I have lent to P. M. Fraser the
typed (long)
strong copy of the FAB. list,
that belongs here. He will make
a photocopy, and then bring both
back here, for annotation of this
copy. He thinks he has not
received anything except the short
list.

21.I.80

He has brought back my strong copy
and I have seen his photocopy, in which
actually the pencil annotation came out OK.

Dear Susan,

many thanks for your 2 pages of
^{revised} ~~text~~ on deposit, sent with you at 7 Oct, 18.

I am very glad to hear them; have still a few
 comments.

On MSBF: the ref. in line 13 of D. 27
 p. 320 seems misleading, as it should document
 the list of names you give, whereas that ~~is~~
 names the name does appear there. In
 fact they are from working paper of 1956,
 and one, ^{Schuster} ~~Frank~~ ^{Frank}, was been taken off the
 list of pp., he is another kind of ref. in which
 these pp. are also named, of D. 27, p
 319. You can find the ~~in~~ ⁱⁿ ~~hand~~ ^{hand} ~~of~~ ^{of} ~~the~~ ^{the} ~~list~~ ^{list}

Prog. Vm, 2 text on stamps
pp. 423 - 499
423
76+ } page

Dear Bill,

Dr. Gerda BRUNS, via Sardegna 79,
 Roma 25, Italia, needs some photographs
 of finds published ⁱⁿ ~~from~~ The Argive Heraion and
 in Corinth XII, and I understand you are A
 one who knows how to supply these. The
desiderata are as follows:

Waldstein, The Argive Heraion II,
 plate LXXV, 26 (2 prints)
 " ~~LXXV~~, 27 " "
 " " 24 " "

Davidson, Corinth XII, p. 14, 199
 " 32, 361-364
 " 33, 366

Dr. Brunns is the one who excavates at
 the Kabeirion near Thebes.

Sorry to bother you about this.

Thank you
 much.
 Yours,

In general: 2-man handles are kept in drawer, not consigned to basket. [94a]
 For duplicate - 2.VII.65 are discarded, into basket. See below. 9th discarded on Jan. same day as other in drawer.

21.VI.66

R 138 - clay does not look like that.

131_B

only 4 assembled, and apparently none have been discarded.

R 139B Discard 3 (4) (on 2. viii. 66)
R 141 Discard 3 (on 2. viii. 66)
R 143 Note 3/4 ex. of 1 die seen to show the

25. vii. 65

2. viii. 66

R 145 clay shows ^{two} ~~not~~ ^{work} ~~period~~
R 148 Note incuse border above and below, as though die had been cut back for removal of button types.

R 154B discarded into basket: 17¹⁸ (none w. second, no notches (fractional))
23. vii. 65 41 5

Those kept in drawer include one definitely small fraction and 2 smallish.
→ Also, at end, 3 exs of a retrograde type.

R 154E 2 handles, both v. narrow - perhaps was a device or letter, not pres.? Late looking.

R 154F None discarded into basket.
Note considerable diff. in fabric, good appearance.

25. viii. 66

an example presumably Δ , E, Z? both definitely $\sqrt{1}$
of 154F, with A rather than $\sqrt{1}$, while there is larger numbers (? KT etc.) both definitely later, looking to be small - body wide.

in use, spelled $\rho\kappa\rho\acute{o}\tau\gamma\varsigma$

A double-stamped ex. (?) w. Δ above the line looks latest.

156D Discard 2.

R 157C Disc. into basket: 48⁹⁺ (no rim)
Note one rim pres. - roll, not roll large.
Note variation in color for firing, also bits.

R 158

Discard into basket; 8 ⁺⁵ (non w. sec. st.,
+ no small fractionals)

Note half a dozen fractionals

" " " w. sec. st. +10

R 168

Note rim w. Δ cov - rolled, raised
δ poor

R 170

[Δ cov]
2 rim sections - heavy rolled;
massive crumpled, clay various (fine).
In another, the rim not pres. was set higher
- diff. early class? Have an ep. is
named? (e.g. Δ cov (45))

(Now discarded.)

R 173

[Δ cov] Rather non-Rhodian clay, with hollow
in thick part of full-size crumpled. Of
3 in drawer, 2 are ^{water soaked} fractionals. The same
stamp (without twin) on full-size -
fractional; the one w. deep is on a
fractional.

R 174

Fractionals of both A & B

AT. 66
which B?

(R 171a

includes type w. * in middle. Handle
looks Period I

172_B - 2 added w. sec. str.

R 177 Discontinuity, pb., but not to be sorted; what is then sorted up to now is as follows:

A 2-line I & perhaps IIa

The earliest of these are those marked ΔIONY
CIOC

They are fairly heavy, and have little rise. One like this but with a frame has part of rolled rim. (I think this was painted with an ep. of IIa, 2 handles at Tarsus). This handle has more rise.

A₁ w. arched in @ arched I & I or IIa?

B w. rose in @ or O arched I or IIa?

C w. cluster in @ arched; one is not like IIa?

