SICILY - Morgantina

9

University of Virginia

McIntire Department of Art

Fayerweather Hall
Charlottesville, Virginia 22903
804-924-6123

Dear Carolyn,

Here are the rubbings, as well as the corrections and information about contexts. Eventually we will go over the contexts and provide you with our dating evidence.

Two favors: the name of our site has been Morgantina for thirty-one years now, and I imagine with the computer that the change could be made from Serra Orlando, as it is now in your files, to the ancient name with no difficulty. Also, our inventory uses the form 57-3176, 63-223, etc., for catalogued objects: the first two digits indicate the year. This is obvious enough, I suppose, but as you are writing out the entire year (e.g., 1957-3176), I have thought to suggest that you use the form actually in use at the site, so that your records would agree with ours.

I hope the new information will be useful. Let me know if there is anything more that we can do--all the best,

Yours,

22 September 1988

May 7, 1989

Dear Andreas,

I was a great pleasure to have a letter from you, and to know that you have finished working on the rubbings from Morgantina. Better, as you say, to wait to send us the carbon of the duplicates until they are ολοκληρωμένα.

I typed out your letter and sent it by computer to Carolyn at the University of Maryland, and she has talked to Professor Mac Bell about the rubbings. He said that he has a Guggenheim scholarship for next year and will be going to Morgantina next month, and will try to get better rubbings of the ones in your list. However, he asked if he could have the old ones back for comparison (so that he would know when he had taken a better one). Of course we will send him your samples of what a good rubbing ought to look like, and your advice. I have already sent the second page of your letter to Carolyn in the mail.

Could you send back the rubbings in your list (unless they have been used for the files, of course) to him at Morgantina?

I am sending this to Carolyn by computer (BITNET) so that she can give you Professor Bell's address, and print it out, and send it to you, so it is really a letter from both of us. My greetings also to Maria, and please tell Miss Grace that Mrs Leipen gave me her letter, and I will write soon.

Love,

Maggie

16.v.89

I now add my bit and send this on--as I meant to do a week ago (there are some things that computers don't save you from, and that is the press of business and life in general!). It was particularly good to have your letter so quickly, and just now, since I could phone Mac Bell before he goes to Sicily. Here is his address there:

Professor Malcolm Bell
Expeditione Archeologica Americana
Museo Archeologico
Aidone
Sicilia

I have just time now to send him your sample rubbings, too, while he is still at the University of Virginia; they and p. 2 of your letter to PMWM arrived here yesterday. I'm looking forward to seeing you all as soon after my arrival on July 1 as possible.

Love,
Carolyn

Αγαπητή Maggie για σου,

Μέσω της Carolyn πήρα το γράμμα σου από 4/5/89.
όχι 26/5/89. (3 weeks)!!

Σήμερα σου έστειλα και σου βάλνω τα "bad
rubblings" για να ζυμώσουμε καλύτερα.

Όπως δε προσέχεις και εσύ, πιεζών πάλι με
καλύτερα rubblings πολλά απ' αυτά δε διαβάζω
Είναι κάπως άρχη και διάβουμε να χειώσω το
γράμμα για να εί το ταχυδρομείο τώρα.

Έτσι περιγράφω σε αυτά τα λίγα και με-
τιν εύχην το γράμμα να σε βρεί καλά σε
χαίρει.

Με αγάπη
Ανδρέας

MORGANTINA

We need better rubbings

25.IV.89

Αγαπητή Maggie,
 Σου γράφω αυτό το σύντομο γράμμα, για να σε ενη-
 μερώσω πως τα duplicates από Morgantina έχουν
 τελειώσει. Τα rubbings δεν με έβγαδαν πολύ, και
 έχουν μείνει αρκετά αδιάβαστα. Πιστεύω πως πολλά
 από αυτά δε διαβάζουν αν μας στείλουν καλύτερα
 rubbings.

Δεν ξέρω αν πρέπει να σου στείλω το carbon από
 τα duplicates, αλλά νομίζω πως δε είναι καλόνι
 τώρα να τα συμπληρώσουμε πρώτα και μετά να
 τα έχω ολοκληρωμένα.

Σου γράφω ότι συνέχεια τα νομίσματα που πρέπει
 να μπισουμε να μας στείλουν καλύτερα rubbings

~~61-55~~ 61-55 (no rubbing)

61-330 (better rubbings from both stamps (sec. st.))

84-146

63-512

88-7

66-381

71-335 ³⁵⁵

83-45 (no rubbing)

Όλα αυτά τα νομίσματα δεν έχουν διαβιβαστεί γιατί ήταν αδύνατο από αυτά τα rubbings.

Εκεί που σημειώνω (no rubbing) σημαίνει πως δεν έλαβα rubbings ενώ τα νομίσματα αναφέρονται στις λίστες με τα νομίσματα.

Παρακλήσιον όταν τους γράψω να μάς στείλουν καλύτερα rubbings, να τους παρακαλέσω να στείλουν το σιγαρόχαρτο στην σφραγίδα ώστε τα γράμματα να φαίνονται relief και μετά να το πρίβουν με γραπίου (εσύ έσωκλήσιον δέχημα).

Επίσης από τα illegible να βγάλουν περισσότερα από ένα rubbing ώστε καινού που δεν δείχνεται στο ένα να φανεί στο άλλο.

Αυτά σου γραφω πληροφορικώς και έχω τους χειρισμούς από την Dider Grace και Μελία

Με αγάπη
Ανδρέας Συμεωνίδης

Philipppa entered these from copies of the duplicates, Spring 1988, and this list was sent to Mac Bell just before he left for the season at Morgantina. He said he would try to get the rubbings & info we needed. 29.11.88 csk

Serra Orlando (Morgantina) SAHs 1955-1960

List of readings of stamps recorded by the SAH department at the Athenian Agora. This list was made up from the "duplicates" made by Miss Grace for the excavation and contains little or no additional information. The readings will be need^{ed} to be checked against the Agora files in the light of new information and for accuracy of transcription before they are published, but may help now for identification of unnumbered handles, for instance.

Some abbreviations

Classes, upper right, include Rh (Rhodian), Kn (Knidian), Ko (Koan), Cor B (Corinthian B), Lat (Latin). Also hdl (handle), stp (stamp), pht (photo), rub (rubbing).

Numbers

Sorted in SO inventory number order, followed by Miss Grace's continuous series of SO numbers in parentheses. Photo numbers are from the excavation, and are entered as role-frame or just a single number. An asterisk means that the photo is of the stamp, "(side)" that it is a profile photo. Photos which had no number on the back are marked "unnum."

Needed

The first batch (1955, except those not numbered, and 1956) were read from contact prints of photos. The photo number, where known, is given under the "Pht" heading. It is possible that readings of presently unread stamps, as well as corrections to the readings given here, could be made from good rubbings of all of these, or from new photos printed at scale 1:1 if available. The second batch (1957-1960 and 1955 unnumbered) were read from rubbings and the readings are thus probably more complete. These are marked "rub" under the heading "Pht."

Rubbings of stamps should be made with powdered graphite on plain (not watermarked) cigarette paper. The paper should be thin and strong (JOB, made in France, are good, also Italian papers called "Club" made by S.D. Modiano, which are available in some tobacconists in Rome as well as in a shop named Earthworks in Washington, D.C.). The paper should be held by the edges across the stamp with one hand, the thumb of the other hand pressed firmly on the paper over the stamp to make a preliminary impression of the stamp through the paper, and the graphite rubbed over the stamp, delicately and evenly, getting into all corners, with the little finger of the same hand.

Additional information needed for individual handles from this group is marked on the right of some entries.

Corrections for SAH records in Athens

- 1) 1955-169: Is this a small handle? No, the handle is of a medium size.
- 2) 1955-646: Is statue visible on handle? Yes
- 3) 1955-695: Is this a small handle? Yes
- 4) 1956-168 is incorrectly numbered. Should be changed to 1955-168.
- 5) 1958-412 is incorrectly numbered. Should be changed to 1959-412.
- 6) 1959-41 should be changed to 1959-14.
- 7) 1959?-? (SO 272) is 1959-375.
- 8) 1960-607 should be changed to 1960-707.
- 9) 1960-1333 should be changed to 1960-1353.
- 10) Please add to Athenian Agora list (stamps included):

Serra Orlando

SO 306 - 404

Indications in the upper right corners classify handle and/or stamp, distinguishing 1) place of origin when known - T(hasos), R(hodes) K(nidos), etc.; 2) type of stamped vessel if not an amphora; 3) language if not Greek; 4) shape of stamp if not a plain (unframed) rectangle; retrograde inscription (indicated by an arrow). Inventory numbers and any other documentation go to the left, any descriptive comment to the right, dimensions unless otherwise specified being width by thickness of handle where stamped. Numbers in the middle are negative numbers. *from rubbings*

Indications in the upper right corners classify handle and/or stamp, distinguishing 1) place of origin when known - T(hasos), R(hodes), K(nidos), etc.; 2) type of stamped vessel if not an amphora; 3) language if not Greek; 4) shape of stamp if not a plain (unframed) rectangle; retrograde inscription (indicated by an arrow). Inventory numbers and any other documentation go to the left, any descriptive comment to the right, dimensions unless otherwise specified being width by thickness of handle where stamped. Numbers in the middle are negative numbers.

