30.IX.66

The above made by AA from the file cards we had got out to correct Mlle. Metzger's manuscript and had annotated with the numbers in the no. column above right. These numbers are as I believe publication numbers, and these objects have never yet had any individual inventory numbers by which to identify them, only have been marked with numbers indicating their finding-places, and several could have the same number of this sort. These " " numbers appear on the original rubbings given us 23.IV.66 by Mlle. Metzger which I have just found. Mlle. M.'s ms, which I have returned with the readings corrected, had a certain amount of context information for some items: the two Chian (3 and 4) first(?) half of 3rd century, the Knidian 7 and 8, 2nd century (first half for 7).

Items not covered by the foregoing analysis:

Metzger ms/ no. 11, on which see my letter to her of Sept.24. Although I have since found her original set of rubbings, this item is not among them (received by us 23.IV.66), is perhaps a find of the past summer. If guesses in my mentioned letter are right, this no.11 is closely contemporary with nos. 5-8 and 10.

visit  
Dunant nos. 3 and 6, see my notes of 16.IX.65. (These numbers are probably just mine for these notes.) Of these, 3 is MSBF period, while 6 is duoviri period. They evidently are not from the area covered in Mlle. Metzger's publication ms.

On EYKPATHE: whereas he is not in the Combined List of Knidian types found in Corinth and/or in the building fill of the Stoa of Attalos, apparently he directly followed KAEYMBPOTOZ who occurs in both places: see original and revised types of EΠΙΘΑΝΗΣ in the two terms (KT 569 becomes KT 2235). A large number of potters name KAEYMBROTOZ, including all but two of these (much fewer) who name this EYKPATHE.

Note that of the unclassified No.2, other examples have been found only at Koroni and in Alexandria.

22. VI. 89

*KAEYMBPOTOS is in the fill of the Stoa of Attalos,  
EYKPATHE is not. Now are there only 7 changes  
in the SA fill who are later than Φρόνι-φρόνι  
(E 166), is KAEYMBPOTOS sp. for 160 B.C.  
and EYKPATHE for 159? ?*

(From list, Hyp. 1985, pp 32-34

| 25 | Πυθόκριτος (MS 4)        |                         |

Kuind eponyms:  $\Lambda\sigma\kappa\delta\gamma\tau$ s

It now seems likely, that there was an  $\epsilon\phi$ .  
 $\Lambda\sigma\kappa\delta\gamma\tau$  in the MS period, III, as well as  
 the one named by  $\Delta\pi\sigma\tau\alpha\chi$ , probably TV B.

The  $\epsilon\phi$  monogram <sup>KT 1783</sup>  $\epsilon\phi$  in the MSBF is of  
 uncertain restoration, and so <sup>uncertain also</sup> perhaps the one  
 of  $\Lambda\sigma(5005)$ . (KT 2043); although  $\Lambda\sigma(1)$  seems pretty  
 clear.

But KT 948 and KT 2220, which have  
 the name in full (in nom.) with an incident.  $\epsilon\phi$  (?)  
 $\Delta\iota\sigma\tau\alpha\chi$  ? are strengthened by the  $\epsilon\phi$  -  
<sup>(KT 1783)</sup> monogram  $\epsilon\phi$ ,  $\epsilon\phi$ , 59, 30 found the strengthen  
 it; in place of  $\Delta\iota\sigma\tau\alpha\chi$ , in exactly the same kind  
 of reading,  $\epsilon\phi$ ,  $\epsilon\phi$ , 59, 30 less - almost certainly  
 -  $\Lambda\sigma\kappa\delta\gamma\tau$ . Other types with  $\Lambda\sigma\kappa\delta\gamma\tau$   
 similarly arranged name versus MSBF  $\epsilon\phi$ s.

this present  $\epsilon\phi$ .

Kuini eponyms:  $\Lambda\sigma\kappa\delta\gamma\varsigma$

It now seems likely that there was an  $\Lambda\sigma\kappa\delta\gamma\varsigma$  in the MS period, III, as well as the one named by  $\Delta\pi\acute{o}\sigma\tau\alpha\lambda\upsilon$ , probably IV B.

