KNIDIAN VG KT STUDY

PHOTOCOPIED BY KATHY DAVIS 28.III.94

FOR AMPHORA PROJECT

The Tense numbers on the
cards, are they the published nos.?
e.g. Ἀριστοκλ. ep. ΠΤοδ.

31. X. 88

[201]

Notes on "new KT" laid out by MST

Ἀθανάκριτος ep. Κλεισπιδος?

i.e. ref. T. Dunt, but choose 12d2

(coin type) (back, say "corrected")

(There is a good 11 for this - another type in which

Ἀνδρόκλος w. Bowman ^{Ἀνδρ. and on new, for a much Kdson. The}

is then reason to pull this out of LK, ^{look at AEANA}
i.e. without the rest?

Ἀριστοκλ. ep. Σαμ. Πτοδ. τγς

— work out the reading, with brackets

Ἀρτίκλν

Ἀρτ. Δεμ. (

— what is "K 4"? (on a plate.)

got things here

1. X. 88

Εἰρηίδας

ep. Νικασίβουδος

This is reasonable, as N. is a late III (mostly)

E's ep. are IVA) But a reading of E,
in nominate seem not to appear else-

where

Εἰρηνν.

u. except (ep. not pres.)

Does resemble KT 539. Possibly belongs?

2. X. 88

pretty faint — ΟΕΟΔΟΤΟΣ

(2)

(2. XT. 88)

2.02

Note Again
ex. (BS 13347)
"is of Rhin
shape through
Kundin clay"

Θεούδεμος O w. back.

→ is this not same as O. w. Lion's head?

(KT 1681)

look under CHIN

Ιπποδοχος - cf. JNSZ

clear up entries on back

9. III. 88

with PMW

at SA

[3]

For work on KT series

MET has ^{worked on} reached more or less KT 1977. (They go up to nearly 2300.) She has printouts to 2000.

although she has read KT 1977, she still has occasion to go back and make revisions.

The printouts she has worked on, and still works on, are all in the Stoa. (Photocopies ^{of these amended pages} have been taken, and exist at 33 Plutarch, basement apt. These probably include the greater part of MET's revisions, but she does go back and make more.)

I should put more comments, they want them.

Notes on correction of KT series

Beginning now with KT 1

²Ag. 2100s, presumably homonymus

1.) ²Ag. with bee ∇ , perhaps starting out end of TVB

2.) ²Ag. with horn IVB - V

3.) ²Ag. with horn VTA ²Ag. 2100s 4s 2s 100s

4.) ²Ag. with STAR in V (V very probably, but this is not a purely V of. nam) (KT 17 + 19)

5.) With crescent, homonymus ∇ and VT, and no sure duorini for if VT. Maybe a pair with palm tree 10x45 E3 (100d.)

6.) KT 26, 27, eps 1101745 - 145
' these also presumably VT (as [could be] 111-115)

4.02

KT 32 Diamond only. Evit. wrong reading.
Seems foolish to give it a date.

In general, when fab. - ep. stamps are of
diversi period, it seems as if suppl. types, if
known, shd be referred to.

KT 36, single type of Agathokids as
kind. fab.

KT 39 cut in die - in all exs?

KT 40 Where is master card?

17. VI

→ "device" card?

KT 56 Absence of prep. should be
mentioned (3rd)

KT 60 Here again, no prep. But
ep. is in num - call attention?

e/ri)

A

4.03

Have run through type of 2 AAs / Ova ;
one or two make a page.

KT 74 It seems as if the man could
be pulled out, as in the MSBF article list:
 $\Delta \mu_{\text{Ox}}(\text{vys})$ (or $-\text{EUS}$) We know
 $\Delta \mu_{\text{Ox}}(\text{vys})$ in weather 0 type.
In 74, $\Delta \mu_{\text{Ox}}(\text{vys})$ (or $-\text{EUS}$)

KT 78 of (Myriad(apor)) not & is in full
in desc.?

and dies? $2. \sqrt{11} \cdot 87$

RT 86 If IVA is kept, due to (IVA)
because the reading is for Damant only,
and nothing else under A.P. & C.
so early.

RT 91 Document only
~~restoration~~ proposed by
V.G. in 1952

RT 84, 85 $\rightarrow$ $\left(\frac{\text{min}}{\text{max}} \right)$
