AGORA EXCAVATIONS
AMERICAN SCHOOL OF CLASSICAL STUDIES
ATHENS, 140, GREECE

7th February 1997

Dear Mr. Jöhrens,

Warm thanks for the photo of KGA
1317, you sent us. I am very glad,
it is in actual size.

Enclosed, you will find the
photocopies of your photos of the stam-
ped amphora handles, you found in
your excavations in Tanais.

You will find also my readings
and references to publications, when
they exist in our files in Agora.

On Elizavetskaya (?) on the Lower Don, and
its being replaced by TANAIK, see Prot. 3rd E.H.W.
pp 106, 108 etc. On p. 108, speaks of the careful
study of the pottery at Eliz. by Mlle. T. N. Kimpovskaya.
She identifies the site "with the early Tanais
(transferred in the third century to another place,
the ~~old~~ modern NEDVIGOVKA)"
