Indications in the upper right corners classify handle and/or stamp, distinguishing 1) place of origin when known - T(hasos), R(hodes), K(nidos), etc.; 2) type of stamped vessel if not an amphora; 3) language if not Greek; 4) shape of stamp if not a plain (unframed) rectangle; retrograde inscription (indicated by an arrow). Inventory numbers and any other documentation go to the left, any descriptive comment to the right, dimensions unless otherwise specified being width by thickness of handle where stamped. Numbers in the middle are negative numbers.

Notes in British Museum - 2

BM 507 note there is a circular secondary stamp
which contained address and/or letters? largely
lost from slipping of surface.

Indications in the upper right corners classify handle and/or stamp, distinguishing 1) place of origin when known - T(thasos), R(hodes), K(nidos), etc.; 2) type of stamped vessel if not an amphora; 3) language if not Greek; 4) shape of stamp if not a plain (unframed) rectangle; retrograde inscription (indicated by an arrow). Inventory numbers and any other documentation go to the left, any descriptive comment to the right, dimensions unless otherwise specified being width by thickness of handle where stamped. Numbers in the middle are negative numbers. 3.05

I imagine you went to Switzerland over the holiday time. I hope it was as lovely as ever. Do let me know what happened about college, and what your plans and activities are now - I imagine you have ceased to do "nothing".

With love,

[To Caroline Arthur]

American School of Classical Studies
Athens, Greece

January 14, 1956

Dear Carolyn,

How monstrous of me to be so late in acknowledging your excellent consignment of December 1. But December got terribly full for me, so much so that I hardly sent any Christmas cards. There were some papers that had to be ready to be carried to America on the 20th, things that needed a lot of work beforehand; and three times a week we spent the whole morning on the Acropolis, following an exceptional series of lectures given only this year. You might say I could have omitted those, but I had begun to think, when you all come to Athens, I shall have forgotten everything but stamps, and have descended to the level of those ladies who can never remember whether the Parthenon is on the Acropolis, or the Acropolis on the Parthenon. Then after that, I got off to Egypt for a couple of weeks, visiting mostly Hellenistic sites with some fellow-Hellenisticists, isn't that a word.

The rubbings were all processed, though, and the right ones sent to Mrs. Will and M. Bon, who were delighted to have them - "Je vous remercie énormément pour tout ce matériel précieux." I see I have not yet sent Mr. Ashmole's copy of the readings to him, but shall now. As to 1955, 9-20, 338, this was all a careless mistake on my part, I transposed the 1955 9-20 number with the B.M. number. There is no 1955 9-20 338, you are quite right; what I meant to say was 1955 9-20, 325 (which is B.M. 338). But it doesn't matter, and is certainly not worth a trip to that basement. I'm only sorry for all the trouble made by the mistake. I'm so obliged for the complete and competent answers to all my queries.

36 Argyle Road,

W.R.

4.02

Dec. 1. [1955]

Dear Miss Grace,

I finished my exams. last

week, so here are the mabbings. in the 1925

1-19 Series 642a through 614, plus 1955 9-20 333.

These are ones for Mr. Will,

1955, 9-20, 91 (814 91)

1925 911-19 163

" " 887

" " 897

" " 696

" " 699

" " 700

" " 702

" " 703

" " 704

" " 705

" " 706

" " 707

" " 708

709
and
712.

The one with a query registration number is

51, 12-3, 5 not 51, 12-9, 5.

Then for M. Bom, 1955, 9-20, 62,

"	"	64
"	"	159
"	"	306
"	"	309,

I have tried to get the letters and details as clear as I could. 1955, 9-20, ³²⁵~~336~~, I could not find.

The last of that series that I found was the one right at the end of 1928, 1-19, i.e. 1955 9-20 333, ~~4~~

I am therefore writing to Mr. Higgins who very kindly helped me find another one, to ask if he will tell me where to find it.

Every thing else I found easily with your directions! That, I think is all the respects in

your letter of November 22nd which arrived at
breakfast the day I was going to the Museum!!

of your letter of October 22nd:

1955 9-20 237. I have made two rubbings as
I thought perhaps one would be
easier than the other to read.

74, 8-5, 94. The letters are as clear as I could
get them.

(Not very, I'm afraid!)

1955, 9-20, 292. As clear as I could make it.

1955, 9-20 306. On the handle I found only
this marking and C.T.N. 1859.
It had been clipped so that 1859
was legible only.

