

VRG _ Folder _ 0097

1
A typescript "K E R A M E I K O S - Numbering of
Stamped Handles" was made in 1965 for Professor
Willemssen. A copy of this is filed in the KERAMEIKOS II
folder by its date, 28.X.65. This gives a fair directory
to the collection. More KGA numbers have of course been
given since 1965.

VG 23.V.86

7. XI. 74

KEEP FRONT

For Fraülein KrügerCopy of last readings made by us.

The last number we know about

is KGA 2264 (see last
page)Please tell me if you have all
the earlier copies, before this.

VG

25. VIII. 78

Still not delivered, still one last
set of duplicates, but presently the
will be a new set, 2265-2364,
submitted yesterday, & listed.I want something definite about
what she has done with all the papers
we have given to her

Visit to Karamanli 24. VIII

AD found he could arrange a morning's work between the start of his holiday for the Water Co. ^(Wed day, Wednesday 23rd) and the day, tomorrow I think, when he leaves for a week or so at Pefki, their country place. So he said we ought to go and catch up at the Karamanli. In fact it seems to have been 4 years since we were there, though we have seen U. King, her, etc., and Aristide at Gym School lectures & reception.

AD called at the SA on 8:30 and took bag to K. ^{He telephoned me at 33, by night.}
Jobs ^{last old files} KGA 2228-2264, duplication already made, binding to be marked with KT numbers, and put in their places in the drawers. ⁽⁵⁾ Binding to be put away in their alphabetical places. LK, Pante, and mixed, numerically in their drawers. Andreas did all this, Aristides first finding him the drawers of stuff not put away.

New finds KGA 2265-2364 (last no. given yesterday), Aristide found, and AD laid out in order before I arrived which was at 10:00. I made a list ^{incl. missing to be used.} with notes to be used in making duplication. (AD also made a partial list, less details; but he was not supposed to, and it kept him later). AD made rubbings of all-

Various cards and labels prepared at the Agave were put in place by AD. He noted that many in place have been eaten by insects. On a ^(tray, also drawn) thing, noted out of place by AD, he put back in place. Desirable: general control to be made, perhaps at the start of his work by Hans Koenigsdorff. So he gets things straight in order before he starts, and also knows the material.

Saw interesting new SALT, incl. some early Thasin, a Savin in his mask and TA, a later Pluckin? with big longstap on the vertex and a brown band of buff clay.

Aristides son Tiengys was there, also his daughter who looks a bit like him. Also Fr. von Freytag ^{PRO LÖBINGHOFF}, who is doing a little excavation & teach some of the students at Tübingen. She brought for us a series of rubbings from SALT coll. at Tübingen, probably from von Siegel's exped. incl. Alisander.

AD came late, ca. 4:00? and saw me, unexpectedly, then.

Had to wait here, and got pretty tired, and after all missed Cardozo's first visit & Stora (to go on final adjustment of description with PLS p. - but we had good chat by telephone).

or well with enough
They are not loose enough to be interchangeable fully,
41 won't go in place of 53 anywhere. No spurs at back.

7 through 12 are short because there is a
base plug behind them. 9-12 because of dado. - 1464 units of 544

In these short drawers go about 28 mixed handles
(I am laying in the new ones not yet sorted). Regular
taken about 39 (something like an outsize).

19.II.
It turns out
that all
bottom 4
drawers are
short (because
of a sort of
dado
panel projecting
along from
wall.)

(2)

Interior full width of drawers is .565+

Two rows of handles go either side of the interior division.

Best to use the 6 short drawers for small groups.

$\frac{1000 \text{ kind}}{30 \text{ kind}} \text{ (w. open & closed)}$

$\frac{1000}{30} = 34 \text{ drawers}$

Our cases are assembled opposite, not in any order. There is plenty of working space - nobody is working here now except Dr. Gruben and some days Dr. Viernscheid.

Amphioxus lying about; then see 8 to get a lot more, mostly 5^B and 6^B, but including a complete stamped kind - i.e. resting, but whole profile is there. From a cont. Dr. Gruben thought. Looks as if 2nd? Unsuccessful effort to enter a rubbing with Kleenex, die stamps.

② many swollen med. Chm. of various stages. a last? up, 4th?

5 finds

(978)

the manuscript,

duplicate of KGA 2265-2306 (with gaps) have been made by AA and supplemented by MET.

When she finished, yesterday, she wrote a letter to Mrs. Kovasovics, so that we can fill the gaps. See copy of letter - not quite clear, she has asked permission to take outbursts of SAH out of place last time, hope it will be understood. Letter takes to the Institute by Dr. Furthwängler, who was here for Demetrius.