Dear Professor Childs,

Thank you very much for sending us photographs of both
of your Koan handles from Morgantina. They are very sharp. It was
good of you to take this trouble for us.

I hope your interests will bring you to Athens, to
visit us at the Stoa.

Yours sincerely,

Virginia R. Grace

Dear Professor Childs,

Thank you for yours of October 15, with permission to publish your Koan stamps. It certainly is good to hear that you still have the reports and correspondence on the Morgantina stamps. Thank you for proposing to photograph for us. We are relieved to be able to expect the necessary prints, and hope this will not put you to too much trouble personally.

Yours sincerely,

Virginia R. Grace

Princeton University

SICILY - MORGANTINA

MC CORMICK HALL, PRINCETON, N.J. 08540

21.07

13 October 1978

Dear Miss Grace,

Many thanks for your letter of 31 August. I have found here the two reports on the Morgantina stamps. In addition there are copies of your correspondence with Kenan Erim giving selected readings and correspondence between you and Mr. Sjöqvist on corrections of readings.

I have spoken briefly to Carolyn Koehler about doing our stamps. She is tentatively interested. If she is unable to make the photograph(s) you need next summer I shall try my hand at it. You give very precise instructions in one of your letters to Mr. Sjöqvist.

You may, of course, publish the Koan stamps.

Sincerely,

William A. P. Childs

Professor William A. P. Childs
Department of Art and Archeology
McCormick Hall
Princeton University
Princeton, N.J. 08540 U.S.A.

Dear Professor Childs:

It was good to hear from Leslie Shear that Princeton is preparing a Morgantina final publication, and that you have been on the site this summer, and may be there again next year.

In 1960 and earlier, we made, here at the Agora in Athens, a record of the stamped handles found up to then at Morgantina, originally at the request of Kenan Erim. I enclose a photocopy of a carbon of a note given to Professor Stillwell in Athens on January 19, 1961. The original of this, and other correspondence and records including our readings of the stamps, should exist among the papers of the excavations, preferably assembled in one place. (Note by the enclosed that the first batch of readings were sent to Professor Sjöqvist at Serra Orlando in May, 1957, while the second (and last) were given to Professor Stillwell in Athens in 1961 along with the enclosed.) The handles of which we had seen (not very good) photographs and/or rubbings were altogether 305. They were very largely Rhodian, but included two each of Chian, Knidian, Kean, and Corinthian B; also 8 Roman, and perhaps 25 unclassified, i.e. we had not seen the handles themselves, and some of the unidentified may turn out to be Rhodian.

Writing to Erim, Sjöqvist and Stillwell in March and in May 1957, I gave some dates 1) of Erim's selected stamps, and 2) of the remainder. A few were dated then earlier in the 3rd century than now seems to be correct, according to my studies reported in Ath. Mitth. 1974, pp.193-200. I would now say that only two of your stamped handles ^{plaster} ^{must be} are earlier than 212, your Roman date, and they are 55-2757, of the fabricant ZETAΞ, and 56-2574, which names the (eponym) HEIΘIAAAΞ.

See this
field 1
under
date
19.1.61

These two would no longer be put at the beginning of the 3rd century, but near the middle (after Koroni, before Thompson's Group B). They are contemporaries, thoroughly removed in time from the rest of your Rhodian, and I would be interested to know whether the firing, etc., of the handles suggests they are from the same amphora. At the other end of your Rhodian series, one or two may turn out to be datable in the last quarter of the 2nd century; but we can tell this better after the material has been checked over, better photographs have been made, etc. Your collection included about 8 fragments of Roman stamped jars, and I do not know what may be the present dating of these.

I understood from Leslie that you might be asking Carolyn Koehler to undertake the eventual publication of the Morgantina amphora material. Could you in the meanwhile give me permission to include your two Koan stamps, 55-1179 and 55-2726 in a corpus of Koan stamps now being prepared? We would probably need to illustrate at least the first of these, 55-1179. As I believe Carolyn plans to do some work in Italy and perhaps in Sicily early next summer, perhaps it would be convenient for her to rephotograph for us 55-1179, perhaps in the course of having a look at your collection as a whole, if this will be convenient for you.

Yours sincerely,

Virginia R. Grace

Dear Ms Grace,

Have travelled up the Adriatic coast of Yugoslavia and made it down to Florence. Spent today (obviously) in Pisa, which I've never seen before. Yugoslavia was O.K., pretty but not too much else to do. Scanty Roman remains.

I am going to spend a month taking Italian in Florence (along with other activities) before going down to Sicily for July and August. Should be back to Athens for a while in Sept. Hope to have rubbings of post -

1960 SAH from Morgantina for you. Take care, Shellen Stone

Shelley

These were selected, as found in the area of
 the ⁹Demon^{str} structure, some a to floor under destruction
 full. It has been thought that the sanctuary
 was destroyed - never to be used again -
 in 212 B.C. by the Romans (Livy 26, 25 - see
 Kien Eise, "Morgantina (ADA 1958)"). Date in the
 2nd century of most of the stamps makes
 this ~~of~~ ^{of} view impossible. See ADA 1958-1960
 reports on Morgantina. ^{all but at base of 212.} Actually the coins
 moulded bowls - lamp in the pit, both of
 which - in Italy - dated to 2nd cent.

Much of the material was dug by Mr.
Hoover, later director of the Metropolitan Museum.
 He had trouble with stratigraphy.

Hollander

Shelley is to publish the ^{pottery} from Morgantina,
 and this sanctuary was supposed to be in 3rd
 century lot. He has already had his doubts.

He is clear that we have not got all the
 Morgantina stamps to 1960. Some he looked up
 (I think) was not in our series. He will leave to
 make rubbings, and fill out - next early summer,
 when he expects to see Carolyn Hoshel there. He
 says she has ~~now~~ agreed to publish the Morgantina ^{SAT}
 and ampullae.

SICILY : MORGANTINA

24

Athens, Sept. 2, 1978

Dear Carolyn,

I forget if Maria came back to work before you left, anyhow I'm glad to say she now has; and in the course of assembling plates for the Koan corpus to cover unread or partially read types, she asked what were the chances of getting a new photograph of a stamp from Serra orlando - Morgantina. So I found out from Leslie that Morgantina has certainly been taken up again by Princeton, and that Prof. Childs may be asking you to make the publication of the stamps. So I am wondering whether in that case you would mind having the 2 Koan included in our corpus, and whether you would have time to try to get us a photograph of their 55-1179, in case you go to the site early next summer, in your tentatively planned visit to Sicily.

I enclose a copy of my letter to Prof. Childs on this matter, also a photocopy of my note of 19.I.61 given to Stillwell that day in Athens, which sums things up at that time. Perhaps more stamps have been found since, in which case you may want to make rubbings. Note the two Corinthian B (T 56-759 and BI 58-1591). It would be helpful to find out, perhaps at the Meetings, whether Letty has planned to include the Morgantina Latin in her volume, because if so, she ought to get permission, which, up to now, I in any case have not had; but perhaps she is covering only Latin not found in the West. At the same time, you might ask her if O N O M A incuse is a known Latin stamp. Of that there are 3 examples at Morgantina. It might be short for ONOMAPXOZ, a name of note in eastern Sicily. But in the not-too-helpful photographs, the fragments - you can't really tell if they are handles - seem to be of rough fabric. I think we did not think to show her these items.

I'm expecting to see the Weinbergs, with Barbara J., for lunch tomorrow, prepared by Violetta. We will be speaking of you. I hope England was good in many ways, and that you are enjoying getting further acquainted in Baltimore. My best to Dot Hill and Diana Buitron when you see them.

✓ I hope
you will do
it soon
first!

Athens, January 5, 1963

Dear Erik,

It was very nice to have a chat with you yesterday. I was glad it included some talk of amphoras and stamped fragments found at Morgantina. I have been looking through your report in AJA 1962 in the light of our talk, and see that you certainly are concerned with late 4th and early 3rd century dates and will be able to help a great deal with the chronology. It does seem to me, don't you agree, that in future publications we will have to say more precisely what we mean in describing pottery (especially unillustrated pottery) as "completely consistent" with a date in this tricky period, i.e. do we mean according to HAT (etc.) or according to Koroni, or by what kind of adjustment? I am curious to know whether you have 35 years (or is it more?) discrepancy, which you attribute to being far from the center of civilization, in categories other than pottery, for instance in lamps?

Incidentally that is a very nice painted amphora, AJA 1962, pl.36, fig.37 (inv. no. 61-752). I should like to know its height, and what date you give to its context.