51, 12-1, 16.

I tried, as you asked to get the
left end especially clear.

54, 3-9, 27.

Except for the actual head, the
scal is almost smooth. I tried
twice and enclose both
rubbings with the photographs
you sent me.

Then the numbers in the cases 37 through 43.

- Case 37, First in 1955, 9-20, 1, last 1955, 9-20, 91
- Case 38, " 1955, 9-20, 92 " 1955, 9-20, 196.
- Case 39, " 1955, 9-20, 197 " ⁶⁸1955, 4-5, 112.
- Case 40, " 1955, 9-20, 265, " 1955, 9-20, 327.
- Case 41, " 51, 12-1, 1, " 84, 12-13, 62.
- Case 42, " 84, 12-13, 63 " 1925, 1-19, 152.
- Case 43, " 1925, 1-19, 153 " 1925, 1-19, ³787.
- Unnumbered case, " 1925, 1-19, 739 a " 1955, 9-20, 333.

This should be everything you asked
for except 1955, 9-20, 338 (614325) which I will
get as soon as possible. I am sorry about it.
I have put on the outside of each packet
what is inside. I hope the numbers are

all right.

The exams were not ~~too~~ bad, I hope.

I hear the results next week. Cambridge I liked much better than Oxford, but it is usually a very sinister oven to like a paper!

I am now doing "nothing", i.e. all the things which I have been putting off for months, like letters and the dentist!

I hope you are not suffering the foggy, bitter cold we have had here for the last two days.

With love from

Carolyn.

P.S. Here also are the unused cigarette papers
you left me!

[17. 7. 55]

Dear Mr. Grace,

Here are the first lot of

rubbing. I thought this was the easiest way
to send them, so I do hope they arrive
all right. They should be in the right
order inside the chips. I did these on
Saturday, but we went to Sarawak for the
weekend & I went straight from the Museum,
so I couldn't, I am afraid, send them earlier

I envy you in Athens, the last three
days have been bitterly cold with
frost in many places and snow in the
North!

I think I can finish the rest of the
skabbings in one day, and I will send them as
soon as I have. I very much hope these are
all right, but I rather think I've done a
bit of them upside-down. I gave your parcels
for the Keeper and Mr. Brennan & the Engineer who
said he would see they got them.

With love from

Carbidge.

Dear Miss Grace,

It was very kind indeed of you to send us copies of your photographs of the amphora handles, and all so fully documented and labelled. They will be a most valuable addition to our records and we are most grateful. May we regard them as discharging any fee you might, in theory, owe us? This is a case, I think, where a visitor's labours are so useful to the department that the boot is really on the other leg, or at least between the two.

We are very glad to know that your visits to our underworld are not yet over, and look forward to seeing you again whenever you come. There is just a possibility that there will be more light in the basements in the near future.

With all good wishes,

Yours very sincerely,

Dimitri Hatzis

Miss Virginia Grace,
American School of Classical Studies,
54 Odos Souedias, Athens.

Letter of 29. IV. 57 to R.A. Higgins,
on your assembling the material by
this E.C. fig. 1, filed under REPRESENTATIONS

American School of Classical Studies
Athens, Greece

April 17, 1957

Dear Mr. Haynes,

I want to thank you very much for your kindness and that of your department in permitting and very much facilitating my photographic operations on your stamped amphora handles this past February. I am sorry to have been slow in response to these courtesies, particularly as I forgot, in a hasty departure, to inquire the amount of the fee which I should pay. Will you please let me know what it is?

The pictures fortunately came out all right, most of them. Reynold thought the Museum might like to have a set of contacts, for the record. So here they are, arranged in photographic order, which is mostly the order of my numbered sequence, derived from the way I found things in cases. I enclose also a concordance from the Museum inventory number to my photograph number. The strips are lightly attached, and you can have them cut up and the individual pictures pasted in your records if you prefer. Object and photograph numbers are written on the back of each picture.

I am glad to say that these pictures are not quite all I shall need, and hope you will let me come back some day to haunt those caves.

With many thanks, and best wishes,

Yours very sincerely,

(The strip contacts, spread out in order for the Museum, were first used ^{at the Agora} here, to help in the identifying of our enlargements.)

14. 2. 56.

Dear Miss Grace,

I fancy that I was away
~~when~~ your letter of January 14th arrived,
together with the notes about the contents
of our boxes of amphora-handles, and
the additions to the inventory.

