RHODES -

SOLEIL DIG

3η Νοεμβρίου 1960

2

Ἀγαπητὴ Δίς Γκρέϊς,  
προλίγου ἡ Πόλυ μοῦ ἔδωσε τό γράμμα σας γραμμένο στίς 29.10. Σᾶς γρά-  
φω ἀμέσως γιά νά σᾶς πῶ πόσο ὥραϊα περάσαμε τήν ἐβδομάδα μας στήν Ρό-  
δο, τήν ὁποία μέ μεγάλη λύπη ἐγκαταλείψαμε τήν Δευτέρα 31.10, γιά νά  
γυρίσωμε στά ἴδια. Πράγματι ἡ Ρόδος αὐτή τήν ἐποχή εἶναι πολύ ὥραϊα.  
Τό ἀφθονο πράσινο καί τά πολύχρωμα ἀνθισμένα λουλουδία τήν κάνουν ἕνα  
νησί πού μόνο σέ παραμύθια θά μπορούσε κανεῖς νά περιγράψῃ ὅσα ἔχει.  
Σάν συμπλήρωμα σέ ὅλη αὐτή τήν ὁμορφιά εἴχαμε καί τό καλοναῖρι, πού  
ἀκόμα συνεχίζεται στήν Ρόδο, καί ἔτσι εἴχαμε τήν τύχη νά κῶνωμε τά  
τελευταῖα μπάνια μας.

Κάναμε ἀρκετές ἐκδρομές στά διάφορα ἀξιοθέατα τοῦ νησιοῦ, Λίνδο (μέ  
γαῖδουράκι), Κόμιρο, Φιλέρημο, Πεταλοῦδες, Προφήτη Ἥλῖα, καί στά διάφορα  
προάστεια τῆς πόλεως ὅπως τό Ροδίσι, Καλλιθέα κ.ἄ.

Ἐπισκεφθήκαμε τό μουσεῖο καί τίς ἀνασκαφές πού βρέθηκαν οἱ ἀμφορεῖς.  
Ἀπό τό δωμάτιο αὐτό τῶν ἀμφορέων ἔχουν βγάλει περίπου 100 ἀμφορεῖς τοῦς  
ὁποίους τοῦς ἔχουν πλύνει καί ὁ Κώστας ἔχει ἀρχίσει νά τοῦς συγκολλᾷ  
στήν αὐλή στό πίσω μέρος τοῦ ἐργαστηρίου του. Ὅλοι σχεδόν εἶναι σπα-  
σμένοι, ἀλλά οἱ σφραγίδες τους σῶζονται σέ καλή κατάστασι. Προτοῦ τοῦς  
βγάλουν ἀπό τό δωμάτιο τοῦς ἔχουν δώσει ἕνα νούμερο κατὰ σειρὰ πού βρί-  
σκονται τοποθετημένοι, γιὰτί ὅπως μοῦ ἐξήγησε ὁ Κώστας πρόκειται μετὰ  
τό καθάρισμα καί τό κόλλημα νά ξανατοποθετηθοῦν στήν θέσι τους γιά νά  
τοῦς φωτογραφίσουν. Κατ'ῶρθωσα νά κοιτάξω 19 ἀπό αὐτούς τοῦς ἀμφορεῖς  
καί νά πάρω μερικά ράμπινς. Ἀπό τοῦς 19 οἱ 9 εἶναι ὁ τύπος Ξενότιμος  
μέ Πausanias σέ στρογγυλή σφραγίδα, οἱ 8 Μίνυθος μέ Πausanias σέ τετράγω-  
νη σφραγίδα, ἕνας μέ σφραγίδα μπούτόν καί ἕνας καινούργιος τύπος Παυ-  
σανίας τοῦ Τελέσωνος καί στίς δύο λαβές.

Ἔχω βγάλει φωτογραφίες ἀπό τό δωμάτιο μέ τοῦς ἀμφορεῖς ὅπως ἔχει  
τώρα, ἔχω φωτογραφίσει ἐπίσης ἕναν ἀπό αὐτούς τοῦς ἀμφορεῖς, ἐπίσης  
τό μέρος πού βρίσκονται ὅλοι οἱ ἄλλοι πού ἔχουν βγάλει γιά νά συγκολλ-  
ηθοῦν. Δυστυχῶς δέν ἔχω πάρει ἀκόμα τίς φωτογραφίες ὥστε νά γνωρίζω  
γιά τήν ἐπιτυχία τους καί γιά νά σᾶς στείλω. Ἔχω ἐπίσης μερικές πα-  
ραγγελίες ἀπό τόν κύριο Κωνσταντινόπουλο γιά τίς ὁποῖες καί γιά πολ-  
λά ἄλλα θά μιλήσωμε ὅταν ἔλθετε.

Σᾶς στέλνω ράμπινς ἀπό τοῦς δύο αὐτούς τύπους τῶν ἀμφορέων καί ἕ-  
να ἀπό τόν καινούργιο τύπο τοῦ Πausanias.

Εὐχαριστῶ γιά τό Τσέκ.

Χαιρετισμούς πολλούς στόν Τόμ, Τζούντη καί μητέρα κυρία Γκρέϊς.