The crisis monogram <sup>KT 1783</sup> types in the MSBF is of uncertain restriction, and so <sup>uncertain also</sup> perhaps the one of  $\Nu\acute{o}\sigma\sigma\varsigma$  (KT 2043), although  $\Lambda\chi\epsilon\iota$  seem pretty clear.

But KT 948 and KT 2220, which have the name in full (in some) with an incident.  $\phi\alpha\beta(?)$   $\Delta\iota\omicron\upsilon\varsigma$  (?) are strengthened by the monogram <sup>(KT)</sup> item, Herm, 59, 30 found the strengthen it: in place of  $\Delta\iota\omicron\upsilon\varsigma$ , in exactly the same hand of reading, then Herm, 59, 30 less - almost certainly -  $\Lambda\sigma\kappa\delta\gamma\iota$ . Other types with  $\Lambda\sigma\kappa\delta\gamma\iota$  similarly arranged have various MSBF eps.

 In fair copy of Ku. of list  
 he is down as "TVB (SA)"

*but* (16. III. 81)  
 But in list of Ku. of, in SA  
 he is called  $\phi$  *not with title*

to 183 BC MSBF

to 157 BC SAEF i.e., 9 years after 166 BC.  
 (9 eps. of TVB)

26 years apart. less than last two quarters.

## (Appendix 1)

4.05

We include  $\Sigma K \epsilon$  dos although it is only known in 1 type, and no prep. is at any rate preserved in either of the 2 exs. There is actually ~~place~~ place for one, a possible companion type, but for  $\Pi u d a' d s u s$  <sup>KT 1780</sup> with monogram - likely, if  $\Sigma K$ . had a prep. - They are similar.

14. VII. 81

AA is due back 18. VII.

(Check in regard to drawings Carolyn had out, in case there are problems and I want to check with her.)

For the date list of Ker. sp.:

- 1.) Check with her the 2 pages already done: I look at the printed product, and in <sup>reads</sup> ~~books~~ to data. Check also lines 2 pages from the MS list, and the SA list.

26. VII. 81

I feel there ought to be an indication on names known only in single type. But have not managed to do it.

Preparation of Knud's original list  
from typescript of 1969  
to be published as App. 1 of Plavnick's article

Lay out all copies of that DATED LIST of 22. VII. 69  
in case there is to add annotation on one, not  
on other.

Write on the photocopy of that list, correcting if  
necessary the Roman numerals beside the names,  
and adding annotation as asked for in the  
introduction <sup>to App. 1</sup> of 17. VII. 81. For this work,  
Lay out typescript of Knud's spp. in MSBF  
and in SABF, and count examples listed.

To do this work,

Sort by Knud's files, and have to hand Page  
and esp. EAD 27 texts, and look up  
anything that looks dubious in the papers.

Yesterday I got through Zygodontos in preparing  
the photocopy, and AD typed 2 pages of  
the printer's copy (was large), through  
Aguedapitos via. Note he gives a separate  
line to each different dates homonym.

He has stepped for his holiday, and I to  
try to finish the main text of the article, for Mac & me.

in. sp. Θεοδωρος has interesting context  
(on 3x5 postcard) including the for Inter-  
mediate Stoa - ramp at W end of Middle Stoa  
- the only item not in MSBF.

(25) See Gaudin's article in P. Gaudin (etc)

3. F. 82

Especially much the majority of Kruik stamp  
types in the MSBF do not have the ethnic  
Kru, Kru, etc. Having looked through  
in the files, from the pub. MSBF list, I find  
a few pub. do start before IVA -> these  
are always ? but in the case of others, who  
overlap III - IVA, they start to put the  
ethnic in the Peter terms; in post-MSBF terms,  
if in the latest MSBF terms.

27. IX. 83

What about those EK items that say

HEM

UK97

are they later?

shape etc.

27.VIII.59 From this list,  
AB counts 53 diff. of  
names.  
Presumably this was 63  
in the period 188-127  
(at 3 a year). Wd.  
expect some more  
repetition.