Many thanks for all of these, and
very kind regards:

yours sincerely

Bernard Ashmole.

American School of Classical Studies
Athens, Greece

January 14, 1956

Dear Mr. Ashmole,

Thank you for your kind note of November 28.

I enclose the remainder of the copy in our BM sequence, taken from Miss Arthur's final batch of rubbings, which she sent me very promptly, and it is I who am slow in forwarding the enclosed.

It may be a convenience to know the storage by case of this series, to see in case somebody wants one of the handles included in our record. Miss Arthur checked first and last numbers for me, and this is how they lie:

Case 37 contains BM 1 - 91, registration numbers 1955 9-20, 1-91. These are a selection from Case 1, from Naukratis, in which none of the handles had previous registration numbers.

Case 38 contains BM 92 - 196, registration numbers 1955 9-20, 92-196. Selection from Cases 2 and 3, again from Naukratis, again without previous registration.

Case 39 contains BM 197 - 269. This is a selection from Cases 4 through 15, the BM series running in order of the cases. Included are 1955 9-20, 197-263; but some items in these cases (4 through 15) had old registration numbers, and six of these were selected, becoming BM 254, 257, 259, 263, 265, 269. Note that handles in Cases 6 through 17 were found by us (and have remained) in order by publication numbers in I.G. XII, 1-2, pp.175 ff. (Rhodes); they have publication numbers written on top near the stamp, but usually no registration numbers; those removed by us and put into cases 39 and 40 have been given new reg. nos. if they had no previous ones. Most handles in Case 39 are from Rhodes, or of unknown provenance.

Case 40 contains BM 270 - 340. Selection from Cases 17-21. Included are 1955 9-20, 265-327, plus seven previously registered items, which have become BM 277, 278, 282, and 296-299. Handles from Rhodes, Knidos, etc.

Note that either at the end of Case 39 or at the beginning of Case 40 must be the single item from Case 16, BM 22 270 (1955 9-20, 264, pub.no. 1378) which escaped Miss Arthur's attention when taking end-of-case notes.

Case 41 contains BM 341 - 403. Selection from Cases 22-25. These are mostly items which had already been registered, beginning with 16 and 23 respectively from the series of 51 12-1 and 54 3-9, which had been in Case 22. Included are three new reg.nos., 1955 9-20, 328-330 (BM 392-4) found in Case 23.

Case 42 contains BM 404 - 496. Selections from Cases 25 (cont.) - 32. Most of the items had already been registered, but included are BM 1955 9-20, 331-2 (BM 413-414). BM 422-475 are selections from Cases 28 and 29, from Alexandria, in the 48 7.31 series. BM 476-496 begin the selection from Miss Hutton's 1925 1-19 series. Note that the 48 7.31 series was not in order when found, and the handles remaining in Cases 28 and 29 are still mixed.

Case 43 contains BM 497 - 649. Selections from Cases 32 (cont.) - 35, continuing in the Hutton 1925 1-19 series, with no new registrations.

Case [44] which I fear is not marked - could you ask someone to mark it before we forget what it is? - contains BM 650-669, from Cases 35 (cont.) - 36, the end of my selection from Miss Hutton's series, plus 1955 9-20, 333, a handle found by Mr. Brenner among sculpture fragments.

Since writing to you in November, I have rediscovered Petrie's notice in his Naukratis of "about 1200" stamped handles found there by him. This being about twice as many as we have found in your cases, I thought probably there had been a division of finds, and half had remained in Egypt (and no doubt formed part of the heaps we found there last spring). But Peter Fraser has the impression he has seen a lot from Naukratis in the Ashmolean, where he assures me there are 12000 or so handles. I wonder if this can be so, and shall ask him to verify when he goes back.

Peter organized a very good trip to the Fayoum over the Christmas holidays, which I was glad to be able to join. Roger Edwards came also, and we all collected sherds diligently at all those Hellenistic sites, Ruth Fraser being the cleverest, finding lots of jar handles and two whole lamps. Have you seen that country? The site of Krokodilopolis is most astonishing, four square kilometers of enormous high sherd heaps, formed by a reverse of the usual procedure on ancient sites, since the earth is sought and the pottery discarded.

We are expecting Homer Thompson here about January 25, and Mr. Hill, and Mrs. Blegen, tomorrow.

With best wishes for a happy 1956,

Yours sincerely,

THE BRITISH MUSEUM, LONDON, W.C.1

TELEPHONE

Museum 1555

28th November, 1955.