8 Report.
544.15

I find I have rubbings of Morgantina handles of the 1960 campaign and apparently everything earlier, if our records are complete; you have the carbon copy of our readings. I should be glad to be up to date in your stamps, and enclose here ^{3 packet} rubbing papers and small envelopes for safe keeping of finished rubbings, hoping, if you are willing, that some member of your staff may be able to make the rubbings; they will need also the inventory numbers. I should be grateful for such records of all stamped handles you catalogue, no matter how illegible they may be in rubbings, just not to have gaps in our sequence - records in order are so much less time-consuming. You are welcome to publish our readings (with acknowledgement for the sake of the School). I would not publish anything of yours without permission. What I chiefly want right now is up-to-

date figures on your assortment, which will be a by-product of the readings
 add up
 we make of your rubbings. Through 1960 they seem to ~~read~~ like this:

Rhodian 222x	266
Knidian	2
Koan	2
Chian	2
Roman	6 + 2
miscellaneous	19 - 2
unidentified	8
	<u>305</u>

(incl. 40.05)

For us to get these readings done as long as I have my organization here and my assistants (even though not full-time) is easy, much easier than for anybody who started on the job afresh. At the same time your material enriches the files we have here, while taking very little of my time, since I don't do the readings.

I look forward to all the festal occasions on which I am to see you both over the weekend.

Yours sincerely,

Original given to R. Stillwell same
evening, with the carbon copy readings

NOTES ON MORGANTINA (SERRA ORLANDO) STAMPED AMPHORA HANDLES

30.11.78 (after
J. E. Erim's
article AJA
1958, pp.
79-90.
(N. number
of SAT)

Early in 1957, Kenan Erim asked me to estimate the dates of a rather large number of stamped handles found at Serra Orlando, in connection with his study of a group of coins from the site. Since for us it was more worth while to record the handles from the site as a whole, rather than a large but incomplete selection of them, I asked Mr. Erim to give me records of all that had so far been catalogued, which he did. In March 1957 we gave him date estimates of those in which he was particularly interested. In May 1957, we sent him summary notes on the unselected remainder, since I understood this was Professor Sjöqvist's wish. Copies of the letters to Mr. Erim went also to Professors Sjöqvist and Stillwell.

In the meanwhile, readings had been made of the whole lot found in 1955 and 1956. Since the excavation inventory numbers of the handles are in the same series with those of other finds, and thus do not make a complete sequence, we have given a series of reference numbers preceded by the letters SO (Serra Orlando). In the readings, the SO number of each item is followed by its inventory number, and the sequence of these has been kept the same.

These readings having been made in triplicate, the excavators' carbon copy was sent in May 1957 to Professor Sjöqvist at Serra Orlando.

The readings of this first lot were made on the basis of (not always successful) photographs, with some partial readings, I think by Mr. Erim, made from the handles. In July 1960 Mrs. Sally Roberts brought us a set of rubbings of the stamps of all the campaigns, 1955 through 1960. By means of these rubbings, we were able to make a number of corrections in the earlier readings, and to continue through the finds of 1957-60. *π. 79 Not all, after the.*

The excavators' carbon copy of the new lot of readings is here enclosed. Note at the end a few new items of 1955 which had no inventory numbers.

When the second carbon has been cut into cards and sorted, a summary analysis will be available.

THE GREAT ROAD
PRINCETON, NEW JERSEY

11 July 1960

Dear Virginia -

Thank you ever so much
for the Antioch amphora stamp
notes. These will go in the proper
Antioch file here - always get-at-able.

I hope Sally Roberts gave you
the rubbings of our Morgantina
stamps. There are all that were
inventoried, and there are, I am
sure, very few others and those
illegible - i.e. do not show anything.
There is no way to look for handles
without stamps showing, save to
go thru some 600 sherd trays. and
I feel this would be quite
impractical - especially as

fragments of handles are more
than likely to have been discarded
long ago. I can see you SHUDDER!

Theo & I had a very nice short
trip to Gela - Agrigento, Selinus,
Segesta, Paestum, Herculaneum &
Naples before getting to Rome. Trip
home swift & comfortable. Now
picking up pieces once here in
preparation to return to Greece
about mid September. We will
both look forward to seeing
you when we arrive - Theo sends
love —

Yours,

Dick.

Athens, August 2, 1960

Dear Dick,

Thank you for your note of July 11, acknowledging Antioch papers, and mentioning Morgantina rubbings which came to me with Mrs. Roberts.

It was very pleasant to meet and talk with her. She understood our problem in not having a ⁰ list of the inventory numbers of the handles (since the numbers are in the general inventory and not a complete category sequence), and said she would make one for us, from the card catalogue, after returning to Princeton. We need this partly to control errors in the marking of the rubbings, which are bound to occur, as we are all human.

You do not get my point of view on having "everything". It is not at all a desire for more, perish the thought, but a horror of doing the work in order (which requires some discipline), and then discovering there is more, to be fitted in, that was left out the first time!

Readings are now being made, from the rubbings you sent, and when they are finished, we will give you any news that comes out.

How lovely that you and Theodora will be here in mid-September! I am sorry that I shall miss part of your term here, since I plan to go to America probably on or about October 1. This is set at this time ~~xxx~~ so as to include the wedding of my niece Judy Grace, who is getting married Oct. 8 (to a young man named Stetson, an oceanographer), but the trip is needed for various purposes. I expect to be back in November.

Yours,

Virginia

Serra Orlando bundles - general

Today Mrs. Roberts (Sally) called at the Store with what is supposed to be a complete set of rubbings of Serra Orlando stamps: "Envelopes" - really packets, not very secure - marked with yearly dates from 1955 through 1960. (Note & give small envelopes every time we give rubbing paper.)

Up to now, our duplicates, made from photos (mostly bad) run through finds of 1956 only. Readings were made of some stamps of 1958, on a temporary reading sheet, from rubbings sent in Jan 1958 by Dick Stillwell. Use these, also the original rubbings, to help in making duplicates.

The numbers are of the general mounting, so there is no complete sequence of numbers for stamped bundles, and no way, from rubbings alone, to tell if everything is here. This is especially risky in that some of the batches of rubbings were simply in a fold of cardboard, with nothing to hold them, let alone enclose them. I have ^{pointed out} ~~asked~~ Mrs. Roberts the difficulty, and she said she would make a list of the SAH numbers, from the ledger or from the catalog cards, as turned out easier. The catalog cards are apparently all kept together in one numerical series, the categories being distinguished by the color of the card. Mrs. Roberts is to send me this list (I suggested she make it in duplicate, so the explanation has one). But perhaps

Known
from

I can just as well pick it up when in Princeton.

It seems no list of ^{any} category exists except of the coins.

Now: ²(1) rubbings to be put into numerical order, in small envelopes

✓ ¹2.) perhaps marked - with a stamp MORQ. ?

3.) Those of 1955 and 1956 checked, rubbing & duplicates, principally for numbers, but an eye also to type.

4.) AD to continue duplicates, beginning with 1907, omitting non-Placidia. Best to separate out rubbings of these, to facilitate us doing them.

12. VII. 60

Mrs. Heath ^{is stamp "MORQ."} has marked and sorted numerically the rubbings of 1955 and 1956. AD is working with them, going through the duplicates made from the bad photographs previously sent. Both he and Mrs. Heath observed that there are not very good rubbings.

Aidone, 22 June, 1958

Dear Virginia:

Your letter of June 18th arrived yesterday. I am terribly sorry that everything has been put to bed for the season, so that I could not possibly get you rubbings of the stamps from 1957. I was under the impression that these had all been photographed and sent to you.

We had one more stamp this year, which I send you. The dates on the ones you reported on, mostly early second century, seem to agree pretty well with the other evidence.

Alison has been wonderful, and efficient as usual. I think we are returning her to Athens in good condition. She seems to have liked it here, though some of the life is a bit more on the rugged side than Athens.

Her almost last job was taking a series of pictures of a really first class Volute crater (much broken, but largely recovered and mended); r.f., about 530 - 520 B.C., at least that I what I suppose, lacking the proper library here.

Best regards,

Yours,

Dick.

Dear Dick,

Athens, June 18, 1958

Thank you for the rubbings, which are lots better than I can do myself.

I would much like to know whether ~~there~~ those you sent are a complete series in this category, so here is a list of the numbers received, in their order. If there are omissions, will you give me their numbers? This for convenience in my records. The last number previously received was 56-5180.

Readings have been entered in this provisional list, and several new stamp types have been so marked. Nearly new, in addition, is 58-626, of the type of which we had previously only a minuscule reading, from a publication. I see they are all Rhodian save the last one, presumably. Date, 2nd century, most before the middle.

Miss Lucy Talcott

etc.

Dear Miss Talcott:

Many thanks for your kind and helpful letter concerning our medicine bottles. After having written to you I discovered the examples published in Hesperia 1948, p.191 and pl. 69: 4, and am most grateful for your additional information. In the little spare time I have in this rather hectic period toward the end of the spring term I pursue this small problem.

The miniature pot published in Hesperia 1949, pl.97, no.98, is certainly correctly diagnosed by Corbett but is different from ours. I believe, but can for the time being not prove it, that some of our jars are local Morgantina products, and that others may come from the famous health resort and medical centre of Thermae Himeraeae on the north coast of the island.

The presence of the druggist's name was probably a guarantee of the genuineness of the stuff, particularly because, according to Pliny 12.31 and Dioscorides 1.100.2, lykion was often faked. The real lykion was substituted with the berberis shrub growing on Mount Pelion, or with the root of the asphodelos lily, ox-gall, etc. Characteristically enough most of our jars seem to have the same shape, possibly to facilitate the circulation of the faked lykion. Here I am not quite sure either, because I write on the basis of descriptions received from Dick Stillwell. I regret not being able to send you a photo of the general type, but I do not have one myself yet.

