KOAN corpus : Non-Double

In the catalogue

Non-double of same die (all)

Non-double of different die only when there is a special point to be made, with explanation about shape, lettering, context etc.

Reference to plate on which each non-double example appears

Note referring reader to separate non-double concordance. (e.g. "see non-double concordance")

In the concordance

Note at end of each type which has a non-double referring reader to separate non-double concordance (MEI + PRW ^{think not necessary} (?) or just in ~~main~~ catalogue)

Non-double concordance

To follow main concordance, listing non-double which are the same die and, in parentheses, non-double which are not the same die, under corpus number where each example is referred to in the main catalogue.

VG 14. v. 81 : How many types have non-double? Do we need separate concordance?

A quick count shows 51 with same die.

9. x. 81 MET would like to put all non-double from the file in and make a separate plate. Suggests no separate concordance for ND, but asterisk in main concordance and parentheses for examples of ~~a~~ dies not found on double. Illustrate all diff dies in ND plate, and mention which ones are the same in text of catalogue.

398

KTY(

Pl 30

← 1 ex.: Athens

← Context possibly of early 2nd century BC and earlier for this example from a disturbed part of MSBF.

← Non-double: The same die occurs on a non-double handle of Rhodian shape but Koan clay from Athens (KTH EMI). (pl. 30). See Non-double Concordance.

OKT
The same reading occurs also on 5 other non-double handles of which 2 from Athens are of Rhodian shape but Koan clay (SS 8206 and SS 10024, from the same die), and 1, provenance unknown, is a broad handle of early Knidian shape (BM 1925, 1-19, 612). See plate 000.

Previous publication: Pridik 1917, 29, 702-703; IG XII, 1, 1439, 1.

Context of for
SS 8206 from OD, Odeion trench, west part, Layer IV.

399

KTYG(

Pl 30

← 2 ex. from 2 dies: Athens

← Context possibly of early 2nd century BC or earlier for SS 124²79 from a disturbed part of MSBF.

Non-double:

(399) Non-double: The same reading with lettering similar to 398 occurs on 2 handles from Athens (SS 12480 and SS 12535, from the same die) of Rhodian shape but Koan clay. See plate 000.

Context possibly of early 2nd century BC and earlier for both examples from a disturbed part of the MSBF.

(61) Non-double

(399) Non-double: Found in the same context as Die B (SS 12429) were two non-double handles of Rh-shape and Koan clay, both from the same die, reading KTHZ[, SS 12480 and SS 12535. The lettering is similar to that of 398, also from the same MSBF context (see Plate 000). and so perhaps ^{they are} the stamp of the same man. See Non-double Coincidence.

[Double main concordance]

24 March, 1982

Dear Dr. Börker,

Yet again a request for help with a Koan (?) stamp from Samos.

In October, 1973, Dr. and Mrs. Homann-Wedeking came to the Stoa and mentioned (among other things) ^{that some stamps, after found} ~~that~~ ^{rubblings} ~~rubblings~~ ^{after the ones of} which you took ~~of stamps~~ ^{at the Heraion} ~~had included a stamp~~ ^{one} reading $\Delta E \Xi A$, and that Dr. Homann-Wedeking would bring rubbings and/or photographs of this stamp in March when he returned to Athens.

This stamp does not appear among the rubbings which we ^{have} from the Heraion. It is of particular interest as we have both Early Rhodian stamps and Koan stamps with similar readings $\alpha\alpha\alpha\chi\pi\alpha\alpha\chi$ -- perhaps it might be a non-double Koan? Can you give any advice about how to get a rubbing and/or photograph of this stamp?

Yrs sinc

a stamp found at the Heraion,
after the ones of which you took rubbings,
with the reading $\Delta E \Xi A$; Dr. H-W ~~was~~

+ 2 = 10

MZII Perhaps we should not say ^{all} the Breccia exs = AVG ex?Breccia does mention it. For AVG 1089, (corpus 384), the AVG has two stamps, on on each rib. The LALA stamp is not mentioned in SB - maybe it ^{Breccia had} was a different handle? exist type without stamp 6For corpus 58 there is only one ex., from Benaki coll., so presumably the SB ex. is ^{second ex.} another one? Or can we tell from Breccia?

