Series of Boudraion Stamps to help with chronology.

Note that there is little or no overlapping of eponyms between Boudraions. At best, those <sup>July</sup> that we have most examples and most varieties should fit into a sequence, and then their eponyms with them.

- 1 O Θεόδωρος (coin-size stamp; he has also coin's head)
1. O Ἀριστοκλῆς in Boudraion [he also has " " and more!]  
(εἰς Ἀγαθοκλῆς, Ἀριστοκλῆς, Διονύσιος, Δίως, Δράκων, Θεοφύλακτος, Καλλίδωρος, Μενελάος, Φιδίππος, Χρύσιππος)
2. O Δημοκράτης δ' Ἀριστοκλῆς  
(εἰς Ἀριστοκλῆς, Ἀριστοκλῆς, Διονύσιος, Δίως, Δράκων, Θεοφύλακτος, Καλλίδωρος, Μενελάος, Φιδίππος, Χρύσιππος)
3. O Δημοκράτης (εἰς Ἀριστοκλῆς, Δαμόκριτος, Πωδίας, -ης, ζωσιφρων)  
(εἰς Ἀριστοκλῆς, Δαμόκριτος, Πωδίας, -ης, ζωσιφρων)
4. O Διοσκουρίδας (εἰς Ἀγίας, Ἀρισταίνοσ, Ἀριστοκράτης, Διονύσιος, Ἑρμῶν, Εὐφραγόρας, Πίστινος)

Fourfold of lion stamps exist with eponyms named under ③ but not with those named under ④, or ② with <sup>Δράκων, Χρύσιππος</sup> ~~possible~~ exception of εἰς Ἀριστοκλῆς.  
(Note: of lion stamps exist with εἰς Ἀριστοκλῆς or εἰς ζωσιφρων η ③, Ἀριστοκράτης η ④)  
(Note that a fourth of lion stamp of Κόρινθος names Διονύσιος, possibly same as in ② or ④.)

Rectangular boudin stamps also from  
chronolog. sequence sec. 8 potter, are being very little  
overlapping of changes for one potter & another.

See data today assembled on cards and

## KNIDIAN DEVICES

Knidian devices — prow, and "half ship"

Yesterday L. Casson looked at our representations, and said they are all the forepart of a galley, i.e. warship, not a merchant ship. But I had the feeling he was not quite sure they could not be a merchant ship, some of which seem to have the ram-thing also. It would be odd if they showed specifically non-merchant ships regularly. At any rate, the representations on stamps are all prows, and not stems. The steering oars are shown on separate devices.

17.XI.50

This list may serve in making restorations. But it was made chiefly to examine the numerous cases in which two or more fabricants use the caduceus under the same eponym. In 8 out of the 12 cases, the two types are quite different. In the other four, there is a varying amount of similarity: under ΚΛΕΥΜΒΟΤΟΣ, the types of ΣΤΑΙΡΟΣ and ΚΑΡΜΟΝΙΑΣ (?) look quite different, the similarity is in putting the ethnic in the middle of the legend; under ΕΡΜΟΚΡΑΤΗΣ, the types of ΚΛΕΩΝ and ΝΙΚΙΑΣ are quite similar, but the former uses a round epsilon as well as <sup>the</sup> a round sigma, and the line is much finer (cf SS 9806 and 10776), whereas the type of ΣΤΑΙΡΙΩΝ in the same year is quite different; under ΑΣΚΑΝΙΑΔΗΣ, the types of ΔΩΣΙΘΕΟΣ and ΝΕΙΚΙΑΣ seem clearly to have been cut in the same shop; and finally under ΤΑΥΡΙΣΚΟΣ, the types of ΚΛΕΙΤΟΦΩΝ and ΑΥΞΑΝΑΡΙΑΔΑΣ are quite obviously cut by the same hand (Andreades, our letterer, concurs).

Does not necessarily mean that the dies were made in the government office; possibly there was just a professional ~~to~~ whom various shops employed.

Note that the caduceus is used also in the duoviri period (the examples listed here in the discussion are all earlier). The years are those of ΑΛΕΞΑΝΔΡΟΣ, ΠΟΛΙΤΗΣ (2 different fabricants, but one is not yet identified - we have only the duoviri stamp), ΣΩΣΙΠΠΩΝ (known from duoviri stamp), and possibly ΕΡΜΟΒΑΝΤΟΣ (not sure if there are two eponyms of this name, one earlier).

⊗ 2.XII.54 Note that a second type of Δωσίθεος, under ep. Κεδδωρος, is written (?! die) but entirely different in arrangement and appearance.