Again, many thanks and best greetings to everybody,

Very sincerely yours,

Erik Sjöqvist

ΛΟΝΔΙΝΟΝ, Νοέμβριος

Ὅταν οἱ Ἕλληνες, περὶ τὰ τέλη τοῦ 8ου π.Χ. αἰῶνος, ἀπεβίβασθον ὡς ἀποικοὶ εἰς τὰς ἀκτὰς τῆς Σικελίας,

εὐθὺς ἀμέσως κατέλαβαν τοὺς καλοὺς λιμένας τῶν ἀκτῶν καὶ τὰς εὐφόρους πεδιάδας τῆς ἐνδοχώρας. Οἱ ἰθαγενεῖς κάτοικοι, οἱ διάφοροι φυλαὶ τῶν Σικυλλίων ἀπεσύρθησαν εἰς τὰς ἀπροσίτους ὄρεινὰς περιοχὰς τῆς νήσου καὶ διετή-

ρησαν τὴν ἀνεξαρτησίαν των ἐπὶ τινὰ χρόνον. Ἐπὶ πολὺ παρέμεινεν ἀναπάντητον ἐρώτημα πότε καὶ μέχρι ποίου βάθους εἶχαν εἰσδύσει οἱ Ἕλληνες ἀποικοὶ εἰς τὸ ἀξενον ἐσωτερικόν. Αἱ πρώται ἐκπολιτιστικαὶ καὶ πολιτικαὶ σχέσεις μεταξύ τῶν Ἑλλήνων καὶ τοῦ ἰθαγενοῦς πληθυσμοῦ παρέμεινεν ἕνα σκοτεινόν, ἀλλὰ ἐνδιαφέρον κεφάλαιον τῆς ἱστορίας καὶ τοῦ ἐξελληνισμοῦ τῆς Σικελίας. Ἐπιστεύετο ὅτι ἡ διενέργεια συστηματικῶν ἀρχαιολογικῶν ἐρευνῶν εἰς καταλλήλους τοποθεσίας, εἰς ἱκανὴν ἀπόστασιν ἀπὸ τῆς ἀκτῆς θὰ συνετέλουν εἰς τὴν ἐπίλυσιν τοῦ προβλήματος τούτου καὶ ἄλλων συναφῶν.

Ἡ λοφοσειρὰ Σέρρα Ὀρλάντο, κειμένη πλησίον τοῦ χωρίου Ἐμιντόνε εἰς τὴν ἐπαρχίαν τῆς Ἑτνα, ἐθεωρήθη ὡς πληροῦσα πάσας τὰς πρὸς τοῦτο ἀναγκαίας προϋποθέσεις καὶ αἱ ἀνασκαφαὶ ἤρχισαν ἐκεῖ τὸ θέρος τοῦ 1955.

Ἡ λοφοσειρὰ αὕτη εἶναι μία ὠραία τοποθεσία, τῆς ὁποίας τὸ ὑψηλότερον σημεῖον φθάνει τὰ 530 μέτρα περίπου καὶ δεσπόζει τοῦ ποταμοῦ Γκορναλούγκα ἐνὸς ἀπὸ τοὺς ὀλίγους ποὺ κατέρχονται ἀπὸ τὰ βουνὰ πρὸς τὴν ἀνατολικὴν ἀκτὴν, ὅπου οἱ πρώτοι Ἕλληνες ἀποικοὶ ἱδρύσαν τὰς πόλεις Κατάνην καὶ Λεοντίνους, αἱ ὁποῖαι ἐδέσποζαν τῆς πλουσιωτέρας ὁλῶν τῶν πεδιάδων τῆς Σικελίας. Ἀφοῦ παρήλθον τρεῖς ἐποχαὶ ἐρευνῶν, ἡμποροῦμεν σήμερον νὰ ἀποφανθῶμεν μὲ κάποιαν βεβαιότητα περὶ τῆς πόλεως, ἡ ὁποία ἄλλοτε ἐκάλυπτε τὸ μεγαλύτερον μέρος τοῦ μήκους δύο μιλίων ἐκείνων ὁροπέδιου. Προέκειται περὶ τοῦ Μοργαντίου, τὸ ὁποῖον ἀναφέρουν ἐνίστη οἱ

ἀρχαῖοι συγγραφεῖς. Ἀπὸ αὐτοὺς συγγραφεῖς ἔχομε δρᾶν καὶ ἐνίστη ἀντιφάσιν τῆς ἱστορίας καὶ τῆς τοπικῆς πόλεως ἐκείνης, ὅμως αἱ ἀποδείξεις πληροῦν μᾶς παρέχουν μίαν συγκοῦν. Καὶ πάλιν ὅμως αὐταὶ δὲν ἦσαν ἐπαρκῶς ὅπου μία ἐπὶ τόπου εὐρεθὶ τὰς κατέστησεν ἀδύνατον.

Κατὰ τὰς πρώτας δύο ἀνασκαφὰς ἀπεκαλύφθησαν τὸ κέντρον τῆς πόλεως, ἡ γεινιάζουσα μὲ αὐτὴν φαίνεται ὅτι ἀνήκον εἰς τὸν τελευταῖον π. Χ. αἰῶνα ῥιζομεν περισσότερα καὶ λαϊότερας ἱστορίας τῆς πόλεως.

Εἰς τὰς βορείους κλίμακας τῆς ἀκροπόλεως τοῦ Μοργαντίου νῦν ἔχον προῖσιν ἀνασκαφὰς ὑπὸ μορφὴν μιᾶς κυκλικῆς δαπέδου καὶ ἐπὶ τῆς καθὼς καὶ μερικὰ ἐργαζομένου λίθου καὶ ἀγγεία ἐξ ἐποχῶν προῖστορικῶν ἐκείνα κτίσθαι θεμελίαν τῶν ἐπὶ τοῦ βράχου νῦν εἰς τὴν πόλιν ἀπὸ τοῦ 12ου π.Χ. αἰῶνος. Ταῖα καλὸν δὲν κατεστρέσαν πιθανότητα πρὸ τοῦ 8ου π.Χ. αἰῶνος καὶ βροχὴ βεβαίως αὕτη ὡς πρὸς τὴν αὐτὴν χρονολογίαν τὸ ἐπικρατοῦν ἀκούει

ΛΟΝΔΙΝΟΝ, Νοέμβριος

Ὅταν οἱ Ἕλληνες, περὶ τὰ τέλη τοῦ 8ου π.Χ. αἰῶνος, ἀπεβίβασθον ὡς ἀποικοὶ εἰς τὰς ἀκτὰς τῆς Σικελίας,

εὐθὺς ἀμέσως κατέλαβαν τοὺς καλοὺς λιμένας τῶν ἀκτῶν καὶ τὰς εὐφόρους πεδιάδας τῆς ἐνδοχώρας. Οἱ Ἰθαγενεὶς κάτοικοι, οἱ διάφοροι φυλαὶ τῶν Σικυλῶν ἀπεσύρθησαν εἰς τὰς ἀπρόσιτους ὀρεινὰς περιοχὰς τῆς νήσου καὶ διετή-

ρησαν τὴν ἀνεξαρτησίαν τῶν ἐπὶ τινα χρόνον. Ἐπὶ πολὺ παρέμεινεν ἀναπάντῃτον ἐρώτημα πότε καὶ μέχρι ποίου βαθμοῦ εἶχαν εἰσδύσει οἱ Ἕλληνες ἀποικοὶ εἰς τὸ ἄξενον ἐσωτερικόν. Αἱ πρῶται ἐκπολιτιστικαὶ καὶ πολιτικαὶ σχέσεις μεταξὺ τῶν Ἑλλήνων καὶ τοῦ ἰθαγενοῦς πληθυσμοῦ παρέμεινεν ἕνα σκατεῖον, ἀλλὰ ἐνδιαφέρον κεφάλαιον τῆς ἱστορίας καὶ τοῦ ἐξελληνισμοῦ τῆς Σικελίας. Ἐπιστεῖται ὅτι ἡ διενέργεια συστηματικῶν ἀρχαιολογικῶν ἐρευνῶν εἰς κατὰλλήλους τοποθεσίας, εἰς ἱκανὴν ἀπόστασιν ἀπὸ τῆς ἀκτῆς θὰ συντελοῦν εἰς τὴν ἐπίλυσιν τοῦ προβλήματος τούτου καὶ ἄλλων συναφῶν.

Ἡ λοφοσειρὰ Σέρρα Ὀρλάντο, κειμένη πλησίον τοῦ χωρίου Ἐμιντόνε εἰς τὴν ἐπαρχίαν τῆς Ἑτνα, ἐθεωρήθη εἰς τὰς πληρούσας πᾶσας τὰς πρὸς τοῦτο ἀναγκαίας προϋποθέσεις καὶ αἱ ἀνασκαφαὶ ἤρχισαν ἐκεῖ τὸ θέρος τοῦ 1955.