7.01

Early TVB (or IVA, but no lower ex. w. title)

See attached sheet of 15. I. 81 on the up  
Πολυχάρης, whose <sup>special</sup> context, and name connection,  
puts him there.

Note too one of the few TVB present in the SA:  
(an inscription on sheet of 16. IV. 81, attached to list of SA):

- Ἀνακτιπιδες ①
- Ἀριστοκλῆς ①
- Δίωυ
- Ἐπίταρμος
- Κλεισιππίδης
- Καζύμβροτος (2) (in SA) ②
- Μεσσηνίτης (2) (in SA)
- Πολυχάρης ③
- Τελεκράτης

<sup>BE</sup>  
SA in goes to 9 years after 166? 157 BC?

- ① Also - Water Channel put out of use by SA cstr.
- ② " " SA " built for fountain of S. style but
- ③ " " cstr. fill of Brick Bldg of Sq. Bldg, (as noted); in that fill, other Ru. are IVA

14. XII. 81

I.e. there are maybe 9 years after 166. If they are the first after 166, date of fill may not go below 157 - almost right

after Autolus II taken off in 159, that is to be reason for no long-held - SA fill although quite a little later. Am.

Early TVB

(or TVA, but we have no ex. w. title)

The ep.  $\Pi\omicron\delta\upsilon\chi\acute{\alpha}\rho\gamma\varsigma$  occurs in the cstr. foll  
 of the Bruch Bldg, where there is no other ep.  
 of post TVA. By looking at the analysis  
 of fabr. in Ep. A TVA period, I see that all  
 this <sup>save one</sup> fabr., occur there ( $\Delta\gamma\mu\acute{\iota}\tau\epsilon\rho\omicron\varsigma$ ,  $\Theta\epsilon\acute{\upsilon}\delta\alpha\mu\omicron\varsigma$ ,  
 $\Gamma\alpha\acute{\iota}\omicron\upsilon\varsigma$ ,  $\kappa\alpha\tau\epsilon\iota\kappa\omicron\tau\omicron\varsigma$  and  $\Sigma\kappa\epsilon\psi\tau\omicron\varsigma$ ). As for  
 $\Theta\epsilon\acute{\upsilon}\delta\alpha\mu\omicron\varsigma$ , 1) he does name ~~several~~ epis  
 of TVA, and in fact the type with  $\Pi\omicron\delta\upsilon\chi\acute{\alpha}\rho\gamma\varsigma$   
 is of dubious reality,

$\Pi\omicron\delta\upsilon\chi\acute{\alpha}\rho\gamma\varsigma$  therefore shd be called

TVA-B ?

or TVBa ?

There are no doubt other TVA-B, so we  
 could find a needed Ep. at this end as at the start.  
 Or at any rate identify early TVB people.

Φρούραρχοι (and EMSBF)

Dated list of eponyms in Knidian stamps

|      |                         |      |                       |
|------|-------------------------|------|-----------------------|
| III  | late 3rd - ca. 188 B.C. | VI A | ca. 107 - ca. 98 B.C. |
| IV A | ca. 188 - ca. 167 B.C.  | VI B | ca. 97 - 88 B.C.      |
| IV B | ca. 167 - ca. 146 B.C.  | VI C | 85 - ca. 78 (?) B.C.  |
| V    | ca. 146 - ca. 108 B.C.  | VII  | later 1st B.C.        |

IV A is the period of the phrourarchoi, of whom ~~2~~ apparently 3 served each year. A minuscule a following one of these indications (e.g. IV Aa) means early in the period. Other indications:  $\Phi$  identifies a phrourarch named in known stamps together with an eponym;  $\Sigma$  identifies an eponym named in known stamps together with one or more phrourarchs; III-IV marks an eponym not in the Middle Stoa filling, and not known with the title phrourarchos, but ~~named~~ by fabricants of late III or early IV, so that he is dated by name-connections. Names that appear in the Middle Stoa filling or in that of the Stoa of Attalos are followed by (MS) or (SA), with ~~XXXXXXXXXX~~ a figure added if there is more than one example. (X)