It may be possible to get outbursts of finds later than 1978?

Looking through duplicate, I require after KGA 2319, recalling something similar. The rubbing has not been started in place, nor can we find it, for the moment. — Found, in place.

Korannein more recent finds
(actually only through 1978)

See notes of 15.VI.81. In the meantime,
duplicate of KGA 2265-2364 (with gaps) have
been made by AA and supplemented by MET.

When she finished, ^{28.IX} yesterday, she wrote a
letter to Mrs. Kovasovics, so that we can fill
the gaps. See copy of letter - not quite clear,
she has asked permission to take outbursts of
SALT out of place last time, hope it will be
understood. Letter takes to the Institute by Dr.
Furthwangler, who was here for Demetrius.

It may be possible to get outbursts of finds
later than 1978 ?

Looking through duplicate, I require after
KGA 2319, reading something similar for
nothing has not been started in place, nor can we
find it, for the moment. — Found, in fact.

10
Mr. Kovacsovich
German Excavations
Kerameikos
Athens

Athens ²⁸~~23~~ September 1981

Dear Mr. Kovacsovich,

I am writing you on behalf of Miss Virginia Grace.

A couple of years ago she took rubbings of the stamped amphoras handles found recently in Kerameikos. They bore the nos K.G.A 2265 -2364. From this series a few handles were missing i.e. KGA 2265 - 22 67, 2331 , 2339 - 2340, 2350, and 2356 - 2361.

We have been told that you are to publish them. Will you be kind enough to let us come some day to the storeroom of Kerameikos to look at these handles and take rubbings of them? We would like to have at the same time any information about context.

When we fill the gap of the above stamped handles Mis V. Grace will send you a copy of the readings of all of them.

Thank you very much,

Sincerely yours

Maria Petropoulakou

Furtwängler

15. VI. 81

Monday

11.01

24. VI. 81

J. Kroll is to do the
publication of the coins
for this deposit, he
told me this a.m.

AS has begun
the duplication of
KGA 2265-2364.

Recent finds at Kerameides

"Building Zed"

A deposit including about 90 coins, and a
great deal of pottery, was found a couple of years ago,
perhaps in 1978. Last week J. Kroll was invited by
Miss Knigge to come and look. He suggested that
it would be interesting also for HAT, DBT, and
Susan Patroff, and ^{Miss Kn.} she agreed that they should
come. (DBT did not go, as she was tired after getting
back from Salonica.)

It turned out to be very satisfactory for all
concerned and present, in that Miss Kn. although
she goes by old HAT dating, and Susan who does
not, agree that the pottery is about late 4th, and
Jack puts the coins just before 307, because
of a silver coin of the last quarter (?) together with
no examples among Athenian Groups of the "owl
left" type, that start them. ~~to~~ I
have all this for Jack Kroll today. On the
pottery, he says Miss Kn. & Susan can agree
because Miss Kn. sees matches with HAT Group A
which she puts before 300, whereas Susan
sees matches also, but, for her, part of Group A
is before 300 (perhaps a lot, but not the latest).

Miss K. does not plan a quick report but a thorough publication. When Jack asked about SAH, she said there were about 6, but VG could ask Mr. KORACOVICS ^{who} ~~who~~ is to publish them; she thought there was one that had an "inscription"; he must I gather had devices.

I looked over Karaman records, and find no tools rubbings and notes in VIII. 78, apparently just before AD was to go on a holiday, in whose duplicates seemed not to have been made. These are KSA 2265 - 2364, it will be best to get them made. I observe some missing items, i.e. not seen by us in VIII. 78:

KSA 2265-6, Latin, entered by ELW

2267

2331

2339 Thasin / ^(Ker. Records)

2340 " " "

2350 Silver record given ^{Δγασαγας} ~~about~~ ^{about} also entire
3/4 4th cent.

2356 - 2361 Not there, and in this case, nothing from their records

Maybe these are the ones from the deposit? M. 91 They are plaster and lead.

as 5A } NEXT TIME
AT KERAM.

These labels have been prepared for the
Keramik workshop after our 1972 visit,
but they did not get placed this time.
Next time bring them again, with a FLASHLIGHT.

Visit of Hen Stichel

He has brought some SALT from Kerameika
for dating.

He tells me the last no. now given is 2361.
our last no. seems to be 2227.

WILFRIED KOVACSOVICS

sent by Miss Knigge

to learn about publishing stamps -
as she hopes he may publish the Kerambik
stamps.