Dear Miss Grace,

Thank you very much for your letter of the 18th, and the admirable catalogue, which we will incorporate. The list of relative totals is most interesting. I feel sure that the Trustees will not object to your publishing any of the handles you wish: nor would they wish to limit you in your choice of journal.

With very kind regards,

*Yours ever**Bernard Ashmole.*

Miss Virginia Grace,
American School of Classical Studies,

American School of Classical Studies
Athens, Greece
November 18, 1955

Dear Mr. Ashmole,

Thank you for your kind acknowledgement of October 24th. I am most grateful for the opportunity to see what you have in the way of stamps, and we have made some very useful additions to our files.

Mrs. Will, who is publishing our Roman stamps and those found in Alexandria and in the French excavations in Delos, was very glad to have the rubbings we made for her. She may be writing to you to ask for a few photographs. I hope there will not be a difficulty in finding any particular handles wanted. The handles we recorded are assembled in cases marked 37 through 43. The first two or three cases (37, 38, part of 39?) contain an uninterrupted series of 1955 9-20 registration numbers, through 1955 9-20 253. The last two or three cases (41-43?) contain a selection from Miss Hutton's 1925 1419 series, in order of her numbers. Just preceding this selection is another of 50-odd handles from the 48 7-31 series from Alexandria, again in registration order. The rest of the handles we recorded, BM 254 through 421 in our series, are of various registrations according to what we found together in cases. You have lists of registration numbers given by us and of previously registered handles of which we made records. I enclose the continuation of the copy of the selected stamps in our BM sequence, from BM 169 through BM 584; this is not quite the end, and I will send the rest when Miss Arthur has had time to send us the rest of the rubbings. This copy will probably help in finding the handles as well as in entering the registration of the new series in your books. I am sorry I forgot to make a note of the numbers beginning and ending the cases.

I don't know if I mentioned the principal of selection this time. I meant to include all Knidian, Thasian, Chian, Coan and Roman handles, since publications are now being prepared of these by various people; also a few Rhodian and miscel-

laneous noticed as of particular interest. I made a count of the handles. This is not absolutely accurate, partly because numbered handles had to be counted in their cases where they were rather heaped, there being not enough time to take them out and pack them in again in order. However, you may be interested in the figures:

Rhodian	2511	
Knidian	274 +	
Coan	91	— ? 14.5.56 MS counts small cards, reaches 126
Thasian	51 +	22.11.60 Discrepancy wid. due to my failure to enter non-Plinian from 2nd and 3rd Naukratis cases, now done.
Roman	49 +	
"Cretan"	28 +	a distinct series for which a Cretan origin was once suggested. Cf. e.g. BM 187-188 in the enclosed copy.
Chian	20 +	Included among these are stamped handles of Chian <u>lagynoi</u> also.
Pontic	19	Most of these are thought to derive from Sinope.
Parian	1	
miscellaneous	494	
total	<u>3538</u>	of which 669 were individually recorded, BM 1-669.

All the minor groups listed above were fully covered in the BM series save the Pontic: 13 of these found in Kerch (from Case 23) were not recorded since large numbers of these have already been published from Kerch. A selection of the Rhodian and miscellaneous were included.

Some day I would like to come and photograph some of your handles. In the meanwhile I thought it might be worth while to make a short report on what you have, which would include also separate figures for the three cases from Naukratis which total about 650 handles; I think there has not been any published notice of handles from Naukratis, and the handles in these cases ~~we~~ have not been registered except for the selection registered by us. Would you be willing for me to publish such a report? Would you have a preference where it should be published?

(X) 29.11.55 Noted in Petrie's Naukratis that they are mentioned, and estimated I about 1200 found (half by me in Egypt?).

With thanks again for your courtesy and help,
Yours sincerely

Museum 1555

24th October, 1955.

Dear Miss Grace,

Thank you so much for your letter of the 13th, and for the copies of your records. These will be most valuable, and we are storing them in a hinged box with your name upon it so that they can be referred to at any time.

We very much enjoyed having you working here, and hope you will come again.

With kindest regards

yours sincerely

Bernard Ashmole.

Miss Virginia Grace,
American School of Classical Studies,
Odos Souedias 54, Athens.