Agathoboulos, III-IV? (KT 1171, 1622)  
Agathoboulos, VI C or VII

## KNIDIAN

Knidian in the plumard period  
and just before

Very important group from a cistern in Perraios  
excavated in 1965. The pottery is being studied by  
Wille Metzger. In PERRAIOS MUS. [also of here]

Close dating of the stamps. From the Rhosin  
are late 3<sup>rd</sup> and early 2<sup>nd</sup>. The Knidia are mostly  
188 - 167, from six handles naming the sp. (FP?)  
Τελεσίφρων, a couple naming Πολύκορος,  
commonest sp. of MSBF group, then late? in this  
period. (Τελεσίφρων is not, actually, one of the  
early FP - period sps. assembled to 62 but may be  
close after.) These sps are in list of sps <sup>7.14.10.62</sup> close to  
early FP period, but not known w. Attic? (Ἀρτίμων,  
Εὐκρά(ς), Θρασύτος)

14.V.66

Add τελεσίφρων tentatively to early FP  
groupings, partly because of the new group but also  
because he is named by 3 fab. stamens  
shown to be of early FP period: Εὐκράτος,  
Πολύκορος and Ζωτίων

14.06

ON THE SAH FROM THE PEIRAEUS CISTERN ANALYZED 9.V.66

This group is of much importance in connection with the beginning of the phrourarchos stamp series in Knidos, see a preliminary note of 28.IV.66 filed in Knidian Studies folder. The stamps naming phrourarchoi apparently belong to the period of Rhodian occupation of the mainland, i.e. 188-167 B.C., as accepted by (1954) P. Fraser, The Rhodian Peraea, p.93.

Among 35 handles from this cistern, 5 are Rhodian, datable in the late 3rd and early 2nd century B.C. The eponym ΚΑΕΥΚΡΑΤΗΣ (no.9) is among the latest <sup>Rhodian</sup> in the Middle Stoa Building Fill, sometimes appearing with an early secondary stamp (rose, no letters).

Among the remaining 30 handles, 28 are Knidian. Of these, the stamps of 3 are matched in the MSBF; they name the eponyms ΕΥΚΡΑ(ΤΗΣ) (no.28) and ΑΞΩΝ (no.29) in a stamp and the fabricant ΔΡΑΚΩΝ without eponym (no.26); whereas 2 more (nos. 31 and 32) name an eponym ΠΟΛΙΟΥΧΟΣ, the most common Knidian eponym in the MSBF, although the particular stamp type (KT 1990) does not appear in the MSBF.

Of the other 23 Knidian, 2 name eponyms who are not established as phrourarchoi, ΑΡΤΕΜΩΝ (no.15) and ΘΕΑΙΑΧΤΟΣ (no.7); but both of these eponyms have been shown to date close to the early phrourarchos series, so they predate the series if they do not belong to it. A third non-phrourachos, but nevertheless of the early phrourarchos period is ΤΙΜΑΚΑΕ (no.27); he is one of the few <sup>Knidian</sup> eponyms known as contemporary with phrourarchoi (he is named as eponym in the same stamp that names also a phr. ΕΥΚΡΑ(ΤΙΩΝ?)); these types that name a phr. in addition to another eponym seem to come at the beginning of the period. (Name-connections would suggest this.)

There remain 4 Knidian eponyms in the group, all phrourarchoi: ΑΓΕΣΤΡΑΤΟΣ, ΑΡΙΣΤΙΩΝ, ΤΕΛΕΣΙΦΩΝ, and ΦΙΑΤΑΤΟΣ. These are known here in single examples save for ΤΕΛΕΣΙΦΩΝ, who dates 8 of the 18 Knidian handles in the whole deposit that bear

dating names (the other 10 bear only fabricant names). For each of these four phrourarchoi, there is some separate evidence to suggest he belongs to the earlier part of the phr. period, i.e. apparently soon after 188 B.C.

The 10 fabricant-only types just mentioned are mostly those of the ΠΑΙΔΙΑ ΘΕΥΑΣΠΙΔΑ (8 examples) plus one each of ΑΡΙΣΤΟΚΛΗΣ and ΑΡΑΚΩΝ. This last (see above) is of the MSBF period, i.e. pre-phrourarchoi. The others are of the phr. period.