The alternative she offered him was
the drains of the Kerambik.

I showed him how to prepare publication,
photo first. Also how to tell a photo has
been taken, in ^{three} ~~two~~ copy of the duplicates. Etc.

Keramische SAH - publication

Miss Kunz wants to get this done, and when she was here the other day we talked about possibilities. I hoped it might be possible to draw Bärker do it. But there seems no way to pay for that. She has somebody whose name is something like Kovalskowitz, sent and recommended by Prof. Walter in Salzburg (?), who is fixed for one year in Athens for the present, but there is a possibility of another. He did his dissertation on relief sculpture. I said, even if Bärker could not arrange - or have arranged for him - a stay in Athens, maybe he could do the publication in his summers. But she said, this doesn't work, already enough trouble with Vienna etc., they have to be there where she can leave an eye on them, or no mos. result.

They are to call me up after this week, and make a date for him to come and talk to me.

Requirements: 1.) good seals, photo. - They will need more than we have, as we only have 5.00 as we did not have better than this already.

Accurate readings, i. to arrangement
of the stamp type (direction of line, position of
following line, etc.)

Thorough investigation of printing places
extracting as much as possible from the
records.

He may take published as from our
files, but must state that he has done so,
in the publication.

KERAMEIKOS : TRIP OF CGK & B.C.

Mended from old excav:

- no us?]
1696
1018
- 2 Lesbian; (1 Thasian??) (B.C.'s theory)
 - 1 late Eoz type?
 - 1 "Attic" Agora type? w/ mushroom. rim
 - 1 Samian??? top. w/ bottom of another, also 2 w'd 1018
 - 1 Samian (& another body?)
 - 1 Chian, (2nd/4 str??)
 - another bottom/body

Aristides says no new stamps (one handle w/ graffiti, only).

18. VII. 75

^{was} This was chiefly for Barbara Climbhead,
to start work on her Lesbian theory.

Carolyn wanted to consult Fred (working
then on his Panathenais) on a Roman head
she is to publish (for Amth).

B.C. has a runny nose & go back then
next Monday, July 21. And should work
then at least 3 days, as she must draw
and photograph, as well as going over her
description.

KERAMEIKOS - ELW's visit

2. IX. 74

(not leave be
give before)She delivers these
useful papers to
Frl. KniggFor the Kerameikos, i.e.
for the records there, Frl. Knigg

- 1.) plan of cabinet (photograph)
- 2.) list of contents of
Plinian drawer
(signature of 2. IX. 72)

Lilly went there this morning, ca. 9:30, and brought
the 2 papers listed above to Frl. Knigg. Frl. von Freytag also
there, but not Willemssen. (They were all 3 at our party
Sunday night.) She is to go again Thursday a.m.
She has seen so many things there that belong
in the series.

19. X. 74

A Δ

When are we with
new duplicate of
Kerameith?

26. X. 74
 A Δ = 4200
 for working on them

(I should get all this done
 if possible, so as
 to be ready to go there
 with ELW)

Kerameith folder being put
 back in file, but work
 is to be done on the same.

KERAMEIKOS

Notes of VII - VIII. 72

are in a separate folder ~~now~~ ^(3. 74) ~~now~~ (18. 74) as they have not been thoroughly pulled together. Quite a lot of work was done. The notes were not read all through before our visit of 29. VIII. 74, and should be before any further visit. Ⓢ Now in this folder, 23. V. 86

In 1973, apparently we did not visit to Kerameikos at all. See however here carbon of typescript of 6(-13). III. 73, an incomplete study of the stamps in the Diphylon deposit of 1962. (Considerable more processing and synthesis of Thursians was found to be needed to finish it properly.)

Visit of 29. VII. 74, see now ^{this} separate folder.

Agenda with Keramides
papers.

→|| Best first to read through all recent papers, which I should have done before going to the Keramides. It was really not necessary to go today, only the effect of knowing that A.S. and Franklin Knigge are both about to go on leave, and she thought Fr. in von Braytag had some SAH of which dates were needed. Bad day to have gone, as it was the last of the Shears, also to call of Bernard Boltner; and I got back just as tea was finishing.

Next, check with ^{quantities of} cartons not yet in place, to see what possible reason there can be for their not going into the general file. It seems that:

phot. have been taken

handles have been put away

apparently entire have been made in

Kridin storage list, but check that check of ^{for} all cartons additions have

been made to the proper storage lists.

→ Ask with if she knows any reason.

After check, put cartons into their general order.

Could not identify

at Lesbi in 1906-19.

