

RHODES: CARBONS OF DUPLICATES
REMAINDER 465

Rhodes: flimsy carbons of Duplicates

We have here fl. carbons of

ME 298 - 318

566 - 597

598 - 636

637

822 - 836

It appears we have given the rest, at various times, to members of the Service in Rhodes.

They did not, however, remain available to the current Director - E. P. - there. So we have now given to Mr. Papaschiastokoulou, to be kept in Rhodes, a complete set of photostatic copies of the Originals. I. e., with latest additions (late yesterday)

ME 1 - 836

Nos. 638 - 821 are Rakoula lab finds, and the flimsies - carbons are being given to Q. D. Weinberg.

... in the upper right corners classify handle and/or stamp, distinguishing 1) place of origin when known - T(hasos), R(hodes), K(nidos), etc.; 2) type of stamp not an amphora; 3) language if not Greek; 4) shape of stamp if not a plain (unframed) rectangle; retrograde inscription (indicated by an arrow). Inventory any other documentation go to the left, any descriptive comment to the right, dimensions unless otherwise specified being width by thickness of handle where stamped. Number in the middle are negative numbers.