Σᾶς χαιρετοῦμε ἐγώ καί ἡ Πόλυ

Μέ πολύ ἀγάπη

Ἀνδρέας Δημετρίου

Soleil amphebas in storage

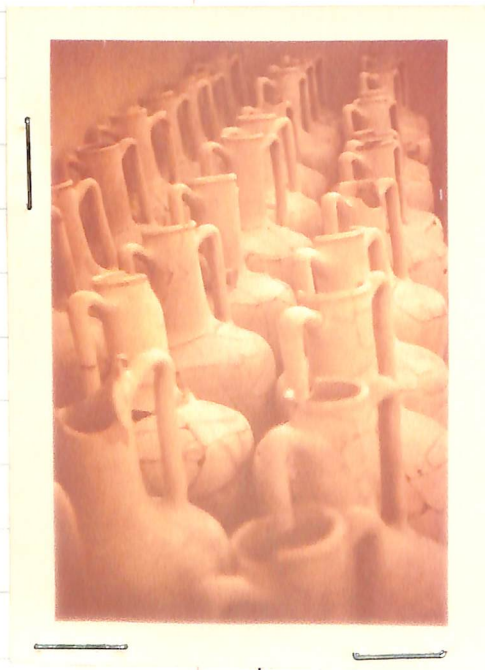

MET looks at the NY TIMES photo in a clipping of date 27. XII.64.

She tells me this is the way she and Nida found the amphebas. I said how could you get at them & take rubbings, etc., She said they took out one row with the help of a workman, and put them in a narrow <sup>plate</sup> against a retaining wall outside <sup>a room</sup>. Then each row was done, and then moved into the empty space of the preceding row.

Nida took a photo, she said.

22. II.67

The attached photo. were sent by Nida Reed in his letter of 13. II.67.