Visit to Kerameikos

Fr. Knigge arranged for AD and me to call today, for various checks, after 2 years. I should have spent a good day going over papers before coming here, but now have been doing what I can.

RSA 2228

- 2264

is the new

lot

AD is listing and rubbing some recently found and/or recently surfaced SAH. We have solved the question of a plot, with a number Y, which is not 2155, but a new find. Inside a number is now given (2264) by Fr. Knigge. This plot, on actual size, can be attached to an effort by Miss Knigge, "New Scherle-Kleinfelder Mela."

Note the both 2264 and 2155 are left in the ordinary SAH string, but in context breaks. Miss Kn. can put them.

They need data for RSA 2228 - can't be 5th cent. ? Rather small handle, short descending, to, "vertical" and swamps out. Clay mottled surface, under buff core, discolored; mottled.

No quantity of stuff - maybe nothing? - awaits putting away. But the Kaproudas must be out to let us move the lot for storage.

For visit to Kerameich

- 1.) What bundles have not been put in their places? We have a quantity of Kartoules not yet filed away, perhaps this means they need to be used to put away bundles?
(We ought to file the Kartoules, if not needed now.)
What is happening about putting away these bundles? Does Fr. Knigge do it?

29. VII. 74 S&H seen all the bundles have been put away by us, in 1972.
Kartoules to be checked against storage list to be sure all have listed.

- 2.) Effort to identify the Leskin in 406.19, now found, as recognized by B. Climbearbeard. Ask for the object in her Cl. 12, body of similar sign - Alupin, and see if it is the remains of the thing in 406.19. ^{29. VII. 74} It was on a high shelf, and I could not go up myself today. Fr. Knigge said absolutely that it is not our object in 406.19. ^{30. VII. 74} She said, no glue on inside (wooden).
- 3.) Catch up? with the S&H?

So, bring rubbing paper as well as pads, pencils.

A Δ did all this.

KSA 2278-

4

Kerameikos: SAH in a deposit dug in 1962 by the Dipylon Gate
 ("Dipylon 62 unter Strasse II B7")

In one of the strata beside the Dipylon Gate, in an excavation of 1962, 7 stamped amphora handles were found. These consisted of 6 Thasian and a proto-Rhodian, and may be summarized as follows:

	name	device	inv. no.	ref. for stamp type
Thasian	APIETOANHE	bird	GA 1770	Bon, <u>Timbres de Thasos</u> , no.399
"	"	(?) pilos	1771	Bon, no. 386 (?)
"	"	vine	1769	(new type)
"	KPINOMENHE	mask	1773	Bon, no. 1049
"	THAEMAXOZ	horn	1772	Bon, 1595
"	?	dolphin	1774	(new type?)
Early Rhodian	18N		1775	Cf. Nilsson, <u>Timbres de Lindos</u> , p. 526, no. 815 (not just the same)

A stamp of THAEMAXOZ (SS 1160, Bon no. 607) was found in Thompson's Hellenistic Group A. An amphora of THAEMAXOZ, SS 14261, bearing a stamp like Bon no. 1600, was found in 1957 in the construction filling of Agora well F 17 : 3; this packing has been dated $\frac{3}{4}$ of 4th century, see Agora XII.

The top of a jar of APIETOANHE, SS 14096 with stamp like Bon 406 (the device a mask, cf. GA 1773 above) was found in the filling of Agora pit A 17 : 3, dated 320-290 B.C. in Agora XII. Another handle of APIETOANHE, SS 14437, was found in 1960 in the construction filling of the peristyle of the Heliaia, dated by Thompson third quarter of the 4th century; the stamp type is Bon no. 386, of which GA 1771 is probably an example. The rim sections preserved on SS 14906 and 14437 show that the second-named comes from an amphora of somewhat earlier date than the other, thus corresponding with the dates of the fills; the activity of APIETOANHE (of whom very many types are known) seems to have extended over a considerable period, perhaps from the third to the last quarter of the $\frac{3}{4}$ 4th century.

The foregoing is selected from a report of B.III.62 given to Professor Willemsen. I was interested at that time in the relation of this material to that found at Koroni, and when I received (the following day) a request from HAT for a short article on the stamps from Koroni, I got permission from the Kerameikos excavators, Willemsen and Gruben, to include a report on the Dipylon group. I had understood that these Dipylon handles came from a strosis that was the original roadway of the Dipylon Gate, dated therefore with it. But in April 1963 I learned from Dr. Gruben that this was not so, they came from a later level, perhaps very little later but one cannot say, with which the construction of the Dipylon Gate was not connected. So I decided not to include this report in my Koroni article, the context of the group not being closely dated by context.

