-2232-2233-2234-2235-2236-2237-2238-2239-2240-2241-2242-2243-2244-2245-2246-2247-2248-2249-2250-2251-2252-2253-2254-2255-2256-2257-2258-2259-2260-2261-2262-2263-2264-2265-2266-2267-2268-2269-2270-2271-2272-2273-2274-2275-2276-2277-2278-2279-2280-2281-2282-2283-2284-2285-2286-2287-2288-2289-2290-2291-2292-2293-2294-2295-2296-2297-2298-2299-2300-2301-2302-2303-2304-2305-2306-2307-2308-2309-2310-2311-2312-2313-2314-2315-2316-2317-2318-2319-2320-2321-2322-2323-2324-2325-2326-2327-2328-2329-2330-2331-2332-2333-2334-2335-2336-2337-2338-2339-2340-2341-2342-2343-2344-2345-2346-2347-2348-2349-2350-2351-2352-2353-2354-2355-2356-2357-2358-2359-2360-2361-2362-2363-2364-2365-2366-2367-2368-2369-2370-2371-2372-2373-2374-2375-2376-2377-2378-2379-2380-2381-2382-2383-2384-2385-2386-2387-2388-2389-2390-2391-2392-2393-2394-2395-2396-2397-2398-2399-2400-2401-2402-2403-2404-2405-2406-2407-2408-2409-2410-2411-2412-2413-2414-2415-2416-2417-2418-2419-2420-2421-2422-2423-2424-2425-2426-2427-2428-2429-2430-2431-2432-2433-2434-2435-2436-2437-2438-2439-2440-2441-2442-2443-2444-2445-2446-2447-2448-2449-2450-2451-2452-2453-2454-2455-2456-2457-2458-2459-2460-2461-2462-2463-2464-2465-2466-2467-2468-2469-2470-2471-2472-2473-2474-2475-2476-2477-2478-2479-2480-2481-2482-2483-2484-2485-2486-2487-2488-2489-2490-2491-2492-2493-2494-2495-2496-2497-2498-2499-2500-2501-2502-2503-2504-2505-2506-2507-2508-2509-2510-2511-2512-2513-2514-2515-2516-2517-2518-2519-2520-2521-2522-2523-2524-2525-2526-2527-2528-2529-2530-2531-2532-2533-2534-2535-2536-2537-2538-2539-2540-2541-2542-2543-2544-2545-2546-2547-2548-2549-2550-2551-2552-2553-2554-2555-2556-2557-2558-2559-2560-2561-2562-2563-2564-2565-2566-2567-2568-2569-2570-2571-2572-2573-2574-2575-2576-2577-2578-2579-2580-2581-2582-2583-2584-2585-2586-2587-2588-2589-2590-2591-2592-2593-2594-2595-2596-2597-2598-2599-2600-2601-2602-2603-2604-2605-2606-2607-2608-2609-2610-2611-2612-2613-2614-2615-2616-

Further Work on material from Meliades 1957 Excav.

See note of 29. I. on ^{bottom of} my letter of 28. I. to Mr. M. We made, then, an appointment one day to go to the mosque the next day, but it turned out cloudy, not reliable enough for phot. Mr. M. later gave X. K. permission - authority - to send the ground down himself, before he should arrive in his office, so that we could decide to go when we knew the weather.

This past week has not produced any wholly fine days until last Sat., on which day M. had a school. This morning however being fine, I called X. at the house (871-938) at ca. 8:35, and by 9:35 was at the mosque with ^{photographic} paraphernalia, and Soteri to carry it and help set it up.

The light was good, and the reading 12, and later 15, with the hood off. At 22, used exposures of 10 seconds, and later ca. 8 seconds, on Pan. X. Went on with Roll 465, began in Dec. at the N. Mus. M. course toward 11:45, and finished the film, while I had another look about. There is still material for a full film to be taken. We hope to get this developed first.

Charalstein said Mr. M.'s idea is that M. shall publish this group, and that no photo. shall be published before this takes place. Further, the excavations must be pub. first, and then the finds, of which different categories

prepared by various persons, must be ready at the same time. It seems likely there will be considerable delay before all this is done. We hope we may be able to make special arrangements for some needed items.

Among these is a good ex. of an unstamped rather late Horn, which would be useful in the corpus, especially as it seems to come from a cisten with dateable other things. Mr. M., ^{9th} through X. K., is enquiring the date of the jars in the cisten. I have asked him to ask his permission for us to photograph some of them.