1

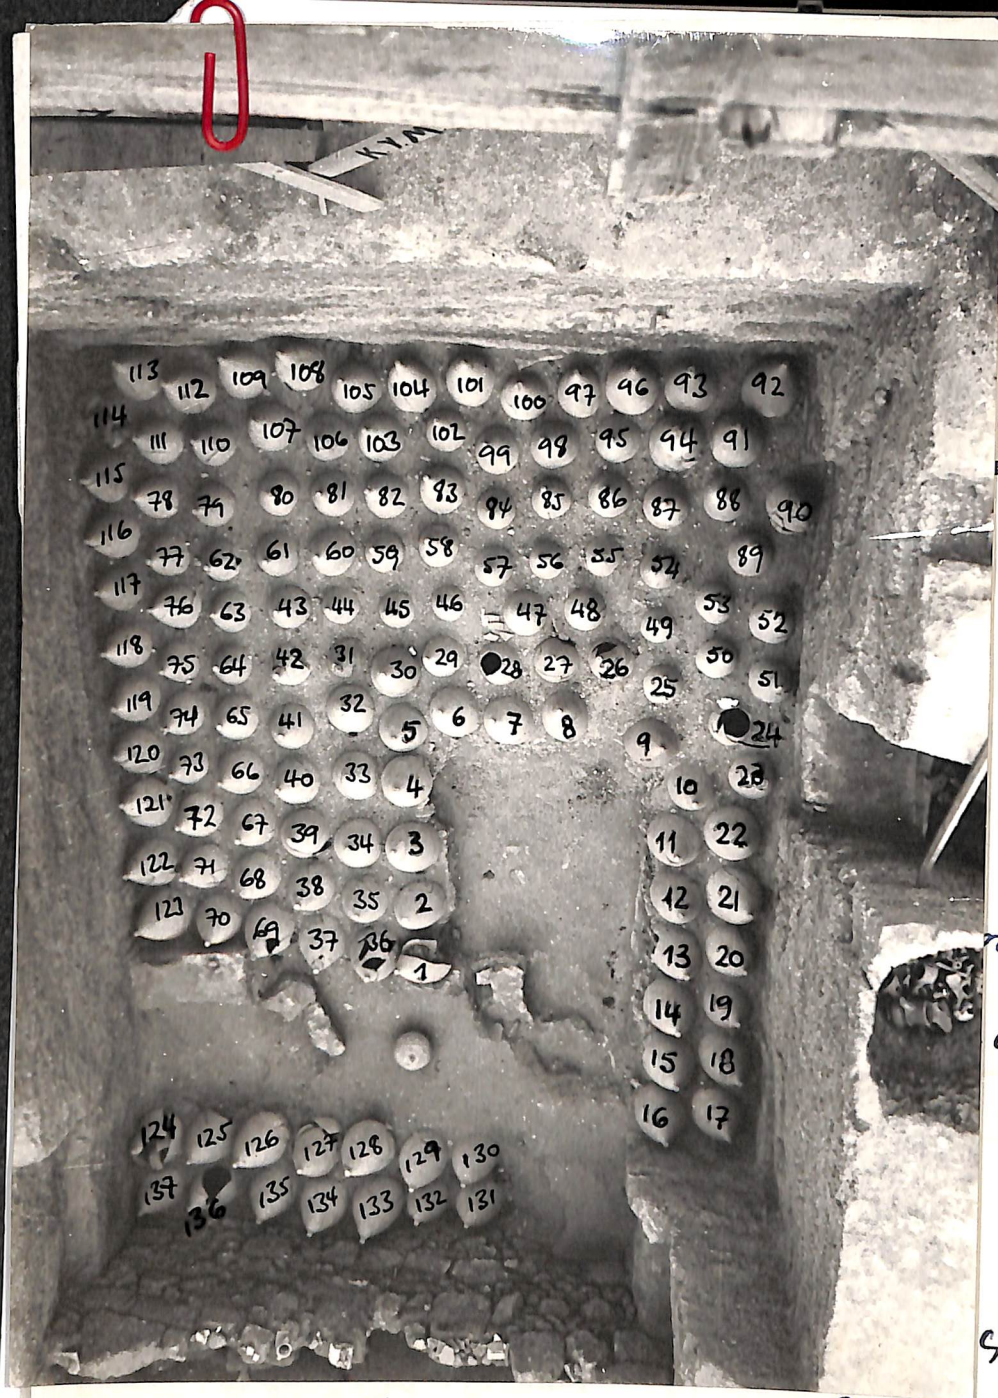

2

3

Phot. no. 3 above → shows the row taken out to make space. MET thinks it was numbered last. She says numbers were given before rubbings were taken, i.e. row by row.

## SOLEIL DEPOSIT

Identification of jars by numbers  
given, as possible to check if  
similar ones together,

Ρόδον 21.9.67 <sup>IX</sup>

Handles missed by Nick on  
mission, he says.

Αγαπητὴ Μαριό,

Κὲ καθυστερεῖς, δὲν πῆκα νὰ σὺνηθοῦν  
πῶσαν κυτῶν, ἐπὶ πῆσαν σου εὐχῶν  
τὴ συντηρεῖς τῶν ἀγαθῶν σου "ἡλίου",  
κὲ πῶ ἀρεθῶν σου Πανέπου.

Ὅσο πῆ πῶν ἀγαθῶν σου σου εὐχαῖναι  
κατῶν δὲν ἔχῃ δῶντες λαβεῖ.

Σὲ λίγο καιρὸ δὲ εὐχῶναι ἔσται κὲ  
δῶντες παρῶντος πῶν ἀγαθῶν, κὲ  
εὐχαῖναι νὰ δῶν νὲ πῶν δῶν!

Χαρεῖντοῖα εὐχῶν.

Μὲ εὐχαῖναι πῆ πῶν εὐχαῖναι καθυστερεῖς

ἦν

[Σεργίουδης]

Copy of the duplicates ME 319 - ME 503 given  
to Miss Zervoudaki for the Museum records.

## Soleil deposit: contents

Note that a single one of these amphoras is old-style, with mushroom rim. No foot preserved. General effect like the published jar of Δυμύτειος (Greece 1986, no. 25). This <sup>one</sup> is M2 387 = A 48, jar of Δαμοκκος, cf. Εὐκλῆς - no mouth, more or less better shape. Battered - rim chipped. (Εὐκλῆς is known with mouth.)

\* The same (?) Δαμοκκος endorses a pair no. of amphoras in the deposit, with rect. stamps mostly having the mouth in the fab. type.

I know there was such a jar, but don't see it noted in the Soleil folder. It is, though. III. 89

## Grouping of jars in Seleid deposit

M.B.W. has made a full concordance of jar numbers on jars, with MZ numbers. <sup>For</sup> These 1st nos. see AD's letter to me of 30.XI.60. at this time apparently they planned to return these to their room <sup>in which they had been found</sup> for photographs. So they marked the jars, and <sup>but corresponded</sup> nos. with jars in the big pile after mending. <sup>Later by these nos. of 2.II.61 (printed)</sup> 9.II.61 (typed), neither goes beyond the '40s, when the total no. was 137. These lists of course don't have MZ nos., but they have names etc. & identify them.

M.B.W. has made a start at plotting the arrangement of jars, by working out where in the group plots were the jars of individual potters. E.g. the jars of Kp's are almost (?) all together, and there is at least a good group of jars of Esv's & nos. I can check this position, as I took a rubbing of one of these while they were still in original positions.

113 112 109 108 105 104 101 100 97 96 93 92

Layout of jars in Solid deposits.

I found one central point, in that I had taken a rubbing of the <sup>back of the</sup> 4<sup>th</sup> jar in the 2<sup>nd</sup> row in my pick, Amphora, fig. 63, left side, and found it to be a jar of Xenoteras w. Ross.

This jar can be identified in the point they gave me of the whole lot, with numbers on the jars. It is jar 13, and in fact it is a jar of Evot., = MS 410, according to the "Row no. 13" in our record, taken from the jars and entered in the dupl.

11 = MS 401 Evot. of Haus. Yak

13 = MS 410 Evot. of Haus. Yak.

14 = MS 451 Evot. of Haus. Yak

15 = MS 438 " " " "

OB no. 10 = MS 402, and is again of M. J. D.

Solid group  
~~Mixed rocks~~

There are now kept in the ~~stada~~<sup>tars</sup>  $\pi\tau\alpha\sigma\eta$  of the  $\epsilon\rho\chi\alpha\sigma\tau\upsilon\pi\iota\omicron$ . They are generally in a state of repair, and individually available as they are stored.

an antiquity turns up, so the Archæological Service may explore the area.