36, Argyll Road

W 8

October 13, 1955

Dear Mr. Ashmole,

I am asking Miss Antenna to bring you three copies of our records next time she comes to the Museum. They include a summary of new registration numbers given, and a list of previously registered handles selected for record. My "BM" series of numbers assembles these into a single sequence, in which in principle the new (1955) number comes first, and the old registration number afterward; but I took the handles ^{in order as I find numbers to use} by case-^{lots} and sometimes registered and unregistered handles turned up in the same case. The "BM" numbers have not been written on any handles. I enclose the first part of a copy of the selected stamps in this BM sequence, carrying one through BM 168, still from the Nancaster cases. (Peter Corbett says, no question marks is to be used following Nancaster, this is the previous.)

Yours very sincerely
Virginia Grace

For should never
with
further before you return, when they are ready.
many thanks for your kindness.

British MuseumRegistration Numbers Given - Summary

The series 1955 9-20 was assigned to Owen (with 205)
by the Keeper.

From Case (1), marked [Naukratis?], 1955 9-20 1 through 91

The categories found in this case have been assembled, and
have been taken in this order:

- Stored in Case 37 {
- | | |
|---|---------------------------------------|
| 1) Rhodian (selection) ⁽¹⁻⁷⁾ | 7) Chian (65-66) |
| 2) Kikian (8-20) | 8) Corynna (?) (67) |
| 3) Coan (21-40) | 9) Miscellaneous unclassified (68-78) |
| 4) Coan (?) (broad) (41-42) | 10) Roman (79-91) (not 83) |
| 6) Tlesian (51-64) | |
| 5) "Gutan" (43-50) | |

From Case (2), said to be from Naukratis, 1955 9-20 92-175

- Stored in Case 38 {
- | | |
|---------------------------|---------------------------------|
| 1) select Rhodian (92-94) | 6) Tlesian (154-159) |
| 2) Kikian (95-113) | 7) Chian (160-163; end of leg.) |
| 3) Coan (114-142) | 8) Corynna (?) (164) |
| 4) Coan (?) broad (143) | 9) Roman (165-175) |
| 5) "Gutan" (144-153) | |

From Case (3), said to be from Naukratis, 1955 9-20 176-196

- | | |
|---------------------------|----------------------|
| 1) select Rhodian (176-7) | 5) Tlesian (189-190) |
| 2) Kikian (178-9) | 6) Roman (191-196) |
| 3) Coan (180-186) | |
| 4) "Gutan" (187-8) | |

Note that nos. 1955 9-20

American School of Classical Studies
Athens, Greece

To Carolyn Anthracis

October 22, 1955

Dear Carolyn,

Your letter of last Monday, with rubbings through 1925 1-19 641a, reached me yesterday, which was pretty good for a registered letter with something in it. The rubbings look fine, and I'm delighted to have them. Only I hope they have not kept you unduly from your studies. I was depressed to find on my return here that my two Greek helpers had both decided in my absence not to try their next examinations, as being insufficiently prepared. This made me feel guilty. So you must do a good job on yours.

Next time you do go to the Museum - no hurry - there are a few things I'd be very grateful if you would look up for me. First, it would be a great convenience if we knew what part of my newly assembled series of handles is in each of the cases 37 through 43. I have lists, of which Mr. Ashmole has copies, which show the sequence of items in the whole series, but I forgot to make a note of the first and last numbers in each case. If I had this information, I could tell somebody just where to look for instance for something that should be photographed. (Mrs. Will is certainly going to ask for photographs of some ~~map~~ of the stamps of which you have ~~sent~~ her rubbings.) The first number in Case 37 for instance is 1955 9-20 1. What is the last number in that case? etc. Everything would be simple if there were a single series of numbers marked on the handles, but this is not the case; so do get us those first and last numbers the next time you go.

Then we need another "look" at some of the stamps and handles, we find in the course of making readings from the rubbings:

- 1955 9-20 237 (BM 237) The device is a pointed wine jar. We think more letters may possibly be legible, especially to the left. Could you take another rubbing of this?
- 74 8-5 94 (BM 278) This makes quite an important correction in the book on Thasian stamps which is just coming out. It removes (In the case, you will find this just before) a wrong name from the list of Thasian potters(? or whatever they were). Will you please make an extra rubbing for Professor Bon to help him make this correction? Get the letters as clear as possible.
- 1955 9-20 292 (BM 305) Would you try to get another rubbing of this? It is
- " " 306 (BM 319) May we please have another rubbing of this? And will you write on the rubbing whatever marks there may be on the handle? There should be, probably, C.T.N. something. (Not quite certain identification.)
- 51 12-1 18 (BM 350) May we please have another rubbing of this? Left end (The 51 12-1 series especially, that is, the end away from the device. comes right after the 1955 9-20 series.)