Koan published:

This is whole jar, unstamped.

Now has xerox in
folder (for Koan)

SHAPES

See Roll 744 of 1977

This reads TIAPL (?) Plate LXXII,
~~star~~ and there is a q, ~~Plate LXXII~~ no. 5
should be in corpus?

context "Hellenistic period, from the
third till the first centuries BCE."

NB p. 65 ^{Plates} Fig 25:1 and p. 63 ^{text}

(Whole Koan jar) early 1st (Antikythera)

Need xerox for shapes?

23.7.82. Later found
no rubbing in Kean's
envelope "Isler's Heraion"
SAH.

MZT I think we are missing some Samos - Heraion examples that have not all yet had duplicates made (or been filed? some are filed)

Samos examples:

- I 1046 $\oplus$ MOC (rubbing exists in envelope "Isler's Heraion SAH"
 hist also says it is double as ~~one of the~~ ^{one of the} dies of (471)? [I think it is a new die, but
 fixed in Kean corpus (Die A) closest to C on suppl. plate ???]. It has been added already in the
 catalogue ~~not~~ ^{and} in the concordance as Die X. What should we do?
 I think 1046 could be included in Die A exactly
 same I 571 - Rubbings and photos hard to compare -
- I 1068 H M + N O P I N O Y Should ~~not~~ ask if this is double or not?
 see Bärker's(?) list (It is mentioned on file card of Kean = double?) Add to Supplement
 Aug/Sept. 1973 catalogue etc.? (882) Filed under Sixipope? In a list checking readings
 already I guessed was double
 clay (clay, small handle, Rhod?) and asked for PH
 "still wie Nr. 1051" but not same stamp.
- ✓ I 1066 H Could be (81) ^{with} ~~impossible~~ Not filed in duplicates because ~~no~~ rubbing
 needed. Not double? hist says Rhod? I do not think we will include
 in Kean corpus
- duplicates end I 1076
- added to corpus I 1127 H A Δ $\leftarrow$ (like Kean neck in Rhodes?) or (1350) like ABC 928
 double handle. add on catalogue
- added to corpus I 1128 H MOC (?) like ABC 928; ~~Boysen~~ 471 die B.
 double handle.
- I 1051 doppelt.

CURRENT PROBLEMS

7. x. 81

- ~~MZT~~ Louvre : ^F why are we asking to use of of S 5447 - Louvre 6 ? Is it to be included in corpus? Where? File card? How to mention in concordance? are they all "provenance unknown"? (Yes, not at top of duplicates) Louvre S.... or omit "Louvre"?
- ~~8/11/81~~ ~~VB~~ Samaria list: MOC card (2) is in New Treas = Suppl. Plate folder where is Korrich card? Found
- ~~MZT~~ Argos club corpus 4. Is S 5414 die A? ^{no. of} ~~where are Louvre/Argos~~ ~~these 5 should be filed?~~
- ~~(124)~~ no of S 5454, ~~(142)~~ S 5457 and S 5470 ~~(371)~~ S 5418 ^{f.p. (31) (140)}
- ~~MZT/VB~~ ~~provenance~~ "Unknown provenance" (6) but "Unknown finding place" (124) (and sites cards say "provenance unknown"). standard form shd be ?? Unknown finding-place VB
- ~~MZT~~ Samaria list needs to have Thasain also checked
- ~~MZT~~ MOC I 1046 H Johnston told us that it is double, but I forgot to add "we need a rubbing". At the moment it is "Die X". (Have entered it as Di X)
- ~~PMW~~ Write letter to UIC London confirming of order
- Askado about unknown provenance, unknown finding place
Discussed with VB: should be "unknown finding-place".

May 1981

PtWMT to check all

(7.01)

these again next time

1) Check that KF 822, 828, 831, 832, 840, 841 + 842 are in supplement of NEW TYPES.

