricity, b.) needed Thasian handles out of sacks etc., while I ~~also~~ continue with notes on Rhodian. Everything being assembled, I photograph. She helps, or sets Rhodian in better order.

8. IV. 51

v9, M. 2.

At 9:20 we get in, after waiting 3/4 hour, because on the Acropolis they forgot. Have learned that the thing to do is to go to the Acropolis, and get the guard with the key, in a car. We got out to Thasian (saw K 25, card of which was out!) and Mrs. B. took notes on them. While she got a start, and used the lamp for making, I took fabric notes on Rhodian, K d z w r o s through K p e w. Then photographed 11 Thasian, before packing up at 12:45, when Mrs. B. finished. In the meanwhile, Miss Z. has put away - lots of Rhodian from the first part of the alphabet into their cases.

Next time to be Wednesday 14th then Thursday.

On Wednesday, finish photographing Thasian, ^{then finish film on Didopora ends up.} Take some fabric notes, especially check enlargements available for Roll 149. Remaining time, proceed with Rhodian fabric notes. ^{Get film developed.}

On Thursday, Miss Z. to put in numerical order all those ^{still} to be phot., while I continue w. Rhod. fabric notes. Then I phot., she helps, or puts away Rhodian.

14. IV. 51

(done) (keep on time) Finished photographing Thasian stamps, ^(has job) did some ^{Thas.} side views.

Some experiments on new camera, side views and a stamp. Checked enlargements, good.

15. IV. 51

(Rubinger) (keep on time) Got out Latin stamp (10 of them), and E. Lyding came and made readings of them. Photographed them (stamps only), and a few

more Thasian side views. Mum. Bon came and looked at the dog stamp^{log} (Ker. Vg 25) and the one with dolphin (Thas?). She is dispirited following talk with Dams. ^{Took fabric notes on Thasian, when dit infixed.} Rubright helped by putting bundles and small cards in numerical order, getting things out of sacks & returning them, etc. Showed him how I photograph, and how the various records were made, and photographed a relief lamp with my set-up, & show method. On leaving at noon, left behind: 1 chair, metal stand, ground glass, plumb-bob, cable release. To return, I hope, Wed. 21st. Note that 150-watt lamp was transmitting small shocks whenever touched anywhere but on switch. Does not do it on return to Agora (wooden floor) but wire looks badly worn. Having fixed. Next time: probably best on Wednesday to get through as far as possible with Rhodian fabric notes.

21.III.51 Arr. ca. 8:40, Mum. Ghali about 9:00. Ten little bits I phot. now has one eye out. With Mum. Gh. (to head her) phot. the Rhodian waiting for pictures, and one or two others. Continued for $\frac{1}{2}$ hour on Rhodian fabric notes. Left at noon.

22.III.51 Arr. ca. 8:20, Miss E. present. She washed the ground glass (w. soap & warm water from the School), put away and got out bundles, oilst the camera stand. Discovered I had forgotten camera. So she came to the Agora ca 9:45 and I continued w. Rhodian fabric notes (through N). ^{and some sides} Estimated there are at least 120 photos to take there still, on 4 films. Also sawd more full markings on Rhodian fabric notes. Again, probably best on Wednesday to get on with Rh. fabric notes.