Of the 2 handles that are neither Rhodian nor Knidian, no.35 is a Koan the stamp of which is duplicated in two Agora deposits which both may date in the early 2nd century B.C. Of these, B 20 : 22 belongs by its ΣΑΗ to the Knidian phrourarchos period. The other deposit, O 16 : 3 had been tentatively called rather earlier by GRE, but the Koan item is a whole amphora, and by its shape it fits much better in the first half of the 2nd century, post-MSBF.

No parallel has been found for the final unclassified and unidentified item, no.23.

(From a draught of 14.V.66)

ANDRIAN

Eponyms close to early φρ. period  
but not known in types with φρ.

φρ.

MSBF, 1, 1966.

Ἀρτίμων : on name-connection, esp. <sup>false</sup> Ἀρτισαγόρας  
Ἀρτισίων

Δαμάτριος  
Ἐπιφάνης  
Ἐύκρα  
Θραϊβύτος

only with Ἀρτισαγόρας + and/or

MSBF  
slightly post MSBF  
context

Λάχαρτος ?

See separate sheet, for

GRE dating, for all these, beginning

MSBF

Λυσάνιος

with Εύκρα

MSBF ?

Φιλαππίδας

~~Φιλιππος 7.II.67~~ Forson ~~name~~ RT 1471 ~~missed~~

being listed <sup>with φρ.</sup> it has now been added: has  
name + title, clear. (i.e. this (not φρ. but) φρ.)

7.VII.69

Μόσχος - now has pref. of title, but on  
analogy w. Φιδοκρίτης and Ἀνδρόκλεις  
is types in line of swappings (all of  
Ἀρτισίων ?) he seems to be one of the  
3 φρ.s of the 7 swappings.

15.XII.80 Add Πολύτρος - type ? on note of 10.VI.56 in the  
folder. It seems likely ? that some names seen  
by connection to be in III-IV, but not present in III, and  
not on file with title φρ., are actually (early ?) IV,  
and it just happens we have not found a type w. φρ.

(letter from CORINTH - EDW. GRIPS file, RT. 70)

Notes in connection with dating of GRE kind.  
in S. Sten well.

Date of Λάξαρος, - GRE 527

Two prob. with ep. Λάξαρος:

- 1.) Αριστογέρης + τριδεντ (ESBF with triad)  
φρ. τιν. w. bar
- 2.) Αζύδαμος
- 3.) Αζυδαρίδας (not abbrev.) (Αζυδα( in MSBF  
not abb. - φρ. τιν.)
- 4.) Νεκαρίβουδας + τριδεντ (MSBF with triad  
φρ. τιν. " "

1.) ?Ap. + τριδεντ exists in term of Εύκρα

All examples of uncertain  
date, considered perhaps  
near end of 11 or  
just after MSBF. (Esp.

→ Αζαίδης  
(Λάξαρος)  
(Λυσάριος? - "bar")  
Φιδάμπεδος  
Φιδάππος

2.) <sup>3.)</sup> 2 too complicated to do now

4.) Νεκ. + τριδεντ, in term of Εύκρατος  
(Λαχ.)

νεος φρου

ράρχου Ἀγία

XII. 80

(Dunn 139)

(3)

(The

only

type

during

φρ.

Agias)

This is Olympion (1939 or 119).

Now one sees that neither of the names in 1663 is a fabricant, but at this time both φρ. and another φρ. were named. Presumably this was at the beginning of the period of naming φρ.

Note that there is a type of same <sup>Ἀποστάγο</sup> ~~potter~~ with Δεξιφάγος and without any φρ. named. So perhaps it starts in his time? Or perhaps there was a companion st. with name of φρ.?

Note that at least one other φρ. is contempor. with him (annual?) of Δεξιφάγος - an type of Ἀποτίων with Δεξ. + φρ. Ταυριόκος named. And there are some incomplete types, or φρ. not preserved in one.

Study all the combinations - two specimens - types. Types of Ἀποτίων provide an interesting series.