2) Check for places in plates and photos for new die's:

(254) KF 823

(471 C) Bucarest unnumbered

(373) KF 825

3) Change reading on $\kappa\alpha\tau\omicron\upsilon\lambda\alpha\varsigma$ for (257) (227)

4) Write to Isler and ask if 471 Moc(from Samos is ^{Yes [card in Suppl. plate]} double or not - rubbing? and can we have

5) (686) Write to Constanza musée + ask if there is any provenance for M496 [card is in Suppl. plate folder]

6) Is Pella A4273 ϕ in new examples Suppl.? (PH on card, so ϕ exists)
If not, change wording in cat. to "The letter forms of Die c (Pella ex, not ill.) are close to those of type 319."

7) Change publ. refs under ϕ s on Plates to short publ. ref. form (see overhead)

8) How are "similar reading in Gabelov's list"s treated? In no. of ex. and in concordance, or not?

9) Check PtWMT's sites cards vs. Filed sites cards

10) Reply to Myers?

~~11) Read Tentative catalogue.~~

~~12) Get Bibliography cards~~

TO BE DONE

For new text (as Plates are finished)

Plates Finished xlii. 81 by METT

Unread by devices ✓

Unread by tentative reading ✓

Supplement 1) New types ✓

2) New examples

Type concordance and catalogue. Then:

1) Add to Bibliography cards

2) Add to Sites cards

3) If new sources : unpublished - check if permission to be asked
 - add note of acknowledgement in Introduction

Other jobs

Retype catalogue and concordance

Make list of sources to be acknowledged in introduction

Check Sites cards (? ~~the~~ found that a Mauri ref. was not in the Kos sites card)

Check Bibliography.

Where corpus nos. have been changed : ^{change} check ~~reprints~~ and duplicates
 with new text.

{ Make standard
 Add Non-Double refs in standard form(?)

Make minor concordance of ABC nos. (and others ?) SS and AVG are done

KOAN corpus

Adding new examples of Koan types already in the corpus:

- 1) Find file card (with photo where possible) of new example type.
- 2) Make sure of Die identification
- 3) Using check list (yellow sheet of 7. v. 80), enter in Catalogue (no. of ex. to be upped by one, new site added or no. of ex in old site increased, publication reference, if any, to be added in text under Previous publication: with short title and reference), in Concordance (either the ~~inventory~~ inventory number or "+ 1 publ." under the appropriate die), Bibliography (either make new card, or add, in red, corpus no. where new example ~~appearance~~ appears on the back of the card) and Sites card (either new card or add corpus no. to ~~the~~ existing card)
- 4) Check for possible context and add to separate list (begin on small white sheet 27. v. 80)
- 5) If any of these procedures seems dubious, add a query to the list (yellow sheet 28. iv. 80) of ~~problems~~ New Examples - Problems and ~~not~~ ~~but~~ save for METI.

MZTT (385) ^{OK from duplicates ("like ABC 58")} Samos ex. is Die B, OK? ^{I 982 H} In Samos IV no. given as J982 H. we have

~~done~~ PTTM — Find publication reference for Bibliography. Samos IV ^{YES} Isler? Bärker fertigte

Aufnahmen "...an"

6. vi. 81

MZTT p. 252 n. 91 of Tell Kesian — does this go in unread? ^{copy for my in my 9}] 15. ^{no}

PTWTT ^{822 those} EICI 'Emperour NEW? Also 828. ^{822 those} ^{831 ZTEPANOV} ^{832 Zup} ^{840 ZWITPOV} ^{841 "} ^{842 "}

MZTT (254) Emperour ex. not same die. So ABC 519 = Die A, and JYE KF 823 = Die B. I have

entered this:) In catalogue (2 ex from 2 dies: Alex. & Kerk,) In concordance (254 A ABC 519 254 B JYE KF 823).

PTWTT to do 3) on cartons of ABC 254 (became 254 A), 4) on file card 5) on duplicates not ABC, cause dup. don't all have corpus numbers, etc. any where else? ^{iv} 8. vi. 81

MZTT (546) Pasias: filed, OK? what about non-double not same die? YES OK

PTWTT (694) ^{CPA SEN ← from Alex. p. 15} Cyprus publication? To be entered on file card and in corpus. ^{ASK VG.} Not pub as far as we know use AH 879

PTWTT (319) ZWITÚ [put note about why out of order (if originally was read as ZWITÚ (or don't explain)

PTWTT NEW Emperour? See list above 4. iv. 81