Workmen are sometimes ordered to break up the find before the service finds out. "We cannot afford to let them do this in Rhodes," said Gregory Constantinopoulos, superintendent of antiquities for Rhodes. "We have to keep a watch on every building site."

"This is our chance to peek into the past of this town," Mr. Constantinopoulos said, "and try to keep it accessible to visitors."

Plans are modified in cases of discoveries, so the cellar of the structure may be accessible to sightseers.

The Rhodes antiques de-

partment is drawing the plan for the ancient city, which spread over three and a half acres in the third and second centuries B.C.

A recent find in a building plot was a 25-inch-square mosaic of the second century B.C., showing the face of the

drunkard Silenus, a follower of Dionysus.

The Greek archeologist said "it was still a masterpiece—the first evidence of Rhodian painting we found so far."

Other recent finds were a marble head of Hercules and a bust of a Rhodian girl.

Special to The New York Times

ATHENS, Dec. 17—A building boom stimulated by tourism on the Aegean island of Rhodes is enabling Greek archeologists to uncover an ancient city buried under the modern town of Rhodes.

In this country, a rentless war is waged between archeologists and building contractors. The builders resent a Greek law that forces them to hold up construction when an antiquity turns up, so the Archeological Service may explore the area.

Workmen are sometimes ordered to break up the find before the service finds out. "We cannot afford to let them do this in Rhodes," said Gregory Constantinopoulos, superintendent of antiquities for Rhodes. "We have to keep a watch on every building site."

Miss Louisa Godwin

## Navy Lieutenant Becomes Fiance Of Miss Godwin

**Anthony Celebrezze Jr.,  
Son of Secretary, to  
Wed Defense Aide**

Special to The New York Times

WILLIAMSTON, N. C., Dec. 26—Miss Louisa Godwin and Lieut. (jg) Anthony J. Celebrezze Jr., U.S.N., son of Secretary of Health, Education, and Welfare Celebrezze and Mrs. Celebrezze of Washington, plan to be married next spring at the chapel of the United States Naval Academy in Annapolis, Md.

Their engagement has been made known by the prospective bride's parents, Mr. and Mrs. Charles Hudgins Godwin Jr. of Williamston.

Miss Godwin, an analyst with the Department of Defense, was graduated from the University of North Carolina at Greensboro.

Lieutenant Celebrezze, who was graduated last year from the academy, is stationed in the Washington area.

Victor O'Neill

Miss Edith S. Wypler

## Law Student to Wed Miss Edith Wypler

Special to The New York Times

WESTON, Mass., Dec. 26—Mr. and Mrs. Alfred R. Wypler Jr. have announced the engagement of their daughter, Miss Edith Schwarzkopf Wypler, to James Bennett Swire. He is the son of Mr. and Mrs. Arthur Swire of Holliswood and Bolton Landing, N. Y.

## Mead—Lull

Special to The New York Times

SAN ANTONIO, Tex., Dec. 26—Mr. and Mrs. David Irving Mead Jr. of San Antonio and Waccabuc, N. Y., have announced the engagement of their daughter, Miss Marianna Mead, to Robert Williams Lull. He is the son of Col. George F. Lull Jr., U.S.A., Medical Corps, and Mrs. Lull of Fort McClellan, Anniston, Ala.

Miss Mead attended the Masters School in Dobbs Ferry, N.Y., and is a sophomore at Trinity University here.

Her fiancé is a senior at Trinity. He is a grandson of Maj. Gen. George F. Lull, U.S.A., retired, of Chicago and the late Mrs. Lull.

## Ellen Buckner Engaged To Randolph S. Fields

Note in "To Ergon" of III.61  
on Soleil apothekes

(Dionysios Plutarchos)  
See pp 200 (fig. 231) and 201.

p. 201: "SW of the subterranean reservoirs, basements  
were chases, "καρποοκείον" originally, of Hellenistic  
buildings, and in one of them were stored the 137 painted  
Rhodian amphorae to be seen in Fig. 231. These,  
according to their chronology, it is not <sup>απ' εαυτών</sup> impossible were  
covered at the time of the earthquake of 227/6, when  
the city was destroyed."

ALL SOULS COLLEGE,  
OXFORD.

19 February 1961

Dear Virginia,

Thank you very much for the list of stamps & comments. Τελείων is a common name at Rhodes - there are about 20 instances in the various epigraphical publications, as contrasted, for example, with only one in Kirchmeier's Bos. Att. So inferences from the name would be dangerous.

We hope to arrive on about April 20<sup>th</sup> & I don't anticipate that it will prove too difficult to put somewhere for Ruth & Alex. In a few days - I can stay in the school if the worst comes of the worst.

Yours

Rey

of school

RHODIAN  
CORRESP. W.  
P. F.

1<sup>st</sup> - sent - 2/17  
to Mr. B.

