finds, snaks
in National Mus.
records.

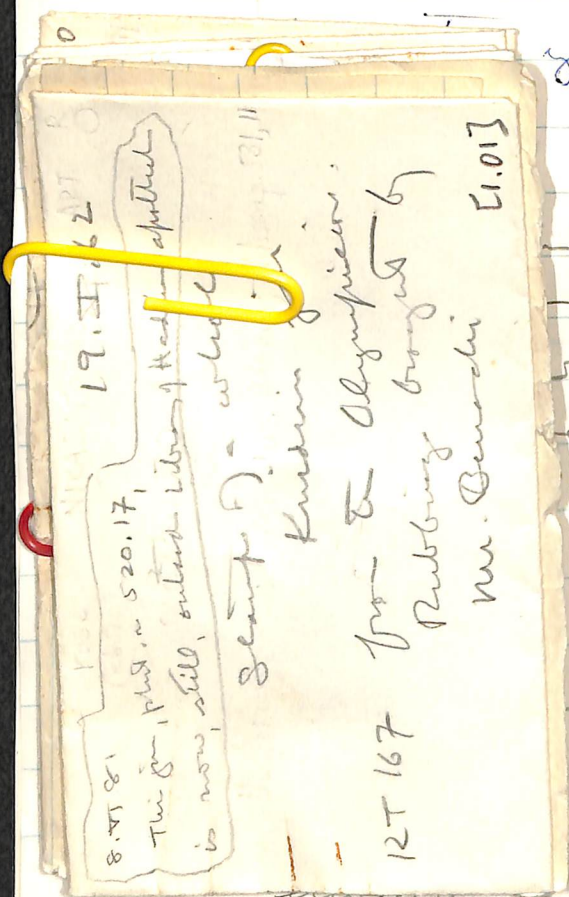

Olympic

Mr. Thorpeides told Mr. B. 12. XII. 61 that he has
say 50 handles found in trial dig at Olympic ca.
2 years ago. They are in a potter's at Hadrian's Library.
Mr. B. is 8 number and out there. Given this number
OA. 58 ¹⁹³⁹ or whether year it was. Another lot being
year.

Mr. B. has made duplicates of
- 309. These were done while I
was in the U.S., the initial date
being 30. VII. 62.

ephora from the Olympic ¹⁹³⁹ has no
record, i.e. for the same time as the record of
handles found in 1939, except the attached
ephora containing rubbings, and dated 19. I. 62. 38 was
not included in our duplicates (OA. 31 is another one
- rubbing shows not ident.) It has, up to now,
no number.

Plus 7 jar; 520. 17. Jar found today by MET,
still outside apotheca of the Library of Hadrian.
(The potter of a 3rd ephora.)

Olympic

Mr. Thorpe told Mr. B. 12. XII. 61 that he has
say 50 handles found in trial dig at Olympic ca.
2 years ago. They are in a folder at Hadrian's Library.
Mr. B. is 8 number and not the given the number
OA. 58 ¹⁹³⁹ or which year it was. Another lot being
found this year.

6.8.62

I see that MET has made duplicates of
OA 1 - 309. These were done while I
1939 was in the U.S., the initial date
being 30. VII. 62.

8. VI. 81

The handle ampoule from the Olympic ¹⁹³⁹ has no
contemporary record, in fact the same as the record of
the Thorpe handle found in 1939, except the attached
envelope containing rubbings, and dated 19. I. 62. It was
not included in our duplicates (OA. 31 is another one
- rubbing shows not ident.) It has, up to now,
no number.

Plus 1 of jar; 520. 17. Jar found today by MET,
still outside a folder of the Library of Hadrian.
(The folder of a 3rd sphinx.)

31.VII.64 1.37

TITUS tells me that Mr. Threpside
died in Sept. 1962. I am by my
calendar, it was Sept. 16. Handles for the Olympian 1939

These were seen, and I began numbered, and
rubbed, by Mr. Benacchi in January 1962. They
were, and I believe still are, in the
Olympian apotheca, in the enclosure of
the Library of Hadrian.

(These handles are not from the same
excavations as those given to us by Mitson in
the National Museum in 1949. The handles of
Mitson were from his excavations just after
the 2nd World War.)

Duplicates were made of the 1939 lot for
Mr. B.'s rubbings by ~~the~~ MET in July-Aug.
1962. They have been separated and cut
and each copy sorted. ^{Dup} Cards have been
made for new types.

26 plates are to be made according to
A.D.'s listing yesterday.

Olympic 1939 Duplicates (OA 1-310)

The second copy was taken by C&K for
use in computerization.

Indications in the upper right corners classify handle and/or stamp, distinguishing 1) place of origin when known - T(hasos), R(hodes) K(nidos), etc.; 2) type of stamped vessel if not an amphora; 3) language if not Greek; 4) shape of stamp if not a plain (unframed) rectangle; retrograde inscription (indicated by an arrow). Inventory numbers and any other documentation go to the left, any descriptive comment to the right, dimensions unless otherwise specified being width by thickness of handle where stamped. Numbers in the middle are negative numbers.

Åstén in Samos (2), near Xapfili, Attika
(1) and at the Olympion (1), see

COLLECTIONS - SWEDISH INSTITUTE
in Athens

ATHENS-VAR.: OLYMPIEION

12.02
Original and 1st carbon
given to Mr. Travlos.

9.III.62

STAMPED HANDLE OF ROMAN PERIOD FOUND AT THE OLYMPIEION

Attached is a photograph (VG 517.27) of a stamped handle found during excavations by Mr. J. Threpsiades and Mr. J. Travlos at the Olympieion in or about December 1961. The handle was found east of the Valerian Wall in fill among tombs of the cemetery of the 3rd century after Christ. Stratification above this fill excludes a date as late as Justinian for the fill in which the handle was found.

The lower attachment of the handle is preserved, and the start of the curve at the top. It was rather short, a close fit for four fingers, a thick band in shape (width 0.033, thickness 0.024). Many of the rather small jars of the Roman period have generally similar handles, though I have not been able to identify a definite restoration for this fragment. Note that the handle was set with something of a twist to one side. The clay is porous and contains bits, white and dark; it is fired reddish buff with redder ring near surface as visible on the handle (thick) break.

The stamp is some sort of ligatured combination of Greek letters, which I have not succeeded in working out. Perhaps it is a Latin name in Greek.

Nothing at all closely like this stamp is on file with us at the Agora. I ~~may~~ just refer to another handle bearing a ligature stamp, SS 2778, of unknown class. The stamp is quite different, and the shape of the handle is also different, being round in section. The clay however is rather ~~different~~ similar. SS 2778 comes from Section K, late Roman well at 32/E (grid number I 15: 1), the date of which seems to be 4th or 5th century after Christ. In the late Roman period stamped handles are not at all common. For ligatures in stamps on the toes of late Roman unguentaria, cf. Hesperia III, 1934, p.295, nos. 289-290, with comment by Waage.