Ἡ λοφοσειρὰ αὕτη εἶναι μίᾳ ὥραιο τοποθεσίᾳ, τῆς ὁποίας τὸ ὑψηλότερον σημεῖον ὀφθαίνει τὰ 530 μέτρα περίπου καὶ δεσπόζει τοῦ ποταμοῦ Γκορναλούκα ἐνὸς ἀπὸ τοὺς ὀλίγους ποὺ κατέρχονται ἀπὸ τὰ βουνὰ πρὸς τὴν ἀνατολικὴν ἀκτὴν, ὅπου οἱ πρῶτοι Ἕλληνες ἀποικοὶ ἴδρυσαν τὰς πόλεις Κατάνη καὶ Λεοντίνους, αἱ ὁποῖαι ἐξέσποζαν τῆς πλουσιωτέρας ὄλων τῶν πεδιάδων τῆς Σικελίας. Ἀφοῦ παρήλθον τρεῖς ἐποχαὶ ἐρευνῶν, ἡμποροῦμεν σημερὸν νὰ ἀποφανθῶμεν μὲ κάποιαν βεβαιότητα περὶ τῆς πόλεως, ἡ ὁποία ἄλλοτε ἐκάλυπτε τὸ μεγαλύτερον μέρος τοῦ μήκους δύο μιλίων ἐκείνου ὁροπέδιου. Πρόκειται περὶ τοῦ Μοργαντίου, τὸ ὁποῖον ἀναφέρουν ἐνίοτε οἱ

ἀρχαῖοι συγγραφεῖς. Ἀπὸ τοῦς ἰδίοις αὐτοῦς συγγραφεῖς ἔχομεν μίαν ἀμυδρὰν καὶ ἐνίοτε ἀντιφάσκουσαν ἀποψιν τῆς ἱστορίας καὶ τῆς τοποθεσίας τῆς πόλεως ἐκείνης, ὅμως αἱ ἀρχαιολογικαὶ ἀποδείξεις πληροῦν πολλὰ κενὰ καὶ μᾶς παρέχουν μίαν συγκεκριμένην εἰκόνα. Καὶ πάλιν ὅμως αἱ ἀποδείξεις αὗται δὲν ἦσαν ἐπαρκῶς πειστικαὶ ἕως ὅτου μίᾳ ἐπὶ τόπου εὐρεθῆσα ἐπιγραφὴ τὰς κατέστησεν ἀδιαβλήτους.

Κατὰ τὰς πρῶτας δύο ἐποχὰς τῶν ἀνασκαφῶν ἀπεκαλύφθησαν μέρος τοῦ κέντρου τῆς πόλεως, ἡ ἀγορὰ καὶ αἱ γειτνιάζουσαι μὲ αὐτὴν συνοικίαι, ποὺ φαίνονται ὅτι ἤνθκαν εἰς τοὺς τρεῖς τελευταίους π. Χ. αἰῶνας. Ἦδη γνωρίζομεν περισσότερα καὶ περὶ τῆς παλαιότερας ἱστορίας τῆς πόλεως.

Εἰς τὰς βορείους κλιτῶς τοῦ λόφου τῆς ἀκροπόλεως τοῦ Μοργαντίου, ἀνευραμεν τὰ ἴχνη προϊστορικοῦ συνοικισμοῦ ὑπὸ μορφὴν μιάς καλύβης μὲ κυκλικὸν δάπεδον καὶ ἐπ' αὐτοῦ ἐστία, καθὼς καὶ μερικά ἐργαλεῖα ἐκ πυρίτου λίθου καὶ ἀγγεῖα ἐξ ἀργίλλου. Τὰ προϊστορικὰ ἐκεῖνα κτίσματα ἔχουν τὰ θεμελίᾳ τῶν ἐπὶ τοῦ βράχου, ὥστε φαίνεται ὅτι ἦσαν τὰ πρῶτα ποὺ ἐκτίσθησαν ἐκεῖ καὶ συνεπῶς ἀπέτελουν τὰ πρῶτα τὰ ἴχνη ἀνθρωπίνης δραστηριότητος εἰς τὸ μέρος ἐκεῖνο. Τὸ κατώτατον ἐκεῖνο στρώμα ἡμπορεῖ νὰ χρονολογηθῇ ἀπὸ τοῦ 12ου π.Χ. αἰῶνος, ἡ δὲ τελευταία καλύβη δὲν κατεστράφη κατὰ πᾶσαν πιθανότητα πρὸ τοῦ 8ου αἰῶνος, ἴσως μάλιστα καὶ βραδύτερον. Ἡ ἀβεβαιότης αὕτη ὡς πρὸς τὴν τελευταίαν αὐτὴν χρονολογίαν ὀφείλεται εἰς τὸ ἐπικοινωνεῖν ἀκόμη εἰς τὴν προϊ-

στορίαν τῆς Σικελίας πλήρες σκότος.

Ἐχομεν πληρεστέρας πληροφορίες περὶ τῶν μεταγενεστέρων συμβάντων. Ὀλίγον πρὸ τῶν μέσων τοῦ 8ου π.Χ. αἰῶνος, τὰ τελευταῖα ἴχνη τοῦ προϊστορικοῦ ἐκείνου συνοικισμοῦ ἐξηφανίσθησαν, καὶ ἤρχισαν νὰ κτίζονται μεγαλύτερα οἰκήματα ἐξ ὠμῶν πλίνθων, ἐπὶ βάθρου ἐκ λαξευμένων λίθων. Οἱ νεηλῆδες ποὺ ἐγκατεστάθησαν ἐπὶ τοῦ λόφου τῆς ἀκροπόλεως ἦσαν Ἕλληνες ἀποικοὶ, προερχόμενοι ἀπὸ τὰς ἀνατολικὰς ἀκτὰς τῆς νήσου. Ἀπὸ τέσσαρας διαφόρους τοποθεσίας, ὅπου διενηργήθησαν ἀνασκαφαί, προκύπτει ὅτι οὗτοι εἶχαν ἐγκατασταθῇ ἐπὶ τοῦ μεγαλύτερου μέρους τοῦ λόφου καὶ ὁ συνοικισμὸς ἐκεῖνος ἤρριξε νὰ ὀνομασθῇ πόλις. Πέριξ τοῦ λόφου ἐκτίσθη ὀχυρὸν τεῖχος, ἀνευρέθησαν δὲ ἐν τῷ τοῦ περιβάλλοντος ἴχνη ἀρχαίων ναῶν. Εὐρισκόμεθα συνεπῶς ἐνώπιον μιάς ἑλληνικῆς πόλεως καὶ ὅχι πλέον εἰς ἕνα συνοικισμὸν βορβάρων. Τὸ γεγονός τοῦτο εἶναι προωρισμένον νὰ μεταβάλλῃ ἄρδην τὰς ἐπικρατούσας ἀποψεῖς περὶ τοῦ ἀπὸ ἱστορικῆς πλευρᾶς σημαντικωτάτου προβλήματος τοῦ ἐξελληνισμοῦ τῆς Σικελίας. Ἐφ' ὅσον οἱ Ἕλληνες, ὅπως γνωρίζομεν σημερὸν, ἦσαν ἱκανοὶ νὰ κτίσουν μίαν ὀχυρὴν πόλιν εἰς τὴν ὀρεινὴν ἐκείνην περιοχὴν τῆς κεντρικῆς Σικελίας ἤδη ἀπὸ τῶν μέσων τοῦ 8ου π.Χ. αἰῶνος, θὰ πρέπει νὰ ἀναθεωρησῶμεν τὰς γνώμας μᾶς περὶ τοῦ πολιτισμοῦ τῆς σικελικῆς ἐνδοχώρας κατὰ τὴν ἀρχαιοτάτην ἐκείνην ἐποχὴν.

Μεταξὺ τῶν εὐρημάτων τῆς ἀκροπόλεως τοῦ Μοργαντίου, εἶναι διακοσμητικὰ ἀνάγλυφα ἐξ ὀπτιῆς γῆς, προ-

ωρισμένα νὰ στολίσουν τοὺς πρώτους ναοὺς τῆς πόλεως. Τὰ ἀρχαιότερα ἐκ τῶν «ἀκρωτηρίων» ἐκείνων εἶναι, ὅπως τὰ περισσότερα ἐκ τῶν παρομοίων τεμαχίων, ἀτέλῃ, ὅμως διατηροῦνται τὰ κυριώτερα μέρη τῶν. Φέρουν γυναικεῖαν μορφὴν, πιθανῶς μαινάδος, ζωηρὰ χρωματισμένην μὲ πορφύρου, μαύρου καὶ κόκκινου χρώμα. Ἐκ τῆς τεχνότητος τῶν ἡμποροῦμεν νὰ κατὰτάξωμεν εἰς τὸ δεύτερον τέταρτον τοῦ 8ου π.Χ. αἰῶνος. Τὰ ὑπόλοιπα ἐκ τῶν ἀρχιτεκτονικῶν ἐκείνων διακοσμήσεων ἐξ ὀπτιῆς γῆς εἶναι μεταγενεστέρως κατασκευῆς καὶ ἀναπαριστοῦν διαφόρου τύπου κεφαλὰς γαργολῶν.