KNIDIAN

Earliest? Knidian sponges

96:2

as J. Knoll is putting HAT Group C numerically a stage earlier than "John's Well" (P 21:4, a side); and as I would call the <sup>Ph.</sup> ~~later~~ <sup>earlier</sup> in P 21:4 — Ζωδονος — ca. 207 B.C., so the Knidian types with monograms in O must have been pretty much the earliest Kn. sponges, since one of these is (the only S.M.H.) in Group C, hence before ca. 200 B.C. The type is KT 1784, w. sp. Παταξίας, monogr.  $\Phi$ . [St. 05 Rotiff is now downgrading Group C, well into 2nd c.]

(16) Sponges named in these O monogram types:

21. VII. 81

Name of  
Ep. is in  
MSBF

|            |                  |                  |             |           |

17

New Ep. = KT - from Berlin Mus.

KT 1976,

Κυδίου Στ.

Δεξιφάνους

Εὐφρονος

Φιλοστράτου

Exp.: E.M., SS 14380, and

Berlin Museum - 3 et al.

← We had had φ. 10. - - -

This is a totally new name in Kind.  
apparently it must be the fab., and Εὐφρων  
the φρ.; maybe ~~all types~~ all types using  
Εὐφρων in this period were the φρ.; and there  
is no E. fab. except into the 5th.

from  
B. Hansen's article

26. VII. 72

Not numerous revision in Kind for Perg. also  
from Dr. Böhmer's photo. There should be  
assembled and published soon

7. II. 81

M&T finds the originals of our duplicates of  
(this part of?) the Perg. MSS readings, where there  
are corrections marked in colour. Second - 2? -  
maybe of Perg. period and not of MSBF period.

Group. period A

4. VI. 68

## Companion types of Διονυσόδωρος (fabriant)

Stamps naming only Διονυσόδωρος (fab.) could ~~not~~<sup>hardly</sup> undoubtedly be connected with types naming phourarchoi, for instance:

- 1) KT 471 (Διονυσόδωρος w. scepter) could have as companion type KT 1310 (Φρ. Απολλώνιος) because of similarity of omegas? (X)
- 2) KT 468 (Διονυσόδωρος without device) - companion(?) type KT 1369 (Φρ. ΕρμOCRάτους) On both types <sup>letters</sup> N, P are retrograde
- 3) KT 469 (Διονυσόδωρος reh.) is a mate of KT 1865 (Φρ. Ἀρζανδρος) not retrograde but the lettering is very similar

Note that There are in file: 2 types of Διονυσόδωρος (KT 472, 473) naming the Φρ. Αριστίδης on same stamp. and a type naming ΕρμOCRάτους (KT 1963) but without the title Phourarchos.

(X)

22. IV. 86

Note no. of examples of type of Δ. + scepter found together in a site in Israel, reported to me by Arsl.

26.VI.67

KN. CHRON: PERIODS III-IV

13.VI.88

[accompanying] the  
is was & &

golden: Karamanlis:

Kind chronology - (up) Augusta(vios)

Dipylon Braum

(Braum)

Fraulein Braum brings today photos of  
6(?) handles from various levels of the Dipylon-  
braum. 4 are Platin of 3rd and to 3/4. At  
lowest level was on using Agostinos; as I  
said he could be ca 275 or a little later, she  
says stratum is to end of 2nd quarter

at middle level, an ex. of KT 447,  
Die 3 typ of Διου(ρα) (of) Augusta(vios),  
which is MSBF. I say to Miss B., late  
3rd or early 2nd, at the level she says,  
unless slipped down, it should be 3/4 of 3rd.

I don't really think this object dates before  
200 B.C.

22.VII.69

Fr. Braum now dates context of this kind  
as 200-180 B.C. (the level VIII).

14.I.64

MS II suggests possible combination  
 of 2 types as indicated another year  
 when both  $\delta\alpha\mu$  and  $\phi\rho$  were  
 named; (similar in letter)

KT 549

Ἐπὶ δαμίου  
 ρου Εὐδίου  
 ου Εἰρηνίδα

K 39 = Alex  
 No KT (yl)  
 (see 593.2)

φρουραρχου  
 ντος Ἀριστι  
 ντος Κνιδίου

These names don't appear in  
 the various lists made 10.62.