54 3-9 27 (BM 368)

(This series comes right after the 51 12-1 series in the case.)

We are not sure to which of two types this belongs, KT 929 or KT 1638, but we think the latter. I enclose photographs of better examples of these two types. You will see (I hope) that the device is a lion (ess?)'s head. Can you see letters to the left of the head on the British Museum handle which would make sure the identification? Can you get a rubbing to show them?

I hope all this will not take too long, and remember, there is absolutely no hurry about it.

We haven't had it cold yet, but while I was away there was a terrible lot of rain. Floods. And I had left my best, selected, freesia bulbs in the only tin I have that doesn't leak out the bottom. And somehow it wasn't covered - I thought it was. Hideous state of drowned sprouts and decay. I am still hoping a few may be sound enough to push on when properly planted.

I have to dash off to Peiraeus (port of Athens) to try to meet the Megaws and persuade them to call on our friends and excavations on their way home to Mrs. Megaw's mother's flat.

With love, and many thanks for your help,

VG

American School of Classical Studies
Athens, Greece November 22, 1955

Dear Carolyn,

I have my fingers crossed for you these days, since I believe it is the time of the Oxford exams.

Perhaps you will be able to go back to the Museum when they are over, so I am sending here a supplement to the requests in my letter to you of October 22. We need some more extra rubbings:

9-20									
1955	12-12	62	(BM 62)	as many letters as possible.	For M. Bon.				
"	"	64	" 64	" " " " " "	" "				
"	"	91	" 91	For Mrs. Will					
"	"	159	" 159	Especially for the Δ in the middle with its two tails: X					
				For M. Bon.					
"	"	308	" 321	For the letters.	For M. Bon.				
"	"	309	" 322	" " " " "	" "				
"	"	338	" 325	For the little shovel and as much other detail as poss.					
				For M. Bon.					

51	12-9	5	or		
51	12-3	5?	" 416	If not too hard to find BM 416, see which is the correct registration number - i.e. what number is written on the handle. It must be in case 40 or 41; it comes 6 before the long series of 48 7-31 numbers.	

1925	1-19	163	" 503	For Mrs. Will	
"	"	387	" 527	"	
"	"	397	" 532	"	
"	"	696	" 632	"	All
"	"	699	" 633	"	this
"	"	700	" 634	"	last
		702	636		batch
		703	637		are
		704	638		Roman,
		705	639	and	
		706	640	I	
		707	641	should	
		708	642	have asked you to make	
		709	643	two sets to start with.	
		712	645	So please do second set now.	

All of a sudden it has got very cold here. I hope you and your family are well, and that you will do lots of nice things once the exams are over.

If any trouble finding these things, get Mr. Ashmole to give you the copies he has of our lists etc. Remember the 1955 9-20 series is at the beginning of our lay-out (case 37 on), and the 1925 1-19 series is at the end (about case 41 on). Please keep track of extra time spent, so it can be properly credited!

Check to be made of possible items.
19 XII, 1, presumably to be
found in a British Museum.

For next time

Αγαπητή δ^η Grace

Χθές το βράδυ, ο κ. Κορουνιώτης είχε την καλωσύνη να μου φέρει
2 γράμματα σας στο σπίτι μου. Το ένα με rubrics και το δεύτερο
γραμμένο στις 3 του μηνός. Δεν περίμενα να έχω πια γράμμα σας.
Σκέφθηκα ότι αν θα μπορούσατε να ανοίξετε τις κάσες.

Σας στέλνω ότι μπόρεσα να ετοιμάσω σήμερα, σε duplicates.

Με κόκκινο μοχλίδι έβαλα το σημείο Φ όπου χρειάζονται φωτο-
γραφίες. Δεν υπάρχει όμως θα δώσε τίποτε καινούργιο έως Κηδεμένα
όπου πολύ άρατες σφραγίδες ώστε να χρειάζονται φωτογραφίες.

Σας στέλνω ένδεκα σελίδες στις οποίες περιλαμβάνονται δύο
σελίδες θασιακά που μου στείλατε εσείς.

Αύριο θα σας στείλω τα υπόλοιπα δυο έως ΒΜ 89-170
Ο Θεός μου σας χαιρετά μαζί με την οικογένειά μου.