Ὁμοῦ μετὰ τῶν εὐρημάτων αὐτῶν ἀνευρέθησαν καὶ ἐνδιαφέροντα θραύσματα ἀγγείων. Ὀλίγα ἐξ αὐτῶν ἦσαν ἀπὸ εἰσαχθέντα ἀττικὰ ἀγγεῖα τοῦ «μελανοκόρου» ρυθμοῦ καθὼς καὶ ἀρχαιότερα ἐρυθρόμορφα, ἅπαντα καλῆς ποιότητος. Ἄλλα ἦσαν σαφῶς τοπικῆς κατασκευῆς, τοῦ εἶδους ποὺ εἶναι γνωστὰ ὡς Σικελιωτικὰ ἀγγεῖα III καὶ IV, τέλος μῖα τρίτη ὁμὰς ἀνέκει εἰς ἀγγεῖα ποὺ προφανῶς μιμοῦνται τὴν ἀττικὴν τέχνην, χωρὶς φυσικὰ νὰ ὀφθάνουν εἰς τὴν τελειότητα τῆς, οὔτε κατὰ τὸ σχῆμα, οὔτε κατὰ τὴν κατασκευὴν καὶ τὴν διακόσμησιν. Ἐὰν ἡ πρώτη ὁμὰς ἀποτελῇ μαρτυρίαν τῆς ἀδιακόπτου ἐπαφῆς μὲ τὴν μητέρα χώραν, καὶ ἡ δευτέρα εἶναι δείγμα τῆς τοπικῆς τέχνης, ἡ τρίτη εἶναι κατὰ πᾶσαν πιθανότητα προϊόν τῶν προσπαθειῶν τῶν ἀποίκων εἰς τὸ πεδῖον τῆς κεραμοπλαστικῆς.

Eric Sjöqvist

American School of Classical Studies
Athens, Greece

June 8, 1957

Dear Erik,

Thank you for checking our readings of your stamps. This has cleared up several points, and in particular the identity of SO 159, 56-2958. We had never had a photo of this object, but its number had been written on a duplicate of the photo of SO 67, 56-351, hence the wrong reading; this confusion did not become evident until we assembled the material after study. An additional handle of the eponym APIETEIAAE thus provided, ~~which~~ increases the large proportion of your Rhodian datable ca. 190-180 B.C., an odd phenomenon? Does it correspond with other finds? With the help of your notes, it looks as if we might read SO 7 as [MI]AA cluster This is a fairly common type of the 3rd quarter (probably) of the 2nd century BC, and would be your first example of MIAAE. SO 9 is possibly *ENHIAFEZ TPATOYA IPIANIOY or other month at least that is the only one like it in our files. For SO 27 we ~~have~~ had adopted the reading in the inventory given us by Mr. Erim: OE[EM]OPOPI(OY) Of the reading of SO 106 I can finally make nothing, except to think now that it is probably Rhodian, not Knidian. Does it look so?

Your ancient city sounds delightful, with its archaic acropolis with painted roofs and Attic vases; and its fourth century shrine with gay ladies. I hope the season brings its sure identification and the best of the finds at the end.

The Stoa of Attalos has been officially turned over to the Greek Ministry of Education, except for the working and storage areas; so now if we want to take out a pot from the exhibition, we have to get permission! and there are strange guards there.

Yours as ever,

Won't some of you be coming over?

I'm expecting my niece Judy Grace to stay here a good part of the summer and help me - her own proposal. She is 20. Her twin, John Sebastian, will pay us a visit, with two of his college friends.

Princeton, 3 June 1957

Dear Miss Grace,

Please do accept my very sincere apologies for not having written earlier to thank you for your recent commentaries on the second group of amphora-stamps. I have been unfortunately typing practically day and night until last week trying to finish the second draft of my dissertation in order to send one copy to Professor Sjöqvist and submit the other to Professor Raubitschek and see their reaction. Indeed, I shall have to spend the summer trying to put the whole thing in shape providing that this draft is accepted on the whole. Naturally the more quickly this is done, the better it is, as I do not know as yet where I shall be next autumn after my final examination!

I have tried to find out the negative so-recorded B-738 of the stamp 56-2958, but unfortunately without success. The negative of this number represents an object which is certainly not an amphora-handle. On the other hand all records of the negative numbers repeat the number so there is no way of finding where the mistake can be located easily. The best solution, in my opinion, is to write to Sicily and ask the photographer to re-photograph the stamp in question. I shall do it and will ask Mr. Sjöqvist to send you again one print of the photo. I am sorry for the delay but I tried various possible numbers that might have been mistaken for B-738, but none produced any satisfactory result.

The academic year is almost over here in Princeton, except for the reunion and commencement ceremonies which will produce, I suppose, the usual noisy celebrations, before summer takes over the campus. As I said earlier, I shall have to remain here the whole season, and it is evidently with nostalgia and envy that I see many a person readying himself for the Mediterranean shores. I hope at least that the weather is not going to be too difficult to bear over here.

Thanking you very much again for your generous help, and hoping to meet you again sometime somewhere, I remain very sincerely yours,

Kenan Ekin

Prof. R. STILWELL

AIDONE (Enna)

May 31, 1957.

Dear Virginia:

Very many thanks, indeed, for your list of readings of our last bunch of amphora handles, for your datings of them and for all your help.

I am sorry that the photos were not made in the way they should. It is just as much my fault as anybody else's as I didn't know how they should be made. The photographer is grateful for your advice and suggestions and they will be followed in the future.

Needless to say I am very impressed by your readings and your datings and full of sincere admiration for your skill and perspicacity.

I have personally gone through the whole material to-day and compared it with your lists.

This is the result.

Those which you did not succeed in reading remain entirely illegible for me too, with the following meagre exceptions.

Seven Islands handles: general

A check of a particular group of these was asked for by Kenan Erim, Turkish graduate student at Princeton, to help date a series of coins from the excavations.

H. spoke to me at the ^{Princeton} Arch. Society meeting on Jan. 16, ^{afterwards} and sent photos and inventory records ^(5 of town) of the items that interested him. At my request, he later supplemented these data with a complete list of all stamped handles from S. O., and continually photographs were received, in 4 times, of all the rest save 3 (50, 45, 58, 62).

From the 1st lot of photos plus the list ^{1 brought to Allen by HAT}, H. laid out a collection as a whole in duplicate readings; and gaps were filled in ^{later} from Erim's supplementary lot of prints (smaller than the first lot, and showing less of the object, but pretty good - none of the pictures are printed to scale I think, but some must be about right) plus prints of new negatives made later in Aidone by E. Sj.'s arrangement (distinguishable by being small square pictures in pairs, side view as well as stamp for each).

Summary analyses were made for Erim, with copies to Stillwell and Sjögren, first of the selected items, then of the remainder.

The ^{him} carbon copy of the readings was sent 8.7.57 to Sjögren in Aidone.

Disposal of photos: ^{of} ~~them~~ ^{are} not needed in our index ^{i.e. not} (new types, ^{or} usefully superior examples), the small prints have been

attached to the small portfolios (cut-up heavy copy of the readings) and the large ones (for the first lot of prints) will be filed in the Plodina ^{and Kildian} phot. files; these latter pictures are often quite sharp, but being oversize they give a distorted impression of the stamps, and also are too big to use on the files, unless one tears off the edge where the record number is written.

Assortment

Plodina: $\frac{\text{Fair}}{85} + \frac{\text{rest}}{51} = \frac{\text{total}}{136}$

Kildian $2 + 1 = 3$

Coan $2 - 2$

Chian? $1 - 1$

Latin $3 + 1 = 4$

Miscell. $4 + 12 = 16$

? (no plots of 50, 45, 58, 62) 3

165 (which is the last 50 numbers)

examples of known types have now been filed, Miss Kolson is making cards for new types, and MZ will supplement these today by making cards for various monograms etc.

Prof. R. STILWELL

AIDONE (Enna)

12th of April, 1957

Dear Virginia,

Here are a set of amphora handles, newly photographed and completing Kenan Erim's set. He asked me to send them directly to you in order to gain time. Simultaneously I send an identical set to Kenan, so you can refer to them in your correspondence with him. It is awfully good of you to help us out with so much priceless information that we can recover nowhere else.

You may well consider many of the stamps illegible, but it is not the photographer's fault. Most of them seem better on the photos than in reality, and the pictures are pretty sharp. As we have no electric current, there are only contact prints available, but I hope that a magnifying glass will help you out. In order that you get the shape of the handle as well as the stamp, you have two photos of each object. They are kept together in pairs. The inventory numbers are the small typewritten figures above the scale, while the numbers in white ink are the photo numbers. In your correspondence with Erim the former are the significant ones.

The dig is going pretty well and we have quite

43.11.21
a lot of significant finds and information gathered in these first weeks of the season. But the unstable weather has as yet prevented us from attacking the - hopefully - ancient acropolis of our Serra Orlando. I hope we will be able to do so in the week after Easter.

Please give our very best to common friends in Athens, above all Homer, the Casheys, Allison, Gene and Lucy Talbot, and to British and Swedish friends when you see them.

