General notes on loan
of Benacini Collection

Alex. 19.II.55

- 1) Αδαίος - no difference in clay KO 595 greyish clay due on baking
(30 handles)
with this name) 6 handles with rim preserved. All rolled rim except
one (KO 384) w a little sharp edge, slightly close to the
Tridik ones. Variations in profiles. KO 155 and KO 446
w. the same die but the first is more abrupt in curve.
KO 414 more arched. There are 3 dif. dis without device,
same reading and also 3 dif. dis with rose: see fol. and.
- 2) Αθυραίος - Variations in die. All from the same red clay w.
^{or} Αθιραίος slip. A handle w. rolled rim. All slightly arched
(13 handles) handles in profile. KO 479 whole handle pres. HH. 162
- 3) Αίγυπτος - like Αθυραίος handles - Rolled rim pres.
(1 handle)
- 4) Αχάζι - Angular handles - KO 5, KO 195 w. heavy greenish slip.
(4 handles) pres. KO. 364. light red clay with ^{more} mica on surface. No
slip? or gone out
- 5) Αχκί - pink clay w. small dark bits - greenish slip
- 6) Αραζογίπας - Rim pres. like Αδαίος (KO 384) see above
- 7) Ανδρος - KO 326: Rim w. sharp edge and flat top. Handle set
close to the rim. red clay w fine mica.

- 7) $\Delta \nu \epsilon \iota \alpha \rho \rho \sigma$ - KO. 329; red clay w. heavy greenish chips and sharp edge rim with flat top
- 8) $\Delta \sigma \kappa \chi \mu \tau \iota$ - red clay w. few white bits, heavy greenish chips
3 handles. no mica. Rolled rim
- 9) $\Delta \sigma \kappa \chi \mu \omega \alpha \delta \iota \varsigma$ - Not fine clay. more porous
- 10) $\Delta \chi \alpha \rho \rho \iota \varsigma$ - handle set not very close to rim. Thin rolled rim pres.
- 11) $\Delta \sigma \iota \chi \epsilon \iota$ - KO 494. grey clay at core red at surface w. greenish chips
- 12) $\Delta \sigma \epsilon \rho \upsilon \varsigma$ - KO 564: clay not as fine as the others, with heavy greenish chips.
(8 handles) Arched Handle set close to the rim of which very small part is pres. 0.55 x 0.28 compare KO 510: 0.46 x 0.24 and KO 292: 0.5 x 0.25
- 13) $\Delta \omega \delta \epsilon \mu \alpha$ - KO 333: shorter top handle than the other examples
(6 handles) and slip not as heavy as on the other examples.
4 ex. with rolled rim
KO 236: red clay w. dark surface and traces of slip
KO. 333: 0.4 x 0.2
- 14) $\Delta \rho \epsilon \mu \iota$ - handles w. high raised short tops
2 types
2 handles
- 15) $\Delta \iota$ - short top handles.
2 handles
- 16) $\Delta \iota \omicron \chi \epsilon \rho \upsilon \varsigma$ - characteristic Coan. KO 165, 357 short top handles
8? handles.
not satisfactory reading
- 17) $\Delta \iota \omicron \pi \iota \delta \iota \varsigma$ - Thin handles
3 handles

3

- 18) Διορίσιος - 3 types - Variation in dies. Slip of different color. No
11 handles KO 532 "greenish slip and 429 reddish
Note also KO 672: fine red clay w. fine black bits. (angular)
- 19) Διοσκουρίδης - From same die but dif color of slip. Note KO 362 with
6 handles dark red clay and greenish slip. KO 509 yellowish ^{pink?} slip?
- 20) Εματάς - Variations in die (see file card) In the same die variation
11 hand. also in clay and slip. See KO 160 and 346. KO 160
w. this name dark red clay w. greenish slip and rolled rim KO 346
light red clay w. pink slip and thicker rim
All the handles wide and thick: .05-.055 x .025-.03
- 21) Ερυχίς - No Variations - caraters too lean
- 22) Ζήτροπος - short top handle - archaic
2 handles
- 23) Κίπος - No Variations - Rim pres. only on KO 353. sharp edge
5 handles rim rather thin rim
- 24) Λόχος - Variations in die - On 10 handles rim pres. on all of them
49 handles rolled rim (like Alodian?) Red clay, mostly w. fine mica
w. this name and with pink to greenish slip. On 7 h. slip gone
away, surface looks dark
- 25) Μέραρπος - On 1 handle rolled rim pres. No variation in clay. KO 444
9 handles no slip smooth surface
- 26) Μερκάρης - On 4 rolled rim preserved. On KO 193 of dark red clay
7 handles
- 27) Μερύγας - KO 417: slip greenish dif than the others wheel are pink
7 handles slip