Με πολλή αγάπη

Μαρία

Στο γραφείο σας περιμένουν πολλές κάσες έως τον
κ. Μανιάκη.

Care of Mrs. Arthur

36, Argyll Road

London, W. 8

England

October 3, 1951

Dear Maria,

I hope you are well, and your week's condition has improved, and that you are having an interesting time reviewing archaeology in the Am. School library.

This is really a business letter, and like Mr. Bonatti's I needs an IMMEDIATE reply! because otherwise I won't be able to do any of the things you will decide need to be done.

This morning I mailed to you six pages of RUBBINGS from ^{III} bundles selected from the first ~~manuscript~~ two cases, as I have numbered the 36 cases found in the British Museum. Here are three more pages, taking us down to BM 170, still from case (2). (The prospect is not as bad as it sounds: a great many of the cases have almost entirely Rhodian, which we will not record this time.)

There are two things to be done now with these rubbings:

1.) find out which of the bundles really need photos, and are worth it. That is, I think we have to have

out the "may be read later" kind, unless they are ^{hand out} very interesting, and perhaps also ^{the} slight variations. (I am not absolutely sure I can photograph them, but I hope so.) The kinds to check are of course chiefly the Kridian and the Coan. I am recording the Roman for Mrs. Will's records, but don't expect to photograph for her. The Thasian will be hard for you to check, because of our files not being all assembled, so don't bother too much with them. The Ecdopos are rather extra.

2.) If possible, make the triplicate copy before writing to me, and send both these copies in your letter. Write any questions about stamps or handles in red on the original only, and I will try to solve the problems while I am still here, and correct readings, etc., and then give the thin carbon copy to the Museum before I leave.

In any case, the triplicate of ~~these~~ handles will have to be done for the rubbings, because I will not have time to do most of it here. So don't remove any of the rubbings until it is done, as there is no other detailed record, no copy of readings, except for the five pages covering Thasian and nearby numbers which I enclose here. From these

pages you will see how it is to be done, with BM number followed by museum registration number (¹⁹⁵⁵₉₋₂₀ etc.) followed by finding place. These are new museum registration numbers, now being given, to items which have never been registered before, though discovered 100 years ago perhaps. So I make our BM numbers begin with them, for convenience. (There are other handles which have been registered, and under different series, so we have to have our BM series, like TD and others, to keep our records straight. When I send you these, I will tell you the old registration numbers.)

For finding place, see the summary of registration numbers given, of which I enclose here the first page.

This will also guide you, in case of doubt, as to which kind of handle the stamps in the rubbings are on, since the numbers are given by category.

I hope all this is fairly clear, ^{although} ~~as~~ it has been written in various places, and is being finished - something of a hurry. If you see Mr. Benedict before I do, tell him I appreciate his rubbings more since I tried to do a lot myself. Some of these were

made by a young art student who doesn't know
Greek, so they are mostly numbered upside down.
Up to show, the new registration numbers have also been
written ^{on a number} by one or other of two art students working for
me. They are poor and need too many, but so do I!
so I hope today they are going to give me somebody
from the Museum to write the rest. ^{The numbers} They are so complicated
they take a long time. It is so dirty down in
that irrigator, with such black London dust,
that I thought I might be able to take the rubbings
with that, instead of pencil shavings!

I have been to visit Professor and Mrs. Gomme, who
were in Greece this year, and some other friends; and
must now plan to come back to Athens, as
soon as we can get finished. I shall send you rubbings
in a day or so. Please if possible write to me the same
day you receive them, each time, and mail the letter
airmail from the Central post office. (My friend Miss
Talbot would give you a stamp, but better to send the
letter yourself at 1/2 K. & P. & K. & V.) I ought to have been
some time with work.

with love to you, and address reports to others.

Berlin Museum, basement

36 "cans" of SAT. They are in fact ^{large} deep square traps, mostly (?) with divisions. Part are in numerical order and clean, part loose, dusty, unnumbered.

Old markings on the traps, in black, indicating previous and other matters, new markings, chalk, by Peter Lohd in somebody's helping time. - Mr. Aschmole comes down again, and agrees we may give the traps running numbers, which we will do on Monday, having figured out a reasonable order.

4 X. 55

Note there are about 540 canthos selected but still to process. ^(following BM 236) Probably can take no plants, nor record except by subtrips and concordance of numbers.