28. III. 51 Came alone and worked on Rhodian fabric notes. Got through Tavroavias fab. ^{hells}. Feghmann was there.
29. III. 51 Came with Rubright. While he put away finished Rhodian, did Tavroavias sp. Then photographed (Roll 163). Then Rhodian he prepared (centered, forward) and I checked color ready, measured, mopping up several messes. Leaving ca 12:05
4. IV. 51 Came about 8:35, Rubright a little later. He prepared and I checked and took photo. ; toward end he took, also, playing with the light box. (We stood on a wooden box, not to get shock from the 150-watt lamp; though it has been checked for being out of proper order, it still shocks when one's feet are wet.) Rh. fabric notes Παιδαίdas - Σωκράτης. On way out, looked at stuff from the cistern on Philopappos, which Fassio from the Agora is working in the court of the new museum: incl. several Thasian, one at least on a large piece of paper, and a Rhodian red, and other fragments, with the 2 stamps: 'ΕΔΩΚΕΝ and 'ΕΡΙ ΑΠΟΡΙΔΑ ΑΡΧΑΙΩΝ. New combinations.
5. IV. 51 Waited for Spyros & got key, got in ca. 8:30, Rubright ca 9:25. He took photo. almost without help, got through 10 before noon. I did fabric notes Σωκράτης - Δεδοκράτης, and issued and recorded objects photographed. He goes to Corinthe Saturday, and will work with us no more.
11. IV. 51 Note for tomorrow: ^{when Miss G. comes,} get Sach 3, and from it K 324, Rh. of Xyrtos also, then mugged out items for Sach 6 for fabric's desc. From Case 17, get at least Rhodian (for Louf)
- Finished part of the Rh. fabric notes, and worked on part of the difficult

and unrec^{ed}_{x1} ^{Rhodian} making note for housework in files at Agora.

12.V.51 Got in early, ca. 8:15, finished the study of the difficult Rhodian, with verifications from files at Agora. Miss E. arrived 9:45 (following Kátoia Sou d zia), put away Rhodian in cases, and was finished Roll 164 on Rhodian stamps selected for further photography during my making of fabric notes. She made set-up, w. l. occasionally I altered or checked, and I did the lighting. Left before 12:00. ^{These came out faint. See film list for speculations.}

Remains: to run through to S. á fop a and write the fabric notes, select for photography, phot. Plat. also 16 or so more Rhodian stamps, Rhodian & other stamps on long frags. (diff. set-up), side views ordinary size and largish and still larger, - necks, objects as much as .30 high.

Need: background ^{2 pieces} paper, sand box & sticks long pieces in (and color them ^{slightly} with white paper?), scale & appear in picture.

19.V.51 ~~now~~ got in at 8:30. (Miss E. at E. Me. looking at loans) In starting to go through to S. á fop a, observe that not only are some of these backs in their sacks without really sufficient recording (e.g. K1, of which I did see H.H., if not perfect photo -), but also the file itself is not in sufficient order yet for notes to be taken against it. E.g. for K 33 H. pack: the photo. on the file sent is of a w. for example, but I don't know what better one there may be. All this would avoid my getting through Agora S. á fop a, for which I must have time now. So, not to through there & write down notes to these things.

2.VI.51 Sat. aft. Took a few ^{stamps on} photo. of large objects in direct sun, to finish an outdoor film. (Some for Philo. office, some for Kotzias)

26.VI.51

(from dig at city wall, south)

Photographing several of Thersipades' handles, which are new to us, or needed for the report.

Go first to new Kerameikos museum, ^{two recently} & do slight repairs on medals of jar found in Kotyia Philopappos cistern.

This has been spread out for some months in the court of the new museum, and I have photographed (poor exposures) the stamps on the large frag. of Thasian and Rhodian jars. G. Rogn E. looked at the pottery in general, and said it covered 75 years — somewhat earlier than I thought for my latest handles, the Rhodian sp. Hieron. (Two later kind handles, that wondered in from other lots of sherds.) Miss E. is making copies of stamps, to be investigated & sorted and typed. She is writing in pencil numbers in circles.

See ATTICA
MISCELL.
folder

~~When speaking of stamps & fragments~~

Thersipades has remarked that this cistern was not properly dug, that certainly many frags. found are not still with us. Numerous fresh breaks, the middle frag. of the ~~the~~ handles of the Rhodian jar missing, etc.

Of jars, apart from stamped frags.:

— — — E. Lyding turns up, wants to see the later again, so we go down to the old museum, and photograph Thersipades' stuff. Mudi-tin still to put in case, over the dyvasta, on shelves and table. Nothing a flower except corn, and Latin on a branch. (over)

Back to new museum, and pick, side views -
 Photos for of Hellanthes, P.H.S. .75
 side views of 3 items for Kerr, ^{side} ~~side~~ ^{side} ~~side~~
 another side w. 3 views for Phil. sister.
 No time to finish here.