Athens, February 14, 1961

Dear Peter,

Here are some interim notes on stamped jars found last summer in an  
in the city of Rhodes.  
ancient cellar. Altogether there were 137 of these jars, neatly laid out,  
upside down. Although Mr. Benachi did not go to Rhodes last summer, did he,  
I think you must have heard some rumour of this depot. Unfortunately all  
the jars needed mending, and this proceeds slowly. Friends on trips to  
Rhodes have taken rubbings from the stamps on the finished jars. On 31,  
35, and 40: 40 has two <sup>com,</sup> supplementary stamps, in which the month is with  
the fabricant, in a stamp for which we have no exact parallel on file, and  
the reading is not quite certain. Apparently there are two other jars on  
used on 40  
which the eponym stamp has been impressed ~~twice~~ on both handles, no doubt by  
mistake, the fabricant stamp not appearing. TEAEZEN as a patronymic is not  
otherwise known to me, but an eponym TEAEZEN is named on some early Rhodian  
handles which I should date about a generation before this ΠΑΥΣΑΝΙΑΣ.

It was nice to get a glimpse of you in December, and I am looking for-  
ward to seeing Ruth and Alexander this summer. I wish I had a house to  
put them in.

Yours,

22.II.61

See comment, Letter 16 from Mr. B.

He does not see how we can put  
 the list so early, given 1.) naming of months  
 2.) endorsements of  $\text{ἐπιότιμος}$ . There  
 seems to be much too much & go before,  
 even if you go back to the beginning of  
 Pt. Soter's reign.

It will be very welcome if Mr. Kosta can make rubbings of some of the other jars, of which we have now no ~~records~~ records.

With best wishes to you and Mrs. Konstantinopoulos,  
Yours very sincerely,

February 9, 1961

Dear Mr. Konstantinopoulos,

This letter will be brought by Mr. and Mrs. Kiang who have been staying at the American School and are special friends of mine. I shall be very grateful for any help or advice you can give to these people, who, I am sure you will agree, are ΣΥΜΠΛΟΕΣΤΑΤΟΙ. Mr. Kiang has been working on Hellenistic sculpture and terracottas with special reference to the School of Alexandria. He has just had a great disappointment in that the Egyptian government will not grant him a visa to visit Egypt. I hope that the trip to ~~Egypt~~ Rhodes will make him forget this trouble.

Thank you very much indeed for facilitating the work done for me by Professor Wallace and his family, and in particular for your kindness to the Wallaces and the Stillwells. The rubbings and photos brought to me by the Wallaces have been of the greatest use. I enclose a summary list from the Soleil depot of the names on the jars, of which up to now I have records. You will see that nearly all are dated in the term of the eponym ΠΑΥΣΑΝΙΑΣ, and that in several cases he is called ΠΑΥΣΑΝΙΑΣ Ο ΤΕΛΕΣΧΟΝΟΣ - I assume that it is the same man as on the other jars. One jar names instead the eponym ΕΥΚΛΗΣ, whom we know from other evidence to be about contemporary with this ΠΑΥΣΑΝΙΑΣ. (no. 6) The stamps on the tops of the handles of this jar do not name a month. I would like very much to know whether there is another stamp, on the side of one of the handles of no. 6, which names a month. At present I believe the date of this ΠΑΥΣΑΝΙΑΣ to be toward the end of the first quarter of the 3rd century B.C.

## RHODES - SOLEIL JARS

Comment on list of 2. II. 61

Fabo. : Δαμόνικος } sp. Eúkd̃is, no mate? and  
 Κρῖων } (may be inside of Eúkd̃is) } sp. Παντ., Υακινθῶος  
 Μικυθῶος }  
 Ξανότιμος } sp. Πανταρίας, mate Υακινθῶος  
 same Κρῖων, " Ἀγρ.

Eps Eúkd̃is and Πανταρίας I, other confirmation that  
 they are close together : 1.) both named by fab. w. rose in red. sp. stamps  
 2.) " " in small early group <sup>SAH</sup> of NN ad. at 100/1c  
 (has also a late <sup>SAH</sup> group)

Ἀγρίανος is the mate just before Υακινθῶος in Nilsson (b. 132)

Evidently Πανταρίας & Τεδίανος is the full  
 name of Π. I.

Comment (a few days later)

Above is a summary list of the names on the jars from the Soleil Hotel extension excavation of the summer of 1960, so far as I have records of them at present.

Note that these bear endorsements by four different persons, and are nearly all dated in a single term, that of the eponym ΠΑΥΖΑΝΙΑΣ; in several cases the eponym's name is given as ΠΑΥΖΑΝΙΑΣ Ο ΤΕΛΕΣΣΩΝΟΣ, but I am guessing he is the same man. One jar names, instead, the eponym ΕΥΚΛΗΣ, whom we know from other evidence to be contemporary with this ΠΑΥΖΑΝΙΑΣ. Nearly all are dated in the month ΥΑΚΙΝΘΙΟΣ; ΑΡΡΙΑΝΙΟΣ named on no. 29 immediately precedes ΥΑΚΙΝΘΙΟΣ in Nilsson's hypothetical Rhodian calendar (Timbres amphoriques de Lindos, p. 132, and cf. p. 126).

14. VII. 61 Note 4 in Αρρητιος.  
This precedes Αρρητιος, Nilsson p. 132.

This is evidently a purchase, or possibly some kind of requisition, in any case the opposite to the material from the Villanova deposit (Annuario IV-V, pp. 249-269). This latter is an accumulation of jars dated during many different months through eight eponym terms, the produce of essentially of two potters one of whom evidently succeeded the other, since, while we know them to be roughly contemporary with one another, there is no overlap of eponym terms between them. I.e. the Villanova deposit seems to be made up of factory discards or surplus.

