Indications in the upper right corners classify handle and/or stamp, distinguishing 1) place or origin when known - T(hasos), R(hodes) K(nidos), etc.; 2) type of stamped vessel if not an amphora; 3) language if not Greek; 4) shape of stamp if not a plain (unframed) rectangle; retrograde inscription (indicated by an arrow). Inventory numbers and any other documentation go to the left, any descriptive comment to the right, dimensions unless otherwise specified being width by thickness of handle where stamped. Numbers in the middle are negative numbers.

Indications in the upper right corners classify handle and/or stamp, distinguishing 1) place or origin when known - T(hasos), R(hodes) K(nidos), etc.; 2) type of stamped vessel if not an amphora; 3) language if not Greek; 4) shape of stamp if not a plain (unframed) rectangle; retrograde inscription (indicated by an arrow). Inventory numbers and any other documentation go to the left, any descriptive comment to the right, dimensions unless otherwise specified being width by thickness of handle where stamped. Numbers in the middle are negative numbers.

Books published by Brashinsky

J. B. Brashinsky, Greek Pottery Imports to the
Lower Don, V-III Centuries B.C. (in Russian, and this
 is only my translation of the title), Leningrad 1980.

11

I don't find any pages of translation of this pub.

⊗
 These pages
 were folded and
 kept inside
 the cover of the
 book.

The attached corrected readings of Thasos by Garland ⊗
 have some annotations by me, also I perceive some of
 the photos of Thasos, ^{in the book} are marked by our photo numbers.
 So probably the Thasos section has been more or less
 processed into our archives. Should be checked,

Brestinskij

LOWER
DONYvon Garlan
8/11/81P. 110 : N° 37 : = Bon 1294 (voir Debidour, Thasiaca, p. 299.)

P. 146 : N° 24 : Je me demande s'il ne faut pas plutôt y voir un timbre à attribut fixe (pilos) de la série de Δημήτριος :

 $\Sigma \Delta \tau [\nu \rho] \sigma (s) [\Theta / \alpha \sigma \acute{\iota} (v)] | \Delta \eta \mu \acute{\eta} \tau \rho \iota \sigma$ (Bon 596)
N° 57 Timbre
N° 577 dit surN° 26 : Plutôt $\Theta \alpha \sigma \acute{\iota} \omega \nu$ que $\Theta \alpha \sigma \acute{\iota} \omega$.N° 28 : Il semble que ce soit le même type que le N° 27. A la ligne inférieure de la reproduction pl. XXIV je crois plutôt lire $[\Phi] \alpha \nu \sigma \kappa$ renversé (selon la mise en page caractéristique de cet éponyme) que $\phi \iota \lambda \omega \kappa (\rho \acute{\epsilon} \tau \eta)$ (disposition aberrante pour cet éponyme).

N° 48-49 : A disposer comme sur la plupart des autres types d'Ἀριστοκλ(

 $\Lambda \nu \sigma \iota \kappa \lambda \epsilon \iota () \leftarrow$ Lyre $\rightarrow$ $\text{'Α} \rho \iota \sigma \tau \epsilon [\sigma] \sigma [\kappa \iota] \leftarrow$

N° 51 : Ecrire plus précisément :

 $\text{Ν} \upsilon \sigma \sigma \iota (\kappa \alpha \varsigma) \Theta / \alpha \sigma / \acute{\iota} (v) \text{Μ} \epsilon \gamma \omega / \nu$

Vase I (alabastre)

N° 63 : Restituer : $\Theta \alpha \sigma \acute{\iota} \omega \nu | \Pi \alpha \nu \varphi \acute{\alpha} \eta \varsigma$ Arc $\uparrow$ $\Pi \alpha \nu \sigma \alpha \nu \acute{\iota} \alpha \varsigma$ = Bon 1340 + 1843; Canarache 122.

N° 65 : Ne serait-ce pas le même type que N° 27 et 28 ?

N° 66 : Ecrire :

 $\Theta \epsilon \sigma \acute{\iota} \omega \nu | \phi \iota \lambda \omega \kappa \rho \acute{\alpha} (\tau \eta \varsigma)$ Porc-épic $\rightarrow$ $\Pi \upsilon \lambda \acute{\alpha} \delta \eta \varsigma$ = Bon 1508 (sans reprod.; à corriger); Canarache 89.N° 68-70 : Est-il bien sûr que l'A de $\phi \iota \lambda \omega \kappa \rho \acute{\alpha} (\tau \eta \varsigma)$ soit sur le petit côté droit et non, comme d'habitude, sur le long côté supérieur ?

N° 73 : Ecrire, comme sur les autres types de l'éponyme Ἀριστέδης :

 $\text{Ἀ} \rho \iota \sigma \tau \epsilon \delta \eta \varsigma | \Theta \alpha \sigma \acute{\iota} (v) | \text{Ε} \acute{\iota} \varphi \rho \acute{\alpha} \nu [\omega \rho]$ Tête de lion $\uparrow$ 

N° 75 : Ecrire :

 $\text{Ν} \upsilon \kappa \acute{\iota} \alpha \varsigma$ Sauterelle $\rightarrow$ $\Pi \upsilon \lambda \acute{\alpha} \delta \eta \varsigma$

N° 78-79 : L'attribut est une gaffe et non un glaive dans son fourreau.

N° 92-93 : L'attribut n'est-il pas accompagné d'un attribut secondaire tel que $\odot$ ou $*$?

N° 101 : Il faut écrire TAT, N° 1071 (et non 1070).

N° 103 : Le timbre de *Me'lvos* (si c'est bien ce nom) ne comporte-t-il pas d'attribut secondaire tel que $\odot$ ou $\ast$ ou $\bullet$?

N° 105 : Il faut écrire :

$[M]_{\text{Main}} \rightarrow$
 $[M \acute{e} \gamma] \leftarrow$

= Bon 1141; Canarache 55.

N° 106 : Il ne faut certainement pas restituer $[O \alpha \sigma \iota \omega]$ à la ligne ~~www~~ inférieure. On y attend un autre nom propre, celui du potier.

N° 107 : Restituer $[n \circ \circ \lambda]$ et non $[n \circ \lambda] \nu \alpha \delta \circ \circ$.

N° 110 : La tête d'Hèlios est surmontée d'une phiale $\odot$.

N° 112 : = Bon 1450 (attribut mal identifié). Il s'agit de Pythion IV.

N° 129 : Ecrire :

$[A]_{\text{Chèvre}} \uparrow$
 $[T \gamma \mu \eta \sigma ()] \leftarrow$

= Canarache 119.