2.X.51 in court of new museum
 Came today to finish notes on stuff, for
 Philopappas sister, and do a little photography ~~for~~
 in the apothecary. Therapsides not here, said to be
 sick in bed. Spiro lets us take notes on Phil. stuff,
 and opens the apothecary for me so I can see situation,
 test lamps etc. Old guard's wife cross about
 light bill. must try to ascertain what I should
 pay, and bring it. Spiro to find out where we
 can come to apothecary and work, and to telephone me
 at Agora.

4.X.51 M.E. photographed in old museum, took about 24 pictures,
 items wanted from Philopappas sister, and some side views of

⊗ Roll 121. Keramides items, mostly Rhodian ⊗. For me, gave to wife
 of old guard envelope containing 60,000 dr., for electricity
 and for maintenance of same, over four or five months.
 I did not go at all this day. Andreas Andreades went at 4:00
 to help her back with stuff, including pearl. stand and table,
 for use in Delos.

These side
 views ~~not~~
 very good, as
 also had
 not been
 trained how
 to do them,
 and they are
 difficult.

7.V.52 By arrangement with Mr. Thorpe, and by check in the morning with the old guard's wife, went down about 1:40, V9-M5, and began to map up fabric notes on miscell., and remaining photography, chiefly of miscell. also. Checked Phloxia side-views on Roll 171, cleared up some ^{old} identification, etc. problems. Finished Roll 193 on miscell., and took 8 Enid for developing, to check exposures, mostly used lamps. But as sun came in, used that ^{instead} ~~also~~ several times. Left most of the stuff there, to return. Spiro is on afternoons at present, which actually seems to work out better - less waiting for bags - now that M5 ^{in full time and} can be there early.

8.V.52 This afternoon got these labels, turned 2:00, having been held up by calls. (Hugo, Parastrephids). M5 did some putting in order, ^{with the kind} division cards fully alphabetized by first alphabetically of the 2 names; ^{adding those w. V9 nos.} cleared up - only cards out of fab. Phot. more than half Roll 194, on stamps (items ^{w. old numbers} assembled which had been omitted, or done badly) and the series of *Scia popa* ^{w. V9 nos.} continued. I took fabric notes on *Scia popa*. Some miscell. cleanings-up. Stayed till ca 5:25.

9.V.52 Stayed till 5:00 & HAT. Arrived 2:20. Finished fabric notes on Miscell. while recording Maria's photo. All stamp photo finished save a few on large frags.; but quite a few sides remain to be done. Stayed till nearly 6:00, finishing 2nd ¹⁹⁵ film. Remains to be done: sides of small & large frags., a few stamps on large frags., perhaps 1½ rolls. When returning 14.V.52: remember to bring hot water and board, clean piece of glass (or clean), something to stick big pieces in, or tripod. Plan to put

everything back in case, but not to let cases be disturbed or piled until our lists are complete, certainly not till after June.

14.V.52

Have arrived at ca 1:35, without old film lists, no pad & under new ones. Roll 196 stamps on large page, ^{in sum} outside, exposing acc. to meter $\frac{1}{40} + \frac{1}{30} + \frac{1}{60}$, w. 18; Kev. 215, 287, 321, 326, Kev VG 413. Then, ~~sides~~, with lamps, 18 and $\frac{1}{8}$, scale, no., date., sides; Kev VG 401, 414, 415, 416, 423, 424, 425, ^{Pontic} 440, ^{LK} 442, 445, 461, 470, 486, 487, 566, group (1), group (2), group (3), group (4), LK under VG 395, Kev. under $\begin{cases} 257 \\ 202 \end{cases}$

Groups of sides:

1.) Phosion: VG 719 VG 680 VG 677 251

2.) Chlorin - Phosion: 321 206 $\frac{1}{8}$ VG 476

3.) Musell., 3rd and 4th series? ^{BP} 207 ^M VG 365 ^{Ev.} 215 ^{Sch.} VG 413

4.) " 2nd and 4th series? ^{Nik. 8th?} VG 469 287 VG 735

Kevins: ^{PH .32} 257 ^{PH .275} VG 395

These groups were taken ^{on a clamp turntable, at 8} in the doorway, both sides open, not in sun but sun on a white paper reflector directed toward them. Helios reading rather varying, from $\frac{1}{30}$ and $\frac{1}{40}$ w. opening 7, holding the camera (not on tripod, i.e.).