On the dating of Thasian stamps in general, see Delos 27, pp. 354-356, a brief summary with references to earlier work. A change in stamping procedure in Thasos occurred in or about 340 B.C. The approximate date derives from that of the late redfigure pottery found in quantity, with numerous Thasian stamps of a distinctive kind, in a deposit at the Pnyx. The redfigure was considered to date a little later than Olynthos. The year 340 is that of the take-over of Thasos by Philip of Macedon; the break in system of the stamping (a change from ^{2-name} ~~2-name~~ to 1-name stamps) is such as one expects to find explained by an administrative change. Excavations in Thasos in 1963-1965 brought confirmation: Y. Garlan was able to distinguish successive strata containing stamped Thasian handles, and the interrelation of the strata confirmed the earlier date of the 2-name stamps, found apparently unmixed in a lower stratum, covered with a layer which contained partly 2-name stamps and partly 1-name stamps. See Y. Garlan in BCH 90, 1966, pp. 586-652; pp. 642-645 list items from "couche 12" and "couche 10" at the Porte d'Hermès; "couche 9" carries the trend further. By the Porte de Zeus he also found stratified layers, of which the lower (anyhow by its stamps) seems to follow on after the highest (9) at the Porte d'Hermès; it contained only 1-name stamps, but they seem to be ^{among} the earliest with 1 name (according to various indications of style, and independent dating of some of the names from other deposits, e.g. at the Agora). From study of Garlan's publication of his groups (we know the stamps also from rubbings and his publication is based on readings made with the help of our files), we arrive

at a useful sequence of groups:

- A. Garland, Porte d'Hermes, couche 12 (all 2-name or equivalent, so before ca. 340 BC)
- B. " " " " 10 (mostly 2-name)
- C. " " " " 9 (half and half)
- D. " " de Zeus, lower group (early 1-name; no 2-name)
- E. " " " " upper " (overlap of names with D, but some new)¹⁵
- F. Agora deposit Q 10 : 1, listed in Agora XII as "ca. 325-300 B.C. ?"

Note that A, B, and C are from superposed strata of which C is the highest, and that E was on top of D.

Group F shows an overlap of 5 names with E (AIEXPION, AIEXPON, APIETBIAHE, APIETO-AIKOZ, KHΘIZOON; AIEXPION is also in C, but otherwise none of the names in F appear in any other of the groups save E) but includes also these new persons, not in any Garland group: NIKOAHMOZ, HOYAYAAHE, HPHEIMOAIZ, and HYEION III, HYEION IV (commonest), and HYEION V. (The numerous Thasian one-name types with the name HYEION sort themselves into 9 different styles, the earliest datable in the 4th century, the latest perhaps after 200 B.C. Garland's groups contain a single stamp with this name, one of the types of HYEION II (see p. 645 of his article for this item), certainly earlier than any of the types in Group F.)

The sequence of the groups is clearly right. For dates derived from Garland's study of his accompanying pottery and the stratigraphic relation of pottery and stamps to certain constructions: Group A of the sequence (Hermes, couche 12) is dated by its pottery (other than stamped amphoras) ca. late second quarter of 4th century, or about 350 B.C. (Garland's pp. 601-603, 607.) On the coins from the Porte d'Hermes, see pp. 606-607. Our Group D (Zeus, lower group) comes from a stratum which dates a restoration of the Porte de Zeus which, according to an inscription on an architrave, was effected by a certain HYEIMHOZ HA[IETPATOY], who may be the same man who became theoros of Thasos somewhere between 315 and 285 B.C. (Garland, pp. 586, ff.). On the fragments of Attic pottery and lamps found with our D, see pp. 589-591; they are compared by the author with material at Olynthos.

On our E (Porte de Zeus, upper group), Carlan dates it by comparing the stamps in E with those in D. He concludes then (p. 595) that the potters named in the upper group (E) are a little later than those in the lower group, hence active in the last quarter of the 4th century and the beginning of the 3rd century.

Kramm - all of today

I arrived about 9:50 a.m. (having persuaded the taxi firm upfront to wait at the SA while I fetched the briefcase, with ^{the} prepared Sat. J., and take me on to their office) and found the door open and Fr. Krüger and the dog Dick within. Presently Hans Willmann arrived. Toward noon, I found that Fr. Kr. and Hans W. would be staying on in the p.m., so (with permission) I telephoned again to A.D. at his office and got him to come here. Both to clean up here a bit before his holiday, as perhaps less will be forgotten.