- 28) ΜΕΡΙΣΚΟΣ - Variation on clay of handles w. the same stamps
6 handles
- 29) ΜΙΡΡΙΩΝ - 4 stamps abbreviated. Rolled rim. KO 244, and 525
8 handles high raised top handles
- 30) ΟΡΟΒΙΩΝ - No variations in shape and clay. Thin handle. Angular
6 handles in profile. Variation in die see file.
- 31) ΠΑΣΙΑΣ - Variations on dies (see file card). 5 rim rolled rim
9 handles from same ^{red} clay w. greenish slip -
- 32) ΠΟΣΙΔΩΝΙΟΣ - from same die - rolled rim Note KO 383 diff. rim:
7 handles - sharp edge w. convex top profile: $\cap$
- 33) ΤΡΥΖΟΣ - 1) Τρυζος without device: light red clay with heavy greenish slip
4 handles 2) " with rose (stamp like on Rh.) thinner handles pink clay
and slip - Rim rolled, thinner flat top than the one without
device.
- 34) ΕΛΦΙΝΑΞΟΣ - Variation in dies - KO 1 and KO 124 from same
die but note dif. in clay KO 124 grey at core
red at surface w. pink slip and KO 4 red clay
with greenish slip as KO 118 from dif. die

Alex 1. III. 55

ΕΛΦΑΖΟΣ - Many types - Variation in dies - rolled rim when is present
51 handles Variation in clay and slip. Note KO 404 greyish ^{greenish} clay
w. greenish slip & black bits. Nothing unusual in shape

(NAUCRATIS) BH 1955.9-20.143 KOAN NON-DOUBLE?

N. η φ έ [as retr.

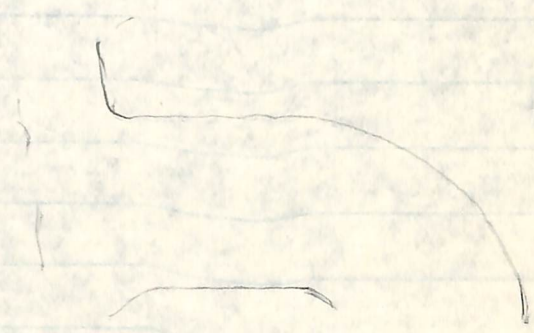

Clay pale orange-tan with greyer core. Small grey + white bits, a few voids. Surface slightly paler in places.

P.W. 0.065 (as on jar)

W x Th. 0.044 x 0.023

C&K thinks the clay not unlike some of the exp of Koan she saw at Corinth in Nov. of prev. yr.

Arch of hdl may be right too?

LIST of Photos still needed for Koan (mostly for N-D plate)

Non-double in the Koan corpus

What to include

No non-double examples should be included unless they have the same reading as appears on double handles.

All non-double examples should be either the same die as appears on double handles, or a closely similar die.

In the catalogue

The discussion of non-double examples should be a separate paragraph, giving finding-place and publication references. We will not add the non-double to the tally or the list of sites for the type.

Each example given will also have the Plate no. on which that die ~~is shown~~ is shown, and it will be stated whether the stamp is the same die as one already on double handles of that type (in which case the photo will usually be on the existing plate) or whether it is a different but closely similar die (in which case its photo will appear on the additional non-double plate).

In the concordance

All non-double examples will be listed with an asterisk, e.g. *ABC M ...

The ones which are the same die as the double Koan will be listed under the appropriate die. The non-double dies which are not found on double handles will be listed under Die X, and sometimes therefore Die X will have to be added to types which previously had only one die.

In the bibliography and sites cards

Non-double examples are added in numerical order by type (like the double examples) but marked with an asterisk.

In the introduction

It should be stated that Die X includes also non-double examples for which no double example exists (yet)...

175 Agno
vapor

I have tried to identify dies for the non-double
and suggest as follows:

Die = double : SS 11711 ✓

IP 576 ✓

Miletos 63, 6 ✓ ?

M ABC 367 (new on pl. 13) ✓

wide
bottom p

Another die : SS 2022

Kanchreai (published)

M ABC 363 — shd be used in non-double
plate?

(M/222) → M ABC 201 } (from rubbings in list).

(M/311) → M ABC 266 } narrow p

Another die: Miletos 61, 11 } I think ^{it is} same. ABC 363
(we need proper-sized
photo of this 'if it is another die

(Miletos photos taken from envelope in file)

Non-double Kean from Pella