Feb. 24
24. II. 60
(10.10.1)

Yesterday (Tues.) while it rained, Nilsen drew Roll 465, which seemed satisfactory, when looked at early today.

Today early seemed fine again, so I called X. K. and joined him, a bit later (ca. 10:45). Mr. M. had agreed to having us photo some of the jars, but said he would like to have prints. M.S., being telephoned, brought tripod to set them up and a roll of ~~the~~ background paper. She took over photography of handles, which I had begun ^(on Roll 467). I made selection of jars, and of suitable places to photograph them - outside, against a window on the ~~#~~ S side of the house, tying up with wire a π x α ki of wood to climb and the paper to. Paper attached. We began bringing out jars, but it started to rain - had begun to be cloudy almost as soon as I started to photo handles. So we took everything in. M.S. photographed most of the rest

of the crandles, which Xap. and I, and Tiasapáki, measured and described the selected jaws.

We left about 12:40 by taxi having finished photographing the crandles, and measuring 9 jaws. M^{rs} picked out a tooth which we thought somewhat different from any of the others. Perhaps it will be included. (Variation of Based)

4.10.60

Came this morning rather late (after 11:00) and have been photographing the 9 jaws outside the mosque, as set up the other time. It is cloudy, and misting a little from time to time, with occasional pale sun. Light meter reads from 25 with cover open to 10 with cover closed. Have camera without slow timer. Have been opening and closing with slight interval. The jaws are phot. in numerical order (see list of jaws measured & described 24.10.60) any details following the phot. of the jaw as a whole. Note no. 8 has loose parts, so right-side-up phot. the bottom missing.

Finished about 1:15, and went to S^{te} for lunch, where found Miss M. Taylor of the J.R.S.

from M.E.'s
recollections

SAH from excavations by Mr. Miliades
on the south slope of the Akropolis,
season of 1957

Chairkleia^{X.} Kanellopoulou^{K.} last asked us to look at
these bundles, she having taken part in an excavation,
and in the cataloguing. She spoke of it a number of
times. Mr. Miliades also wanted us to help with this
material

On Dec. 22²³, 19⁵⁸, while I was in America, M.E. and
A.S. went to the mosque where these finds are kept,
and A.S. took 2 sets of rubbings, one for them, one for
us. M.E. X.K. had already made inventory cards for these
objects, in the general inventory series, and M.E. took notes
from the cards as to finding-place groups (which are
numbered in this excavation with sample numbers in a
single series as in Pergamon current dig). She also
took notes on kinds.

On January 20, 1959, she started to make the duplicate,
from these notes and the rubbings.

The total of these bundles has been added up: 314.

Detailed count will be easier when duplicate have been
separated and cards out. If possible, best to take first
the necessary photos, which are about 50.

Today - now - we go to the mosque, M.E. and I, she
to find and put together the selected bundles for photo,
and I to have a general look, and to see if photography

could be done there in or near the mosque.

Then I shall apply to Mr. M. for permission to photograph them, and if necessary to take them away for this purpose.

At the mosque

MZ is picking out the handles to be photo., with the help of a student. They had been laid in cartons, in layers separated by newspaper, as we had done in Delos. Then takes 2 people to lay out a layer without spilling and disarranging. Name of guard helping us: 'Asyphakys . . . v. int. frag.; on toe, stamped C.S. as on the Punic (?) frags.; clay looks similar, too.

Photography of handles can be done conveniently in the doorway, which naturally opens west, and the sun strikes a building opposite, certainly from 10:20 on, probably good for a couple of hours after that.

Jars: a lot of ^{small?} co. 2nd AD seem to have been found together, finding-place no. NA 1358. Include:

Banded Jars (1?) numerous (Box II?)

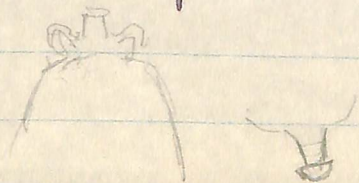

slim Kom

"non-Kom double-handled" (better gone)

pre-tubular. foot (numerous) also a red tub. foot

flat-shoulder pinched-double-handled, red

also

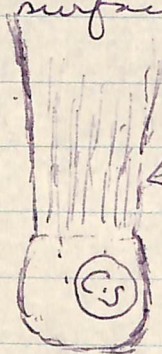

Notes for ELW:

NAA 583 (handle); no rim; thick handle without
arch. Fine buff clay, porous, light red at core, almost no
mica. Breaks in smooth surfaces like Plodin.