24. VII. 61 But what about the non-Rhodian?  
(Thasos, Kos, etc.)

Date of the Soleil jars: at least three eponyms ΠΑΥΖΑΝΙΑΣ are known. The shapes of the jars of the Soleil group, and the associated fabricant names, identify Π. Ο ΤΕΛΕΣΣΩΝΟΣ with the one datable in the first quarter of the 3rd century by Agora context, see especially N 10 : 2 (in E). I should guess, latish in this quarter.

# RHODES

"SOLEIL" dig

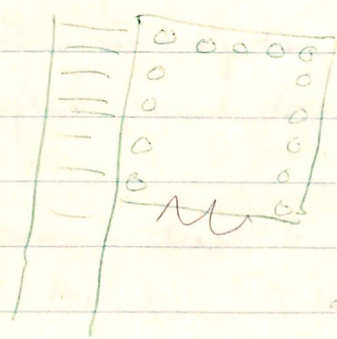

New find of amphoras in Rhodus (SOLEIL dig)

(From Mr. after she went and talked to Koudis)

(now Ephraim of Altia)

Mr. Koudis was recently in Rhodus for a short visit, and saw a find of amphoras, which are being excavated by Mr. Konstantinos Joulas.

This is a lot where they are going to build a hotel near Hotel Helios, outside the medieval walls. Must be excavated, so building work can go on. Found ancient 'spagay' a, with steps and walls and apses. Amphoras against 3 walls of a room beside the stairs.

I thought to be Hellenistic. Needs and handles in the ground. He could not tell which kind of jar. They are "fresh" on surface.

He promised Toatas (former Minister of Edress) to finish the excavation in 2 weeks. If I got there by next Monday - He will try to keep to keep this part of the building visible in a cellar of the hotel.

5. V. 60  
at the "Helios" dig  
(Thursday)

37.02

### Rhodes - "Helios" establishment

Decided to come today, to avoid delay (and <sup>to avoid</sup> because of a social involvement). Found Mrs. Konstantinopoulos at the office of the Institute, and we came out here for a short look. By the time I had got bicycle (5531 for <sup>Turkish</sup> ~~same~~ establishment as 2 yrs ago) and unpacked and changed, it was ten to 12:00, so made arrangements with Mr. Costa, of Institute put gear in mending room used previously for photo., and lunch at "Links," and a short rest at home (7, 8000000 + Apodias) and returned by ca. 1:40. Have not any lead, and there is no shade this time of day over the amplifier room, so hand slides to paper, and brain not too sharp.

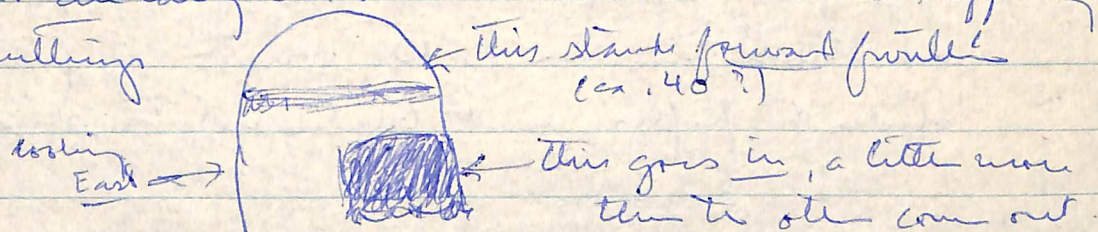

The area is ~~about~~ to the Helios Hotel, on the side toward the <sup>Thermis</sup> Hotel. The excavated part is L-shaped, about 35 m on way, 30? the other (hard to pass, because so many hazards). The longer arm (more or less N-S) has a long piece of slab-covered drain(?), not as elegant as in Athens. A heap of fragments beside it look all 4th century (for jars and some of). In another part of this arm, a well-~~built~~ <sup>fast</sup> shaft which is being excavated; it seems to be 5-6 meters deep already, and projects <sup>sideways of both</sup> ~~sideways of both~~ <sup>the walls</sup> collect the light well. Rectangular rock-cut shaft, only a little constructed at top. On 2 long sides, cuttings all the way down to facilitate access. Not too much pottery from this: mostly tile frags.; a big piece of a plate of bl. gl. stamped with

OVER

frag. of  
no recognizable amphoras here.

In the <sup>of the L</sup> other ~~area~~, a great deal of rock-cut space.  
20 steps of a rock-cut stairway. a shaft <sup>at</sup> above the  
5<sup>th</sup> step from the bottom, is used to draw out earth  
No, it seems to be a break in the rock-cut <sup>curved</sup> ceiling of this  
stairway. At this point, on either side, nearly cut  
arched niches. Here, and on side of stairs, the red  
soft sandy rock is finished with stucco (appoxima)  
The west niche has a deep quite narrow hollow; y to fit  
a jar, not an early one. The other niche has baffling  
series of cuttings

The floor of this niche has a sort of deep & slot

Looking down →

The wall of the E side of the stairway <sup>(see half way up wall)</sup> has rough hole  
about 10-12 cm long (up and down) and not very deep  
<sup>near</sup> the bottom of the W. wall, all along, is a deep under-  
cutting, nearly finished. you could pour down it. At  
bottom it ends near the floor of a large rock-cut  
chamber with a rock-cut pillar. Bits (rare) in the  
wall pillars seen Roman. The chamber continues  
E and W, not yet cleared.