I went through recent notes, excepting ^{tasks} tasks for A.D., info to get from Fr. Kr., and notes toward a report to send for their files here. Also various chores to tend to myself.

at 1:00 they took me to lunch at the Kargsten restaurant. We spoke of Boehringer. Etc.

at 2:30 A.D. arrived, and has put away the Rhod. and some misc. tasks, and is annotating the diary of the drawings. We have shifted some drawings for more logical arrangement.

22. VII. at SA

Fr. Krüger left at 4:00, left me Prof. W. was upstairs. [Before I left I went up and said goodbye to him, among his sketches. A.D. took me back to the station.]

at Ker.

Keramik - notes for summary
on work summer 1972

On valm & 2 brances, C.K. and B.-cl. ; to works
as well as ex.s of him material.

Put away during July 1972 : KA 1826 - ²²²⁷~~2227~~,
except the most that put away items of small
classes, through ca 2166.

Items to be put away ^{and KT & to marked} through 2090
plus a couple(?) of drawers containing items
separated for photography, which had been
done.

In addition : GA 2091 - 2227,
still to be recorded, i.e. rubbings taken, investigated
at SA, duplicates made, KT marked.

Photographs : see Roll 713

Kerameia: jobs for A/S

The swollen outside Knide - is a big drawer.

This drawer sits now to just right of the cupboard
(moving along to Latin outside), and should have
its contents listed outside. Better, but the Latin
in all 4 drawers - they are now too heavy, and the
Knide is a lumpy drawer.

✓ Put away the last Phodion.

mark GA 2221 as ^dKT 1500. (Has been
marked in pencil, and put away.)

See if we can find GA 2133, that should be
an example of KT 169, but there was some muddle.
(See note of 13.VIII.72). It seems not to be under
"KT 2129" which I have been misled by a miss up.
See also my note of 18.VII.72: this was the 1st handle put
away by B.C.

Our recent visits to
the Keramieten

These were on July 4 (Carolyn, A.S. and I)
July 13 (C., Barbara, A.S. " ")
" 18 " " " " "
" 24 (Carolyn, " " " - with B.)
" 28 (C., B., " " ")

That is, 5 times A.S. taxied us back after
work. Impossibility of managing without, or
of finding a taxi there. H. did accept
anyhow $5 \times 30 = 150$ dr., to be drawn
from Charles.

18.VIII.72

I cannot persuade him to accept it.

19.VIII.72

We had planned that he should join us
next Monday at the Keramieten, and we should
pull things into order and (re)record recent
activities and final situation, for us and for
Willemsen, Knigge, etc.

O.V.F.R.

(19. VII. 72)

34.02

Horow, Aristides is on holiday, and
nobody will be at the apothecary - anyhow,
nobody undertaken to be there - in the p.m.
When A.D. could come. Fr. Krueger will
come a.m., 9:30 or so. I have decided
to go myself with my papers and straighten
things out, chiefly records, also on labels,
etc.

→ I should give Fr. Krueger the 1st carbon of
duplicate ²¹⁵⁴~~2167~~ - 2227 of KFA. Check that she has
received the rest, up to that.

→ I separate this lot of duplicates. Note: look
at GA 2221, Krueger, not restant. Several
items ~~are~~ "not found" Go over them w.
Fr. Krueger.

KT 1500. Check for brackets.
(Also check also 1st carbon.)

At E Kerameikos, 28. VII. 72

Barbara and Carolyn and I went over bringing lunch; in fact, as B. did not have her car.

With AD's help in the p.m., we pretty well finished putting things away. There had remained the last-numbered GA items, which had been rubbed, and looked up and duplicated with at the SA and a few photos taken. These were assembled by him, and by KT for the kind, and re-dugested with the end of the KT series not yet put away; and new exs of earlier KT also put in place. C. put into the ker. drawers, checking and listing on the ^{contents of} ~~contents~~ ^{drawers} and finished a big job of spreading the ~~two~~ ^{two}-full drawers into further drawers available beyond (below). AD and I re-ordered the outsize items, and marked the ^{drawers} ~~drawers~~ and cupboards with their contents. B. checked the rest of the ~~Minor Group~~ ^{Minor Group} lists; so these can be ~~typed~~ ^{typed}. AD pulled together with his usual vigour a great many outstanding jobs. We really got things about in order, but without ^{my} having time to have a good look at the final situation, so that needed ^{next} labels ^{can} be made here, and the design of the drawers in case also drawn up at the SA.