Again, thank you for your wonderful help.

Yours

Smith

SECOND FOLD

FIRST FOLD

Princeton, 29 March 1957.

Miss Virginia Grace
American School of Classical Studies
Athens, Greece.

Dear Miss Grace,

I am terribly grateful to you for the time that you devoted to our stamps. I have just received your letter of the 23rd as I was about to write to thank you for your invaluable help. I am pleased that the dates you give me corroborate as a whole my dating of the HISPANORVM coins to the last quarter of the second century; indeed, one must account for a certain amount of years of re-use of the amphorae once they had been drained of their original liquid; particularly so in view of the fragmentary condition of some of the handles. It is interesting to note that from a purely statistical point of view the second century stamps dominate at least in the cross-section that you were kind enough to examine. I suspect that the same will be true in the overall number.

I hope that you have more pleasant weather in Athens than we do here. Two days ago, we woke up to find snow piling furiously outside our windows. Naturally, because of the temperature, it did not last very long.

Thank you again very much for everything that you so kindly did for me. If there is anything that I could do for you, here in Princeton, please do let me know. May I ask you to convey my respectful greetings to Professor Thompson?

Very sincerely yours,

Kenan Erim

AIDONE (Enna)

29th of March, 1957

Dear Virginia,

Many thanks for your good letter of 20 March which reached me yesterday together with the carbon copy of your letter to Erin.

I use this day in bed (head-cold, temperature and deafness) to give you a preliminary answer. First of all, I am impressed by your rich and accurate information concerning our handles. I have not yet been able to check with all our note books and profile drawings etc. but feel for the time being very encouraged by your news. It is wonderful, Virginia, that you can and are willing to help us in this substantial way. You know that I had always admired your work and tried to understand its great importance. Now, when applying it to my own things for the first time, I feel simply elated.

Simultaneously I received a letter from Erin (written before he had received yours) with a list of missing photos from the seasons 1955 & 1956. The photographer is already at it, and we will remember your instructions on the technicalities. You will get two photos of each handle: one showing the stamp at best

advantage and one showing the handle itself.

Being in bed to-day I have not been able to check personally how many of the missing handles that are photographable, but I hope that at least some of them will prove to be worth while.

Our work started three days ago and we are getting pretty well under way already. The group is in good spirits and the weather is reasonably good.

Please give my very best to all our friends at the Agora. I am cordially joined by Gurl; Lucy Shore and others.

With all good wishes for yourself and the Agora people and their work.

Yours

Rich

March 23, 1957

Dear Mr. Erim,

Mrs. Will has written me some notes on the Latin stamps from Serra Orlando. You will be interested mainly in her opinions on the dating, which I pass on to you here:

56-1817, and probably also 55-696, are datable in the late 2nd to early 1st centuries B.C. Of the stamp on the former, 12 duplicates have been found in Dálos, where activities were much reduced after the destruction by Mithradates in 88 B.C.

For 55-691, she says the safest date to quote is "first century B.C."

56-1818, which, as I wrote you, I also consulted her about, appears not to be Latin, and I am afraid we cannot date it at present.

Yours sincerely,

SICILY

On Serra Orlando stamped handles

American School of Classical Studies
Athens, Greece March 20, 1957

Dear Mr. Erim:

Thank you for your letter of March 10, and the second lot of prints. I shall be glad to have the final set when the rest of the handles have been photographed. It is best to show the handle as a whole, not just the stamped part.

We have made readings of most of the selected stamps of which you gave me photographs in Princeton, and have investigated dates. Here are some results, beginning with the majority class, the Rhodian:

photographs received		85
stamps illegible (55-127 and 692; 56-370, 371, 490, 612, 614, 1774)		8
datable in the 3rd cent., before about 225 B.C., 55-436 (ΘΕΥΑΡΡΟΞ) and 55-562 (ΗΑΥΖΑΝΙΑΞ), both fabricants		2
datable in the/late 3rd cent., to about 190 B.C.		ca. 15
datable close together, apparently ca. 190-180 B.C.	1	ca. 30 + 2
datable ca. 180-140(?) B.C. or a little later	2	ca. 28 - 2
		85

1
The eponym handles in this group are 16, naming 8 different yearly officials. Most numerous are those that name XENOPHON; I list them with their trench and stratum numbers: 56-372 (28,1), 56-493 (28,2), 56-1288 (28,2), 56-1724 (28,2), 56-1740 (28,1), 56-2692 (33-F,3), 56-2893 (39,2) - seven handles all naming the eponym Xenophon. Dating of this group based on recently assembled evidence.

2
Of this group, five stamps name five eponyms some or all of whom may date after about 146 B.C. (date of destruction of Corinth and Carthage): ANAPIAZ, 56-142 (4,3); APIZOTHEITOX, 56-510 (28,1); APIZOTMAXOX, 56-167 (2-6,3) and 56-1772 (28,2); ΛΑΘΕΙΑΞ, 56-2914 (33-H,2); TIMOAIKOZ, 56-162 (4-A,4). (Again I have put in indications of the trench and stratum, which you should check for yourself.) I don't think it likely they are to be dated much later than 140, because of the interconnection of names that tie them up with persons established in the second quarter.

Apart from the Rhodian, there were two Knidian, of which one, 56-1352 we have not succeeded in reading, while the other, 56-1352, is an early one, datable probably at the beginning of the 2nd century (28,2). The photographs of the three in Latin, 55-691, 55-696, 56-1817, I have sent to Mrs. Elizabeth Lyding Will, who is publishing our Latin stamps; I have also sent her 56-1818, possibly also Latin. You gave me photographs of three other handles, 55-437 (2-C,3), probably 3rd century B.C., and 56-4759 and 2330, which I cannot date.

Non-Rhodian, altogether 9.
TO sum up, then: the handles you inquired about date probably not later than the third quarter of the second century B.C., unless the Latin go later.

cc. Professor Stillwell

(to be shown to Mrs. Hill) 55-1164

1

MISCELLANEOUS

unclassified, and no dates proposed: 55-153, 1124, 1125, 1126, 2738, 2755, 2778, 2779, 56-196, 365, 3080, 3180

12

These do not seem to match anything we have on file. Perhaps some are local or from near by. 55-1126 looks as if possibly it might be Punic, or related? Can one make out letters? 56-196 looks as if perhaps it is on a rim, not a handle, so it may be from a Roman jar; I shall show it to Mrs. Will. 56-3080 is like 56-2330 of the first list, but like nothing else I know of.

Yours as ever,

NO PHOTOS RECEIVED so I don't know what they are: 55-2725, 56-150, 168

3

Professor Sjöqvist seemed to expect me to communicate to you about this lot, and perhaps you will be interested to see the comments on these as background to those on the selected group. I shall send copies of the letter to Professor Sjöqvist and Professor Stillwell; and I shall send to Professor Sjöqvist also a carbon copy of the readings we have made of the stamps, so that if possible somebody on the spot can check the readings from the actual objects, in some cases easier to read than the photographs. I should like to know any corrections that are to be made, but the carbon copy is to be kept with the excavation archives, if wanted.

I hope you have come on well with your interesting investigation, and have kept well. Here we are having wild cold north winds, and wearing warm coats in May. Several friends are leaving for Turkey soon, Mrs Piet de Jong and Miss D.H. Cox for Gordion, and travellers to Istanbul.

Yours sincerely,

This note only on copy to Sjöqvist

Virginia Grace

Dear Erik,

Here is the carbon copy of the stamp readings. Do see if somebody has time to check from the handles. (See above.) We have had more trouble with the second lot, because the photos are smaller, and sometimes show the stamps tipped; and for these we have also no notes from the inventory, with readings taken from the handles.

May I make one or two suggestions about photographing these things? Where electricity is not available - or perhaps even where it is - the best way seems to be to take them indoors, by daylight coming from a rather low window (anyway not a high one) or from an open door. Room as a whole rather dark, especially the ceiling dark or high - as little as possible light from above. Reflected light from an opposite building is very good - but also reflected light from clouds. The handle must not be tipped, the stamp must be full front to the camera, i.e. the light to be oblique, not the stamp. The enclosed 356.4 was taken in a sitting room in Alexandria, by ~~day~~ sunlight reflected from the opposite house through an open window. Exposure probably about 10 seconds with opening 18 or 22. The shadow on the dark side

⊗ Ten setup to be not too close to door or window, but a bit back.

of the handle has been cut by a small reflector made of tinfoil on a card; one holds it low enough so it does not cut the shadows that pick out the letters. To prop the handles for photography: stick them with a lump of modelling clay to a little column (we use one of those cases ~~used~~ to hold cassettes of roll film). Whoever checks the readings, will they please look at the sides of the handles to see if there is a secondary stamp? (Only on Rhodian.)