Departed at ca 5:10, leaving behind the photo stand and bit roll, ground glass, lamps, one chair. Handlers returned to their cases, except those ^{just} photo, waiting for ident., and those from Sec 29, in order on the table and incomplete because of photo. To return not before June.

July 29, 1952

In the meanwhile, I came back one day, and took the ^{with stand} bit, needed for Chris, and the ground glass, which however we have not succeeded in cleaning.

Today, with delay in flight, started work at 9:50, to check final photo, and put things away. It will of course be necessary to get out a handle now and then, since nothing is yet published, nor even listed by finds.

The cases which have been standing open, with handles taken out and put back, sometimes in boxes by us, are now closed: the handles laid out in numerical order, and repacked in bags in their cases. The order is that of numbers go in first, smallest on bottom. Old Keramides numbers always on top, in case of recognition by somebody. Closed in left margin of original case list. M2 and 2 packing, the bag A. Andruddes lying out in numerical order for checking and packing. Left at ca. 12:35, not finished.

30.VIII.52

9:15
Brought drill, and Spina attached wooden labels to packed cases. M2 packs case 20 (large). Also case 21, and checked and repacked some sacks which had sat open.

I have read through this journal. We have attached to most of the wooden labels made for us by Chr. Andruddes 2 years ago. The cases and sacks being returned to the long apartment, and set in fair numerical order, all labelled.
(31.VIII.52)

We took home 29-30.VIII.52 the lamps, white paper background, the final chain, the addendum, also 5 Kouridica, & throw away at Agona, but they lie about belonging us. Said goodbye to guard's wife, gave her 20,000 for last bit of current. Without doubt, come back some day.
(over)

(30. VII. 52)

Mr. notes in the parlor room a series of photographs.
They are 18, all 5th and 6th? 4 chairs, 2 gray,
1 black (9) (and we have in complete assembly
as 5th) 1 chair 1 (mustang)

June 8, 1948

Dear V,

ad. Jones

I went to the Kerameikos again this morning to look at some things and this time I succeeded in locating the stamped Amphora Handles. The accompanying sketch shows where they are. There are 9 tarring boxes (@ ca. 50?), 2 boxes for kerosene tins (@ ca 100?) and sixteen small burlap sacks (@ ca 35?), which gives roughly 1200 pieces. They are sorted by kind apparently and many of them have numbers. They are quite accessible and it would probably be worth your while to have a look at them when you come.

Last time I wrote you, I realized the moment I dropped the letter in the box that I

38.02

had never answered your letter
about Boehinger. I'm afraid
that I haven't much to say.
As far as I know I have never
met him in person. During the
Occupation I once got as far
as his outer office, I forget on
what errand, but was headed
off by a secretary. I understand,
however, that he was usually
well disposed, and that it was
chiefly through him that Mr.
Hill managed to save 9 Plutarch
St., and himself as well.
I would have no objection to
writing, but I can't truthfully
say that I know anything
about him at first hand.

