

RHODES; PMWM SOME WORKING
PAPERS 1979-1980

474

Rhodes: Instituto (some also from Castello) (5.vi.79) ^{1.01}

22.vi.79

Concordance of A and MZ numbers.

Items checked (✓) were seen by PTHW in Rhodes. Others exist and are entered in the catalogue of A numbers, with descriptions, finding places, location etc. but I didn't see them.

The present location of items in this list, where known, appears in the left margin of each column. A, B, Γ, Δ, E, Z, H, Θ, I, K, and Λ are all racks with upper and lower tiers, in a "παραί" in the work rooms of the Institute. β refers to another section of the same room, also a παραί (called by us παραί β') with low beams overhead where one bumps one's head frequently. Here there are shelves with necks and handles at the far end from the ~~stairs~~ stairs, and two sections ("middle" and "end") where amphoras are (temporarily?) piled up against each other on the floor.

23. v. 80

Continuation of the "black list" contains only new ~~the~~ ~~new~~ necks and jars found in the small $\pi\alpha\tau\alpha\pi\iota$ ($\pi\alpha\tau\alpha\pi\iota$ β) in the "middle" and "end" sections on the floor. Only those with a $\checkmark$ mark ~~the~~ were actually found.

(list goes up to A 504 because this was apparently seen by PDWTL in 1979~~8~~ (?)