[5.V.60]

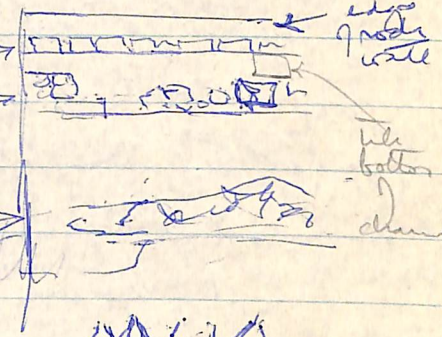

Thursday

Parallel to the stairway, west of it, another cutting, ~~little~~ wider than the "A" cutting further west, parallel still, a <sup>from</sup> late N-S wall rests on fill, visible in scarp, and making a martyre; the late wall must be drawn before being removed. <sup>469.26</sup> <sup>(M. T. C. 1000)</sup>

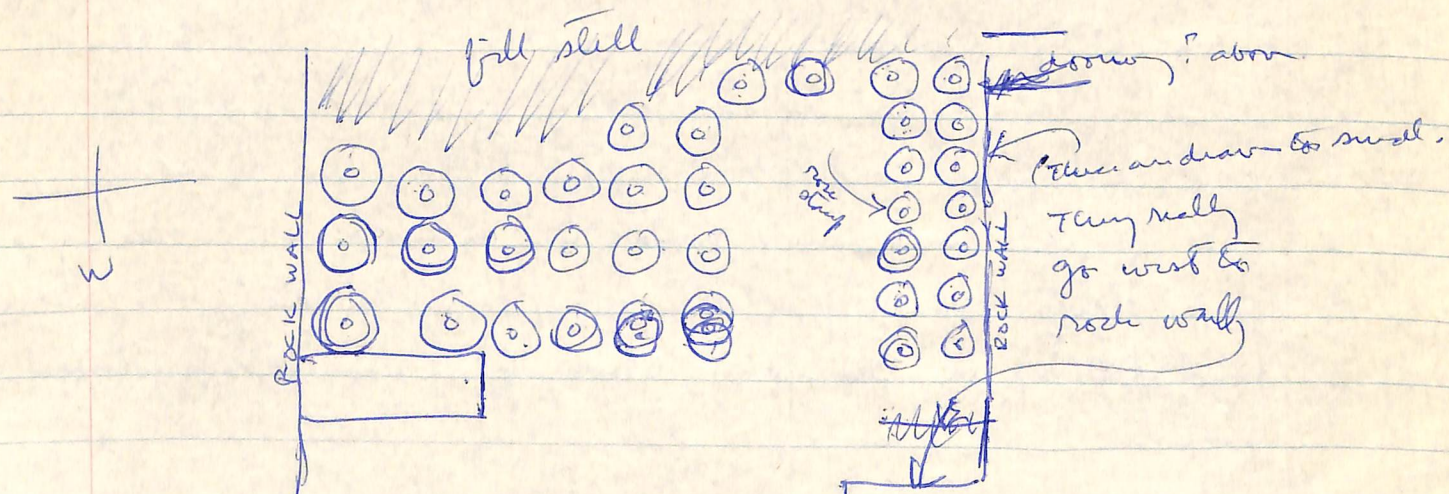

⊗ The "right line of stones" formed on side of a water channel of which the bottom was a series of pan tiles (one or 2 only per row, and slant in photo.) The other side of the channel formed by the "front" late wall"

The legs of the main window may be visible upper right show when they are pulled up earth from the bottom of the stairway (see previous page).

Plat. This:   
⊗ Rhodian   
floor   
wall

At the bottom of the photo should show some of the Rhodian window in rows upside down on the floor of the rock-cut room next west, still partly not cleared, under the front late wall.

469.26  
This is a  
floor of  
wall

50 jars are visible, their size 3rd cent. toes up. One jar (see arrow label "rose stamp") has been dug under a litter, revealing a rose stamp on an early curved handle; brown mirror, cannot read.

OVER

The jars seemed to be resting on the floor, or (then along the S side) on a low platform. (Though the one we dug under seems not to come quite to the floor of the "boudoir")

West side of trench, see 469.27-8

S.V.60 After  
discuss. on  
W. Kon. what  
is possible  
will be just  
foundation of  
wall. Haven't  
seen a face  
toward east

The west side of the room, as now constituted, is a poor sort of wall, full of small stones, but it seems to go down to the floor (not cleared entirely). If to it a little further west, is a wall <sup>with</sup> full of pot sherds (etc?) fragments, which rest on <sup>at</sup> stones full of pot sherds (and plaster frags) which perhaps correspond with what is in the masonry on the E side, though not sure of levels.

Beyond this wall, about its width further west, is the west rock cut wall

Cuttings in the N & S side, Costa said "It is suggested they took beams. So there would be a floor <sup>(on rock)</sup> over the lower room with the jars."