E.g. Εἰρηνίδα is not among the facts  
 of the ep.s -  $\phi\rho$ .s of the supposed  
 early period -

N. Mus.

Notes on KT checks

(17. VII. 54)  
Note on KT 2055 (Euphrates), sp. Asud'705

that is by same scrib as KT 1847 (Irodoxos sp. Agad'705)

See now Emperor's publications  
of pottery works of these potters.

It all comes out plain.

For preparation of Kinder grid.

To begin by establishing as well as possible the 188-167 series, using the group file to pull out all types with these names from the striped file, then reshuffling to fabricant order, so we have a list of fabricants of this period. <sup>Attitude and</sup> adjustments will be necessary since names repeat.

To help with sequence, use for instance <sup>numerous</sup> types of Δυμύτρος and Θεοδότος who both use the anchor. There is scarcely any repetition between them of ep. names. Probably Θεοδ. uses has sword post-fr. type, follows Δυμύτ.

Types of Δυμ. are dated by

Ἀγαστρατος (φρ.) (εκιπτ)

Ἀπολλώνιος "

Ἀρίστερχος " NO DEVICE (εκιπτ)

? ΑΡΜΩ

Ἀρτέμων (MSBF?) <sup>2 TYPES</sup> (εκιπτ)

39 handles, dated to 20 or more phourarch terms.

## Fabrics of Handles naming phronarches

Selection not  
studied.  
There may con-  
be more pairs.

When writing to P. Proux 26. II. 52, mentioning his list on Ph.  
stamp phronarches, I had MS got out for me an example (probably  
large) of each phr. type from Agave and Puyos. I gave a  
hasty glance to see if anything looked good 150.

A second look before having them put away;

Larger pieces: SS 9756, top of neck, w. tops of handles  
and one whole handle. Of <sup>2</sup>Apistokids,  
pp. Tepopetv. HH ca. 265  
SS 9375, neck, tops of handles. Of  
<sup>2</sup>Apistokids, pp. Agave. Note  
contraction at mouth. Handles  
appear to have been considerably shorter.

In general:

These handles have a slight rise. Some are slim and neat,  
some broad and perhaps lumpy. Perhaps  $\frac{1}{4}$  of them have a  
noticeable light slip (?). The rim is not a clear strip,  
but str rather fluted (e.g. SS 10551 of Zarcas).

→ List on back of them got out.

Φρούραρχος

Note that the new volume of P. Wason - R. Mitchell  
 Philon - P. Jones, 1941, has an 8-column  
 article on "Phourarchos", by H. Kortenbeutel.

Nothing is said about Rhodos - no mention for  
 instance of the fact that the <sup>title</sup> ~~title~~ appears on  
 Rhodian jars. No mention of Rhodos.

So perhaps in  
 Rhodian jars  
 Seleucid - or  
 Ptolemaic -  
 servants?

p. 229, on uses of the word in the Seleucid empire,  
 - in distinction from ἀκροφύλαξ (ref. to coast  
 of A. Minor opposite Samos, in the time of  
 Antiochus II. Refon & Bickerman, Les

Inst. des Séleucides. Oct Hellenistic

empire. Amélinx, p. 780: "Schliesslich

hat eine Reihe von selbständigen kleinasiatischen  
 Städten der hellenistischen Zeit Offiziere  
 mit der Bezeichnung Φρούραρχος in  
 ihren Diensten." But they seem to be  
 military men, not civil officials.

See Inscr. von  
Priene, p. XIII

A series in Priene: any tätig might be chosen,  
 term was 4 months.

September 19, 1947

Dear Professor Robert,

Thank you very much for your comment on my plan for a corpus of amphora stamps. I regret very much not having acknowledged it more quickly, but I have been away for the greater part of the summer.

M. and Mme. Bon and I have been in correspondence on the subject of these stamps for many years, and particularly in recent years have exchanged ideas rather fully. Unfortunately since the war their duties at Montpellier have been so exacting that they have not been free to pursue their studies in the field of amphora stamps.