OVER

→ I need also to go soon again to give
 say 100 dr. to Aristides and/or his son
 Yannis for their help. And B. needs
 to go, preferably ~~alone~~ ^{with me} ~~with~~ ^{probably} ~~with~~ ^{with} her
 return for Kephaleon & discuss whether
 there is any finding - place info. on her
 jars and fragments.

As we were leaving, already late,
 then arrived Prof. Willensen, to whom I
 introduced Carolyn (I guess B. had left
 in her car, by then too available). Prof. W.
 was very nice, and said, yes, C. (who had
 written to him) had permission to study and
 publish.

Plan to go again, then, before long. Take
 all these recent papers. Pull them together there.
 AS to come when he can (p.m.) and put in
 his. Karloulas, Labridis, etc.; I think there are
 still a few Plochin recent finds not yet
 in place.

Then write a report for these people.

(20. VII. 72
MSA)

on Kew. visit of 18. VII. 72

36.05

after AD came, a few more photo. of stamps
were made, and the ^{Roll 713} film was for taken out
and given to F.V. for. To be developed and to
be printed.

AD finished rubbings and notes on new GA
items, and gave me a couple of description &
notes, on duplicate, of some Synanthus.

Putting away ^{of Kew.} continued. B. assembled
a series; C. assembled others first, and put
^{assembled by both} away all, entering numbers on drawers
They got through on KT ¹²⁰⁰ ~~1400~~. There is
still a lot more of this to do. We ~~assembled~~
pulled the contents of the drawers closer together,
and eliminated several ~~of~~ drawers. (B. had
undertaken to consolidate photo. (on 697a) items with ^{had not finished it.} good series)

We plan to go back next Monday, 24. VII.

Visit to Karamater
(Feb. 12/72 away)

Effort to make headway in putting away the
Karamater was projected. Carolyn K. also to look
further at her 2 whole-ist jars; and B. Climbbrand
to study the Lesbian (?). Carolyn to draw to
put away Karamater, for general understanding of SATT
task; and to have to plot stamps.

We came a bit after 11:00, in Barbara's car.
Aristides took us up to the amphion apotheca,
where B. stayed with a couple of her jars
brought down ^{from the shelf}. Aristides got me out the series
of SATT waiting to be put away, laying the drawers
in order on the long tables. (It is after
all better to do this work when other people
are not needing the apotheca.) I began to
show C. how to assemble the Karamater by KT,
using the paratolas. She went upstairs to
bring B. a patchelake provided by our hosts here,
and came down to say she'd do it. Help B. a good
deal by bringing up the jars while she was measuring.
So she has been up the stairs, with occasional
visits from me, and instructions how to take her
measurements. ~~FD~~

Franklin von Freytag (who has just dug a
wonderful Gromatius grave) and Hans Höpfner
took us to lunch, way up Ataxion, at

to "Karyotis" restaurant, simple and good - Now the girls are again upstairs, trying to take at least some study photos. And I am down here, just tired by walking out and back for lunch, but also by proceeding along with putting away the Kridin. Better go up and see what they are doing.

17. VII. 72 at EA

Later AD arrived, and set up for photographs, stamps, for Evelyn & I have another lesson. Six photos done of stamps. No ^{photo} ~~film~~ was managed that day by Barbara, and just one by C., which I coached; but it will not be publishable, just perhaps O.K. for study. Spyro had no long roll of white paper (as before) from which to cut 3 meter I hope Eugene, Jr., will advise them about this and other matters.

In the end, became very tired and pressed, and indicated departing a bit before the absolute hour, leaving things rather in suspense. Some further progress had been made in putting away the Kridin and both girls had learned the system, but Barbara not so much to (gross) check of identifiers, which really needs a flashlight so it can be done in the drawer. We are buying flashlights next time.

What is to be tomorrow. [i.e. 18 VII]

Professor F. Willemsen
 German Archaeological Institute
 Phidias 1, Athens

Dear Professor Willemsen,

Under the guidance of Miss Virginia R. Grace, I have embarked this summer upon a study of the two series of amphoras which we classify as Corinthian A and B, hoping to discover whether both were in fact manufactured in Corinth. The second series of jars (Corinthian B) is in clay and shape very different from the first, and may possibly be Corcyrean. The bulk (some two hundred handles and amphoras) of the material I am working with was excavated at Corinth and Isthmia, but significant numbers of the "Corcyrean" class turn up also in Athens, along with a few of Corinthian A.