[Further cuttings and fill of sherds further west, near west end of excavation. Here was <sup>(still S.V.60)</sup> found fine t.c. head.]

Heaped beside and over the amphorae, pieces of painted stucco, pink, yellow, which was found in the fill. Some (brought up on N side) show fine mouldings; these are white.

1st. Konst. points out on frags. from the East (the one just west of the stairway) finding of one of the long cuts. They include LR unguentaria with stamps. One has whole 3-lin. rise, not monogram. [Remains frag. by bottom in Corinth.]

Phot.  
these

7.11.60  
[Sat.]

Came up this a.m. at 8:45. Mr. K. came too. Took  
nothing of the fine handle, which reads ΕΥΔΕΙΞΕΤΕ  
now

470.23

Took some plates, beginning with a shot of Costa and Mr. K.  
down in the shade, and including one of the later pottery of the last  
fill. HT. of the whole deposit for (small one) 0.45  
The cylinder thing (no top, no mouth) may be an Ornament?

A little discussion of dates with Mr. K. He says the  
plaster <sup>(stucco)</sup> frags. are important. A lot of them should be  
rather 1<sup>st</sup> B.C. The shards collected at Low Level  
Hall. bowls (both incising and flaring) & a Camp, look to  
me as if they might be of time of long earth goods (225 B.C.)  
but could not say 275, <sup>or earlier</sup> which should be date of the jar  
of ΕΥΔΕΙΞΕΤΕ (partly because of paper of handle). In  
the fill under the walls (now being removed), there we see  
and a lower mess, which covers the jar, is distinct  
from an upper mess strata. <sup>with plaster frags</sup> The lower (in the scarp)  
we see a nice piece of white stucco with tall baroque  
profiles. In the upper, we see a very plain plate for  
(Group D? E?)

Later (going)

I came up when I picked for Costa for lunch. They were  
working down under the "single line of stucco". masses of pottery,  
most of which is being shovelled away. I tried to suggest some  
discrimination, and to point out things good to keep, and show  
shape. Note there was nobody there taking notes, nor was  
any foreman, while I hear Costa. A good workman, large

OVER

was a couple of assistants, one shovelling up to the other who was higher up. Mr. Kowal, visits to dig at intervals, but has no time, I guess, to follow Ball the time. He tells me to separate the pottery every 20 cm.; it would certainly be better to do it by the layers there.

S.V. 60  
Sunk

Arriving about 9:15 a.m., find Mr. Costa and the 4<sup>th</sup> workmen. They have now removed also the "poor late wall", and are digging even over the whole area. <sup>771.20-21</sup> <sup>(more)</sup> ~~First~~ <sup>large</sup> and another man, working on this layer which is loose and full of pottery. Behind them are the E and S rock walls of the "amphora room"; at right edge of doorway on the S side (cut in the rock wall) should show the top of the level being worked on (partly gone) is about 0.82 below the E rock edge, and about 1.65 above upended toe of amphora at edge of fill below (measured, both).

② In this  
space a  
rough station  
has been cut  
in the fill, for  
movement of  
access now.

In the quantities of pottery coming out, many frags. of early 3<sup>rd</sup> cent. jars, and stamps - handle - i.e. earlier than the jars at the bottom. I do not see anything I know to be later than 3<sup>rd</sup> cent.; but now a Plr. handle which may be 2<sup>nd</sup> cent. (short top) - cannot read stamp without acid. <sup>And later note with Mr. K. some very straight flat flaring flat pieces.</sup>

Note that in this layer (now they have finished that level) there are lots of shreds, and quite a lot of broken local rock, hardly any shreds frags. of which there were many just under the stones; and I think are many in the layer just over the jars. Shreds frags.

Kipos Boudas  
acting ~~as~~ <sup>as</sup> ~~agent~~ <sup>agent</sup> of Boudas  
much interested

(4)

(8.V.60)

37.08

in quantity, suggest an earthquake fall, which fell  
full of coarse shreds, with little shreds, suggest at this  
level shovelling in.

Mr. K. has come up. It is now nearly 11:00. They  
are taking out "the red earth", clearing a white layer.

on 9.V.60

I called at the dig just before 3:00, when I met 1 & the Inst.

on 10.V.60

Yesterday early, before flying back here, I  
called at the dig. They were still 50-60 cm  
above the jars. Looked through shreds again, and  
found again same sort of stuff. Rather more shreds  
said to be appearing.

11.V.60

phot. 471.41 \*

\* Best shot of ensemble of jars.

2.VIII.60

Mrs. Dusenbury has just called, and told me that  
she and Elaine Loeffler were at this dig about July 11,  
and the jars were still as found (resembling my photo);  
but she estimated "100 or more". Probably more appeared  
when they cleared.

From mibbing taken by MSA and chief by N. Rhoads (VII.66)

## SOLEIL GROUP

9. XI. 66

must date from early in the <sup>time</sup> of  
 naming months. Composition & to studied  
 count ex. s of various months: Tak, is  
 in general  
 by no means commonest acc. & Nilsson  
 (p. 132)

apparently same Δαμόνικος in O and  
 □ types, since both here? If the  
 did not use month in term of Εὐκλῆς  
 (when some did) and did in term of  
 Πάυρ, does this mean Εὐκλῆς  
 preceded Πάυρονίος?