NAA 621 (DICA.F.1') (handle); no rim; broadish
handle, putrid buff clay, no different color at core, rather
pinkish on surface; non-micaceous; surface of break is rough.

NAA 890: (C.S.) ^{inside of toe} brick-red clay, small white bits,
heavy cream surface layer, over vertical firing.

↑ no hollow

23.V.60

See corresp. with P. Monte

of April 1960, filed under NOTES

← diam. of the → ON THE CANAANITE JAN

The handles are now all laid out in order in a tray
which was brought for the purpose, and we depart, 11:25. Light
is still fine for photography.

Same day, at EA.

The stamp C.S. is very close to that of SS 12705.
The fragments must be contemporary. Hunting for a
link in shape between this kind of toe and the Oriental-
type handle, I came rather by accident on plin. of jar
from ^{Comite} Well in SE Bledy ^{nearby full} (146 BC) —
(roll 369.21)
C 47-848. It certainly ties up the two, although
it is at a different point in the series: the "shoulder" angle

of 55 12705 shows, above, a definite slope (not just a recess); and the toe of N.A.S. has a ^{sub-}higher in proportion than that of the Corinthian.

This ^{change} could well happen in ca. 40 years in the same series. So if the C.S. stamped frags. are earlier than the Munro's date of the Corinthian, maybe they are MSBF period, i.e. before ca 185 B.C. On the other hand, can't be sure they are not later.

Maybe, as it's out, the context of the Akr. toe will help to decide. (X)

An early Thasian has a new type [Akr. ?] / Oros / Oros, with wheel.

29. I. 60

(X) X.T.K. telephoning to give Mr. Meliades reply to my letter, says context of this fragment is an accumulation of which nothing is later than late 3rd, early 2nd, comparing middle Stoa dating for 55 12705.

MELIADES — S. SLOPE OF AKROPOLIS

1957

January 28, 1960

Dear Mr. Meliades,

We have made some records, as you know, of your 314 stamped handles found in 1957 on the south slope of the Akropolis. When the records are complete, we shall be glad to give you a copy of the readings, restorations, descriptive notes, etc.

To complete our records for study purposes, we need to photograph about 50 pieces, which provide new stamp types, or better examples than we have otherwise on file.

May we have your permission to take these photographs? The work could be done in the mosque, any sunny morning. We should use the reflected sunlight coming through the open door.

(photographs)

I should like, if you are willing, to send prints of the Latin stamps to Mrs. Will, who is publishing the Latin stamps from the Agora and other American excavations. But it is understood that none of your material would be published without your permission.

With best wishes for a happy and prosperous 1960,

Yours very sincerely,

Virginia Grace

29.I.60 Xap. Kov. telephoned ^(speaking to HZ) to say that Mr. Meliades is willing for photos to be made, but wants to know the day before (can be cancelled). Prints may be sent to ELW, but nothing must be published until they have published it first.

Dr. J. Meliades said to ME, today, 28.VI.60: "With pleasure we permit to Miss Grace the publication of the stamps found in our excavations of 1957 and for the honor we thank her very much. He added also, he would like to have an offprint." 5.09

June 28, 1960

Dr. John Meliades
Ephor of Antiquities
Akropolis

Dear Dr. Meliades:

Miss Savvatianou tells me you may decide to release for publication in Mrs. Will's corpus the three Latin stamps from your excavations on the south slope of the Akropolis in 1957, of which, with your permission, we sent her photographs.

I am delighted if you can do this, because we want Mrs. Will's corpus to be as complete as possible. It is supposed to include all Latin stamps found in the eastern Mediterranean area.

In the meanwhile, there is one of these fragments that is of particular interest to me in connection with an article I published in 1956. I am speaking of your NAA 890, of which I enclose a photograph. In the offprint which I send herewith, you will see that another impression of the same stamp appears on plate XII, no.10. Your piece helps to tell us what was the shape of the jars from which these two fragments came, which was certainly an Oriental type, like the others in my article.

I should very much like, with your permission, to use your fragments in an article to appear in the American Journal of Archaeology, a general report on our investigations in past years, with news bringing previous publications up to date. I am sure Mrs. Will would make no objection to your stamp appearing in my article as well as in her book.