D w. dolphin (suff. ex., but clear) III or IV

E 2-line, w. cluster? VI

F 1-line, w. cluster, left later VI - ~~VI~~

G 1-line, rather or not VI

H 2 or more lines, incompletely imp. on v. late handles VII

may probably be the ep. RE 89

- now 7 of them, 4. VII. 65

23. VII. 65

Those with

Λαοδ, κρυς

are big marked RE 89

some & b behind the

Λαοδ, κρυς take a pb.

not possible.

24. VII 65

(7.)

26. VII

10.07

R 194 _B not discard 4, keep 6, assorted

194 _B 0; discard 25, keep 10 assorted
(see 5 to no sec. at)

R 180. clay is fine hand, mostly grey. Shrap has
a hand angular effect. The best - by far
- impression of a cyre type is on a handle
with a sharp rise. To be placed, top-side.

RHODIAN FABRICANTS: names which PMF wishes to

add to

our fabricant list

or take from

1. APHEIAE Nilsson no. 11 There is nothing reliable to support this doubtful reading.
2. APHEIAAE Nilsson, p.533 Reference is to a type probably of APHEIAAE (characteristic)(Skorpil, Bull. vol.11, no.465) as in Rhodian stamps
It seems probable that all listings of APHEIAAE are misreadings or miswritings of APHEIAAE. An early handle in the Benaki coll. reads, retrograde, APH
This is the best there is, and quite likely a miswriting. CIA
3. AIZHIOZ, our R 37. Name now well-established on Rhodian handles.
4. AAEHIKPATHZ Nilsson no.38. There is no support for this reading; it has not reappeared anywhere, nor any other with this name. Some day we will probably identify the stamp that was misread.
5. AAEIIMAXOZ Nilsson, p.533. N.'s reference is to Skorpil in Bull. vol.11, no.469, a circular type with a(rose) in the middle. Apparently the preposition was not impressed in this example; I do not doubt the eponym is named.
- 5 bis. APXEAAOZ. Nilsson, no.130. Yes, no doubt R 116: APXEAAE regularly appears accompanied by the name of a month. His own name is in what I take to be the genitive, APXEAA. I suppose it could be always an abbreviation of APXEAAOY.
6. APXIAAE. The reading in BCH 1952, p. 526, derives from the Delos handle TD 1667, in which the TEM is almost invisible. Now we have other examples of the type, TIMAPXIAAE in a circular type with rose in center, and cluster of grapes to the left.
7. AAMONIKOZ. Nilsson, p.533. N.'s reference is to Skorpil in Bull. vol.11, no.485, in a type combining the name with that of a month, a style used by AAMONIKOZ and probably his (suggestion of Maria Petropoulakou).
8. AIOINHTOZ. Nilsson, p. 534. N.'s reference is to Skorpil in Bull. vol. ³III which I seen not to have. I know this name in stamps only as that of a Knidian duovir, accompanied by that of ANOAAOAPZOZ.
9. ENIKAHZ. Nilsson, no. 193. N. restores a genitive ENIKAEIYZ YAKINOIO(Y) This is no doubt and with month. a type naming the eponym KAEAPXOZ, abbreviated, as the name often is, (KAEAP- OPAZ not to be restored, as months are not named with him.)
10. HPAKASIAAE. Nilsson, no. 224. No. 1 is to be restored HPAK/ABEN (known type), and no. 2 HPAKASITOY or HPAKASITZ (known). As for the item in IG XIV, the fabricant ones reading HPAKASIAA we have filed under Unclassified, as we have not seen any Rhodian with that name; a partly restored eponym type may be a misreading for HPAFOPA which has the same device and month, and the month misspelled in the same way (ATPLANIOY).
11. HPAKAHZ. Nilsson, under no. 224. Not a reading by Nilsson, but taken from Dumont,

Inscriptions ceramiques de Grece, Paris, 1871, p. 95, no. 142 (out of alphabetical order). We have not found this object in the National Museum (where much in Dumont is to be found), nor the type on a handle anywhere else.

