SAT for 19 XII, 1
(Rhodes)

First 3 pads of duplicates are
finished: MZ has filled in Indian
etc. and Miss R. Crox made
cards, and cards are filed.

1, 1065th published
and taken to the
on Gaertner, 1895.
1, 1958, duplicates of were
AD supplemented by MZ

for non-Rhodian, problems, etc. They corrected wrong
readings as far as possible without seeing rubbings or
plates. or of course to Chandler.

In June, 1962, AD made a list of items
of which rubbings were wanted, either because they
bore new types or because they presented problems.
Added to this list ~~was~~ were items listed by MZ in 29. III. 60, for
rubbings and for notes on fabric. Note that by no means
everything was rubbed, so most items ^{at publ.} have not been checked.

In July and in September, 1962, I made
the rubbings and notes in the British Museum, so far as
the bundles were in place.

Beginning, at least, in Sept. 1962, AD
examined rubbings and made indicated corrections
in duplicates, supplemented again by MZ & TT, who think she
also entered them or filled in the duplicates.
The originals were at some time separated from
the carbons; perhaps I took them to the B.M.

Now we need to separate filming and card copies,
paste rubbings, and cut and sort fragments.

Originals, and most notes, are filed under
RHODES, with a few notes = BRITISH MUS.

YFD

9. XII. 58

SAC for 19 XII, 1
(Rhodes)

First 3 pads of duplicates are
finished; MZ has filled in Indian
etc. and Miss R. has made
cards, and cards are filled.

BRITISH MUS.

Note that 19 XII, 1, 1065th publishes
 bundles found in Rhodes and taken to the
 British Museum. (Hilde von Gaerting, 1895.)

Beginning on May 21, 1958, duplicates ~~of~~ were
 made from the publication by AD supplemented by ME
 for non-Rhodian, problems, etc. They corrected wrong
 readings as far as possible without seeing rubbings or
 photo. or of course the bundles.

In June, 1962, AD made a list of items
 of which rubbings were wanted, either because they
 bore new types or because they presented problems.
 Added to this list ~~was~~ were items listed by ME in 29.III.60, for
 rubbings and for notes on fabric. Note that by no means
 everything was rubbed, so most items ^{at publ.} have not been checked.

In July and in September, 1962, I made
 the rubbings and notes in the British Museum, so far as
 the bundles were in place.

Beginning, at least, in Sept. 1962, AD
 examined rubbings and made indicated corrections
 in duplicates. Supplemented again by ME II, who thinks she
 also entered them in full ~~into~~ ^{of the} duplicates.

The originals were at some time separated from
 the carbons; perhaps I took them to the B.M.

Now we need to separate filming and card copies,
 paste rubbings, and cut and sort barbotines.

Originals, and most notes, are filed under
 RHODES, with a few notes = BRITISH MUS.

Today Anne Waldman has ^{also} started planning
for next copy and will cut the ~~known~~ ^{known}

IG XII, 1, p.175 Hiller's introduction to section on
jar stamps

AMPHORA STAMPS FOUND IN THE ISLANDS OF RHODES; CHALCE, CARPATHOS

FIRST PART.

STAMPS OF RHODIAN EPONYMS

Since amphora handles, in which are impressed either stamps of eponyms or merchants' marks, are found in very different parts of Europe, Asia, and Africa and of these the greater part certainly are to be attributed to Rhodes, it is worthwhile to look at handles found in Rhodes itself and in islands connected with her from north, handles found in other regions not being mixed in.

^{Because?}
For after the works of Kaibel it was clear how very lower was the wine trade of Rhodes with Sicily and Italy, now one must investigate this island, which seems to be the stem and origin of ^{so} great trade, whether the amphora handles found there, which we call Rhodian, really in Rhodes surpass the number of the other handles. Because, as far as I certainly know, very few among the so many learned people, who visited Rhodes, occupied themselves with researches on amphoras, it ~~is~~ has been a great good fortune, that Newton brought to London the very large abundance of handles collected in Rhodes in the year 1853. The stamps of these handles very accurately copied in British Museum by C. Emily Hutton, who deserves much praise for these studies, now it is permitted to me to publish in this place for the first time, by the kindness of A.S. Murray. I copied all these amphoras in the British Museum. Finally, I should say that the form of the stamps ^{is} ~~are~~ always oblong (rectangular) unless otherwise stated.

(From a letter by H. 1, with
some help.)

30.IV.60

For comments and correction of. Pridel in Klio 1926, pp. 303-306

Rubbing

Indications in the upper right corners classify handle and/or stamp, distinguishing 1) place of origin when known - T(hasos), R(hodes) K(nidos), etc.; 2) type of stamped vessel if not an amphora; 3) language if not Greek; 4) shape of stamp if not a plain (unframed) rectangle; retrograde inscription (indicated by an arrow). Inventory numbers and any other documentation go to the left, any descriptive comment to the right, dimensions unless otherwise specified being width by thickness of handle where stamped. Numbers in the middle are negative numbers.

Indications in the upper right corners classify handle and/or stamp, distinguishing 1) place of origin when known - T(hasos), R(hodes) K(nidos), etc.; 2) type of stamped vessel if not an amphora; 3) language if not Greek; 4) shape of stamp if not a plain (unframed) rectangle; retrograde inscription (indicated by an arrow). Inventory numbers and any other documentation go to the left, any descriptive comment to the right, dimensions unless otherwise specified being width by thickness of handle where stamped. Numbers in the middle are negative numbers.