Hope to see you soon,

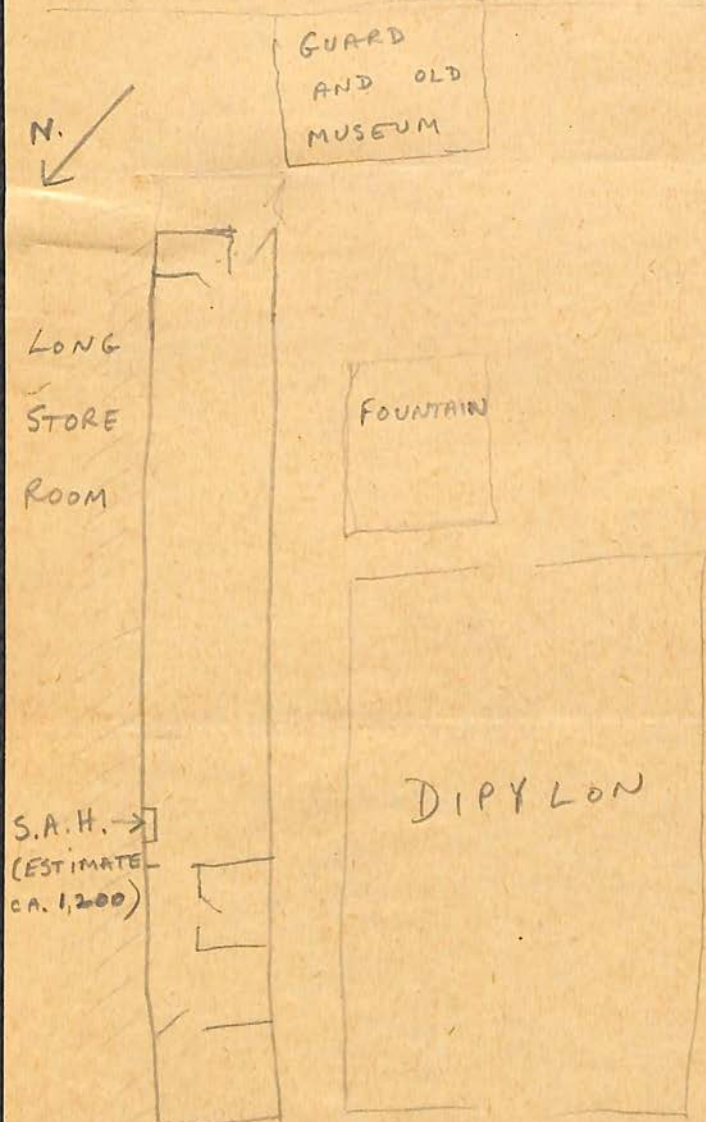

J.

ATHENS - KERAMEIKOS

SKETCH PLAN TO SHOW WHERE
STAMPED AMPHORA HANDLES ARE STORED

MELIDONE ST.

JUNE 1948

April 14, 1948

Dear V,

Some time ago I wrote Kraiker to try and find out about how many stamped amphora handles had been found at the Kerameikos. His answer came yesterday, and as you will see there are not very many.

This information is probably too late to be of any special use to you, but at least we know now what to look for there.

If you should come over next year as I hope you will, it would perhaps be worth while to go down and look over the Kerameikos material. Thepriades, who is acting Ephor, seems willing to open the place almost any time.

Yours, J.

Copy

KERAMEIKOS

38.05

From

Prof. Dr. Wilhelm Kraiker
(17a) Heidelberg, Zahringerstr. 69

March 15, 1948

Dear Mr. Vanderpool,

It was nice to hear from you and I am glad you have been successful in your excavations of last year. It seems that you have found at last the tombs of the kings of Mycenaean Athens-- since there was a palace, there must be the tombs too, and here they are. I hope you will be equally successful in your further campaigns.

14 B
Kerameikos

The stamped amphora handles in the ~~kerameikos~~^{Kerameikos} I remember well, but since I didn't know whether Kubler had found any more in the meantime and how many they could be altogether, I asked Kubler. (His address is: Dr. K.K., Tübingen (14b) Lustnau, Linsenbergstr. 25). He tells me that he does not remember how many there are, one or two cases full in all, certainly not thousands of them, but perhaps a few hundreds. Of course they do not occur in the deeper stratas, which were explored during the last twenty years in the ~~kerameikos~~ area, so that their number is of doubtful "statistic" value. Many of them we found in the Pompeion in 1931, others might have been found in earlier excavations and thrown away. I remember a fairly large wooden case full of them. It should still be in the long and small magazine near the old museum ("langer Schuppen"). Perhaps Miss Grace will be allowed by the Greek authorities to look at them. There should be written "Amphorenstempel" or something like that on the outside of the case. Kubler did not look at them since 10 years as he tells me-- and shan't be able to do so in future I fear, nor will the Greeks ~~do~~.