Yours very sincerely,

Virginia Grace

ATHENS - S. SLOPE - MELIADES
1959 and general

Today M & went up to the Akropolis, by appointment with Charikleia, and took rubbings and notes of the S. Slope handles of 1959.

There were between 60 and 70, including more non-Kindian than in other seasons. Contexts have not yet been fully studied, but are listed (by group number) for all handles; significances will come later.

Mr. Meliadis showed to M & a letter from Mrs. Will asking for permission to publish the 3 Latin from this ~~the~~ 1957 lot. He said ask M & if she had any objection to his agreeing, and she said not. Mr. Dantos then asked Charikleia to look up the groups for Mrs. Will, also to make some measurements.

The 3 include the two C.S. I would like to ^{publish} ~~include~~ a note on this, in connection with the jar in Corinth ^{and to Canaanite Jar.} I shall ask permission, and probably plan to include in SURVEY ARTICLE.

(for memory)
(really it was
wide in
prop.)

Melina exca. 3. Sides of Akropolis
(1957)

See today a part of a jar related to the C.S. series
(same clay slip, same vertical flaring above actual foot)
which is known under the NAK 890 (0.75 ft
widest part, not exactly at bottom) and hollow will
show into bottom. From NA 1023 (context
late Hell. ? they will see) 1957

Later... This call was to check with Charitola the
identification of the jar phot. on Roll 468. ~~She~~ I
brought the set of enlargements made for Mr. Meliades,
on which the temporary (1-9) numbers had been written
(as well as the file numbers). We checked the jars one by
one with these photos, and Ch. gave me their
regular numbers (NAK 993, etc.), which I wrote on
the pages of descr. dated 24.IV.60, ~~which she~~
wrote them on the set of prints.

She told me that the first item (NAK 993) is
actually not from the same TT 31, but from the
Papiri Ky Sakavry.

Νταβάρης was there, and a Δστ. Ζαττουρίδης
or something similar.

Still later... On making up file cards with identified
prints, I perceived that ^{the} measurement of NAK 998 is certainly
too large; it is likely .72 rather than .82. OVER

30. IV. 60

Checked by ME and RK on 25. IV. 60, proved to be 0.67.

As Niles had forgotten to do 3 ^{line prints} prints of 2 of the jars,
he did these, and also gave us a corrected set of 3
side prints of NAK 998,

check HT
of NAK 998

ATHENS - S. SLOPE - MELIADES

EXCAVATIONS OF 1955

On ^{Thursday} June 9, M.E. went to the Akropolis to look at the 1955 handles from the S. Slope, on which she had already given some assistance by telephone (see notes of 2. XI. 59) in connection with dating a fill for Mr. Dantas. Rubbings and notes were taken. On Monday 13th duplicates were started.

Today, going to the Akropolis to make records of the 1959 handles, she took along file cards & help in the identification of some difficult 1955 examples.

← ^{the beginning of}
 In this line, Mr. D. reads EP,
 but no such type exists, and ME
 emends to Δαμ[ο]κράτους, reading
 of KT 356. ~~3. KT. 59~~ Reading
 confirmed by Mr. Douts.

516 3) Ἐπι Φ[ι]λ[ο]π[ο]ν
 π[ο]ν κ[ρ]α[τ]ο
 χ[ι]ος κ[ρ]ιδ[ι]ο
 ον [double axe]

KT 909

3. KT. 59 Mr. Douts, again by telephone, says
 that our proposed date (see below) corresponds
 with that of Megarian bowls and West Slope
 ware from same place, hence is convenient.

This morning Mr. Douts reported reading of three
 Kridion handles found together, speaking with ME over
 the telephone; he asked for a date. Above are the readings
 with our emendations and identifications, so far as
 could be done without rubbings or other precise information.

If correctly identified, the 3 handles as a group
 should date about the middle of the 2nd century B.C.

V9

⊗ Actually, not too clear on this type, the only one of Δαμ[ο]κ[ρ]α[τ]ο[ς]
 in rectangular stamp. No independent dating, and there is a later
 type.

Do you think this is
a general permission?

could things be cited
in other publications?

- of course with
acknowledgments.

And do you agree ??

Athens, July 8, 21

Dear Miss Vir. Grace

In answer to your letter of June 30
I am at the pleasant position to in-
form you that I have no objection of
your citing the finds of the excavation
from south of the Acropolis.
You may do it freely.

Yours sincerely

Miliadis
