November 12, 1977

Dear Peter,

Above are some short titles used in the Rhodian eponyms list, and not present
in the bibliography EAD 27, pp.287-8. For publication they will of course need
a careful check (which I have not made). But they should make it possible for
you and your staff to find the references without much ado. This is the page I
did not find to enclose in my letter of October.

November 12, 1977

Dear Peter,

Above are some short titles used in the Rhodian sponyms list, and not present
in the bibliography EAD 27, pp. 287-8. For publication they will of course need
a careful check (which I have not made). But they should make it possible for
you and your staff to find the references without much ado. This is the page I
did not find to enclose in my letter of October 20, 1977.

49

Rhodian eponyms - references what to use

Forms of titles, i.e. abbreviations to be used:

must regularize. Probably best to use abbreviations in DeLOS 27, as far as they go.

Establishing the names:

If the name exists in N.'s Lindos catalogue (i.e. in its regular alphabetical place, not just in some special list in N.'s introduction), then the entry should be just "Nilsson" - no page ref or number. Note if there are two ^{forms} of the ^{same} name, as for Agzotpatos, then "Nilsson" only goes for the right one, & in this case, Agzotpatos 2nd. This may sometimes be hard to tell, but ^{in this case} presence of mouth, or head of Helios, shows they cannot be types of Agzotp. 1st, who is too early for mouths or H. h. If a name is not in the Lindos catalogue, see if you can find it in one of N.'s lists, and cite this, with page ref.

Nilsson's readings will usually be believed, but we would like a reference also to a

photographs, if one has been published,
or a careful drawing (such as Canavachi's).

The names must be documented as eponyms
in the references given to establish them.
i.e. the proposition must appear, or
the title " " "

or at least the name must be in a
button stamp, since most button
types, apart from those naming
reportedly, are eponym types. We
know there are exceptions, and we
would refer for illustr. to button
types when the name is otherwise
known (though without published
photos) to be that of an ef.

References for comment

Use the big prosopography cards. Let
me help about this.

Other things to note on list

- 1.) if not known with proposition
- 2.) if fewer than 6 sp. altogether
- 3.) intercalary year.

The list above described is the one to be photographed for P.M. Fraser.

We need a ^{separate} supplementary list of plots. to be used when it turns out that in no previous publication is there adequate illustration, or, often, any illustration, of an eponym.

The same plan to be followed as in choosing published plots, i.e. establish the name, and establish it as that of an ep.

I hope to get these supplementary photos in my longer Phosin publication, with the name lists. Especially for the earlier period, & so far as possible, I will illustrate pairs - jaws, heads, etc.

Should get in
somehow

1. VII. 77

Dear Maria,

I've asked Andrew to get 2 sets of photostatics made of the Rhodes spongyous list with date and references. So it is sitting on his desk. Please send one set to P. M. Fraser, address on my note to A.A. I attach two 50 dr. pm. postages, but not necessary to send to first class. Send to airmail, but not posted, just to cheap postage, and it goes at book rate, or printed matter, if you don't write on it.

Here are books and articles that need cards. Please do ^{the cards} ~~them~~ carefully, with authors' initials complete, and with BOOK, when it is. Then put ~~each~~ card inside the front cover, ^{it's both a book & article} and put the book or article under the Rhodian files. Please gather up all the other articles and books you have already done that are lying about in the office, and be sure they each have a card inside the front cover (not sitting on top, where they may get lost).

Good luck to Solari's exams!

Love

Meaning of

"Nilson"

(in alphabet. in cat.
 of Linn.)

the ~~the~~ is spec. ref. to Nilson

which distinguishes person

of same name

(cf. "Aggypus")

For Susan

(original) Theon - Athens, 30.VII.91

The eponym named in Rhodian stamps is apparently the same annual official (the priest of Halios) whose name is used to date Rhodian inscriptions. His name dates the amphoras (the greater number are dated to the month also), but no reason to think he had anything else to do with their production. Responsibility for their standard quality is that of the fabricant, and sometimes also of an individual potter in his shop - I think the so-called secondary stamps, (a couple of letters, a device) are the working potters' marks.

Recently V. Kondarini has published inscriptions on the bases of the statues of eight or nine ~~xxxxxxxx~~ priests of Halios (found apparently in the sanctuary of Halios in Rhodes) which give the names also of the sculptors who made the (now missing) statues. The identity of the stamp eponyms with the inscription eponyms is here further strongly suggested, e.g. two eponyms whose statues were made by the same sculptor would both have been dated about the middle of the 3rd century according to stamp dating. (The rest seem to be ok too.)