I am grateful to you for pointing out an obscure place in my prospectus, the sentence on p. 3, toward the end of the first paragraph, "Finally, the sequence, etc." In recasting the plan for publication, I shall try to express this more clearly. I had in mind for instance a series of Knidian jars on the stamps of which the official, presumably the dating authority, is given the title phourarchos. Excavation evidence for jars and fragments bearing such stamps suggests they belong to the late third or early second century B.C. It may be proper to narrow and confirm this archaeological date by interpreting the phourarchos as an instrument of the Rhodian occupation of the mainland in the first part of the second century, about which we know from other sources. I enclose photographs of the two handles of one of these jars (Agora inventory no. SS 9375, the neck and the upper parts of the handles preserved); and note, with regard to the endorsing name following the word "Knidian", that an Aristokles of about this period signs circular Rhodian stamps (with the characteristic rose) which appear both on Rhodian and on Knidian handles.

I am greatly obliged to you for taking the time to consider my project, and should of course always be very much interested in any further comment you might care to make.

Yours very sincerely,

the name of the phourarchos on SS 9375, "Aγρως, is not, to the best of my knowledge, either a Knidian or a Rhodian name. This is true of a number of others. It has been suggested to me that these officers were mercenaries.

Knidos : phrowarches -3

10-V-46

I had noted there were numerous non-Knidian names among the Phrowarches, which names were not Rhodian either. Sugrains sug. by W. Wallace that the administration might have been under mercenaries, which wd be no more Rhodian than Knidian.

Not so many established phrowarches names, which <sup>after all.</sup> turn out to occur on no other Knidian stamps <sup>in any form</sup>. They are:

"Αγρων

"Αρίστρατος

"Ασκάσιος

Βουδαρχίδας

"Επιγένης ← (Zippiti, Mercenaries, p. 322) in N.'s lists.

"Ροδοκλῆς

Τιμοφών

Φιλοφρών a Rhodian ambassador (see Papp.)

Φιλτίδας

of these, Αρίστρατος is Rhodian (sp.), and Ροδοκλῆς is possibly a Rhodian fab. The others don't appear

However, it looks as if the title was sometimes omitted when the same official was in reference, i.e. the

Kuidas - phormas - 4

same individual which he held the same office.

Consider Σωσίπικρος. So that occurrence as

spongers or other clearly early Kn. stamps might not mean the name was Kuidas. <sup>an established</sup> ~~established~~

example is Καταρπίδας: (there are others of which e.g. the names occur only in D. as phr.s, so are yet to be established. Finally, the 3 forms of Ἀποστείδης, Ἀκκαδικαίδης are apparently to be added to the list of possible foreigners.

From <sup>W. Wallace</sup>, the Museum of the Hellenistic World, by G. T. Griffiths (Cambridge Univ. Press 1935).

On Rhodes as an employer. pp. 90-92, with relevant references to texts (literary and epigraphical) of date relevant to these stamps:

Living 33.18.1000. "mille et octingentis fere armatis, ex variis genere auxiliorum collectis, miserrant; Galli et Pisnetae et Nisnetae et Tanianae et Aerei ex Africa et <sup>(of Laodicea)</sup> Laodiceni ex Asia erant." Ten Rhodians sent these under Pansistratos the praetor, to fight Philip V on the mainland (197 BC)

(Griffiths cites also:)

an inscription Class Rhodes ii. p. 169 of "uncertain date" which mentions several mercenary officers of name. But the names don't match ours.

an inscription of the end of the 3rd BC (Pitt. Syll.<sup>3</sup> ii. 581) of a treaty bet. Rhodes and Hierapytna, Gort., dealing with the recruiting of mercenaries by the one and the other. (No names mentioned.)

(Griffiths p. 90. : "It is to be expected that Rhodes, a great merchant state of the time, should have kept a permanent army of defence. Traders are not very often good fighters, and especially they do not like to interrupt their business with active service in the field. Rhodes was wealthy enough to support a standing army of paid soldiers, though there is no absolute proof that she did so.")

It would be nice to place the names. Paper no use.

# Types of <sup>ΕΚ</sup> ~~Αγνωση~~ - 2

ΕΚ -