PRINCETON UNIVERSITY

PRINCETON, NEW JERSEY

Department of Art and Archaeology

Princeton, 10 March 1957

Miss Virginia Grace
 The American School of Classical Studies
Athens
Greece

Dear Miss Grace,

I am terribly sorry for the delay in sending you the photographs of the remaining group of handles from Serra Orlando. Unfortunately, our photographer here, despite my pleas, was very slow in getting them ready. These photographs complete the series that you already have, but, as I had told you in Princeton, there is a certain number of handles that, for some reason unknown to me, was not photographed. The inventory number of these are:

56-168	55-1124	55-2289
56-1760	55-1125	55-2301
56-1771	55-1126	55-2383
56-2003	55-1179	55-2689
56-2004	55-1184	55-2758
56-2864	55-1731	55-2759
56-3038	55-1732	55-2762
	55-2071	55-2769
		55-2779

I will send this list to Professor Sjöqvist in Sicily at the end of the month and ask him to have them located and photographed, and send prints to you directly. I would be terribly grateful to you if you could give me your precious, "chronological" opinion on the handles whose prints I presented to you here in Princeton. Indeed, they happen to have occurred in strata in which I am directly interested for my coins.

Thanking you again very much for your invaluable help, and apologizing once more for the delay, I remain very sincerely yours,

Kenan Erim

P.S. I am sending the photographs in a separate packet by air, so that you may receive them as soon as possible. Mrs. Smithson, whom I called, advised me to do so, since the person who is going to Athens would not arrive ^{there} before early April.

Train for New York &
Princeton, and in Princeton
January 30, 1957

Dear Maria,

Mr. Thompson has kindly agreed to take these papers
and photographs to you, so you can make the
duplicate readings of the handles found in Serra
Orlando, the Princeton excavation in Sicily. When
you have the duplicates made, so far as possible
- there will be some empty spaces for the present
- please start to look up the dates of these
people, as you did for Mr. Koudis. When I come,
we can go over it, and send the information to
Mr. Kemal Erkin, a graduate student at Princeton
University (a Turkish young man) who is doing his
dissertation on some coins found with some of these
handles.

He gave me information and photos mostly only
about these particular ones. I have asked him for
photos also of all the rest, and he says he will
have them made and sent, - some need negatives
made, in Sicily.

In the meanwhile, please make the
duplicates in the regular way, leaving the empty
spaces. See next page for how to do it.
Use ^{mostly} the photos to make readings, of course, but the
descriptions may sometimes help, though the ^{readings} were made

William N. Lissner.

SO (for Serra
Orlando)

Please do this job now, as soon as you have
time.

I have just had lunch ^{at the Numismatic Museum} with Margaret Thompson
and Mr. Mills, very nice people whom you'll
remember.

My best greetings to your mother and sister,
also to Andreas. I'm sorry to be in a hurry
— I am to leave this envelope, and the
Mrs. Thompson will drive me to Miss Goldman's
house for dinner. I'll be leaving before long for
the British Museum. With love.

SICILY

SERRA ORLANDO

54.01

Princeton, 17 January 1957

Miss Virginia Grace
c/o Mrs. F.M. Mc Phedran
5321 Baynton Street
Philadelphia, 44, Penna.

Dear Miss Grace,

After our conversation of last night, I got your address from Mrs. Smithson and therefore, I thought it better to send you the photographs of the amphora handles along with the inventory listing from our records with the supposed reading of the stamps, which to an expert like you may seem to be wrong on many occasions. Thus, you will perhaps have a chance to have a look at some of them before your trip to Princeton next week and we could discuss more profitably and losing less time.

Thanking you most sincerely for your generous help, I am very gratefully yours,

Kenan Erim

Stamped Amphora Handles (55.)

Selected

- Cat. no. Photo no.
- 55-127 A638 Serra Orlando 27 Aug. 1955 - Trench 4, North end, 5th stratum.
Sjöqvist.
H. stamp, 0.014 m. Pres. L. 0.03 m.
Part of upper arm and adjacent rim preserved.
Rectangular stamp, end toward rim: IXOY
- 142 A635 Serra Orlando 25 Aug. 1955 Trench 4, Stratum 3
S. Borgstam
Stamp: 0.042 m. long; 0.014 m. high
Upper arm and adjoining wall preserved. Stamp complete, but impression partial.
Rectangular stamp, inscription in two lines, running from wall to "elbow." ΕΠΙΑΝΔΡΙΑ
OY
- 162 A658 Serra Orlando 7 Sept. 1955 Trench 4-A, Stratum 4
S. Borgstam, I.
Pres. L., 0.04 m. H., 0.018 m.
"Elbow of handle; broken along left edge of stamp.
Rhodian fabric. Rectangular stamp, in three registers reading from wall to elbow: ΕΓΙΤΙΜΟ
ΔΙΚΟY
ΥΑΚΙΝΘΟΥ
- 167 A644 Serra Orlando 10 Sept. 1955 Trench 2-C, Stratum 3
R. Grimm, I. (Sand)
L. Stamp, 0.038 m.; H., 0.018 m.
Upper arm preserved with some of adjoining wall and rim. Upper right corner of stamp broken away. Impression faint; stamp slipped.
Rhodian fabric. Rectangular stamp in three registers, reading from wall to elbow.
ΕΠΙ Α
ΡΟ
ΔΑΥΛΙΟΥ
- 184 A647 Serra Orlando 8-9 Sept. 1955 Trench 4A - Stratum 5
S. Borgstam, I.
L. Stamp 0.04 m.; H., 0.016 m.
Upper arm and some of adjoining wall preserved.
Rhodian fabric. Rectangular stamp, in three registers, reading from elbow to wall:
ΕΠΙΛΑΓΕ
ΣΤΡΑΤΟΥ
ΑΡΤΑΜΙΤΙΟΥ

- Cart. no. Photo. no.
- 55-436 A645 Serra Orlando 10 Sept. 1955 - Area I, Trench 2-C, Stratum 3 (Sand)
 R. Grimm, I, p. 100, Find #1 for Sept. 10.
 L. stamp, 0.032 m.; H., 0.013 m.
 Upper part of handle and adjacent wall preserved.
 Rhodian fabric. Rectangular stamp, reading from elbow to wall: EYΔΩΠΟΖ -
- 437 A654 Serra Orlando 10 Sept. 1955 - Area I, Trench 2-C, Stratum 3 (Sand)
 R. Grimm, I, p. 100, Find #10 for Sept. 10.
 Pres. L. stamp, 0.035 m.; H., 0.015 m.
 Vertical section of handle and "elbow" preserved.
 Stamp incomplete.
 Non-Rhodian fabric. Red clay; mica, lime and other mineral inclusions. (Self-slip).
 Rectangular stamp on elbow, reading retrograde from elbow to wall: ΠΩΧΙΝ
- 562 A650 Serra Orlando 16 Sept. 1955 - Area I, Trench 2-C, floor level below lowest step
 R. Grimm, I, p. 122, Find #2 for Sept. 16
 L. stamp, 0.03 m.; H., 0.017 m.
 Upper arm, without elbow, and adjoining wall preserved.
 Rhodian fabric. Rectangular stamp, in one register, reading from wall to elbow:
 ΠΑΥΞΑΝΙΑ (III^d 220?)
- 644 A639 Serra Orlando 20 Aug. 1955 - Area I, Trench 4, Stratum 2
 S. Borgstrom I, p. 5
 L. stamp, 0.038 m.; H., 0.014 m.
 Upper arm and part of adjacent wall preserved.
 Rhodian fabric. Rectangular stamp in one line, reading from elbow to wall: *
- 645 A630 Serra Orlando 1 Sept. 1955 - Area I, Trench 2-B, Stratum 2 to 0.70 m.
 R. Grimm, I, = p. 58
 Pres. L. stamp, 0.048 m.; W., 0.013 m.
 Elbow of handle; right edge of stamp missing, but break probably comes at border.
 Rhodian fabric. Rectangular stamp in two registers, with radiate frontal head at left, reading from elbow to wall:
 ΕΝΙΑΡΙΣ
 ΤΣΑΜΟΥ

Cat. no. Photo no.

646 A631 Serra Orlando 22 Aug. 1955 - Area I, Trench 7,
 R. Grimm, I, p. 15 0.60 - 0.90 m.
 So 24 pres. L. stamp, 0.022 m. H., 0.017 m.
 "Elbow" of handle preserved; right half
 of stamp missing.
 Rhodian fabric. Rectangular stamp, reading
 from elbow to wall, single line: 152 p o, L

691 A629 Serra Orlando 23-24 Sept. 1955 - Area I,
 So 25 S. Bagstam, I, p. 119 Trench 4A, Stratum 4
 L. stamp, 0.02 m.;
 H., 0.014 m. Max. Meds. frag., 0.175 m.
 Fragment of wall with stump of handle.
 Medium red clay with coarse mineral temper;
 buff slip.
 Fragment of shoulder of heavy amphora with
 bottom stump of handle. Rectangular stamp
 impressed at base of handle: GK

692 A636 Serra Orlando 17 Sept. 1955 - Area I, Trench 15,
 So 26 R. Grimm, I, p. 125 Stratum 1, lower end
 L. stamp, 0.041 m.; H., 0.015 m.
 Upper part of handle; very battered.
 Rhodian fabric. Rectangular stamp;
 illegible.

693 A641 Serra Orlando 19 Sept. 1955 - Area I, Trench 2-D,
 So 27 R. Grimm, I, p. 138 Stratum 1