12. KAEIZIMBPO(TOZ?) which is Nilsson no. 316 does equal our R 313 of which we do not know the whole name. R 314 is KAEIZIMBPOTIAAZ. Note the dates/ periods given in the typed list for the two numbers. (The date suggested for (R 314) in Hesp. Suppl. X has been seen for some time to be too late.)
13. KAEONIAAZ. Nilsson, p. 534. N. cites Skorpil in Bull. vol. 3, which I do not have. ^{(X) See below, p. 3} Compare Musée Greco-Romain inv. no. 14394 (photo VG 348.19). I think M. Empereur told me this stamp - handle - has been published by Botti. This handle of the Mus. Gr.Rom. might be early Rhodian by how it looks in its photo. Ending seems to be -OY.
14. KAHNΩ. Our R 322. This is well-established though in few examples. Late. Known in only one type, in the genitive KAHNOYΩ, in combination with the eponym IEPOKAHZ. For type, and examples, and notes on the two names, see a rather complete comment in EAD 27, p.309-p.310, under E 24. Easily available by means of the index of that chapter in EAD 27. (See rubbings on cards.)
16. ~~(E)NOAAAMOZ~~. Nilsson 336, in a circular type with head of Helios. Reading MENEAAAMOZ, this is an example of a known type.
15. KTHZIQON. Nilsson, p. 534. N.'s reference is to Skorpil in Bull. vol. 11, no. 520. The reading there, KTHCI/ΩWNTOC looks very real but we do not really know the handle is Rhodian. We have never found this name on Rhodian. Further, what might have been an abbreviation for the name, KTH and KTHZ, no. 329 in our list of fabricants, is now cancelled. It was based on impressions on several handles which although of Rhodian shape were of far from Rhodian clay. These stamps are matched on double handles, and the handles now considered to be non-double Koan. All that remains as possibly Rhodian is KTH (retr.) on some lagynos handles that may be Rh.
17. HPABIAZ. Nilsson, p. 535. N.'s reference is again to Skorpil in Bull. vol. 11. We have this reading on a Chian lagynos handle in the Benaki coll.; 3 ex. published from Smyrna in the catalogue of the Leiden Museum (1936) (reproductions of rubbings, no photos. or descriptions). Not Rhodian.
18. NYOOPENHZ. Nilsson, no. 364. BCH 76, 1952, p. 527. N.'s no. 1, in which [OO] is restored, seems to match a stamp which we have in a single example from the Benaki collection which reads ~~TYXX~~ TYXAPENEY[2 with caduceus, left, below the name. (See rubbing and photo.) Slightly restored by Maria Petropoulakou. Tau for gamma, but that may not have been well-preserved in N.'s example. I don't find this name in Pape. Have you got it otherwise from Rhodes? ^{N.'s no. 2.} There are types that read NYOOPENEY2 without preposition, e.g. TD 2418 on the basis of which I listed it as fabricant in 1952; but I now think they all name the eponym.
19. ZHAGION. Nilsson, no. 377. Name in gen. with asterisks in the 4 corners. There is no other support for this name in Rhodian stamps (nor in any others as far as I know). Probably derived from a badly impressed example of ZAPAHIONOZ with asterisks in the corners.

20. ΕΞΕΙΤΙΜΟΖ. Nilsson no. 387. These are two abbreviated names on an early handle
 ΕΞΕΙ(retr. Cf. ΑΠΙΣΤΙ ΝΙΚΑ ΔΑΜΕ
 ΤΙΜΟ(ΤΙΜΟ ΤΙΜΟ ΤΙΜΟ

It is rather surprising that N. included this handle in his general run of Rhodian, as it must have looked unlike his usual Rhodian.

21. ΤΙΜΑΖΑΓΟΡΑΣ. Listed BCH 1952, p.530, but as eponym.

22. ΤΙΜΟΘΟΛΙΖ. Nilsson no. 415. ^{N.'s} The reading of this is YAKINOI(OY)
 ΤΙΜΟΘΟΛΙΟΖ

which should no doubt be YAKINOI(OY)
 ΤΙΜΟΘΕ(ΝΕΥΕ) or ΓΕΝ(ΒΥΕ)

as we have a series of types of this latter man combined with months, all rather abbreviated. And N. speaks of confused effect of double impression.

In the meanwhile I have found our offprint of Skorpil's Bull. vol. 3 article, and add notes on nos. 8 and 13 above:

8. ΔΙΟΓΝΗΤΟΖ. Skorpil's reading is ΔΙΟΓΝΗΤΟΥ
 caduceus cluster of grapes.

One of our Knidian types naming ΔΙΟΓΝΗΤΟΖ does have a grape-cluster under the name in the gen. There are more names above, when the whole is preserved. I cannot make a sure identification, but only say that we have not seen a Rhodian stamp (or a rubbing or photo of one) with the name ΔΙΟΓΝΗΤΟΖ.

13. ΚΑΕΣΝΙΑΔΕ. Skorpil's reading is ΚΑΕΣ ΝΙΑΟΥ He has drawn a square around it, perhaps to indicate a frame in relief. It is the same kind of thing as ours from Alexandria, although probably not the same die. If Rhodian, it would be early.

- ΙΙΙΘΝΙΚΟΖ. Fraser, Funerary Monuments, p. 136, note 234. Cf. Nilsson, p.157. Reference there is to a publication of 1873 by Dumont ("Ra73", with readings taken from Colonna Ceccaldi's facsimiles of stamps found mostly in Cyprus), also to a publication by Neroutsos in 1875 of the Demetriou collection, which includes some of the same material as in Dumont-Colonna Ceccaldi. Dumont's no. 63bis is the basis for Nilsson's listing (p.157). It reads ΙΙΙΘΝΕΙΚΟΖ with dolphin. This is evidently one of the variant types of ΑΠΙΣΤΟΝΕΙΚΟΖ with cornucopia, now well known to us. For a published photo, see E. I. Levi in Olbia, Temenos and Agora, Moscow and Leningrad 1964 (in Russian), pl. XV, no. 220. ΙΙΙΘΝΙΚΟΖ is not known in Rhodian stamps.

7. XII. 67