Thank you, we are rather well as circumstances go. Please remember me to Miss Grace, Mr. Thompson and whoever is there, also to Mr. Hill and Robinson. I am trying to write some "popular" archaeological books for earning-- rather interesting. I hope to give lectures soon again.

With best wishes

Yours sincerely,

Kraiker

Thank you for the news from the keramekos museum; we are glad they left it as it was.

Dear V

Thank for ~~the~~ your letter of Aug. 19 from Detroit. I am glad the Lake cards arrived at long last - and it is a long last, for I first undertook to deliver them well over a year ago. When I finished UNKRA in Aug. 1946, I planned to go to America - chiefly because UNKRA would send me free, (worst of all possible reasons). Someone fastened on me and said Oh you can take these cards. So I put them in an empty suitcase which went inside ~~and~~ otherwise empty trunk, both of which I was taking to America to bring back full. In the end I didn't go to America after all, but as the trunk and suitcase were "empty" I never bothered to open them and they were put in the cellar. In the course of the winter the question of the lake cards

came up several times. No one could put their finger on them, and I vowed I knew nothing about them. Alison said she thought I had done something about them, but I swore I hadn't. Came the summer of 1947 and we had a house in Glyfthaden for a couple of months and needed a trunk to ~~put~~ pack sheets and the like in. My trunk was opened, and there were the lake cards. They were mailed right off, and I see reached you in about six weeks. Moral: don't let anyone tell you that "by safe hand" is the best and quickest way to send things. I'm sorry - but ka'ddio äppä napä itotē.

Some time last spring I went to the Kerameikos with Threpsides to look for some inscriptions for Ben Meritt. We went into the Museum, workrooms, store rooms,

everywhere, but didn't find them. We also kept an eye out for amphora handles, but, believe it or not, we saw none. There must be some there, but they will be in boxes ~~as many as~~ of which there are thousands (all we saw seemed to have sherds only), or in some cupboard or room we didn't see. The Kerameikos is all kept locked up, and I don't know when I'll get there again, or where I'd look if I did. I guess we will have to await the return of the Germans!

I could perhaps write to Kraiker, whose address I have, to see if he remembers where they are kept and whether there are many.

In Samos at the Heraion the wooden shelves were all taken by the Italians and the pottery is said to be all dumped in a pile on the floor. I don't know about Tzani or Vathy. I don't know

38.09

when anyone will be going
there.

The handles here have not
been many or sensational this
year. I remember one with a
device which recalled the mandarin
(?) one - Dionysos on a donkey (?)
but I didn't compare them at
the time, and I can't put my
finger on the new one now.
Lucy follows the handles
closer of anyone and maybe
she will send you ^{notes on} some of the
better ones when we finally
finish this long season
(Nov. 1 ?).

Yrs.

J.

P.S. Thanks for reprint of
Wine jars from Class. Journal.
It's nice to have a look at the
forest, we get so lost among the
trees most of the time.

AMERICAN SCHOOL OF CLASSICAL STUDIES
ATHENS
GREECE

August 30, 1937

My Dear Dr. Wrede,

Dr. Kibler told me last year that the Institute would in all probability permit me to study the stamped amphora handles found in the Kerameikos, and, as I understood him, publish them. ~~I don't~~ ^{Perhaps} ~~know if~~ he has spoken to you about it.

I ask now for your permission because I am preparing an application for funds which would make it possible for me to

work on handles found outside the
Agora.

My plan for publication, subject to
various persons' approval, would be to
include your handles in the same volume
with those from the Agora, so we may
have as far as possible all the types in
one index, illustrated in each case by
a photograph of
as good an example as ^{can be found} possible. You
might wish a summary of your ^{material} handles
to come out separately; that of course
could be done.

I should hope to be working on
your handles next summer.

Yours sincerely,

Virginia Grace