As part of my work on this problem, an examination of all fragments belonging to the two classes is of course very helpful. Fräulein Knigge kindly gave me preliminary permission to look at the ten stamped handles and two complete amphoras of the "Corcyrean" class which have been excavated in the Kerameikos, and I found them most interesting. I wonder whether I might use this material in the formal presentation of my project, which probably will first be a dissertation presented to Princeton University for the Ph.D. degree in classical archaeology. Eventually I should hope to publish the results of my study, with a catalogue of examples. I do not expect, however, to reach that stage for at least two years. Can you permit me to include your pieces in my proposed publication?

Thank you very much.

Sincerely,

(Miss) Carolyn G. Koehler

28. VII. 72

We met Prof. Willemsen as we were leaving the Kerameikos apothekē, & he said "Of course you may publish them" in ref. to the Corinthian stamps & amphoras mentioned in the letter.

at EA

38.01

For general putting in order up to date
at Keramiras

Drawers - full of SAIT not put away begin with
KGA 1826. To be worked in with these are the drawers
of SAIT "to be phot." All or most of these items have
been phot., on Rolls 697-9. We need ^{to know, there, one} duplicates
beginning about KGA 1800 or before - last number
known put away is KGA 1806. We then get
the whole series, ^{that is still out} first into ^{ONE} KGA order (phot. and
not to be phot. ^{unphot.}). We note gaps, which are ok if item
is one of the small groups which have been put away
(by HET on 19.V.70: on final page - 3 - of notes of that
date).

*
Job at EA { The bulk of what has not been put away is kind
or Rhodian. For these we need the Kartoulas in
alphabetical order, or in KT order for the kindian.
Using these, we then pull ~~the material~~ out the bundles
(from their KGA order) into storage order, following that
of the Kartoulas. Next to get these ^{Kartoulas} separate from
the main file of Kar. and Rh. from the Ker., so
start from, say, KGA 1207, and see we have them
all that belong to the material to be put away.

For job at Ker. * Bring with us: dupl.s from before KGA 1806.
ordered Kartoulas of this material.

Surely
Boutas to be best to get whole lot e.g. of kindian

into KT order before starting to put away.

I considered that the staff then should join with us in putting away those things; however, the order, say, of the kind is really more in aid of our work than of any of theirs.

4. VII. 72

39.01

Trip for Carpy 8
study to Cor(B).
She saw the SAA, also
2 whole. in jars
upstairs.

Note at Keramulus

For Knigge find the lower than copy of our
duplicate through: KSA 2152 (or 2154)
[21. VII. 72 I give in 2153 - 2274.]

~~A~~ A last to be put away. The

[in series of SAA to be put away]

oldest number is KSA 1826. (X)

Bolton KT 1531 (Kn. Draw 24):

Draw: KSA 1826 - 1852 1855, 1877

This includes Photo - Chin, as well as
many Knigge

Draw: KSA 1873 - 1920 Knigge, Photo - etc.)

" 21 - 1968 " " "

" 1969 - 2017 " " "

1+2, by dr. 2018 - 2090

(X) The last "invest" Knigge put in its place
is KSA 1806.

Dr. Werner Gauer

(2)

(4.VII.72)

39.02

Regensburg
Universität

archaeol. Seminar

Part of the confusion is due to SDG separated from 197
photographs, which have now been taken (Roll 699.1)

We try to replace them of which I have records
here, but they won't fit. Have to do whole job
from start, for which I have not brought old
enough duplicate - I start w. KGA 1969,
whereas I should have 1807 and on.

So bring:

Duplicate KGA 1807 and on.

Film title 697-9 (et.?)

We do this with Fraider Krüger cover
order for Germany, after ca 5 weeks.

AD checking a drawer full of bundles, finds
missing:

KGA 2153 - 2166

In a small special box, Fr. Krüger gives
us KGA 2159 - 61

2163, 2167, 2168

We received, with note and markings
AD

2167 - 2200 (already numbered by staff here)

5.VII.72

This was not all that had been numbered, but there
were 30 or 40 more in other drawers.

Visit planned at Kramerton
for next Tuesday, July 4

For Carolyn Kochler, need to see both the works
and whether Corinthean there is there, e.g. there are
some more or less whole Car. B. jars. She
ought also to photograph, but not much is
accumulated for that - not a film-jul - in the
way of stamps. She might, if permitted, phot.
some whole jars.

For B. Climbauert, good for her to see whether
Lesbian jars there are. (She had another engagement
and did not go with us.)

As little is accumulated for the
of the next batch. Even if not yet numbered, could we
number? We have numbered new finds, and get nothing
etc. of them in 1 of 2 drawings accumulated.

What about permissions? e.g. for the 2 new girls.

* Check KSA 15-46. See attached card w. rubbing
+ phot. for Sargant -
(ed. F. K. 1211)
